Some Good Reasons Why we claim your trade

FIRST—The brass we make is the standard by which all other brass is judged.

SECOND—It was good enough for good people 40 years ago, and now that we are making a better brass, it ought to be good enough for the younger generation.

THIRD—WE ARE ON THE SPOT with a full and complete stock for shipment same day order is received. This alone is worth a good many dollars in these rush times.

FOURTH—We have issued a comprehensive catalogue classifying over a Million Pounds. It's here for the asking.

WHEN WRITING ADVERTISERS PLEASE MENTION THAT YOU SAW THEIR ADVERTISEMENT IN THIS PAPER

THE DEMAND FOR THOROUGHNESS,

A GREAT deal of attention is being given on both sides of the Atlantic to that particular part of the address dealing with education which Professor Dewar recently delivered before the British Association at Belfast. Although his remarks were for the direct consideration of the British public, indirectly they have an application to every commercial country. Hence the general interest they have excited.

Speaking of the unsatisfactory industrial conditions as they exist in Great Britain to-day, he said that the root of the mischief was not in the patent laws or in any legislation whatever. "It is," he continued, "in the want of education among our so-called educated classes, and, secondarily, among the workmen on whom these depend. * * * Let no one imagine for a moment that this deficiency can be remedied by any amount of technical training which is now the fashionable nostrum. It is an excellent thing, no doubt, but it must rest upon a foundation of general training. Mental habits are formed for good or evil long before men go to the technical schools. We have to begin at the beginning; we have to train the population from the first to think correctly and logically, to deal at first hand with facts, and to evolve, each one for himself, the solution of a problem put before him, instead of learning by rote the solution given by somebody else."

It is to-day quite fashionable in Canada, as elsewhere, to read lectures to the Mother Country in regard to her educational and industrial methods. But we are by no means perfect in those respects. Consequently, the pointed remarks of Professor Dewar have an application to us as well as to Great Britain.

The "root of the mischief" in Canada is that we, too, do not always get to the root of the matter. "Of a truth it is the duty of all men," wrote Carlyle, "to note with accuracy the characteristic circumstances of their education, what furthered, what hindered, what in any way modified it."

In no epoch in the history of Canada has the outlook for the general prosperity of the country been as bright as it is to-day. It is apparent in whatever industrial direction we look, and particularly in regard to agriculture, manufacturing and mining. But the very fact that this is so makes it more imperative that Canadians should fit and prepare themselves for the higher demands that shall be made upon their skill.

The more the great natural resources of this country develop the greater attention will we necessarily have to give to the export trade. And the more we go into this export trade the more necessary will it be for us to be fitted to meet the competition of those countries that have much wider experience than we have.

Probably no people in the world are possessed of a greater degree of intelligence than Canadians. But intelligence is not thoroughness. It is a medium through which thoroughness can be attained.

We want the Thorough Man in the factory, the Thorough Man in the wholesale warehouse, the Thorough Man in the retail store, the Thorough man on the farm.

Thoroughness is not the gift of genius; it is not the reward of those who diligently seek to get to the bottom of a thing; to know the "ins" and "outs" of a thing. In other words, thoroughness is being master of your vocation. The training begins with the boy at school. And it is most necessary that the instruction he receives there should be as practical as possible. "The root of the mischief" in Canada is that our educational system is not sufficiently practical. It has variety enough, goodness only knows. In fact, it is overburdened with variety and smothered with rules and regulations which make the teachers machines with little or no latitude for the exercise of their own judgment.

Professor Dewar's address comes at a time particularly opportune for Canada as well as for Great Britain, and we shall be unwise if we refuse to apply it to our own case or to fail to profit by it.

SIR WILLIAM MULOCK'S SURPLUS.

IN his address in Toronto on November 3, Sir William Mulock, Postmaster-General, announced that his Department would show a surplus of $5,000 for the past fiscal year. This is the first time in the history of the Department that the revenue has been made to even meet expenditure, much more show a surplus.

No doubt some of Mr. Mulock's political opponents will find reason to criticize his statement in regard to the surplus, and to throw some doubts upon its reality. As it is well known that some items of expenditure are charged to the Works Department, their criticism may not be altogether out of place. At the same time, however, it must be recognized that the result of the past year's administration of the Department has been more successful than any previous year in the history of the Dominion.

If there is a deficit, according to the calculations of Mr. Mulock's political opponents, it must be very small indeed ; in fact, smaller than ever before. For this he is certainly entitled to a great deal of credit, and not carping, factious criticism.

It must be remembered that this satisfactory statement of affairs is in face of the fact that the postal rates on letters, both within the Dominion and within the Empire, have been greatly reduced since Mr. Mulock became Postmaster-General. Besides this, he has made a great many improvements, which could not, of course, be made without the expenditure of money. That this was warranted has been justified by the fact that not only is there a small surplus, but there has been a very large increase in the mail carried.

The business men of Canada, irrespective of politics, must necessarily feel gratified at the result of the past year's administration of the Post Office Department. Years before Sir William Mulock became Postmaster-General, this journal referred to his business and administrative ability. Since he came into office his action has more than justiffed this high opinion of his merits. Although actively engaged in law, he has had a wide business experience on account of his connection with large commercial enterprises, and this he has turned to good account as Postmaster-General. While, in addition to this, he possesses in an eminent degree the quality of adaptation. This in an administrator of a Department, such as that of the Post Office, is a valuable quality indeed, enabling as it does the possessor of it to appropriate and act upon suggestions which may, from time to time, be made to him.

There is another business department in the Government which we wish was only administered in the same efficient manner as that relating to the Post Office, and that is, the Department of Trade and Commerce, over which Sir Richard Cartwright presides. Sir Richard Cartwright is, no doubt, an able man. He is certainly one of the best-informed in Canadian political life, and his attainments are wide and many, but as the Minister of Trade and Commerce he has proved a decided failure. As we have pointed out in the previous issues, it may be because he was not appointed to the Department of Finance when the present Administration was formed, but whatever the reason might be, and whatever his attainments might be, he has certainly not been suited for the Department of Trade and Commerce.

One almost wishes that Mr. Mulock was head of that Department, but it would be scarcely a wise thing to make a change when he has produced such good results in the Post Office portfolio. It is to be hoped that the exceedingly good results which have been obtained in the Post Office Department will open the eyes of the Premier to the necessity of removing Sir Richard Cartwright from the Department of Trade and Commerce. On account of his faithful services, however, he should not be cast overboard, and as the Lieutenant-Governorship of Ontario will soon be vacant, it would be the proper thing for Sir Richard to be elevated to that honorable position. At any rate he should not, in the commercial interests of the country, be permitted to longer cumber the Department of Trade and Commerce.

TINPLATES LOWER IN THE STATES.

A decline of 10c. per box has been made in the price of tinplates in the United States. For some time the demand for tinplates across the border has been unsatisfactory, but the most bearish influence of all is the competition of the independent mills, which is being felt with increasing keenness. A further decline would not be unexpected.

It is a long way to success by the short-weight medium.

A LESSON FOR CANADA.

IN seeking for the foundation causes of a nation's commercial success, many influences have to be taken into account. Britain owes her supremacy in great measure to her insular nature, which fostered sea-faring, and to the fact that she was first in the modern industrial field. The United States soon forged to the front because they were forced by circumstances to provide for a rapidly expanding population. But when it comes to the reason for Germany's remarkable advance of recent years, other causes must be sought for.

These causes lie principally in the German character itself. The German is a student of men and of methods. He is observant. He travels extensively and mingles with men of other nationalities—much more freely than other foreigners do. These characteristics are at the basis of imitation and the German becomes an imitator. He sees the plausibility of the commercial ways of other nations and he decides to practice them himself. He appropriates all that he deems valuable in methods for conducting business, and he sets doggedly to work to excel in the mercantile world. Then his scientific knowledge comes to his assistance and helps him out in his plans. That is why Germany has succeeded so well.

Our own nation is in a similar position to Germany. The old-established industries of Britain and the United States will not relinquish their market in this country without a struggle. Canada will have to meet outside competition on its own level, and to reach that level Germany's lesson must be taken to heart. Keen observation of the methods of other nations will constantly be required if Canadian industries are to advance.

THE C.I.F. QUESTION.

IN view of the numerous and varied opinions that have been expressed in these columns on the vexed question concerning the true meaning of C.I.F., it has been considered advisable to consult a legal text-book, which is held to be the authority on such matters. This book is "Benjamin on Sales," and on page 574 of the fourth edition it is written: "The terms, at a price, 'to cover cost, freight and insurance, payment by acceptance on receiving shipping documents,' are very usual and are perfectly well understood in practice. The invoice is made out debiting the consignee with the agreed price (or the actual cost and commission, with the premium of insurance and the freight, as the case may be), and giving him credit for the amount of the freight which he will have to pay the shipowner on actual delivery, and for the balance a draft is drawn on the consignee, which he is bound to accept, if the shipment be in conformity with his contract, on having handed to him the charter-party, bill of lading, and policy of insurance. And it is not sufficient to tender the bill of lading without the policy of insurance nor (semble) to hand a policy of insurance upon a larger parcel of goods, if the policy is warranted free from particular average." (Hickox v. Adams, 34 L.T., N.S. 404.)

"Should the ship arrive with the goods on board he will have to pay the freight, which will make up the amount he has engaged to pay. Should the goods not be delivered, in consequence of the perils of the sea, he is not called on to pay the freight, and he will recover the amount of his interest in the goods under the policy. If the non-delivery is in consequence of some misconduct on the part of the master or mariners not covered by the policy he will recover it from the ship-owner. In substance, therefore, the consignee pays, though in a different manner, the same price as if the goods had been bought and shipped to him in the ordinary way.

"If the consignor is a person who has contracted to supply the goods at an agreed price to cover cost, freight and insurance, the amount inserted in the invoice is the agreed price, and no commission is charged. In such a case it is obvious that if freight is high the consignor gets the less for the goods he supplies; if low, he gets the more. But, inasmuch as he has contracted to supply the goods at this price, he is bound to do so, though, owing to the rise in prices at the port of shipment, making him pay more for the goods, or of freight, causing him to receive less himself, because the ship-owner receives more, his bargain may turn out a bad one. On the other hand, if owing to the fall in prices at the port of shipment, or of freight, the bargain is a good one, the consignee still must pay the full agreed price. This results from the contract being one by which the one party binds himself absolutely to supply the goods in a vessel such as stipulated for at a fixed price, to be paid in the customary manner, that is, part by acceptance on receipt of the customary documents, and part by paying the freight on delivery, and the other party binds himself to pay that fixed price. Each party there takes upon himself the risk of the rise or fall in price, and there is no contract of agency or trust between them, and therefore no commission is charged."

Editor HARDWARE AND METAL,—I agree with "M. S. Co." in his letter in your last issue, stating that the term C. I. F. should be threshed out by The Canadian Manufacturers' Association and The Canadian Wholesale Hardware Association, and a proper understanding arrived at either one way or the other.

In the last issue, "Mancunian" states that the seller generally undertakes merely to pay the freight and insurance on behalf of the buyer. If such is the case, is the cost generally given in C. I. F. instances, as say, $2 plus, say, 50 cents for insurance and freight?

I say no. The seller always states but one amount, say, $2.50 C. I. F. to a given point. This C. I. F. certainly means all it abbreviates, namely, cost, including full insurance and freight up to the point mentioned in the agreement. If I received a shipment in bad order which I bought on C. I. F. terms, I would certainly refuse to take delivery of it.

MONTREALER.

Editor HARDWARE AND METAL,—Having read with considerable interest several of the contributions to your paper regarding the C.I.F. question, I think that for the benefit of the trade generally in establishing the true and correct meaning of these conditions, it should be arrived at, and in order that this should be brought to an issue, I would suggest that the full facts of the case be plainly set forth in a letter and the same sent to the councils of the Montreal and Toronto Boards of Trade with the request that they take some action in the matter. From present appearances this discussion will be carried on to a very great length, and unless something such as I suggest is resorted to nothing good will come of it.

"VOLEX."

Editor HARDWARE AND METAL,—In answer to "Mancunian's" letter in your last issue, I should say that I maintain my former statement is perfectly correct, and I will again repeat that a buyer on C.I.F. terms has nothing to do whatever with the insurance no more than with the freight charges or the manufacturer of the goods. As the seller undertakes to deliver the goods at a certain point there is no doubt but that he is responsible for delivery in good order up to the point of destination.

I am glad and thankful for the information that has already been given in your valuable paper of others' experiences. It goes to show that we have not been the only sufferers, and we hope that in future the terms C.I.F. will be better understood by the trade in general. Our company have not asked Suren, Hartmann & Co. to pay freight on our goods, but as they did not want to sell their goods otherwise than C.I.F. we had to buy at their terms or decline.

We always prefer to insure here, as it is easier for us to secure settlements in case of loss, but we are still open to sign a contract on C.I.F. terms with Messrs. "Mancunian" or any other firm, on condition that the goods and prices are right.

I shall further state that we have only asked the rusty shipments to be replaced, and not for any damage through loss of sale, although we have suffered greatly; all we have asked is for damage on the value of the goods.

A. M. ST. ARNAUD,
Manager The Canada Hardware Co., Limited.

DISCOVERY OF ASBESTOS.

The discovery of extensive beds of asbestos at the upper end of Lake Temiscaming is reported at the Ontario Department of Mines by Wellington Mackenzie, of Toronto. The presence of nickel has long been suspected by those familiar with the country, but asbestos is an entirely unexpected discovery. Mr. Mackenzie, who is familiar with the asbestos beds in other parts of Ontario, and the famous ones in Quebec, says the Temiscaming find is as good as the best.

INDUSTRIAL GOSSIP.

THE Canada Atlantic Railway Co. is building a number of new passenger cars at Ottawa East.

The Temiskaming Railway Co. have ordered 175,000 ties, and called for tenders for 8,200 tons of steel rails.

The sum of $20,000 has been subscribed towards the new foundry at Windsor, and $10,000 more is being raised.

The Western Foundry Co., Wingham, want the Town Council to build a foot bridge over the river. They intend to build a 40 x 70-foot addition to the moulding shop.

The Canadian Construction Co. of Toronto has received the contract for the erection of the new Cockshutt Plow Works, Hamilton. The contract price is said to be near $100,000, and the buildings must be completed by June 1st, 1903.

A new manufacturing concern will soon be located at Hamilton, and there will be constructed a three-storey brick building, 55 x 120, with a floor space of 18,000 square feet. About 125 hands will be employed.

The Great Northern Lumber Co., Limited, Ottawa, has been incorporated with a capital stock of $50,000. The mill and machinery of J. B. Scott and Solomon Cole, in Terrebonne County, will be taken over by the incorporators, who all reside in Montreal and Lachine.

The Grant Acetylene Gas Co., St. Thomas, Ont., is applying for letters patent. The capital of the concern is to be $100,000, divided into 4,000 shares of $25 each, and the provisional directors are Geo. W. Babbitt, R. Doyle, W. H. Guy, T. L. Cochrane, and Geo. B. Elliott, of Detroit.

The Manitoba Frost Wire Fence Co., of Winnipeg is seeking incorporation. The capital stock of the company is $40,000, the objects of incorporation are for the sale of wire fences, posts, gates, etc., and the applicants are Henry Louis Frost, of Welland; Osbert L. Byers, Winnipeg; C. H. Henson, W. E. Ouelette and Joseph F. Phelps, Welland.

Hull is to have a cement manufacturing plant. The works will be located at Leamy's Lake, adjoining which are 200 acres of limestone, clay, etc., especially suited for the making of cement. An analysis of the limestone made some time ago gave a result of 96 per cent. approximately of carbonate of lime and 66 per cent. of silica. The Canadian Pacific Railway runs right through the property, furnishing unrivalled transportation facilities. The factory will be a duplicate of the one at Durham, some of the directors of which are interested in the Hull project; will have a capacity of 1,000 barrels per day, and when in operation will employ about 70 men.

THE COLLINGWOOD STEEL WORKS.

The Cramp Steel Co.'s plant at Collingwood, Ont., is progressing towards completion. Work will soon be finished on the open hearth steel and rolling mills, which, it is expected, will be running in December. A solid foundation for the buildings was made with Portland cement and stone. The machine shop is already completed. In this building is located a huge forge for forging articles of the largest description, a complete equipment of tools, including anvils, a power-driven bolt machine, a power hammer, a power-driven grindstone, emery wheels, bar cutters, screw-cutting engine lathes, a 36-in. planer, a massive lathe which swings 72 inches and weighs 20 tons, a 10-ton crane, a large boring mill, radial drills, etc. An 80-horse power engine drives the machinery. The merchant bar mill building, 120 x 210 ft., will contain the rolling mills and heating furnaces; a 10-in. guide mill; a 300-h.p. engine, and hotbeds 200 ft. long for cooling the iron. This mill will handle material 4x4 in. and roll it into flats, rounds, squares and small angles down to ¼-in. The east end of this building will be supplied with a 20-in. mill for rolling ingots, 8x8 in. by 4 ft. long, into billets for the 10-in. mill driven by a 600-h.p. Corliss engine. Two water-tube boilers of 150 h.p. each will be attached to the ends of the furnaces which are located on each side of the building. On the west side is a 9,000-gal. tank, connected by gravity with another tank in the pump-house building which is provided with two powerful pumps. These pumps will pump water from a 11,000-gal. tank in the building and will be capable of developing 700 lb. to the sqr. in. There will be several elevated tanks which will have a total capacity of 20,000 gallons. The open-hearth building is a steel structure provided with two 20-ton furnaces of modern type, known as the straight line tapping furnace, which have given the best satisfaction of any furnace yet invented.

In the rear of the open-hearth building will be the charging platform, adjoining that further to the north will be the gas-producer building, now being erected. The gas-producers are expected to be delivered inside the next 30 days, and will consist of four large machines. These producers will be built in Canada, being the first machinery of this type built here. The plans were furnished by the company, and will embody all the chief improvements found on the various types in use in the United States. They will be water-sealed and will be charged from a top platform served by an elevated railway trestle. Coal will be brought up in drop-bottom cars and dumped on this platform for charging, thus doing away with the needless expenses of hoisting coal up to charge, as is the customary practice. These improvements will do away with gangs of men and will be a large saving. Work has been commenced on the trestle and on the foundations for the gas producer building, and it is expected these will be ready in three weeks.

This will complete the open hearth end of the company's plant, which will have a product of 100 tons of the very best of open hearth steel per day. The steel will be rolled down and finished into bars, rods, angles and flats, such as are used by machine, implement and wagonmakers, blacksmiths and manufacturers of wire nails. There is a constant demand for this class of material, blacksmiths and machinists are constantly using it. It goes into bolts, nuts and the various other forms of material. This material will be finished as close as possible to the point where it is required by the manufacturers.

HAMILTON, ONT.

MERCHANTS SHOULD ORGANIZE.

By a Well-Wisher.

THERE is no guide to the value of any service except that put upon it by the purchaser.

The reward of a merchant or commercial traveller must depend upon the value put upon his services by those willing to pay for them. Where there are artificial obstructions they affect such valuations, but seldem to a great extent.

The natural force of competition is certain to triumph ultimately.

Time has fully arrived for the seller to realize that his merchandise equalizes the buyer's cash.

An independent buyer does not expect to get something for nothing, but he strenuously objects being taxed with a bad debt that he was in no wise instrumental in creating.

The day is not far distant when exchanges will be conducted strictly upon cash basis, with the removal of many of to-day's charges upon costs. If a man obtains a livelihood without producing it, some other man or set of men must produce it for him.

Merchants are now beginning to recognize that they have too long allowed a spirit of petty jealousy and rivalry to dominate their actions, which provoked unhealthy competition, whilst the various sections of trade only fought for their own hand.

Traders' associations and organizations are now, however, rising up on every hand, and the benefits of united action and continued effort are becoming more recognized and appreciated every day.

If merchants would fraternize more freely with each other they would creat a bond of union and sympathy which would cement them together and would tend to strengthen the position of both without losing their individuality or independence of thought or action.

A NEW CONCERN.

A firm that has not been established a long time is The Canadian Aluminum Works, of Montreal. They are in the market for the purpose of manufacturing every variety of aluminum goods, and already they are overloaded with orders for their products. They claim for these aluminum goods that they are light in weight—light as silver—and absolutely pure and wholesome. There is no enamel or plating to flake or wear off. The finish is the natural finish of the metal. They will not burn or scorch food as easily as other metals. They retain heat longer than any other utensil.

GOOD VARNISH

is the result of three things :

Good Materials, Proper Appliances, Skill in making.

THE SHERWIN-WILLIAMS VARNISHES are good varnishes in every respect. They are carefully made from specially selected and directly imported gums. The oil used in them is old-tanked, pure, refined oil. The appliances—kettles, filters, storage tanks, etc.—are all of the latest improved kind. The men who make them are trained workmen who know how to make good varnishes—who have been brought up in the varnish business.

There are no other varnishes that are so well known, that please the painter so well, or sell so well.

If you want good varnishes—varnishes that are ready sellers and money-makers—write to-day for price list and full information.

THE SHERWIN-WILLIAMS CO.

PAINT AND VARNISH MAKERS.

CLEVELAND.

CHICAGO, NEW YORK, NEWARK, MONTREAL, BOSTON, TORONTO, SAN FRANCISCO. KANSAS CITY.

WHOLESALERS MEET.

The Canadian Wholesale Hardware Association held their quarterly meeting on Tuesday, November 4, in the Windsor Hotel, Montreal. Thomas B. Lee, president of the Association, presided. Fred. Lewis, of Lewis Bros., Montreal, the vice-president, was prevented from attending by illness.

Business of a routine nature was discussed.

A NEW AGENCY.

E. W. Hickson, manufacturers' agent, 28 Wellington street west, Toronto, has secured the agency of the Christy Knife Co., Tremont, Ohio, and will have full line of samples in a few days. Bread, cake and carving knives are their leading specialties.

COUNTER CHECK BOOKS.

The demand for counter check books and kindred lines during the past year or so has been a remarkable one. Every establishment for the manufacture of this class of goods reports an immense increase in business. Asked as to the cause they reply that "good times" has something to do with it, but on the other hand there is a growing demand for neat counter check books by merchants who a short time ago were content to send out goods with almost any sort of invoice or address card. The carbon check book has done a large share towards increasing this demand. Its neatness and despatch are easily recognized by any merchant who has used it. The enterprise is one which has evidently come to stay.

PERSONAL MENTION.

Mr. Geo. M. Edwards, managing director Henderson & Potts Co., Limited, Montreal, was in Toronto last Saturday.

Mr. J. E. Elliott, buyer for McLennan, McFeely & Co., Limited, hardware merchants of Vancouver and Dawson, was in Toronto last week.

Mr. Jos. R. Henderson, of Henderson & Potts, Halifax, and president of Henderson & Potts Co., Limited, Montreal, is at present in England, where he will remain for some little time.

Mr. H. P. Hubbard, Canadian representative of E. C. Atkins & Co., saw manufacturers, Indianapolis, has returned from a successful business trip among the lumber mills and the hardware trade on the north shore of Lake Ontario.

Mr. Herman C. Maddock, late of Worth & Martin, Toronto, has severed his connection with that firm and has accepted the position of travelling engineer for The Davion Safe and Iron Works, of Boston, Mass.

NEXT HAS COME.

Mr. H. H. Clark, of Sherbrooke, the Eastern Townships' representative of Lewis Bros. & Co., Montreal, and Miss M. A. Miller, of Griffin, daughter of Mr. Willard Miller, were married on October 22 in the Union church, Griffin.

The ceremony was performed by Rev. A. H. Moore. The bride, who was given away by her brother, was attended by Miss Dee Gustin, while Mr. D. Solls done the same service for the groom. The church was very prettily decorated with a profusion of flowers and plants, and the ceremony was witnessed by a large congregation. After the ceremony Miss Mattie Miller entertained at the family residence a few friends of the family, when the bride and groom received many good wishes and congratulations. Mr. and Mrs. Clark left on the evening train for their new home in Lennoxville, where a few friends had gathered to welcome them. HARDWARE AND METAL begs to tender congratulations.

A MERCHANT'S PLEASANT TRIP.

W. H. McFarlane, general merchant, of Paisley, has returned from an enjoyable trip to Washington and other American cities. Along with a party composed of members of The Canadian Ticket Agents' Association, he visited a number of places along the Atlantic Coast, including Philadelphia, Atlantic City and New York. The Lehigh Valley Railway gave the Canadian visitors special trains, and they passed through the anthracite coal region of Pennsylvania while the great strike was on. The next excursion of the Association will be to Sydney, Cape Breton.

YUKON HARDWARE COMPANY.

The Yukon Hardware Co. has been formed at Dawson to take over the business of McLennan, McFeely & Co., Dawson and Vancouver. The promoters of the concern are Roderick Chisholm and Raymond Brumaugh, under whose management the business will be conducted. The new company is backed by Dawson capital, its shareholders being Dawson people. The Dawson branch will be under charge of Roderick Chisholm, and the wholesale department will be maintained at Vancouver as formerly.

The stock of Mrs. S. Langlois, general merchant, St. Samuel De Gayhurst, Que., has been sold at 69¾c. on the dollar to L. S. Roberge, of Lambton.

MACHINERY AND ELECTRICAL SUPPLY DEPARTMENT

MACHINERY AND ELECTRICAL NOTES.

THE OXLEY-ENOS CO., Limited, manufacturers of electrical and gas fixtures, have opened offices on King street west, Toronto. This is a newly incorporated company with a capital stock of $10,000.

The Sawyer-Massey Company, Hamilton, are doubling the size of their factory.

The Hamilton and Caledonia Electric line will open on July 1, Dominion Day, next.

Wm. Gee, of The Gee Electrical Company, Toronto, is ill with congestion of the brain.

E. Simpson, Moose Jaw, N.W.T., is installing two new boilers. The concrete boiler house is completed.

The Canadian General Electric Company are putting in a new lighting plant for the town of Newcastle, N.B.

Young & Burnett, Calgary, Alta., are shipping two acetylene gas machines to Olds. They have shipped as far east as Qu'Appelle.

The gasoline threshing machine in use at Indian Head, Alta., has proved a success. The expenses amounted to $5 a day for oil.

The American Abell Machinery Company are building an extensive warehouse at Winnipeg. It is 167 by 280 ft., and will cost $12,000.

A new 20-inch pony planer has been added to the plant of James Andrew, of Oakville, Ont., the machine being installed by H. W. Petrie, Toronto.

The International Nickel Corporation, who have large interests in the Sudbury district, are negotiating for the purchase of The British Nickel Company.

The amalgamation of The Northy Company and The Canada Foundry Company under the control of The Canadian General Electric Company will in all probability take place within a month.

A fine 80 horse-power boiler has been delivered to The Smith-Wool Stock Co., Toronto, to supply power for their plant. This boiler was furnished by H. W. Petrie, Toronto.

The Dodge Manufacturing Company, of Toronto, have completed their contract for The American Cereal Company, of Peterboro'. The material consisted of over 18 carloads of transmission machinery.

An 8 horse-power Haggas gasoline engine, which is fast becoming a popular means of transmitting power, has been installed in the plant of James Andrew, Oakville, Ont. This engine was furnished by H. W. Petrie, Toronto.

A NEW ELECTRIC ROAD.

An electric railway is projected from Sarnia to Petrolia, Ont., and Oil Springs and through Dawn to Rutherford, where branches will be run to Florence and Dresden. The road is to be completed in three years, and the company operating it is known as The Lambton Central Electric Railroad Co. The necessary by-laws have been passed by the various municipalities through which the line will go, and work will likely be commenced on it immediately.

NEW MACHINERY.

The Ontario Compressed Air Dustless House Cleaning Company, of Toronto, are showing a machine for removing dust or stains from carpets, upholstered furniture and other similar household utilities. By the use of compressed air this machine gathers the dust in and under the carpet in less time than it could be done by manual labor. The Canadian patents are controlled by Toronto men, and the invention will doubtless prove a favorite in the near future. John B. Kay is president of the company.

PROCESS FOR RESTORING BURNT TOOL STEEL.

An English patent has been taken out by Max Hirschmann and Valentin Heilmeier, of Nuremberg, Germany, on a mixture for the restoration of burnt steel, especially of burnt tool steel. The following proportions are taken as most suitable: 90 to 110 parts resin, 28 to 32 parts sulphate of copper, 18 to 22 parts bone dust, 13 to 18 parts borax, and 8 to 12 parts of common salt. This mixture is either produced in a finely granulated form, or is prepared as a fluid or solid mass. The process for the restoration of burnt steel consists in treating the piece of steel that is to be restored by bringing it to a red heat, whereupon the material is sprinkled over the surface of the steel. The coating thus formed unites with the steel, the process being assisted by a moderate warming of the sprinkled spot. The steel is then hardened in the usual manner, when upon fracture, it is stated, its original fine close appearance is restored. It is stated that numerous trials have shown when steel has been restored in this manner that tools of extraordinary endurance can be produced. Even when the burning of the steel has gone so far that cracks can be seen, it is claimed the process can convert it into a condition for further and effective use.

RECIPROCATING AUTOMATIC DRILLS.

The Goodell-Pratt Company's automatic drill is a tool which requires a good deal of attention. It was not believed possible to accomplish with a hand-drilling tool what can be accomplished with this one, and this is due to the fact that an "angle slant" has been selected for the spiral which minimizes the friction and magnifies the power. By using twist drills in ¼-inch chucks, iron or steel can be drilled with comparative ease, and often in out of way places, where it is difficult to operate any other kind of a tool. The wood-travelling handle is also quite a feature, and it is so shaped as to insure an easy and comfortable grip.

The Goodell-Pratt Automatic drills are made containing drill points in certain numbered compartments, and are always kept in their proper place, a feature which has always been a popular one with the mechanics.

The firm also offer to the trade the same automatic drill which does not differ in the slightest degree from that in their most expensive styles, excepting being left in a dull nickel finish. Each drill is furnished with eight drill points 1 to 8-32. Decatur, Bull & Co., Montreal, are the sole Canadian agents, and they will furnish catalogues on application.

ELECTRIC LIGHTS FOR CITY CLOCK.

The City Council of Toronto are doing a lot of figuring on the price of lighting the City Hall clock. It is estimated that an electric service would cost $2,700 to instal and $2,000 a year to maintain it. They have had figures from different gas companies, but believe the electric light would give the best satisfaction.

CHANGE IN A MACHINE FIRM.

THE SMART-EBY MACHINE CO., Hamilton, Ont., after having had a most successful career since its inauguration, has recently made some changes in the members of the company, and is now changing the firm name to that of The Smart-Turner Machine Company, Limited, J. A. Turner having been appointed in place of Mr. Eby, who has gone out of the business.

Mr. Turner is a young man who has had an unusual amount of experience in the machine business, having held important positions with The Westinghouse Electric and Manufacturing Company, of Pittsburg; The American Tinplate Company, Pittsburg; The Hamilton Steel and Iron Company, Hamilton; John Bertram & Sons, Dundas, besides being a graduate of McGill University in mechanical engineering.

The Smart-Turner Company has never had so much work on hand as at present, having a number of waterworks, plants and other contracts in the course of construction. A few of the recent contracts on its order books are: A pair of triplex power-pumps direct connected to two gas engines, for the corporation of Bridgeburg; a tandem compound duplex direct-acting pumping engine with 2-60 x 14 steel boilers, for the corporation of Newcastle, N.B.; a duplex outside packed pot valve pump for The Halifax Electric Tramway Company, Halifax, N. S.; a duplex pump for The Strathcona Coal Company, River Hebert, N.S.; a duplex pump for The Jacques Cartier Electric Company, Quebec city; a duplex pump for The Deering Harvester Company, Hamilton; a duplex pump for The Canadian Rand Drill Company, Sherbrooke, Que.; a pair of vertical high-speed engines direct-connected to electric generators, for The Collingwood Shipbuilding Company, Collingwood, Ont.; a Meyer cut-off engine with boiler heater, etc., for The Dominion Harness Company, Port Elgin, Ont.; 1-10 ton hand-power travelling crane, 55 ft. span, for the new power house of The Halifax Electric Tramway Company; 1-5 ton travelling crane for the foundry of The I. Matheson Company, New Glasgow, N.S.; 1-10 ton travelling crane for James Brodie, Graniteville, Que., besides innumerable other orders.

GASOLINE ENGINE CATALOGUE.

An attractive and unique catalogue is that issued by The McLachlan Gasoline and Engine Co., Toronto. It is illustrated throughout and contains some valuable information regarding the construction and ability of their engines.

SCREEN CLOTH SEASON FOR 1903.

The manufacturers have just completed their arrangements for screen cloth for next season and amongst the improvements that The Greening Wire Company have introduced, is an entirely new system of painting, which will enable them to supply the trade with 100-ft. lengths. The building is completed and they expect to start painting very shortly.

As 50 and 100-ft. rolls will both be on the market this coming season, the merchant who orders a given number of rolls of screen cloth will get 100-ft. rolls. It will be very necessary to execute great care in ordering so that those merchants who have heretofore been getting 50-ft. rolls will not get double the quantity that they call for. Dealers are strongly advised to order their screen cloth by the lineal foot.

The Garvin Machine Co.

Spring and Yarick Sts.,

(43-3) New York, N.Y., U.S.A.

The immortal Shakespeare says,— "the apparel oft proclaims the man."

The label *oft* proclaims the quality of the goods, but not always. For instance, take Decorators' Pure White Lead, one of the famous brands of the **Canada Paint Company.** It has a host of feeble imitators which are "dull, stale and unprofitable," but if the package bears the name of the **Canada Paint Company** it is genuine and may be purchased with every confidence. Another White Lead, the old-time painters' favorite at home and abroad, the "Elephant" genuine, is also innocent of all adulteration and, like the **Canada Paint Company's** Decorators' Pure, bears the following guarantee:

205 ST. JAMES STREET.

THE WHITE LEAD ASSOCIATION OF CANADA

PAINT, OIL AND BRUSH TRADES

THE GLUE COMBINE.

IT now transpires that the Glue Corporation which was incorporated in New Jersey last week with a capital of $6,000,000, has been organized for the purpose of taking over The American Glue Company. In this connection the Boston News Bureau says :

"A lively fight for the control of The American Glue Company is apparently in prospect, judging from recent circulars sent to shareholders. The company is a New Jersey corporation formed August 1. 1892, by a consolidation of various rival glue companies, principally the companies controlled by D. Webster King and W. King Upton, who are president and vice-president, respectively, of The American Glue Company.

"There are some 200 stockholders in the company, which is capitalized for $1.600,000, 8 per cent. cumulative preferred stock and $800,000 common stock. Of the above stock the King family own between 3,500 and 4,000 shares and the Upton family between 7,000 and 7,500 shares. The first knowledge of any disturbance in the relations between the managers of the business was the receipt of a printed circular within a few days, which stated that it was proposed to organize a corporation under New Jersey laws for the purpose of acquiring the capital stock and ultimately the properties of The American Glue Company, with $2,000,000 8 per cent. cumulative preferred stock and $4,000,000 common stock, all the stock to be issued to voting trustees for five years and beneficial trust certificates to be issued in lieu of stock during such period, the voting trustees being clothed with full powers to elect directors and vote upon all questions arising.

"For the present issue of stock voting trust certificates will be given on the basis of one share of new preferred and one share of new common for every share of American Glue Company preferred stock and one share of new preferred and one share of new common for every two shares of old common stock. The Massachussetts Trust Co. is named as depositary, and D. Webster King, Everett J. Stevens, Andrew J. Ward and Augustus P. Loring are denominated a committee to carry out the above plan for lodging the control of The American Glue Company with the new corporation. The King interests in the company are understood to be back of this movement and they claim to have a majority of the stock deposited under the plan.

"The Glue Company has now been formed under New Jersey laws as the vehicle to carry out the above plan and Tarrant P. King, son of D. Webster King, has been elected president of the new company. Minority stockholders claim that this a scheme of the King family to secure perpetual control of The American Glue Company, and it is quite likely that counsel will be employed on both sides and a bitter struggle ensue. There is a New Jersey statute which provides that control of a New Jersey company cannot be turned over except by a two-thirds vote and the Upton interests of over 7,000 shares prevent the securing of such a majority.

"The American Glue Company is paying 8 per cent. dividends on its preferred stock and 4 per cent. on the common stock, which securities are selling at about 130 and 60, respectively.

"The last annual report of the company, dated May 31, shows : Surplus, June 1, 1901, $59,194 ; net earnings, June 1, 1901, to June 1, 1902, $170,038 ; total, $229,233. Dividends, $132,028. Balance, June 1, 1902, $97,204.

"The assets and liabilities as of May 31 were : Assets—Cash and receivables, $601,713 ; merchandise, manufactured and in process, $1,285,772 ; real estate, machinery and fixtures, $635,117 ; corporations owned, $247,002 ; patent rights and good will, $800,000. Total, $3.569,606. Liabilities—Preferred stock, $1.304,300 ; common stock, $800,000 ; debts, $909,000; profits reserved as working capital, $460,000 ; profit and loss, $96,305. Total, $3,569,606."

FINE WEATHER.

The painters and decorators are very much pleased with the fine weather of the past ten days. They consider their business is 20 per cent. better than it was a year ago, and if the mild weather continues there is much outside work that they will finish, which otherwise would have been left over till spring.

LINSEED OIL.

The price of linseed oil having been high for some time past has had the effect of inducing numerous persons to offer adulterated oil to the trade at a lower price than the market, and depending on its cheapness for sales. Every intelligent painter knows the quality of the linseed oil he uses has more to do with the quality of the paint than the pigment. No matter how careful the painter may be in applying the paint, it will soon perish if the oil used in thinning it is adulterated.

The adulterants used in cheapening linseed oil are cottonseed oil, rosin oil and petroleum oils, any of which spoil the durability of the paint. Any article as staple as linseed oil will always bring the market price and there is no need for any dealer to offer this oil below the market price, except for the purpose of selling an inferior article. Painters should be warned against such offers for they are paying more for this class of oil than it is worth, and at the same time they are hurting their reputations as good painters, because of the premature perishing of the paint.

PAINTS IN THE HARDWARE TRADE.

It is the general opinion throughout the trade that paints are becoming more extensively handled by hardware merchants every day. One is led to believe that it is only a short time until the bulk of the trade will be done by hardwaremen.

THE USE OF STAINS.

By "X. R."

DECORATORS do not make the use of stains on wood that they might do. This class of work has been carried on to a great pitch of perfection, and some of the most beautiful work possible has been done by means of stains on the natural wood. They lend themselves to all kinds of treatment, arabesque and natural forms and flat inlaid ornament as well. This is a feature that painters might make much more use of if they had the initiative and resource to do it.

Andrew Fingar Brophy, the eminent designer, many years ago brought out a patent to imitate inlaid woods. His method was to take a design, make a pounce of it and pounce it on the white wood. The portions that had to remain white, whether they were in outline or on broad mass, were laid in with a preparation of white Damar varnish, which is soluble in spirits. The wood was then stained with the next lightest stain that was to be used in the design, which is again stopped out in the same way, the pounce being again used. This process is repeated with each successive stain, until the darkest color is reached ; the whole design thus lies buried beneath the darkest color. The operator then takes a solvent (spirits of turpentine), and with a soft camel-hair brush he proceeds to soak the board or panel with turpentine and gently rubs it with the ends of the hair. This, through course of time, will soak through the layers of the stopping-out medium and disclose the design in its perfection, with the different parts in various colors. One sees much in evidence of this class of decoration in Britain, in public and office buildings, and in the cabins of steamboats, and the effect is most decorative and artistic and well worthy of imitating here.

VISITORS FROM SCOTLAND.

Two gentlemen from the firm of Craig & Rose, No. 85 Cadogan street, Glasgow, who also have branches at Edinburgh, London and Cardiff, arrived in Montreal last week, putting up at the Windsor Hotel. The gentlemen were Mr. Andrew A. Rose and Mr. Donald Stewart. They are paying a flying visit to Canada and a few points in the United States.

Both gentlemen expressed themselves as highly pleased with Montreal and the general businesslike air of the streets, with the exception of the "mud," which is certainly at present a great drawback to the beauty of the city.

Messrs. Rose and Stewart called upon Mr. Robert Munro, of The Canada Paint Company, Limited, intending merely to pay a formal visit, but being induced to take a run through one of the factories of The Canada Paint Company, they spent a full day investigating each department and stated that they were more than delighted with the way in which colors were made by this firm, and were

MONTREAL BRANCH: 1 and 3 DeBresoles St. LONDON BRANCH: 71 Dundas St.

greatly interested in the labor-saving machinery which is employed by them.

After they had seen the dry color factory, coach color and lead departments, the ready-mixed paint branch and the varnish-maturing tanks. Mr. Evans took them in hand and showed them a few of the principal points of the city.

Eventually Messrs. Rose and Stewart left for Toronto and Chicago, stating that the large manufacturing industries in Montreal had made a deep and lasting impression upon them and they would not fail to tell the folks at "hame" the great industrial progress that Canada is making.

CLEANING WALL PAPER.

French chalk is valuable in cleaning wall paper, and will remove grease spots from the most delicately-tinted paper without damage. The chalk may be powdered and dissolved in cold water and applied to the spots with care. When dry it should be brushed off with a soft cloth, and in many cases the soiled spot will disappear. It should remain about 12 hours. A second application may be necessary, and drying can be hastened by covering with brown paper and applying a hot flat-iron. Pieces of bread, soft but not moist, will often remove dirt from the paper. The paper should be rubbed in a downward direction only, and care is necessary to prevent a streaked appearance.

IT BRISTLES WITH GOOD POINTS.

The catalogue of The United Factories, Limited, Toronto, fairly bristles with excellent pointers for those who sell or use brushes. For instance:

"Brushes should never be kept in a warm or dry place, as the best-made brushes are liable to shrink and come apart. For the same reason, paint or varnish brushes should never be used as dusters, nor used dry.

"If, from any cause, brushes have shrunk, they can usually be restored by putting them for a short time in a cellar or moderately damp place.

"Many all-bristle paint and whitewash brushes have been destroyed by putting in water or newly slacked lime. Whitewash brushes should be washed out thoroughly in clean water each time after using.

"Kalsomine brushes are made to use in cold-water paints and colors and must not be used in oil paints or varnishes. The same thing applies to paperhangers' brushes."

This catalogue is mailed free for the asking.

PAINT AND OIL MARKETS.

TORONTO.

THERE is a fair business doing in all kinds of paints. Linseed oil has been reduced 3c. all round. Turpentine, also, has been reduced 1c. The sale of oil has been exceptionally good this week, and dealers expect it to continue so for some time. We quote:

WHITE LEAD.—Ex-Toronto, pure white lead, \$5 to \$5.25; No. 1, \$4.62½ to \$4.87½; No. 2, \$4.25 to \$4.50; No. 3, \$3.87½ to \$4.12½.; No. 4, \$3.50 to \$3.75 in packages of 25-lb. and upwards; ½c. per lb. extra will be charged for 12½-lb. pkgs.; genuine dry white lead in casks, \$5.02½.

RED LEAD.—Genuine, in casks of 560 lb., \$5 to \$5.12½; ditto, in kegs of 100 lb., \$5.50; No. 1, in casks of 560 lb., \$4; ditto, kegs of 100 lb., \$4.50.

LITHARGE.—Genuine, 6 to 6½c.

WHITE ZINC.—Genuine, French V.M., in casks, \$6 to \$6.25; Lehigh, in casks, \$6.00.

SHINGLE STAIN.—In 5-gallon lots, 60 to 75c. per gallon.

PARIS WHITE.—90c. to \$1 per 100 lb.

WHITING.—65c. per 100 lb.; Gilders' whiting, 80c.

GUM SHELLAC.—In cases, 35c.; in less than cases, 40c. per lb.

LIQUID SHELLAC.—Pure orange, in bbls., \$2.25 to \$2.35; white, \$2.35 to \$2.45 per gal.; in less quantities, 10c. extra.

PUTTY.—Bladders, in barrels, \$2.25; bladders, in 100-lb. kegs, \$2.40; bulk in bbls., \$1.90; bulk, less than bbls. and up to 100 lb., \$2.05; bladders, bulk or tins, less than 100 lb., \$2.90.

PLASTER PARIS.—New Brunswick, \$2 per barrel.

PUMICE STONE.—Powdered, \$2.50 per cwt. in bbls. and 4 to 5c. per lb. in less quantity; lump, 10c. in small lots and 8c. in bbls.

LIQUID PAINTS.—Pure, \$1.20 to \$1.40 per gallon; No. 1, \$1 10 per gallon.

BARN PAINTS.—65 to 70c. per gallon.

CASTOR OIL.—English, in cases, 9 to 9½c. per lb. and 10 to 10½c. for single tins.

LINSEED OIL.—Raw, 1 to 2 bbls., 67c.; boiled, 70c.; 3 to 5 bbls., raw, 66c.; boiled, 69c.; 6 to 9 bbls., raw, 64c.; boiled, 66c. delivered. To Toronto, Hamilton and London, 2c. less. All quantities of 10 bbls. and over of linseed oil sold only f.o.b. Toronto, Hamilton, London and Guelph.

TURPENTINE.—Single bbls., 78c.; 2 to 4 bbls., 77c. delivered. Toronto, Hamilton and London, 1c. less. For less quantities than barrels, 5c. per gallon extra will be added, and for 5-gallon packages, 50c. and 10-gallon packages, 80c. will be charged.

GASOLINE AND BENZINE.—We quote: Benzine, 18¾c. and gasoline, ordinary, 21¼c. and engine, 22¼c. f.o.b. Toronto.

MONTREAL.

A reduction of 1c. has been made both in the price of linseed oil and turpentine, the former now selling at 67c. for raw and 70c. for boiled, while turpentine is worth 77c. This change in price has followed upon the arrival of larger supplies in both articles. At present turpentine appears to be steady, but in linseed oil, notwithstanding a fairly good movement, the feeling is still easy. Trade in both the foregoing staples, as well as in the general list of painters' materials, is brisk, and the market is in a healthy condition. Business has received a fillip from the mild weather which has prevailed for the past few days. In dry colors and ready-mixed paints there has been no change in price, these articles remaining steady under an active demand. We quote:

GROUND WHITE LEAD.—Best brands, Government standard, \$5.15 to \$5.25; No. 1, \$4.77½ to \$4.87½; No. 2, \$4.40 to \$4.50; No. 3, \$4.02½ to \$4.12½; No. 4, \$3.65 to \$3.75, all f.o.b. Montreal. Terms, 4 months, or 3 per cent. off for cash in 30 days.

DRY WHITE LEAD.—\$5.25 in casks; kegs, \$5.50.

DRY WHITE ZINC.—Pure dry, in casks, 6¼c.; in 100-lb. kegs, 6¾c. No. 1 zinc, in casks, 5¼c.; in 100-lb. kegs, 5¾c.

WHITE ZINC (ground in oil)—Pure, 25-lb. irons, 8c.; No. 1, 7c.; No.2, 6c.

PUTTY.—We quote: Bulk, in bbls., \$1.90 per 100 lb.; bulk, in less quantity, \$2.05; bladders, in bbls., \$2.25; bladders, in 100 or 200-lb. kegs or boxes, \$2.40; in tins, \$2.55 to \$2.65; in less than 100-lb. lots, \$3 f.o.b. Montreal, Ottawa, Toronto, Hamilton, London and Guelph. Maritime Provinces, 10c. higher, f.o.b. St. John and Halifax.

ORANGE MINERAL.—Casks, 7c.; 100-lb. kegs, 7¼c.; smaller quantities, 8¼c.

RED LEAD.—Genuine red lead, in casks, \$4.50; in 100-lb. kegs, \$4.75; in less quantities, \$5.75 per 100 lb. No. 1 red lead, casks, \$4.25; kegs, \$4.50, and smaller quantities, \$5.50.

LITHARGE.—Ground, casks, 5c.; less quantities, 5½c.; flake litharge, casks, \$5.25; smalls, \$5.75 per 100 lb.

LINSEED OIL.—Raw, 67c.; boiled, 70c. In 5 to 9 bbls., 1c. less. Terms, net cash in 30 days. Delivered in Ontario, between Montreal and Oshawa, at 2c. per gal. advance.

TURPENTINE.—Single barrels, 77c.; 2 to 4 barrels, 76c. Terms, net cash in 30 days.

SHELLAC VARNISH.—Pure white, \$2.35 to \$2.45; orange, \$2.25 to \$2.35.

MIXED PAINTS.—\$1.20 to \$1.45 per gallon.

CASTOR OIL.—8¾ to 9¼c. in wholesale lots, and ½c. additional for small lots.

SEAL OIL.—48 to 50c.

COD OIL.—35 to 37½c.

PARIS GREEN.—Petroleum, bbls., 16¾c. per lb.; arsenic kegs, 17c.; 50 and 100-lb. drums, 17¼c.; 25-lb. drums, 18c.; 1-lb. packages, 18½c.; ½-lb. packages, 20½c.; 1-lb. tins, 19½c.; ½-lb. tins, 21½c. f.o.b. Montreal. Terms: 3 per cent. 30 days, or four months from date of delivery.

PAINT NOTES.

Turpentine has dropped 1c. in price.

Linseed oil has dropped 3c. during the week.

The standard brands of white lead are having a brisk demand.

J. J. Alling & Son, brush manufacturers, Montreal, have registered.

The paint trade seem well satisfied with the business of the past season.

There are a number of contracts for painting and decorating to be closed within the next two weeks.

A demand of assignment has been made on The John McArthur Co., Limited, paints and oils, Toronto.

WINDOW GLASS.

TORONTO.

The glass market is very unsettled and a change of price is daily looked for. We now quote: Under 26 in., \$4.25; 26 to 40 in., \$4.65; 41 to 50 in., \$5.10; 51 to 60 in., \$5.35; 61 to 70 in., \$5.75; 71 to 80 in., \$6.25; 81 to 85 in., \$7; 86 to 90 in., \$7.75. Toronto, Hamilton and London. Terms, 4 months, or 3 per cent. 30 days. Discount, 15 per cent.

MONTREAL.

A number of shipments of glass have gone forward this week, but the demand is still light. No actual change in the price of glass is reported. We quote as follows: First break, 50 ft., \$2.10; second, \$2.20 for 50 ft.; first break, 100 ft., \$4; second break, \$4.20; third break, \$4.70; fourth break, \$4.95.

MARKETS AND MARKET NOTES

QUEBEC MARKETS.

Montreal, November 7, 1902.

HARDWARE.

ALMOST all lines of hardware continue to move out briskly in anticipation of the closing of navigation in a fortnight or so. Steamboats have been making their last trips to some points, and carried heavy cargoes with them. The discount on "New Countersunk" horseshoe nails has been changed to 65 per cent. off. The Canadian Wholesale Hardware Association met on Tuesday of this week in Montreal. Prices on lawn mowers for 1903 will be found below. Prices on galvanized fine wire, f.o.b. Cleveland, are given to the trade this week.

LAWN MOWERS.—Prices on lawn mowers for 1903 delivery are now out. They are as follows: 10½-inch wheel by 12-inch cutter, $7.50; by 14-inch cutter, $8.00; by 16-inch do, $8.50; by 18-inch do, $9.00; by 20-inch do, $10.00. Star, 9-inch wheel by 12-inch cutter, $5.50; by 14-inch do, $5.75; by 16-inch do, $6. Daisy, 8-inch wheel by 12-inch cutter, $4.90; by 14-inch do, $5.10; by 16-inch do, $5.30. Philadelphia pattern, 7½-inch wheel by 10-inch cutter, $6; by 12-inch do, $6.50; by 14-inch do, $7; by 16-inch do, $7.50. Grass boxes are quoted as follows: 12-inch, $2.25; 14-inch, $2.25; 16-inch, $2.50; 18-inch, $2.50; 20-inch, $2.75. The discount on all the above is 50 per cent. off.

BARB WIRE.—The situation remains much as before. It is now quoted at $2.90 per 100-lb. keg f.o.b. Montreal and $2.55 f.o.b. Cleveland.

GALVANIZED WIRE.—There is but a small movement in this wire. The price of galvanized plain wire in carlots has been fixed. Quotations from stock, which remain unchanged, are: Nos. 6, 7 and 8 gauge, $3.20; No. 9, $2.55; No. 10, $3.30; No. 11, $3.40; No. 12, $2.70; No. 13, $2.80; No. 14, $3.80; No. 15, $4.30; No. 16, $4.55; No. 17, $4.95; No. 18, $5.20. In carlots, f. o. b. Cleveland, the prices are: No. 9, $2.15; No. 12, $2.30; No. 13, $2.40, not dutiable. No. 10, $2.20; No. 11, $2.25; No. 14, $2.50; No. 15, $2.95; No. 16, $3.05, dutiable. In less than carlots, 12½c. per 100 lb. extra is charged.

SMOOTH STEEL WIRE.—There is only a small amount of business doing on this market. Prices are unchanged. We quote as follows: Bright and annealed, $2.60 per 100 lb. f.o.b. Montreal, Toronto, Halifax, London, Hamilton and St. John. Net extras per 100 lb. are now as follows: Coppered wire, 60c.; tinned wire, $2; oiling, 10c.; spring wire, $1.25; best steel wire, 75c.; bright soft drawn, 15c.; special hay-baling wire, 30c.

FINE WIRE.—Business is still quiet. The discount is 25 per cent. and net extras are as follows: 1 and 2-lb. hanks, 25c. per 100 lb.; ½-lb. hanks, 37½c. and ¼-lb. hanks, 50c.

BRASS AND COPPER WIRE.—Both these wires are moving slowly. The discount is 62½ per cent.

FENCE STAPLES.—Trade continues quiet and the market is entirely without feature. The price of galvanized staples is $3.25 and of bright, $2.90 per 100-lb. keg. 25 and 50-lb. packages, 25c. extra.

WIRE NAILS.—The market is quiet. We quote $2.25 per keg in small lots and $2.50 in carlots f.o.b. Montreal, London, Hamilton, Toronto, Gananoque, Brantford, Windsor, Ont., St. John and Halifax.

Extensively Advertised.

HERE is a sample of a series of ads. with which we are advertising the "Famous Active" range in daily and weekly papers all over Canada, and will continue until Christmas.

Are you taking advantage of all this publicity by handling this leader?

If not, would it not pay you to do so?

The best advertised article (quality being on the same par) is always the easiest to sell.

We will supply plates of this or any other of our ads. **free** for the asking.

CUT NAILS.—Not much business is doing this week. In small lots the price is $2.45 and in carlots, $2.40 per keg.

HORSE NAILS.—"New Countersunk" heads, "M" brand, are now discounted at 65 per cent. off instead of 66 2-3 per cent. off. Other lines are unchanged. We quote: "C" brand, 40, 10 and 7½ per cent. off; on "M" brand, "Oval," 57½ per cent.; "New City," 57½ per cent.; "New Countersunk," 65 per cent.

HORSESHOES.—There is a good demand for horseshoes at current prices, and the market is active. No quotable change is reported. Our quotations are as follows: Iron shoes, light and medium, pattern, No. 2 and larger, $3.35; No. 1 and smaller, $3.60; snow pattern, No. 2 and larger, $3.60; No. 1 and smaller, $3.85; X L steel shoes, new light pattern, sizes 1 to 5, No. 2 and larger, $3.45; No. 1 and smaller, $3.70; featherweight, all sizes, 0 to 4, $5; toe weight, all sizes, 1 to 4, $6.25. Shoes, more than one size in a keg, 10c. per keg extra. F.o.b. Montreal only.

RIVETS AND BURRS.—There is no change and trade is quiet. We quote: Best iron rivets, section carriage, and wagon box, black rivets, tinned do., coopers' rivets and tinned swedes rivets, 60 and 10 per cent.; swedes iron burrs are quoted at 55 per cent. off; copper rivets, with the usual proportion of burrs, 45 per cent. off and coppered iron rivets and burrs, in 5-lb. carton boxes are quoted at 60 and 10 per cent. off list.

BOLTS.—The demand for bolts and nuts continues quiet. Discounts follow: Norway carriage bolts, 55 per cent.; common, 50 per cent; full square carriage bolts, 55 per cent.; machine bolts, 50 and 5 per cent.; coach screws, 66 2-3 per cent.; sleighshoe bolts, 65 and 5 per cent.; blank bolts, 50 and 5 per cent.; bolt ends, 50 and 5 per cent.; plough bolts, 50 and 5 per cent. To any retailer an extra discount of 10 per cent. is allowed. Tire bolts, 67½ per cent.; stove bolts, 67½ per cent. Nuts, square, 3¼c. per lb. off list; hexagon nuts, 3¾c. per lb. off list. To all retailers an extra discount of ½c. per lb. is allowed.

SCREWS.—There is but a light movement in screws and no change in price has been made. We quote the discounts: Round head bright, 82½ and 10 per cent.; flat head bright, 87½ and 10 per cent.; brass, round heads, 75 and 10 per cent.; brass, flat heads, 80 and 10 per cent.

CORDAGE.—On Thursday a reduction in the price was made in cordage. The market is quiet. We quote: Manila, 14c.; British manila, 12c.; sisal, 12c.; lathyarn, 11c.

BUILDING PAPER.—This is moving fairly well. The market is steady and prices unchanged. We now quote: Tarred felt, $1.70 per 100 lb.; 2-ply, ready roofing, 85c. per roll; 3-ply, $1.10 per roll; carpet felt, $2.25 per 100 lb.; dry sheathing, 35c. per roll; tar sheathing, 45c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll; O K and I X L, 65c. per roll; heavy straw sheathing, $30 per ton; slaters' felt, 60c. per roll.

SBREEN WIRE CLOTH.—Trade is dull. The price quoted is $1.37½ per 100 square feet.

POULTRY NETTING.—Some business has been done for 1903 delivery. The discounts for delivery next year on Canadian and English netting are as follows: 60 per cent. off on 2 x 2 mesh, 19 wire, and 50 per cent. off on 2 x 2 mesh, for heavier.

Canadian Agents for Buehne's "Red, White and Blue" Brand Steel Wool.

THE MOST DURABLE

paint on the market, and the paint that will give your customers the greatest satisfaction is the celebrated

"Ark Brand" Paint.

It is the Painters' paint, and that is the kind you should stock.

We have just received the following letter from a firm of Practical Painters in Toronto :

"In reply to your request for our opinion of your 'Ark "Brand' Paint, we believe it to be the best paint for "outside work we have ever used, and would recommend "it to any person who wants a durable job. We believe "(as practical painters) it will outlast any mixture of "Lead and Oil that can be used.

(Signed), "W. R. WILSON & Co."

If you have not received the agency for "Ark Brand" Paint, write to day for full particulars as to what we are prepared to do for you.

doing. For future delivery the discount is 60 and 10 per cent.

FIREBRICKS.—The market is still quiet and unchanged as to price. We quote : English, $16 to $22 and Scotch, $17 to $22 per 1,000.

CEMENT.—The demand for cement is keeping up and a good business has been done this week. Our quotations are as follows : Canadian cement, $1.90 to $2.25 ; German, $2.20 to $2.30 ; English, $2.15 to $2.25 ; Belgian, $1.70 to $1.95 per barrel ex-wharf, and American, $2.10 to $2.20 ex-cars.

SPORTING GOODS.—The demand for guns and ammunition is now about over for the season, business being confined to a few small orders for special requirements. Shells are now discounted: Empty: Canadian, 25 per cent.; American, 10 per cent. advance on list. Loaded "Trap," 30 per cent.; American, 30 per cent. ; "Leader" and "Ideal," smokeless brands, 37½ per cent. Brass shot shells, Dominion, 55 per cent.; American, 40 per cent. Primers, Dominion, 30 per cent. ; American, $1.60 per 1.000.

SKATES.—Jobbers report a brisk trade in skates, and our quotations are now as follows : Halifax pattern, 36c. per pair ; nickel-plated, 65c.; ladies' nickel-plated, 60c.; ladies' concave nickel-plated, $1.35 ; plain hockey, 27c. to $1.35 ; nickel-plated hockey, 60c. to $2.50 ; double-end hockey, $1.50 to $3. Skate straps, 35c. to $1.35.

HOCKEY STICKS.—There is a very good trade passing in hockey sticks at the prices here quoted : Best second-growth, goal keepers', $4.20 per dozen ; ash, $2.90 ; elm, $2.25 ; boys' elm, $1.10 ; common, 90c. Regulation pucks, $1.50 per dozen.

SNOW SHOVELS.—These continue to go well, and we quote : "Habitant," $2.25 to $2.40 ; "Victor," 30 per cent. off ; steel railroad shovels, 48 and 5 per cent. off.

FIRE SHOVELS.—The demand for fire shovels is still good and a brisk trade is doing. Our quotations are as follows : No. 70, 38½ to 40c. per dozen ; No. 55, 55 to 60c.; No. 57, 82½ to 90c.; No. 60, 82½ to 90c.; No. 65, $1.37½ to $1.45 ; No. 80, 50 to 55c.; "Duplex," No. 7, $1.21 ; No. 9, $1.52 : No. 11, $1.82.

LANTERNS.—A brisk movement is reported in lanterns this week. Quotations are : Tilt, lift or hinge, No. 0, $4 per dozen ; Cold Blast, $7 per dozen ; dash-board, No. 0, $5.75 per dozen ; cold-blast dashboard, $9 per dozen. Extras are as follows : Japanning, 50c. per dozen ; copper-plating cold blast, $2 per dozen. The prices quoted are f.o.b. London, Hamilton, Toronto, Belleville, Kingston and Montreal.

METALS.

Metals and heavy hardware continue to be in active demand, and to various points heavy shipments are being sent while navigation is open. Railway and structural goods are still much sought for, and shapes for shipbuilding are also wanted. There are no quotable changes to report. Supplies in most lines are plentiful enough. Iron pipe, in nearly all sizes, is an exception.

BAR IRON.—The demand for bar iron is still good and trade is brisk at the following prices : Merchants' bar, $1.95 ; horseshoe, $2.20 and extra refined, $2.35.

BLACK SHEETS.—Some improvement is reported in the demand this week. No quotable change has occurred. We quote as follows : 28 gauge, $2.65 ; 26 gauge, $2.60 ; 20 to 24 gauge, $2.50 and 8 to 20 gauge, $2.50.

GALVANIZED IRON.—Dealers report a fairly good movement in this metal during the week. There are no change in prices, and we quote : No. 28, Queen's Head, $4.40 ; Apollo, 10½-oz., $4.40 ; Fleur de Lis, $4.15 ; Comet, $4.25 ; and "Bell" brand, $4.30. For less than case lots, 10c. extra is charged.

SOIL PIPE AND FITTINGS.—Only a small amount of business has been done this week. Prices show no change, and our quotations are now as follows: Light soil pipe, 3 to 6 inch, 50 per cent., medium and extra heavy soil pipe, 2 to 6-inch, 60 per cent.; extra heavy soil pipe, 8-inch, 45 per cent.; light fittings, 2 to 6-inch, 50 and 10 per cent.; medium and extra heavy fittings, 2 to 6-inch, 60 per cent.; extra heavy fittings, 8-inch, 45 per cent.

PIG IRON.—Inquiries far pig iron continue to be received and the prices are firm. Summerlee is worth $22.50 to $23.50, on wharf, exclusive of handling.

INGOT COPPER.—Trade is quiet and we quote 13c.

INGOT TIN.—There is no change and business is quiet. The price of Straits remains at 28 to 29c.

PIG LEAD.—Some business has transpired this week at the prices given here, but the market rules quiet. In carlots the price is $2.90 and in small lots, $3.25.

LEAD PIPE.—There is a fair demand for lead pipe and the market is steady. Composition and waste are quoted at

8c. and ordinary at 7c. The discount remains at 37½ per cent.

IRON PIPE.—The scarcity in iron pipe continues, affecting almost all sizes. Jobbers have been notified that the mills cannot receive orders for delivery earlier than December, and our quotations are now as follows : Standard pipe, per 100 feet, in lengths under 19 feet : Black, ¼, $2.40 ; ⅜, $2.65 ; ½, $2.85 ; ¾, $3.65 ; 1-in., $5.20; 1¼, $7.35; 1½, $8.95; 2-in., $12.55. Galvanized, ¼, $3.20 ; ⅜, $3.15 ; ½, $3.85 ; ¾, $5 ; 1-in., $7.20 ; 1¼, $10.05 ; 1½, $12.20 ; 2-in., $16.85. Extra heavy pipe, plain ends, are quoted per 100 feet as follows : Black, ½, $4.20 ; ¾, $5.25 ; 1-in., $7.55 ; 1¼, $10.55 ; 1½, $12.75 ; 2-in., $17.60. Galvanized, ½, $5.20 ; ¾, $6.65 ; 1-in., $9.55 ; 1¼, $13.25 ; 1½, $16 ; 2-in., $21.90. For threads and couplings 5 per cent. is added.

TINPLATES.—Business in tinplates is of moderate proportions. Charcoals are worth $4.75 to $5.25 and cokes, $4.25.

STEEL.—Some business is doing this week, but the market in general is quiet. Prices are as follows: Sleighshoe, $2.05 ; tire, $2.20 ; bar, $2.05 ; spring, $2.85 ; reeled machinery, $2.75 ; toecalk, $2.70.

SHEET STEEL.—There is not much doing. We quote as follows: Nos. 10 to 20, $2.50 ; 3-16, $2.50 ; ¼, 5-16 and ⅜, $2.40.

TOOL STEEL.—Business in this line is of moderate proportions. Prices show no change. Our quotations are as follows : Black Diamond, 8c.; Sanderson's, 8 to 12c., according to grade ; Jessop's, 13c.; Leonard's, 7½c.; Jonas & Colver's, 8 to 15c.; "Air Hardening," 45 to 60c.

CANADA PLATES.—A moderate inquiry prevails and a fair trade is doing. We quote : 52's, $2.70 to $2.80 ; 60's, $2.85 to $2.90 ; 75's, $2.80 to $2.85 ; full polished, $3.75 and galvanized, $4.25 to $4.35 ; galvanized, 60's, $4.45 to $4.55.

TERNE PLATES.—There has been no improvement on this market. Trade is quiet and the price remains at $7.50.

COIL CHAIN.—This moves slowly. The price is $5.85 to $6.25.

ANTIMONY.—The price is 10c. Not much business is doing.

ZINC SPELTER.—There is no change. Spelter is quiet at 5c.

SOLDER.—The market is active and steady. We quote bar solder at 20c. and wire solder at 18c.

SCRAP METALS.

Excepting that rubbers are a little lower there has been no quotable change on this market. The market, generally speaking, is quiet. There is an active inquiry for iron, especially machinery scrap, which is very firm and likely to go higher. It is expected that there will be a marked scarcity of machinery scrap. At present prices remain unchanged, jobbers being unwilling to raise prices until the market is more settled. We now quote : Heavy copper and wire, 10c. per lb.; light copper, 8c.; heavy red brass, 10c.; heavy yellow, 8¾c.; light brass, 5c.; lead, 2 to 2¼c.; zinc, 2½c.; iron, No. 1, wrought, $15 ; No. 2, $7 per ton ; machinery scrap, $16 ; stove plate, $12 ; malleable and steel, $5 ; mixed country rags, 60 to 70c. per 100 lb. ; old rubbers, 6¼ to 6½c. per lb.

HIDES.

There has been no actual changes in prices this week. A fair trade is doing. We quote as follows : No. 1 hides, 9c. ; No. 2, 8c. ; No. 3, 7c. Calfskins, 8 to 10c. ; lambskins, 60c.

The Beauty of Building

WITH OUR CELEBRATED

Sheet Metal Building Materials

First and foremost, there's the sterling reliability of the goods—you're absolutely sure of qualities being exactly as represented. Our prestige in that respect has been fairly earned, and it counts for a great deal that your customers never find ground for complaint in the goods we deliver to you.

In addition, there's the ease of handling—the studied, artistic effects—the fire and lightning proof qualities—and the many other details that have made sheet metal the popular building material for all progressive people.

SHINGLES, CEILINGS, SIDINGS, CORNICES and every other Building Requisite in the very Highest Grade. You'll do better business by handling our goods.

Send for our catalogues and read them up.

"New Countersunk" horse nails have been advanced 1 2-3 per cent.

ONTARIO MARKETS.

Toronto, November 7, 1902.

HARDWARE.

BUSINESS in all lines of hardware keeps up well and there is little new to report excepting that there has been issued a new price list of lawn mowers, and the prices of green wire cloth have been advanced to $1.40 per 100 square ft.

BARB WIRE.—Very little trade in this wire is being done at present and the prices continue subject to change without notice. Quotations follow : $2.67½ from Cleveland and 12½c. less in carlots. From stock, Toronto, $2.90.

GALVANIZED WIRE.—Trade in galvanized wire is quiet. Prices continue the same as last week. We quote as follows : Nos. 6, 7 and 8, $3.20 per 100 lb. ; No. 9, $2.55 ; No. 10, $3.30 ; No. 11, $3.40 ; No. 12, $2.70 ; No. 13, $2.80 ; No. 14, $3.80 ; No. 15, $4.30 ; No. 16, $4.55. Nos. 6 to 9 base from Cleveland are quoted at $2.27½ in less than carlots and 12½c. less for carlots of 15 tons.

FINE STEEL WIRE.—Very little business has been done in fine steel wire. The discount is 25 per cent.

SMOOTH STEEL WIRE.—The demand for smooth steel wire continues light. The base price is quoted at $2.60 per 100 lb. Oiling, 10c. ; coppering, 60c. and tinning, $2 per 100 lb. extra. Shipping points Toronto, Hamilton, London and Montreal, with freights equalized on those points.

WIRE NAILS.—There is a steady demand for wire nails and the prices are unchanged. Our quotations are as follows : $2.50 in carlots and $2.55 for less quantities. The shipping points are Toronto, Hamilton, London, Gananoque and Montreal.

CUT NAILS.—The volume of business in cut nails is reported fair. Quotations are steady at $2.50 per keg and 10c. less for carlots.

HORSE NAILS.—There is a good trade being done in these, and the discounts are now as follows : "C" brand, oval head,, 40 and 10 and 7½ per cent. ; on "M" brand, 50, 10 and 5 per cent. ; "Monarch," 60 2-3 per cent. ; "Countersunk" head, 60 per cent.

HORSESHOES.—There is a moderate amount of business being done in horseshoes and the prices are unchanged. We quote: Iron shoes, No. 2 and larger, light, medium and heavy, $3.45 ; snow shoes, $3.70 ; light steel shoes, $3.55 ; featherweight (all sizes), $4.95 ; iron shoes, No. 1 and smaller, light, medium and heavy (all sizes), $3.70 ; snow shoes, $4 ; light steel shoes, $3.80 ; featherweight (all sizes), $4.95.

SCREWS.—The demand for screws continues much greater than the supply. Discounts are : Flat head bright, 87½ and 10 per cent. discount ; round head bright, 82½ and 10 per cent.; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.; round head bronze, 65 per cent. and flat head bronze, 70 per cent.

RIVETS AND BURRS.—The manufacturers are still behind in their deliveries and prices are firm and unchanged. Discounts are : Iron rivets, 60 and 10 per cent. discount ; iron burrs, 55 per cent. ; copper rivets, with usual proportion of burrs, 45 per cent. ; copper burrs alone, 30 and 10 per cent.

BOLTS AND NUTS.—Jobbers are still unable to supply the trade within a reasonable time after ordering. We quote as follows : Carriage bolts, common ($1 list), 50 per cent. ; carriage bolts, full square ($2.40 list), 55 and 10 per cent.; carriage bolts, Norway iron ($3.00 list), 55 and 10 per cent.; machine bolts, all sizes, 50 and 10 per cent.; coach screws, cone points, 66 2-3 and 10 per

cent.; elevator shaft and whiffletree bolts, 50 per cent.

SPADES AND SHOVELS.—There continues to be sold quite a number of spades and shovels. A big demand is reported for scoops, which the manufacturers are unable to supply fast enough to meet the requirements of the trade. The discount is 40 and 5 per cent.

ROPE.—A good trade is doing in rope and the prices are unchanged. We now quote: Pure manila, 15c.; British manila, 13c.; sisal, 12½c.; lathyarn, single, 11½c.; double, 12c.; sisal bed cord, 3-cord, 48 feet, 65c.; 60 feet, 80c.; 72 feet, 95c. per dozen.

HARVEST TOOLS.—These have been mostly all sold for delivery in the spring. The discount is 60 and 10 per cent.

LAWN MOWERS.—The new prices issued are as follows: Woodyatt, 12-inch wheels, $7.50; Star, 12 inch wheels, $5.50; Daisy, 12-inch wheels, $4.90; Philadelphia, 10-inch wheels, $6; Ontario, 10-inch wheels, $12.75. The other sizes are in proportion. The discount is 50 per cent.

GREEN WIRE CLOTH.—The price of green wire cloth has been advanced to $1.40 per 100 square ft.

EAVETROUGHING, ETC.—A fair amount of eavetroughing continues to go out. We quote: Eavetroughing, 10-in., per 100 ft., $3.10; conductor pipe, 2-inch, per 100 feet, $3; 3-inch, $4; 4-inch, $5.25; 5-inch, $6.75 and 6-inch, $9.

BUILDING PAPER.—A good, active demand continues for building paper from all parts of the country. We quote as follows: Dry sheathing, grey or straw, 35c. per roll; tar sheathing, grey or straw, 45c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll.

ASH SIFTERS.—The demand for ash sifters keeps up well. The price is $13.20 per gross.

TINWARE AND ENAMELLED WARE.—Trade, both in tinware and enamelled ware continues fair and the prices are unchanged.

STOVES AND RANGES.—These are still much wanted and are as scarce as ever. The advance of 5 per cent. made last week has been maintained.

SCREEN DOORS, ETC.—A fair amount of trade continues to be done in screen doors for future delivery. Quotations are as follows: Screen doors, common, 2 or 3 panel, walnut stained, 3-in. style, $6.60; stained, yellow or green, $6.80; in natural colors, oil finish, $8.15; 4-in. style, 20c. per dozen extra.

CEMENT.—The continued mild weather has enabled contractors to go on with their work and the demand for cement has therefore been well sustained. The prices are firm. We quote: Canadian Portland, $2.80 to $3.20; hydraulic, $1.35 per bbl. At the works the prices are $2.50 to $2.70 per bbl.

METALS.

The condition of the metal market in general is similar to what it was last week. A larger amount of orders are being booked for forward delivery, which shows confidence in the market. In the United States it is feared there will be a scarcity of foreign pig iron, the shipments being much delayed by scarcity of freight room, but buyers have not seriously considered this problem and are placing few new orders. The market abroad is reported to be in a state of waiting for an expected announcement of a decline in prices, and copper is dull and uninteresting.

PIG IRON.—This product is still scarce. At the Canadian furnaces the quotations are as follows: $23 for No. 1 and $22.50 for No. 2. On track, Toronto, No. 2 Summerlee iron is offered at $23.

STEEL BOILER PLATES.—The market is strong and prices are unchanged at $1.80 per 100 lb. in carlots.

STEEL RAILS.—Quotations of steel rails are steady at $30 per ton for railways and $36 per ton for electric railroads.

TOOL STEEL.—The market continues active for tool steel and prices have an upward tendency. We quote as follows: "B C" and "Black Diamond," 10 to 11c.; Jessop's, Morton's and Firth's, 14c.; Jonas & Colver's, 8 to 15c.; ditto, "Air Hardening," 30 to 50c.; Chas. Leonards', 8 to 9c.; Park's "Silver," 12 to 14c.; Park's Special, 15 to 20c.

MILD STEEL.—There continues a good demand for mild steel with a scarcity of the article. Prices are steady at $2.50 to $3 per 100 lb. f.o.b. Toronto.

BOILER TUBES.—The demand for these is heavy.

SPRING STEEL.—A good many orders keep coming forward for spring steel. We quote $3 to $3.50 on track, Toronto.

BAR IRON.—There continues to be an active demand for bar iron and the prices are firm. Quotations are as follows: $2.05 up base. Extras cut to length while rolling: 2 ft. and over, 10c. per 100 lb., 1 ft. and under 2 ft., 15c.; under 1 ft., 20c.; over 20 ft. by special agreement, according to length and size.

BLACK SHEETS.—These are in better demand. We quote: Common, $3.15 for 28 gauge and dead flat, $2.50 for 26 gauge.

CANADA PLATES.—A good steady demand continues for Canada plates. We quote: All dull,, $2.90 to $3; half-polished, $2.85 to $3.10; all bright, $3.75 to $3.85.

GALVANIZED SHEETS.—There is no change in galvanized sheets. We quote: Queen's Head, $4.50 for 28 gauge; American, $4.40 for 29 gauge; Bell brand, $4.30 for 28 gauge; Gordon Crown, $4.50 for 28 gauge.

TIN.—This metal is in active demand. Prices are unchanged at $31 to $32 per 100 lb.

TINPLATES.—A fair business is doing in tinplates. We quote: Charcoal, $4.75 to $5 and cokes, $4.25 per box.

COPPER.—Ingot copper is more active. We quote: Ingot copper, $13 per 100 lb. and sheet copper, $22 to $23.

BRASS.—This metal is unchanged.

LEAD.—Pig lead is in good demand. We quote: Pig lead, $3.50 and bar lead, $3.75 per 100 lb.

IRON PIPE.—The demand for iron pipe continues good. The factories are beginning to make deliveries more freely and jobbers are replenishing their stocks and filling their orders. We quote per 100 feet: ¼-inch, $2.40; ⅜-inch, $2.65; ½-inch, $2.85; ¾-inch, $3.65; 1-inch, $5.20; 1¼-in., $7.35; 1½-in., $8.95; 2-in., $12.55; galvanized, 1-inch, $7.20. Trade discount is 4 per cent. for carlots.

ZINC SPELTER.—This metal is more active. Prices are unchanged at 5 to 6c. per 100 lb.

ZINC SHEETS.—There has been more business doing in this line. We quote as follows: Cask lots, $6 to $6.25 and part casks, $6.25 to $6.50.

SOLDER.—There is no change in solder.

ANTIMONY.—This metal continues active. The prices are unchanged at $9 per 100 lb.

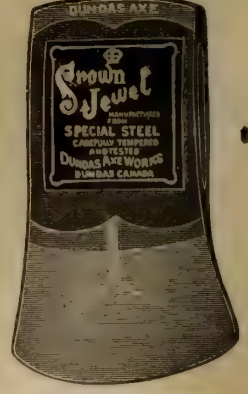
STANDARD.
The cost of Axes per million feet of lumber taken out should be the best Standard. Under this Standard the CROWN JEWEL is the cheapest Axe in the market.



Dundas Axe Works, Dundas, Ont.
W.L. Haldimand, Jr., Eastern Agent, Montreal.

PETROLEUM.

The demand for oils is brisk and prices remain about the same. We quote: Lily White, Canadian, 15 to 15½c. in bbls.; Silver Light, Canadian, 16½ to 17c. in bbls.; Crystal Spray, water white, American 18 to 18½c. in bbls.; Pennoline, best American imported, 19½ to 20c. in bbls. In bulk, 2c. per gallon less.

HIDES, SKINS AND WOOL.

HIDES.—A fair amount of business continues in these. We quote: No. 1 green, 8c.; No. 2 green, 7c.; No. 1 green, steers, 8½c.; No. 2 green, steers, 7½c.; cured, 8½ to 9c. per lb.

SKINS.—There is a good call for calfskins. Lambskins are up 5 to 10c. We quote: Veal skins, 6 to 14 lb. inclusive, No. 1, 10c.; No. 2, 8c.; do, 15 to 20 lb. inclusive, No. 1, 9c.; No. 2, 7c.; deacons (dairies), 60 to 70c. each; shearlings and lambskins, 60c.

WOOL.—The wool market is unchanged. We quote: 13½c. for fleece wool and 7½c. for unwashed.

TALLOW.—The tallow market is still weak at 6¼ to 7c. per lb.

SEEDS.

The chief business continues doing in alsike and the ruling price for it is $7 to $7.75 for prime to choice seed with liberal offerings at outside points. A few small lots of the new crop of red clover have been brought in and sold at $6.50 to $6.75 outside. Timothy is quiet at $1.50 to $1.70 per bushel.

COAL.

Considerable hard coal is arriving in the city this week, but as yet there is none offered on the market. The price at the international bridges is $7 per ton for soft coal.

OLD MATERIAL.

Business is quiet in old material and the prices remain unchanged. Our quotations are: Heavy copper and wire, 10c. per lb.; light copper, 8 to 8½c.; heavy red brass, 9½c.; heavy yellow brass, 8 to 8½c.; light brass, 5 to 5½c.; lead, 2 to 2¼c.; scrap zinc, 3c.; iron, No. 1 wrought, $13.00 per net ton; No. 2 wrought, $4.50; machinery cast scrap, $14 to $15; stove plate, $10; malleable and steel, $6 to $6.50; old rubbers, 6½c. per lb. and country mixed rags, 50c. per 100 lb.

S. H. Caswell & Co., bankers and general merchants, Qu'Appelle Station, Man., are opening a branch at McLean.

THE

WINNIPEG HEATER With New Dress

THE BEST HEATER ON THE MARKET.

Positively saves half the fuel in many cases.
Order a sample at once and put it in use.
Every one sold will sell others without your assistance.

Size, 17½ x14.
Height, 48 inches.

POINTERS:

The Winnipeg Heater is ornamental and does the work of a stove without extra fuel.

It is made out of heavy steel plate and arranged so that it can easily be taken apart and cleaned.

It will heat a room on the same floor as stove or an upstairs room.

It is constructed with flues for air circulation and prevents cold floors.

It has heat retaining pockets and will radiate heat when fire is very low.

It sells like "hot cakes" as soon as introduced.

It is not to be compared with any other drum on the market as it actually takes the place of a stove.

It absolutely prevents waste of heat out chimney.

ACT QUICKLY AS SELLING SEASON IS NOW ON.

The Winnipeg Heater will heat as large a room as the stove to which it is attached, without extra fuel.

ORDER A SAMPLE TO-DAY.

The Metal Shingle & Siding Co., Limited

PRESTON, ONT.

TRADE CHAT.

THERE is said to be a splendid opening for a hardware and tinware merchant at Qu'Appelle, Assa. Every other trade is well represented.

The Dominion Harness Company's building, Port Elgin, Ont., is completed.

A. H. Couse & Co. opened a new hardware store in Sarnia, Ont., last Saturday. Mr. Couse's friends in Forest wish the firm success.

The stove manufacturers are away behind in their orders. One firm has an order to fill and is 2,000 stoves short of the number wanted.

The blacksmith shop on Martin street, Milton, Ont., formerly owned by William McKenzie, was sold by auction to Mr. Benson, of Hamilton.

John B. Abbott, late prominent manufacturer of Ottawa, passed away after a lingering illness. He was 54 years of age, and is survived by his widow and a daughter.

The latest mineral discovered in Ontario is molybdenite, found in Haliburton. This valuable find is reported to be quite extensive, the veins being several feet wide in some places.

Blue & Champ's sawmill, near Rossland, B.C., were destroyed by fire. This plant supplied the well-known Le Roi No. 2, War Eggle and Centre Star mines with timber. The loss is placed at $8,000 with $2,000 insurance. It will be rebuilt immediately.

A rich find of iron ore of superior quality is reported from the vicinity of Campbell's Mountain, at Lynch River, St. Peter's, N.S. The croppings are in the same range as the ore now being developed at Salmon River, and there is every hope of it being found in paying quantities.

Gauthies, Prevost & Co., tanners, Notre Dame Des Neiges, Que., have registered.

Beaudry, Napoleon street, two buildings, size of each, 44 x 34, cost of each, $1,250; to C. H. Meredith, Peel and Pine avenue, a two-storey building, 40 x 40, cost $5,500; to H. V. Meredith, two-storey building, 40 x 40, cost $5,500; to D. Bertrand, Bertrand street, three buildings, each two-storeys, size 22 x 51, cost $1,000 each; to Mrs. A. C. Phillips, St. Mark street, three-storey building, 28 x 48, cost $11,000; to Jos. Lepine, Sullivan street, two three-storey buildings, size of each, 36x38, cost of each, $5,000; to Mrs. R. Wray, Duluth avenue, two-storey building, 22 x 35, cost $1,300; to Beaupre & Fils, St. Paul street, one-storey building, 73 x 76, cost $2,800; to Jos. and Ed. Latreille, Mount Royal avenue, four three-storey buildings, size of each, 22 x 36, cost of each, $2,500; to Jos. Sawyer, Canning street, three-storey building, 25 x 40, cost $3,000; to Louis Demy, Prefontaine street, three-storey building, 25 x 25, cost $3,000; to L. L. Renaud, Champlain Park, three-storey building, 24 x 36, cost $2,200; to A. Senecal, Stadacona avenue, three-storey building, 26 x 38, cost $2,000; to A. Leligne, Bleury street, one-storey building, 9 x 15, cost $300; to A. Carriere, Fullum street, three-storey building, 28 x 51, cost $2,500; to J. E. Laprairie, Gain street, one-storey building, 23 x 48, cost $200; to Y. M. C. A., Point St. Charles, three-storey building, 160 x.57, cost $25,000; to Paul Galibert, Wellington and King streets, one building, size 43x50, cost $3,700; to Charles Benard, St. Hubert street, one-storey building, 25x32, cost $1,000; to S. Richer, St. Hubert street, two-storey building, 23x35, cost $800; to E. L. Bough, two-storey building, size 50x46, cost $1,800; to Jos. Dumas, Guilford street, two-storey building, size 20x30, cost $700; to C.P.R., Nolan street, two-storey building, size 62x580, cost $27,400; to C.P.R., Nolan street, one-storey building, 130x288, cost $30,500; to C.P.R., one-storey building, 82x434, cost $26,000; to C.P.R., Nolan street, one-storey building 126x500, cost $50,000; to C.P.R., Nolan street, one-storey building, 107x540, cost $56,000; to C.P.R., Nolan street, one-storey building, 100 x 677, cost $56,000; to C.P.R., one-storey building, 100 x 677, cost $55,000; to C.P.R., Nolan street, one-storey building, 100x672, cost $55,000; to N. Trudeau, two-storey building, 24 x 29, cost $400; to C. E. Josline, Balmoral avenue, two three-storey buildings, size of each 48 x 50, cost of each, $9,000; to A. & W. Mireault, Joliette street, two three-storey buildings, size of each, 50 x 38, cost of each, $3,000; to Miss J. Bayer, one-storey building, 20 x 36, cost $1,300; to Lyman & Sons, Prince street, three-storey building, 43 by 92, cost $9,000; to Jos. W. Smith, Papineau Road, two-storey building, 23 x 26, cost $1,400; to Jos. Giroux, Frontenac avenue, two-storey building, 44 x 36, cost $1,600; to W. Hugon, Point St. Charles, two-storey building, cost $1,000; to Canada Sugar Refining Co., St. Patrick street, one-storey building, 77x57, cost $1,200.

THE TRADE IN MONTREAL.

Your representative called on James Atchison, 33 Bleury street, Montreal, who carries a full line of plumbers and gas and steamfitters' supplies. In course of conversation, with Mr. Atchison he reported business to be in a satisfactory condition. The plumbers in Montreal all seem to be pleased with the prevailing condition of their trade.

CONTRACTS.

J. W. Hughes, a leading plumber and steamfitter in Montreal, has been awarded the contract for heating and plumbing for the new Olivet Baptist church, a handsome new church being erected in that city. The order amounts to about $1,400. Mr. Hughes also reports that he was sub-contractor with P. Lyall & Sons for the plumbing and heating for the new Guardian building, on St. James street, and for the new Board of Trade building, which is speedily nearing completion. More men than usual are at present being employed by Mr Hughes, which proves the generally healthy state of the plumbing trade in the metropolis city of Canada.

THE TRADE IN TORONTO.

CONTRACTS.

Fiddes & Hogarth have the contract for the plumbing and heating of Mr. Cooper's residence, Winchester street, Toronto.

Fiddes & Hogarth have the contract for the plumbing, heating and lighting of Ald. Oliver's residence, Sherbourne street, Toronto.

The John Ritchie Co., Limited, are putting the plumbing and hot-water heating in Mr. Andrew's house, Parkdale, Toronto.

The hot-water system of heating is being put in Captain Trigg's house, on Walker avenue, by Fiddes & Hogarth, King street east, Toronto.

Keith & Fitzsimons, Limited, King street, Toronto, are putting the hot-water system in the residence of Rev. Mr. Campbell, Avenue Road.

The heating appliances for the residence of Mr. Miller, Major street, Toronto, are being installed by A. Welsh, plumber, Queen street west.

Mashinter & Co., Adelaide street west, Toronto, have the contract for the plumbing and heating of the Nordheimer Company's new piano factory at Toronto Junction.

OCTOBER A RECORD BREAKER.

During the month of October there were 59 permits for buildings issued by the building inspector of Montreal, representing a total amount of $485,249. The C.P.R. are erecting seven new buildings, the cost of which represents a large amount of money. The Olivet Baptist Church being erected on Dorchester street promises to be a handsome and stately building.

BUILDING NOTES.

The C. P. R. are talking of erecting a large building on King street, Toronto.

The Canadian Northern Railway have purchased a site for their head office in Toronto.

TENDERS WANTED.

The Department of Public Works is calling for tenders for the furnishing of a heating apparatus for the new public building at Nelson, B.C. The plans and specifications can be seen at the Public Works Office, Ottawa.

WINDOW GLASS.

Send in your specification now and secure good sizes before the assortments get broken up. Large stocks are now arriving, but so are orders, and many good sizes are sent out as fast as they come to hand. Then when arrivals cease, prices generally stiffen up for the winter. Buy now.

MONTREAL—THE FAIRBANKS COMPANY—VANCOUVER

MANITOBA MARKETS.

WINNIPEG, November 3, 1902.

ANY man that can get a day's holiday in this perfect weather goes a gunning, and sporting goods of that character show an excellent retail demand. In a jobbing way there is not much to report. Business is, perhaps, not quite so pressing as it was 10 days ago, but is still very good indeed. The rush for stoves is about over, Winnipeggers having come to the conclusion that there is not going to be any special coal famine after all. The present warm fine weather is putting the coal bills along very nicely. There has been no weather yet to necessitate the running of furnaces, except for an hour or two night and morning.

PAINTS, OILS AND GLASS—The market is not so rushed, as practically all building supplies are purchased. Linseed oil has dropped 3c. per gal. as was expected. The flaxseed crop is large here. During the month of October over 200 cars passed the inspector's office, and this, of course, tends to depress prices. Present quotations are: 71c. for raw and 74c. for boiled. Turpentine is without change, at 79 in bbl. lots, and 84c. for smaller quantities.

Some idea of the activity of building in Winnipeg this season may be gathered from the fact that during October 60 building permits were issued, and of these 37 were for houses. The permits of the month represent a value of $125,000. The total value of building permits for the present year to date is $2,295,350.

The price list for the week is as follows:

SILVERWARE IN THE HARDWARE STORE.

"I HAVE been handling silver-plated ware for several years," said a hardwareman to HARDWARE AND METAL the other day, "and I believe, take it all around, it is one of the best lines a merchant can carry. Of course, it does not come under the head of staple articles, but it certainly is a leader among the side lines."

"Did it take well from the first, or did it take time to work up this branch of trade?"

"It took well from the first, though that might have been due somewhat to my good fortune. You see I bought it right. I got an exceptionally good assortment from a city manufacturer. Both beauty and quality were there, and all I had to do was to display it properly and it caught the public eye right away. I had a neat showcase of it in a prominent position in the store, and customers could not fail to see it when they entered the place. I also had some of it in the window, and that helped things along, and I might add that it was a good time of the year too. A month or so before Christmas. Of course, I started under particularly favorable circumstances, but, leaving all that aside, it is a trade which has come easily and more or less steadily ever since. You see, silverware is an article which sells practically all the year around nowadays, and is getting more and more in common use."

"Would you advise hardware merchants to handle silverware as a profitable investment?"

"Well, now, you don't want all my opposition on the street to do a thing just because I do, do you?" said the merchant, who, beginning to think that perhaps he was giving away trade secrets, suddenly turned the theme of conversation.

NOW WITH McARTHUR & CO.

Mr. W. D. Gillean, who has been connected with The Canada Paper Co. for over twenty-five years, has now become manager of the mills and product of Alex. McArthur & Co., of Montreal, the large and well-known paper-makers and roofing material manufacturers. The capacity of this firm's mills is to be increased, it is understood, and Mr. Gillean, with his wide acquaintance with the trade in Canada, and his thorough knowledge of the business, will, we are sure, prove a valuable acquisition to McArthur & Co. Although the business of this concern has been steadily forging ahead, a still further increase is now looked for. Their large paper mills occupy a large area of ground at Joliette, Que., while the felt factory is located at the corner of Harbor and Logan streets, Montreal.

GLASS. GLASS.

We have several large consignments of special sizes of 32-oz., 26-oz. and 21-oz. Glass just arrived, and can fill all orders for large and odd-sized windows for dwellings, etc. Heavy stock of all kinds of Window Glass, and can make prompt shipment. Prices are right. It will pay you to send us your specifications.

2 AND 3 PLY READY ROOFING,
BUILDING PAPERS,
SHEATHING AND CARPET FELT,
COAL TAR PRODUCTS,
HANGING AND PRINT PAPER,
BROWN AND MANILLA WRAPPING

from us your expectations will be realized. Our lines are all guaranteed to give entire satisfaction. Quality, the best.

ALEX. McARTHUR & CO., 82 McGill Street, MONTREAL.

PAPER MILLS: JOLIETTE, QUE. FELT FACTORY: HARBOR AND LOGAN STREETS, MONTREAL.

CURRENT MARKET QUOTATIONS

November 7, 1902.

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figures being for larger quantities and prompt pay. Large cash buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list, as the desire is to make it perfectly accurate.

BRADSTREET'S

Capital and Surplus, $1,500,000. Offices Throughout the Civilized World.
Executive Offices: Nos. 346 and 348 Broadway, New York City, U.S.A.

THE BRADSTREET COMPANY gathers information that reflects the financial condition and the controlling circumstances of every seeker of mercantile credit. Its business may be defined as of the merchants, by the merchants, for the merchants. In procuring, verifying and promulgating information, no effort is spared, and no reasonable expense considered too great, that the results may justify its claim as an authority on all matters affecting commercial affairs and mercantile credit. Its offices and connections have been steadily extended, and it furnishes information concerning mercantile persons throughout the civilized world.

Subscriptions are based on the service furnished, and are available only by reputable wholesale, jobbing and manufacturing concerns, and by responsible and worthy financial, fiduciary and business corporations. Specific terms may be obtained by addressing the Company at any of its offices. Correspondence Invited.

Some Good Reasons Why we claim your trade

FIRST—The brass we make is the standard by which all other brass is judged.

SECOND—It was good enough for good people 10 years ago, and now that we are making a better brass it ought to be good enough for the younger generation.

THIRD—WE ARE ON THE SPOT with a full and complete stock for shipment same day order is received. This alone is worth a good many dollars in these rush times.

FOURTH—We have issued a comprehensive catalogue classifying over a Million Pounds. It's here for the asking.

Lowest prices on Mantles, Shades, Chimneys and Sundries.

Write us if you are interested.

AUER LIGHT CO., - - MONTREAL.

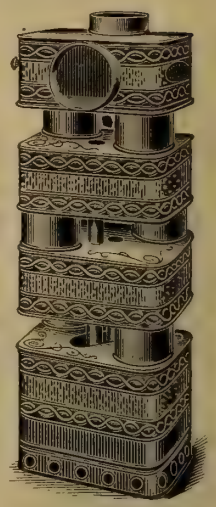
THE

WINNIPEG HEATER

With New Dress

THE BEST HEATER ON THE MARKET.

Positively saves half the fuel in many cases.
Order a sample at once and put it in use.
Every one sold will sell others without your assistance.



Size, 17½ x14.
Height, 48 inches.

POINTERS:

The Winnipeg Heater is ornamental and does the work of a stove without extra fuel.

It is made out of heavy steel plate and arranged so that it can easily be taken apart and cleaned.

It will heat a room on the same floor as stove or an upstairs room.

It is constructed with flues for air circulation and prevents cold floors.

It has heat retaining pockets and will radiate heat when fire is very low.

It sells like "hot cakes" as soon as introduced.

It is not to be compared with any other drum on the market as it actually takes the place of a stove.

It absolutely prevents waste of heat out chimney.

ACT QUICKLY AS SELLING SEASON IS NOW ON.

The Winnipeg Heater will heat as large a room as the stove to which it is attached, without extra fuel.

ORDER A SAMPLE TO-DAY.

MANUFACTURED BY

The Metal Shingle & Siding Co., Limited

PRESTON, ONT.

"Royal" and "Ontario" Tea Kettles

Plain and nickel-plated copper, pit and flat bottoms, double seamed spouts. For a strong well finished Tea Kettle the "Royal" is unexcelled.

The "Ontario" is an extra heavy Kettle at a slight advance in price.

Packed separately in cardboard boxes.

The steadily increasing demand for these Kettles is evidence of their durability.

If you desire to increase your sales it will pay you to handle these lines.

THE SITUATION IN STOVES.

A HEAVY demand continues for stoves and ranges. The volume of business in these articles is much ahead of last year, and the trade with the Northwest has been greater than ever before. This is probably owing to the good crops there of the last two years, and to the fact that the past season has seen a large number of settlers take up their abode in that part of the Dominion. So extensive have been the requirements of the West that a leading member of a large stove manufacturing concern of Canada stated that in his opinion they could have disposed of their entire output there this fall without any difficulty. As it is, the Canadian manufacturers have been unable to ship forward stoves fast enough to supply the wants of the West, and so quite a large number, estimated at 50 carloads at least, were imported from the United States and distributed by several Winnipeg houses to their Western customers. These 50 carloads amounted to about 3,000 stoves or more.

In Ontario and Quebec the stove market has been very active and the demand seems to be rather larger than usual. This can be accounted for by the prosperity of the country putting more money into circulation. The average life of a stove is about 15 years.

Oil stoves have also been active and there has been a considerable inquiry for these from abroad, even from South Africa, but the manufacturers in this country have been kept so busy supplying the home demand that they have had to be content not to place their products on the outside markets. It is gratifying to know that several manufacturers of stoves are at the present time enlarging their premises and preparing to increase their output, so that they in some measure may keep pace with the rapid expansion of trade in this country.

PRICES FOR 1903.

PRICES for screen doors and windows for 1903 were given out on Thursday, November 6, and are quoted below. It will be noticed that the new prices are considerably lower than those in force last year. As an instance, we may point out that in 1902 the price of No. 20, three-panel screen doors, walnut stain, was $7.10 per doz., while for 1903 the price is $6.90. On other numbers prices are almost proportionately lower than last year's :

No.		Per doz
20	3-panel screen doors, stained walnut	$ 6 90
20	3 " " " " yellow	7 10
20	2 " " " oiled only	8 45
21	5 " " " stained walnut, with scroll	8 30
21	5 " " " " yellow, " "	8 50
22	Fancy " " "	8 60
22	" " " oiled only	9 50
22	" " " filled and varnished	10 35
23	" " " stained yellow	10 60
23	" " " oiled only	11 60
23	" " " one coat varnish	11 70
23	" " " filled and varnished	12 70
24	" " " oiled only	11 60
24	" " " filled and varnished	12 70
25	" " " oiled only	11 60
25	" " " filled and varnished	12 70
26	" " " " " "	12 90
27	" " " " " "	13 20
28	" " " " " "	13 30
29	" " " " " "	14 80
30	" " " " " "	
31	" " " " " "	
1	Perfection window screens	1 65
2	" " "	2 00
3	" " "	2 25
4	" " "	2 55
A	New extension window screens	2 00
B	" " "	2 25
C	" " "	2 55
10	Plain adjustable screens	1 85
12	" "	2 10
14	" "	2 40

The above list is for Montreal and Ottawa. For Quebec and Maritime Provinces these prices will apply with freight equalized on Montreal or Ottawa.

For graining screen doors, 6 per cent. is to be added to the above prices. For odd sizes 30 per cent. is added. If larger than 3 x 7 ft., 6c. per sq. ft. is added, or proportion thereof, in addition to the extra 30 per cent.

The prices given for doors are for 3-in. stiles (except Nos. 29, 30 and 31, which are made only with 4-in. stiles). For 4-in. stiles add 20c. per doz. All doors 3 ft. wide should be made with a 4-in. stile, as the 3-in. stile is hardly strong enough for so large a door.

The terms are 3 per cent., 30 days from date of shipment; or if shipped prior to May 1 may be dated as May 1.

Spring hinges for screen doors for 1903 are quoted as follows: No. 20, $10.50 per gross; No. 5, $20 per gross; No. 10, $12.25 per gross; No. 120, $20 per gross; No. 50, $30 per gross; No. 51, $10 per gross.

COUNTING THE COST.

A CANADIAN fast Atlantic service has been the subject of frequent conversation in Canada for some time past. The necessity for such a line and the advantages accruing from it have been emphasized in the press and on the public platform, while statesmen and capitalists have been laying their heads together as to how the project shall be actually consummated.

Yet, with all the eagerness with which this important work is being regarded by patriotic Canadians, there is danger that some important features may be overlooked. To many people the great obstacle will simply be the construction and maintenance of the vessels of the line. They believe that when once the line, as such, is a complete fact, that then everything will be perfection.

But this is the twentieth century, and a few years witness changes which relegate the perfect system of to-day into the antiquated system of yesterday. The Fuerst Bismarck, launched a few years ago at a cost of $1,500,000, is far surpassed in speed and equipment by the Deutchland of 1900, costing $3,000,000. In 1857 the highest steam pressure maintained in the boilers of an Atlantic steamship did not exceed 60 lb. to the square inch. In the latest vessels, boilers are constructed to withstand a pressure of 225 lb. As the years advance the development becomes more rapid. The demand for economy of time is everywhere heard. Whether it be for the transmission of thought, as in the cable or telephone, or in the transmission of merchandise, as in the transportation facilities, increased rapidity is the great desideratum.

It becomes apparent, therefore, if Canadians are to establish a fast line, that they must be prepared to keep it fast or at least relatively fast. If the turbine principle within a few years revolutionizes ocean traffic, then must the Canadian line adopt that principle or fall far behind.

Emil Boas, the New York agent of the Hamburg-American Line, believes in the marvellous prospects of the turbine principle. He writes in a New York paper: "The application of the turbine principle to the propulsion of the steamships I regard as one of the most significant incidents in the history of naval architecture. Unless I am very much mistaken, it will revolutionize present methods. The remarkable speed developed in the ships in which it has been applied indicates that it will be generally adopted."

WHY IT WAS DELAYED.

"IT'S utterly impossible! that insert could never have been printed in Canada."

Such was the dictum of the post office authorities when The MacLean Publishing Company inquired why the Special Fall Number of The Canadian Grocer was being held at the Toronto post office. The insert, of course, was the beautiful piece of work advertising Ogilvie's Flour.

According to the post office regulations —and we are in entire sympathy with them—a publication, any portion of which is printed abroad, is denied the ordinary use of the mails.

The insert referred to was executed in its entirety on the company's premises and the Special Fall Number of The Canadian Grocer was sent out in complete accordance with the requirements of the postal authorities. The latter, on discovering the finely-printed Ogilvie page, promptly concluded that it could never have been produced in Canada, and accordingly stopped the carriage of the edition. Headquarters had to be got at over the long-distance telephone line, and as soon as the Deputy Postmaster-General was assured by the editor that the page was a Canadian product he immediately gave orders by wire to send the edition out in the usual way.

The incident, while unfortunate in one respect, is decidedly encouraging in another. It is a handsome compliment to Canadian artists and to the Canadian engraving and printing industry from men who are competent to judge. We must acknowledge that it is only a short time since the Canadian industry was far behind that across the border in the more modern and scientific branches of the art, but to-day we find, on the testimony of business men, that they can get work done quite as well and quite as cheaply here as in the United States.

The incident served to call forth many compliments to The Canadian Grocer. The paper is usually mailed on Thursday night, so that practically all of Quebec and Ontario get their copies the following day and the Maritime Provinces and Western Canada soon after. On the Saturday following the date of publication a number of letters and even telephone messages came from different parts asking what had become of the paper, and on Monday and the few following days, letters poured in from all over Canada complaining of the non-arrival of The Grocer. Nearly all of them had something to say complimentary to the paper, and showing in what high esteem it was held. A number enclosed another year's subscription, thinking possibly their term had expired, and requesting that all back numbers should be supplied. Finally, it became necessary to send out a printed circular to explain the delay.

FLURRY IN SHELLAC.

THERE has been quite a flurry in the shellac market during the past month, prices in New York having advanced in the last 10 days about four points and about 10c. during the past month, for the ordinary "tn" grade. Handlers there will not accept orders for delivery later than December 31 of this year. Cables from the primary market at Calcutta arrive daily announcing advances, but, of course, the New York or London market does not go up accordingly. The stocks on hand on these markets are important factors in determining the prices.

The present excitement in shellac is due to a decrease in the supply and an increase in the demand. From all accounts it is apparent that there will not be as large a quantity available for shipment from Calcutta this year, as in previous years. Added to this is a new feature in the shape of an unexpected demand from Russia which is taking larger amounts of shellac than usual from the primary market. This is causing the appreciation in prices, and if Russia continues to buy the gum at the rate she has been doing, there is no telling how high the price of the article will go.

THE OFFICE

DEVOTED TO THE OFFICE STAFF OF BUSINESS ESTABLISHMENTS.

BOOKKEEPING IN THE RETAIL STORE.

(By the Critic.)

MANY merchants owe their inability to succeed in business to a failure to keep a proper system of books. There is not a proper account kept of the cash receipts and disbursements, too often the ledger is not correctly posted, and sometimes no ledger is kept at all. Accounts are not rendered promptly, and often goods are sold without being charged or an entry made in the cash book. Carelessness everywhere is predominant in the bookkeeping part of the business, and carefulness flung to the winds. The business becomes neglected all around, all from the little leak commenced through not being systematic in the keeping of the books. And then we hear of an assignment or compromise.

The merchant should pay strict attention to the keeping of his accounts. Thus he is enabled at all times, quickly and correctly, to ascertain his reeeipts, his expenditures, the amount of cash he should have on hand, the exact cost of running his business, and the total profits he has made. It gets him into a systematic way of doing things which will much contribute to his financial success. His expenses can better be cut down and economy practised with greater success on all sides. Fewer temptations are presented to the clerks to be dishonest to their employer, and so correctly-kept books may be looked upon as a preventative of fraud.

The excuse of the merchant is that he is not able himself to keep his own books. If that is the case it will pay him to send to a business college his son or a bright clerk in his employ to learn bookkeeping. In a town or city this can be done with little expense to himself, by allowing the clerk an hour or two during the day to receive a lesson, or by sending him to the night classes of the college, where such classes exist. Anybody doing this is sure to be amply repaid for his pains.

OFFICE CHAT.

Never wait until the last minute to get things in shape for the fall campaign—it is time for all plans to be matured now, and all stocks to be ordered for immediate shipment.

Correspondents who consider themselves thoroughly competent to write upon the topic of bank advertising, either from observation or experience, are invited to correspond upon this subject with the editor of The Office. State, short and sweet, what you actually know.

The average man or woman is the best judge of what he or she wants to purchase, and, naturally, they want articles that are extensively advertised. Good business judgment suggests that the proper thing to do is to meet the demand by supplying the articles that are wanted.

There are all sorts of people in the world, and we suppose there are some who admire sensationalism and vulgarity in ads. But people of this sort bear about the same relation to the great mass of the public as the riff-raff in the top gallery of a theatre bear to the rest of the audience. As a rule, they have little money to spend, and are, therefore, not worth catering to.

HINTS FOR THE OFFICE.

Encourage your clerks. They get the blues the same as you do. Keep them contented by using them well, and by letting them know you appreciate their efforts.

Keep your office clean. Spend a few dollars for paint and varnish. Make your business appear prosperous and respectable. This is a business drawing policy.

Letter Writing—Be brief. Be interesting.

Delay in answering your correspondence means a loss of business as well as a source of annoyance to all concerned.

A sensible way to do in signing your name is to write so that others can at least make a close guess as to what it is.

An incomplete letter is worse than a sore thumb. Correspondence should be carefully read, and all points of inquiry covered in reply.

SET OF OFFICE RULES.

The office manager of a large manufacturing concern recently handed the following to each of his clerks:

We shall deserve well of the company if we meet for work at 8.30 in the morning, take half an hour for luncheon, and so thoroughly clear up all the pressing affairs of the day that we can quit at 5 o'clock.

Find the easy, the quick and the safe way to do things. By this method study how to accomplish 10 per cent., or even 25 per cent. of results for a given expenditure of strength.

Let nothing go over till to-morrow that ought to be disposed of to-day. Let no customer or possible customer expect to hear from us in the morning, or in the next mail, and be disappointed.

In all our intercourse with customers (each one of whom is almost our employer), with all possible customers (who may become almost our employers), and with the public generally, let us be absolutely polite, accommodating and helpful. In letters a very little of this goes a great way; in personal contact it is intolerable to be anything else.

Over the telephone let us be especially polite, so as to bring ourselves in contrast with many telephone operators, office boys and others, who seem to wish to insult you because they are at a safe distance.

Study your work so as to constantly make it quicker, safer, better. Please go to your chiefs with suggestions for the improvement of our service. Please come to me with them.

OFFICE ACCESSORIES.

The Lamson Consolidated Store Service Co. are introducing their new "Ideal" cash carrier. This carrier is entirely new. It is noiselesss, easily operated, material and workmanship of the best.

The Stimpson Credit Register system is proving very popular with its patrons. This system does away with the system of entering sales on blotter, transferring to journal, from journal to ledger, and from ledger to statement. It reduces the transaction to a single entry.

Brown Bros., wholesale manufacturing stationers, are showing 27 new styles of wood-base inkstands with the "Peerless non-scratching rubber feet." This original improvement prevents costly office furniture and library desks from becoming scratched. The designs are in gold, black, mahogany and birds-eye maple.

MONEY IN PATENTS.

Brown—What puts you in such good humor this morning?

Robinson—I've just got a patent for my new ink eraser. I wouldn't take $50,000 for it.

Brown—Didn't you get a patent last year for inventing an indelible ink?

Robinson—I did and I sold it for $30,000, and now I've invented an eraser that will even remove writing done by my own indelible ink.

Brown—What are you going to do next?

Robinson—I'm going to invent another indelible ink that cannot be erased by my eraser. I tell you there is money in this patent business if you only get about it in the right way.

Trade Marks and the Laws Governing Them.

BY EDGERTON R. CASE, Patent Solicitor, Toronto.

THE subject of trade marks is a most interesting, and, to manufacturers and merchants, a vital question. All persons engaged in trade have a desire to conserve unto themselves the fruits of their legitimate efforts. From very early times men have made use of seals and other emblems to indicate ownership. In fact, the use of these devices is coeval with the birth of traffic. Without a recognized and well-established law by means of which men are guaranteed the exclusive use of marks or devices to distinguish their goods from those of another manufacturer, there would be no guarantee of a manufacturer receiving adequate returns for money he would invest in his business. When a trade mark has been used for many years by a manufacturer or a merchant, and indicates to the the public that the article it is attached to is of first-class quality, this trade mark is a valuable asset. Not only have men from early ages marked the fruits of their toil with their own paricalar device, or mark, but they also have marked, or branded, whole flocks and herds, so as to indicate to whom the animals belonged. As is well known, this custom is very common on our sheep ranches and among the Indians in the Northwest.

Among the ancient Egyptians, Greeks and Romans sign boards were extensively used, which became distinctive proprietary marks. In Herculaneum and Pompeii have been discovered many different signs to indicate the occupation of different persons who lived in those cities. Thus there have been found a goat, the sign of a dairy; a mule driving a mill, the sign of a baker; and, at the door of a school, the not very seductive sign of a boy undergoing a birching at the hand of the master. In the former of these cities, at the door of a shoemaker was painted a Cupid carrying a pair of ladies' shoes, one on his head, the other in his hand. As is well-known, 1,000 years or so ago very few people could read; at least, this was an accomplishment that the common people did not possess, and, as a merchant sold more goods to illiterate people than he did to educated people, he had to avail himself of rebuses by means of which he made his name hnown. For instance, a hare and a bottle stood for Harebottle, and two cocks for Cox. As it is well known, Luther was generally represented by the symbol of a swan, and hence "The Bible and Swan" was the characterstic sign of an inn in honor of Luther.

Watermarks on paper are also used as proprietary signs. It may not be generally known, but a sort of watermark is that shown in the securities issued by the United States in which threads of various-colored floss silk are incorporated into paper during the process of its manufacture. Such threads constitute proprietary marks of the Government, and it is a highly penal offence for any person to have such paper, illegally, in his control or possession. A very curious case was tried many years ago, relative to a will. It was believed that the will was false, but, as it was so well executed, this belief could not be substantiated. While the counsel for the plaintiff was studying the document carefully one night, he happened to hold it between his eyes and a candle, and immediately discovered that the date the paper of the will was manufactured in was shown by a watermark. As this date was subsequent to the execution of the alleged will, its illegality was easily proven.

It is curious that the Chinese excel in the institution of commercial guarantee by means of trade marks. Nearly all the goods exported from China are sealed by bands of paper bearing the particular mark of the exporter. Some time ago a cargo of tea arrived at London from Canton, but what was the amazement of the purchasers to find that the boxes were filled with rice straw! The vessel and cargo were forthwith sent back to China. Upon the arrival of the ship at that port, the Hongs were immediately assembled and each one recognized his own mark. It appears that the men who were engaged to load the tea were thieves, and, in place of loading the proper chests on to the vessel, they shipped same to a nearby island and substituted the chests filled with rice-straw in place thereof. Notwithstanding the loss, and in order to maintain their reputation for integrity, the Chinese merchants made it good.

The world-wide importance of trade marks has been recognized by the leading countries in the world from the fact that they joined together, and, on March 20, 1883, at Paris, France, formed what is well known as the International Union for the Protection of Industrial Property.

Manufacturers, and those who use trade marks, would save themselves a great deal of unnecessary trouble and expense if they were to make diligent inquiry as to the appositeness of a particular device they wish to adopt as distinctive of articles in which they deal. It is not every word or name that can be registered as a valid trade mark. The device used must not be descriptive of the goods. For instance, in ex. p. Kenyon decided September 9, 1902, the words "Catarrhal Jelly" as a trade mark for a jelly-like remedy for catarrh were held to be descriptive and not registerable. In case an application is made to register a trade mark that resembles one already registered, this application would be rejected. This was the case in ex. p. Grossmith decided September 2, 1902. Grossmith wished to register the word "Florodora" for a particular class of goods, but was refused registration in view of the prior registered mark "Floridena." It is well to point out here that before a device can exist as a trade mark, it must be attached to a vendible commodity.

The protection afforded a manufacturer by a valid trade mark does not extend only to prohibiting the use by any person of the same mark in connection with the same class of goods, but it also protects him from unfair competition, as is set forth in the following case: Fuller v. Huff, et al, decided August 21, 1900.

1. Term "Health Food" means healthy food or health-producing food, is therefore descriptive of quality, and cannot be a technical trade mark, either with or without the word "Company" any more than the words "Nutritious Wine" could be a valid trade mark.

2. The law of unfair competition is that when a mark, name, or phrase has been so used by a person in connection with his business or articles of merchandise as to become identified therewith, and indicate to the public that such articles emanate from him, the law will prohibit others from so using it as to lead purchasers to believe that the articles they sell are his, or as to obtain the benefit of the market he has built up thereunder.

3. The courts in considering the use by competitors of the name under which a rival has previously gained a business reputation, although the name is not strictly a trade-mark, have attached great importance to long-continued and exclusive use, and have demanded a higher order of commercial integrity, and have frowned upon all filching attempts to obtain the reputation of another.

4. If a trade-name has been so identified with the business of a manufacturer as to inform the public that the name upon goods means that they are the product of that person, and another adopts and displays the name, it is not material that he has not also adopted the particular dress in which his predecessor has presented his goods.

HAMILTON, ONT.

BUSINESS CHANGES.

DIFFICULTIES, ASSIGNMENTS, COMPROMISES.

ANNE CHAPMAN, hardware merchant, Hastings, Ont., is offering to compromise.

A demand of assignment has been made on Joseph Filion, contractor, Montreal.

Wilkes & Michaud are the curators of Henderson & Lovelace, coal dealers, of Montreal.

Mathias Rousseau, general merchant, of Warwick, Que., has assigned to Lamarche & Benoit.

Joseph E. Metson, painter, Galt, Ont., has assigned to A. E. Milligan, Galt, and the creditors met on November 15.

Mrs. P. M. Cauchon, general merchant, Etchemin, Que., has assigned, and Alf. Lemieux is provisional guardian.

A consent of the assignment of The John McArthur Co., dealers in paints and oils, Montreal, has been filed, and they have assigned,

A. M. Mowat & Co., late general merchants, Dauphin, Man., have assigned to C. H. Newton, and their creditors will hold a meeting on November 14.

The creditors of the estate of C. T. Bailey & Co., general merchants, Qu'Appelle, Assa., are requested to file claims with H. T. Harmer, assignee, Qu'Appelle.

PARTNERSHIPS FORMED AND DISSOLVED.

Courtois & Hemond, sash and doormakers, Montreal, have dissolved.

Bowman & Sparling, agricultural implement agents, Roland, Man., have dissolved.

Wm. Lipsett, blacksmith and wagonmaker, Staffordville, Ont., has admitted L. Lipsett into partnership.

Pennell & Haldenby, agricultural implement agents, Teeswater, Ont., have dissolved; M. S. Haldenby continues.

J. W. Bishop & Co., contractors, of Montreal, have dissolved and ceased to do business in the Province of Quebec.

E. Picher & Cie, mill supplies, etc., Quebec, have dissolved and the business is continued under the style of Picher & Paquet.

SALES MADE AND PENDING.

R. J. Nesbitt, tinsmith, Brighton, Ont., is advertising his business for sale.

J. A. Carnett, harnessmaker, Wapella, N.W.T., has sold out.

David Poulter, grocer and blacksmith, Moray, Ont., is selling out.

D. McNaughton, blacksmith, of Varna, Ont., is advertising his business for sale.

The assets of Adrien Barrette, general merchant, St. Tite, Que., are to be sold.

Thomas Gilpin, planing miller, Wiarton, Ont., is advertising his business for sale.

Henry Brookbank, blacksmith, Hartney, Man., is advertising his business for sale.

Edwin Henry, general merchant, Waskada, Man., is advertising his business for sale.

The assets of J. D. Lalonde & Co., general merchants, St. Benoit, Que., are to be sold.

W. Misner, plane and shinglemiller, of Springfield, Ont., is advertising his business for sale.

GOOD VARNISH

is the result of three things :

Good Materials, Proper Appliances, Skill in making.

THE SHERWIN-WILLIAMS VARNISHES are good varnishes in every respect. They are carefully made from specially selected and directly imported gums. The oil used in them is old-tanked, pure, refined oil. The appliances—kettles, filters, storage tanks, etc.—are all of the latest improved kind. The men who make them are trained workmen who know how to make good varnishes—who have been brought up in the varnish business.

There are no other varnishes that are so well known, that please the painter so well, or sell so well.

If you want good varnishes—varnishes that are ready sellers and money-makers—write to-day for price list and full information.

THE SHERWIN-WILLIAMS CO.

PAINT AND VARNISH MAKERS.

CLEVELAND.

CHICAGO, NEW YORK, NEWARK, MONTREAL, BOSTON, TORONTO, SAN FRANCISCO. KANSAS CITY

The assets af Alp. Fontaine, general merchant, St. Alexis de Montcalm, Que., are to be sold.

The estate of Henry Short & Sons, dealers in sporting goods, Victoria, B.C., are selling out.

The stock of G. Dumas, general merchant, St. Gervais, Que., was sold at 63 cents on the dollar.

The assets of C. D. Fontaine & Co., general merchants, Shawenigan Falls, Que., are to be sold.

The assets of the estate of J. Pineau & Co., general merchants, Bic, Que., are to be sold on November 19.

CHANGES.

Wurtele & Jenssen, contractors, Quebec, have registered.

H. & P. Corbeille, builders, have registered at Montreal.

E. Gariepy & Co., carriagemakers, of Montreal, have registered.

Arthur Laurin & Co., painters, etc., of Montreal, have registered.

D. Chevier & Co., masons, St. Cunegonde, Que., have registered.

W. Clendenning & Sons, stove manufacturers, Montreal, have registered.

Joseph Desforges & Co., hardware merchants, Montreal, have registered.

A. Soper & Co., blacksmiths, Aylmer, Ont., are succeeded by Price & Son.

Wm. Bradshaw, general merchant, of Bickford, Ont., has sold out to M. Webster.

R. B. Cockerton, agricultural implement agent, Dauphin, Man., has sold his Gilbert Plains branch to John R. Eagle.

FIRES.

Blue & Deschamps, Rossland, B.C., had their sawmill damaged by fire; partially insured.

DEATHS.

Peter Davidson, builder, of Freelton, Ont., is dead.

Jean T. Couillard, of Couillard, Fils & Co., general merchants, Rimouski, Que., is dead.

THEIR ANNUAL MEETING.

The annual convention of the travelling staff and leading officials from the several branches of The Canada Paint Co. will commence, as usual, at the head office and works of the company, William street, Montreal, on Monday, November 17, and will be continued until the "orders of the day" are all disposed of.

The personnel of the travelling staff of this Canadian company is of a very high order. They are all trained salesmen and the fact that the business of The Canada Paint Co. is continually expanding is to be attributed, in no small measure, to their indomitable perseverance and push. Without being unnecessarily obtrusive, and being backed up by first-class stock, they seem to capture the business, compelling The Canada Paint Co. to again increase their plant materially for the coming season.

PROPOSED LOCOMOTIVE WORKS.

IT is reported that the promoters of the locomotive works, which it is proposed to establish at Longue Pointe, Montreal, are being backed by the United States Locomotive Co., the president of which is S. R. Callaway. It is also said that the Kingston company will be merged and incorporated with the American organization.

Some months ago, during a visit to Montreal, Mr. Callaway made an inspection of the various suburbs of the city on the lookout for a suitable site for the works. Two hundred and fifty acres were purchased at Longue Pointe for $80,000, and this area, it is expected, will give sufficient room for a plant to be erected which would be capable of turning out 1,000 engines a year. The company will also manufacture for export to a considerable extent, and as good shipping facilities can easily be arranged for, the site chosen for the works is looked upon as excellent.

The company will be capitalized at $1,000,000, and about 1,500 men will be given employment. When in operation these works should be one of the largest enterprises which have been started in Canada for some years.

A TRIP TO THE WEST INDIES.

"To the British West Indies, via Halifax," is the title of a booklet recently issued by Pickford & Black, of Halifax, N.S. It is the story of a trip last winter by a party of Canadians on the steamship Dahome of the Pickford & Black line, and is full of illustrations of the different points visited on the trip. The book will be mailed for the asking. Mention THE CANADIAN GROCER.

STEEL FOR THE KING.

The tool steel manufactured by Jonas & Colver, of Sheffield, Eng., has apparently been found unexcelled by the British War Office, to judge from the following extract just to hand from a Sheffield newspaper: "The order for the whole of the tool steel required by His Majesty's arsenals and rifle factories, for a period of three years, has for the third time been placed by the War Office with Jonas & Colver, Limited, Continental Steel Works, Sheffield."

As the tool steel used for army purposes must necessarily be of the highest quality to be procured, the giving of the contract for a third time to this firm reflects great credit on their steel, as well as on themselves for keeping it continually up to the standard. Jonas & Colver are represented in Canada by William Abbott, Montreal.

MACHINERY AND ELECTRICAL SUPPLY DEPARTMENT

MACHINERY NOTES.

GEO. H. EVANS, manager of E. Leonard & Sons' machine works, St. John, N.B., has purchased 150 acres of land at Grand Bay, where he intends erecting a moulding shop.

L. Girard & Frere, machinists, Montreal, have dissolved.

It looks as if the miners of The Nova Scotia Steel and Coal Company would go on strike.

A 20-inch "Crosby" upright drilling machine, including chucks, was shipped to The Walker Foundry, Belleville, Ont., by H. W. Petrie, Toronto.

The Orangeville Electric Light and Power Co., Limited, Orangeville, Ont., have sold out to C. W. Watson, who will take possession on December 1, 1902.

The Office Specialty Manufacturing Co. have added to their plant in Newmarket a dimension saw table. This machine was installed by H. W. Petrie, Toronto.

The Clarksburg Foundry and Machine Shop has been purchased by Tait & Dick. They intend to erect a new moulding shop in connection with the machine industry.

The Gee Electrical Machine Company, Toronto, has assigned to E. R. C. Clarkson. A winding-up order has been granted and Mr. Clarkson is the permanent liquidator.

Guelph is to have a new iron and steel industry. A number of manufacturers in Montreal and New York State have organized a company to be known as The Page-Hersey Iron and Tube Company, with a capital of $500,000. Their head office and foundry will be in Guelph.

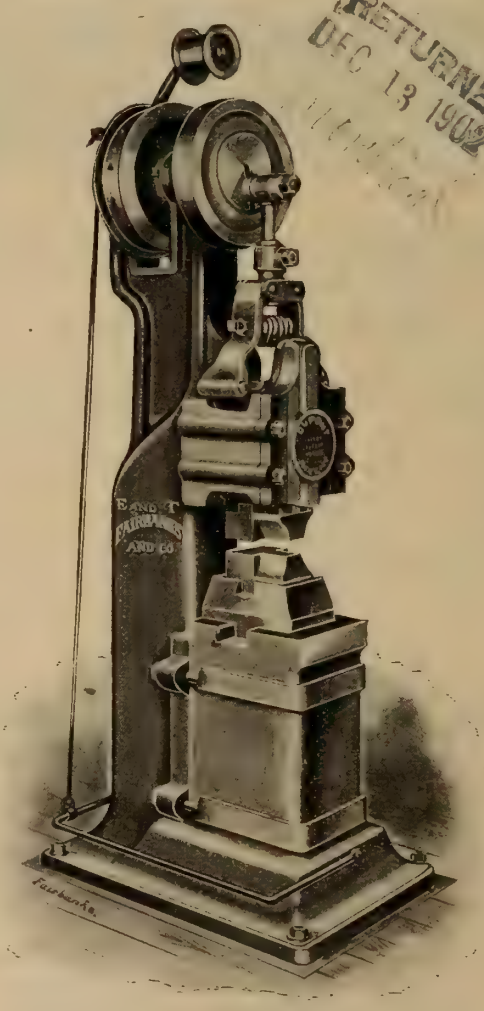
The Toronto Machine Tool Co., 155 George street, Toronto, have purchased from H. W. Petrie, Toronto, a No. 1 power press, manufactured by The G. A. Crosby Co. This press is fast becoming popular in Canada, where it is now being made.

A NEW LIST.

H. W. Petrie, Front street west, Toronto, is supplying the trade with a monthly stock list of machinery. It is a very valuable book for every business man who is at any time buying new machinery. It gives a list of nearly all kinds of machinery carried in stock by this firm.

THE FAIRBANKS POWER HAMMER.

THE FAIRBANKS CO. are presenting a new power hammer that is especially adapted for the sort of work required in carriage factories, car works, edge tool and general shops. The hammer, as it will be seen by the accompanying illustration, is operated by an adjustable crank, the crank-pin sliding



RETURNED DEC 13 1902

in a groove in the crank plate, allowing the operator to lengthen or shorten the stroke at will. Motion is applied to the head or ram, by means of a circulating rod in a sleeve or collar supplied with a large set screw, or, as in the large sizes, a clamp to hold the rod in position, and to this sleeve are hinged two side arms, these in turn being connected to the ram by metal links.

By the use of a steel spiral spring, carefully adjusted between these arms, the force and weight of the blow are many times multiplied, but with an elasticity that removes all danger of breakages and at the same time the jar is so thoroughly cushioned that it is not noticeable in the machine when the blow is struck. The head strikes a quick, sharp blow at the rate of 250 to 500 blows per minute, according to the size of the machine, and instantly gets away from the work, thereby avoiding any chilling of the stock. The entire working parts of the hammer are at the top, in full view of the operator, every part is readily accessible, being easily operated by inexperienced men. Raising or lowering the hammer is accomplished by loosening the bolt and when at the required place, tightening again.

Another feature claimed for the machine is the small amount of power required to run it, and a saving of power means money saved. The entire machine is constructed with a view to durability, the best of material being used throughout.

In writing for catalogues, address The Fairbanks Company, Montreal; also kindly mention "Hardware and Metal."

NEW MACHINERY TO CANCEL STAMPS.

There have recently been installed in the Montreal post office two of the latest patent automatic stamp-cancelling machines. The machines are a valuable addition to the post-office equipment and will expedite considerably the work of getting the out-going mail ready for distribution. They work at an average speed of about 1,000 letters per minute, which is more than twice as fast as the old method. The letters are made up into bundles and placed in the machine, through which they are carried in a steady stream past the cancel stamp.

Work is progressing rapidly on the Deseronto-Napanee extension of the Bay of Quinte Railway. The first train will probably run about December 1.

DEERING COMPANY'S FACTORY AT HAMILTON.

Its Extent and Importance—Construction Being Actively Pushed.

THIS week a representaive of "Hardware and Metal" paid a visit to the new buildings of The Deering Division of The International Harvester Company, now in course of erection in Hamilton, Ont. It may be said, not even excepting the buildings now being erected for The Otis Elevator Company at the foot of Victoria avenue, that it is to the construction of the works of this company now under the hands of some of the best known contractors of the city of Hamilton, that the attention of the industrial Hamiltonians is chiefly directed. This enterprise may, indeed, well rouse their interest and enthusiasm, for it promises more employment, perhaps, for the laboring classes of the "Ambitious City" than any factory yet constructed.

The location of The Deering plant at the foot of Sherman ave., near the bay, was chosen chiefly on account of shipping facilities and for its proximity to the smelter and steel works of The Hamilton Iron and Steel Company, from whom, it is understood, The Deering Co. will derive much of the iron utilized in their factory. This latter company will greatly enlarge their capacity in the near future; in fact, they are already much pressed to produce the desired output and are making arrangements to add a new furnace to their steel factory in a couple of weeks.

The plant, comprising in all 15 acres, was annexed to the city, as Alderman Findlay, contractor for the roofing, etc., explained, by orders of the council, that the company might be granted exemption from taxes. No inducements, however, in the shape of bonuses, were offered. The facilities which Hamilton offered for the procuring of pig iron and other material was the chief attraction to the company.

The superintendent of the Canadian division of The Deering Company is Mr. B. A. Kennedy, while the superintending architect, is Mr. T. T. M. Brooks, both of Chicago. The latter paid a few days' visit to the works last week, but the main supervision is entrusted to the inspector, J. Zeitel, who, for 12 years, has been enaged in the services of The Deering Harvester Company. The local architect is E. P. Patterson, who has designed the buildings of many of the leading industrial concerns of Hamilton.

Operations on the buildings began on July 15, the necessary excavations being performed by John Dickinson & Son, who, when their contract is completed, will have removed approximately 15,000 cubic yards of earth at the charge of 35c. per cubic yard. Since that time about 375 men in all have been constantly employed at construction. Progress has been rapid and many of the chief buildings are much advanced. The roofing of the wood shop has commenced, while Stamp & Co. are already engaged in painting this building. On the grey iron building the iron trusses are now being hoisted up by a derrick and engine, to give support to the roofing. The factory is also well under way. The work of construction of the forge, situated between the grey iron building and the wood shop has just commenced, while preparations are being made for the erection of the malleable iron foundry. Operations for erecting the warehouse will commence next week.

The total number of buildings will be in the neighborhood of 20. The largest will be the malleable iron foundry, which will be three storeys high and 100 feet x 86 feet in dimensions. This foundry will contain 16 annealing ovens, of huge proportion, and like the grey iron foundry, is crowned by steel trusses furnished by The Hamilton Bridge Co., which afford ample provision for ventilation and lighting. Altogether there will be 66,000 lights, or 60 tons of glass in the building. The grey iron building, consisting of two storeys and a basement, will be 555 x 86 feet in dimensions, the wood room, 250 x 86 feet, the forge, 260 x 86 feet and the warehouse, 500 x 86 feet. On the south side of the grey iron factory is the cupola house, 56 x 36 feet, two-storeys in height, with steel and concrete arches, fire-proof, of course.

The heating of these buildings will be both by hot air and steam, the foundries being heated by steam and the factories and wood building by hot air. The fan employed in the case of the hot air in the winter time will be used for ventilation purposes during the summer. The company have their own sewage, which is composed of brick and constructed at the cost of $31,000.

A sub-station, 60 x 90 feet in dimensions, will be erected between the foundries for the generation of electric power. This will be, for the most part, transmitted from Decew Falls, although arrangements are being made to obtain 3,500 horse-power independent of this source. A pump-house, 60 x 90 feet in dimensions, containing six duplex pumps and ten boilers, will secure sufficient fire protection. This is, of course, to be located close to the bay.

The plumbing of the buildings is to be furnished by Purdy & Mansell, of Toronto, who closed the contract with the firm last week. The buildings will be provided with the automatic sprinkling system. The most up-to-date devices are utilized in every part of the construction.

It is estimated that 3,000,000 of brick will be required for the new buildings. George Webb, Hamilton, has the contract of the mason and brick work. For the carpenter work, furnished by Halliday and The Campbell Bros., over 3,000,000 feet of lumber will be necessary. This is supplied chiefly by McAllister & Thompson, of Hamilton. The roofing, supplied by Alderman Findlay, will be of about 1,000 squares of asbestos and about the same number of gravel roofing in addition to 300 squares of Carey's asphalt manganese roofing. The contract of painting and glazing of the malleable iron foundry is given to Peter Thompson, while Stamp & Co. have received the contract for the remaining buildings.

The machinery will be placed in the buildings as soon as they are closed in. Much of this will be derived from the company's factory in Brockville, which will now be transferred entirely to Hamilton. This means the loss to Brockville of employment for 250 men.

Already 2½ miles of railway are laid in the yards, and, when completed, the tracks will consist of about 10 miles of radial ways. Tracks will enter on both sides of the warehouse. Entrance will be afforded to both the T. H. & B. and Grand Trunk railway companies. A pier 1,200 feet in length will effect an opening to shipping transportation by water.

Although it will be long before all the buildings projected will be completed, Mr. Zeitel thinks that by March 1 the company will be able to employ between 1,000 and 1,200 men. This will probably mean the egress of many men to the east of the city, though the radial railway is not very far distant from the location of the plant.

PAINT, OIL AND BRUSH TRADES

W. H. EVANS ON PURE AIR.

AT a recent meeting at the Windsor Hotel, Montreal, of the Canadian Railway Club, a paper was read by Mr. Cowan upon "Car-Cleaning." Mr. W. H. Evans, of The Canada Paint Co., made the following remarks which were well received by the members present, and will appeal to all who travel by rail:

Although I am proud to say I am a member of the "Canadian Railway Club," I am not exactly a railroadman, but, as an old commercial traveller:

> I've travelled about a bit in my time,
> And of cars I've been in a few.

As regards the outside of cars and painting, of course, I have very little to add to the interesting discussion. I must, however, congratulate Mr. Cowan on his valuable paper, and quite agree with him as to "what is worth doing at all is worth doing well," and Mr. Rosevear's remarks are also clearly to the point.

Leaving the discussion to you gentlemen, who are practical, I will, therefore, venture to speak in connection with the cleanliness and comfort of railroad cars. I do not think altogether that the stuffiness and mustiness of cars, to a great extent, is owing to the defective cleaning, but it is largely due, as Mr. Rosevear says, to the people who patronize the cars. I have seen passengers get on the steamers at Liverpool, who have perhaps come across the continent of Europe, and during their long journey have never had a bath. They land here, and perhaps proceed further without a bath. This is one class who are, perhaps, the victims of circumstances. They feel comfortable, like the Hottentots, in their coat of dirt and do not care to shed it. Coming nearer home there are cars, not far from Montreal (I won't mention one road or the other) really, to get into them about four o'clock in the morning is something like getting into the "Black Hole" of Calcutta, and the atmosphere is something fearful. I think, as Mr. Rosevear says, the lighting question should be a subject of debate, and that ventilation should also be a question for papers, because the feeling to-day is for air, and lots of it, and if cleanliness be next to godliness, a ride in a nice, sweet car should convey one to "the realms of bliss," and in the "poetry of motion." —(Hear! Hear!)

I think there is too much plush in the better class of coaches, that more leather or any sanitary covering of that type should be used. Wicker work and rattan should largely displace a great deal of velvet and fluffy furnishings, and that partitions and divisions, while very ornamental, should be done away with as far as practical, making cleanliness and disinfecting much easier, thus improving the ventilation and diminishing the number of "cozy corners" for the propagation of microbes, bacilli germs, and other bacteria of the times "too numerous to mention."—(Applause.)

TO FILL WALLS, ETC.

ACCORDING to an exchange some try to decorate newly plastered walls when they are so green that they cannot be done well with anything, though they may appear to be dry.

When rough or brown plaster, and especially that made without lime, has so much suction that it cannot be easily coated without first preparing, we advise using a filling prepared as follows:

Dissolve one-half pound sal soda in one-half gallon of hot water; when the soda is dissolved, add one-half gallon of genuine boiled linseed oil, stir well, then add to the mixture another gallon of warm water, and lastly to the whole mixture, one pint of good vinegar.

It is necessary to have the proportions right to keep the oil and water from separating, and to keep the oil from coming through the kalsomine. It will be seen that this preparation, ready for use, costs less than 15c. a gallon. It should be applied freely to rough walls, and should stand at least 12 hours, and longer, if convenient, before applying water color. It is also adapted for use on smooth walls with suction, but more especially for rough walls. It may also be used over kalsomine where one coat has been applied and did not produce good work.

A good coat of paint will stop a water stain as a rule; a heavy coat of good varnish is quicker; some have resorted to laying foil or gold leaf on small creosote stains.

TURPENTINE OPERATORS PLEASED.

The past year is regarded as having been very good for the turpentine operators of Mississippi, as both turpentine and rosin have maintained uniformly good prices—turpentine averaging 33c. per gallon and rosin $1.75 per barrel of 280 lb.

On the line of the Mobile, Jackson and Kansas City Railway, from Mobile to the present terminus at Wingate, there are 26 stills, each producing an average af 16 barrels of turpentine and 48 of rosin per day. The 26 distilleries make 416 barrels of turpentine a day, or 12,480 per month, a grand total of 99,840 barrels for the season. There is an average of 50 gallons to the barrel, so that the grand total for the 26 stills will this year easily foot up to 4,992,000 gallons. Turpentine has been steady at an average of 33c. per gallon all this season, so the cash consideration for this important product of the pine forests nets $1,647,360, or probably about $63,360 to each distiller.

There is a persistent story, as old as the distilling of turpentine, that the receipts from rosin pay the entire expenses of the naval stores manufactory. If this be true the gentlemen engaged in that business have enjoyed a profitable season; and if it be not the fact, they have made a profit entitling them to congratulations.—Paint, Oil and Drug Review.

HINTS AND SUGGESTIONS.

To take the yellow tinge out of white lead paint, add a very little prussian blue.

As a general thing the brushes are an index to the worth of the painter. The better the brush the better the painter.

The paint that for the longest time will put off the necessity of repainting is, in the nature of things, the best and most economical.

Linseed oil is a fatty, unctuous vegetable oil, and is said to be the most insoluble of all the oils; hence its use for preserving and in painting outside exposed surfaces.

Decoration is one of the greatest factors in the civilization of nations. In fact, there was no civilization nor any attempt by man to raise above mere animal life, until he became a decorator.

PAINT AND OIL MARKETS.

MONTREAL.

TURPENTINE and linseed oil again form the interesting features of the week, each article having been reduced in price another cent. There has been no change of great importance in the position of either the above staples, the growing abundance of supplies on this market, coupled with a demand that is of not much more than moderate proportions, being accountable for the drop in price. The movement in the general

list of paints, while not as brisk as that of the previous week, has, nevertheless, been quite satisfactory. Some jobbers have reduced prices on white lead, making the base price $4.75 in ton lots and $4.90 in less quantities. We quote :

GROUND WHITE LEAD.—Best brands, Government standard, $5.15 to $5.25 ; No. 1, $4.77½ to $4.87½ ; No. 2, $4.40 to $4.50 ; No. 3, $4.02½ to $4.12½ ; No. 4, $3.65 to $3.75, all f.o.b. Montreal. Terms, 4 months, or 3 per cent. off for cash in 30 days.

DRY WHITE LEAD.—$5.25 in casks ; kegs, $5.50.

DRY WHITE ZINC.—Pure dry, in casks, 6¼c.; in 100-lb. kegs, 6¾c. No. 1 zinc, in casks, 5¼c.; in 100-lb. kegs, 5¾c.

WHITE ZINC (ground in oil)—Pure, 25-lb. irons, 8c.; No. 1, 7c.; No.2, 6c.

PUTTY.—We quote : Bulk, in bbls., $1.90 per 100 lb.; bulk, in less quantity, $2.05 ; bladders, in bbls., $2.25 ; bladders, in 100 or 200-lb. kegs or boxes, $2.40 ; in tins, $2.55 to $2.65 ; in less than 100-lb. lots, $3 f.o.b. Montreal, Ottawa, Toronto, Hamilton, London and Guelph. Maritime Provinces, 10c. higher, f.o.b. St. John and Halifax.

ORANGE MINERAL.—Casks, 7c.; 100-lb. kegs, 7¼c.; smaller quantities, 8¼c.

RED LEAD.—Genuine red lead, in casks, $4.50 ; in 100-lb. kegs, $4.75 ; in less quantities, $5.75 per 100 lb. No. 1 red lead, casks, $4.25 ; kegs, $4.50, and smaller quantities, $5.50.

LITHARGE.—Ground, casks, 5c. ; less quantities, 5½c.; flake litharge, casks, $5.25 ; smalls, $5.75 per 100 lb.

LINSEED OIL.—Raw, 66c.; boiled, 69c. In 5 to 9 bbls., 1c. less. Terms, net cash in 30 days. Delivered in Ontario, between Montreal and Oshawa, at 2c. per gal. advance.

TURPENTINE.—Single barrels, 76c.; 2 to 4 barrels, 75c. Terms, net cash in 30 days.

SHELLAC VARNISH.—Pure white, $2.35 to $2.45 ; orange, $2.25 to $2.35.

MIXED PAINTS.—$1.20 to $1.45 per gallon.

CASTOR OIL.—8¾ to 9¼c. in wholesale lots, and ½c. additional for small lots.

SEAL OIL.—48 to 50c.

COD OIL.—35 to 37½c.

PARIS GREEN.—Petroleum, bbls., 16¾c. per lb.; arsenic kegs, 17c.; 50 and 100-lb. drums, 17½c.; 25-lb. drums, 18c.; 1-lb. packages, 18½c.; ½-lb. packages, 20½c.; 1-lb. tins, 19½c.; ½-lb. tins, 21½c. f.o.b. Montreal. Terms : 3 per cent. 30 days, or four months from date of delivery.

TORONTO.

Business in paints and oils has been steady during the past week. Putty is moving very fast and the price is firm. There is no change to note as regards quotations. We quote :

WHITE LEAD.—Ex-Toronto, pure white lead, $5 to $5.25 ; No. 1, $4.62½ to $4.87½ ; No. 2, $4.25 to $4.50 ; No. 3, $3.87½ to $4.12½.; No. 4, $3.50 to $3.75 in packages of 25-lb. and upwards ; ½c. per lb. extra will be charged for 12½-lb. pkgs.; genuine dry white lead in casks, $5.02½.

RED LEAD.—Genuine, in casks of 560 lb., $5 to $5.12½ ; ditto, in kegs of 100 lb., $5.50 ; No. 1, in casks of 560 lb., $4 ; ditto, kegs of 100 lb., $4.50.

LITHARGE.—Genuine, 6 to 6½c.

WHITE ZINC.—Genuine, French V.M., in casks, $6 to $6.25 ; Lehigh, in casks, $6.00.

SHINGLE STAIN.—In 5-gallon lots, 60 to 75c. per gallon.

PARIS WHITE.—90c. to $1 per 100 lb.

WHITING.—65c. per 100 lb. ; Gilders' whiting, 80c.

GUM SHELLAC.—In cases, 35c.; in less than cases, 40c. per lb.

LIQUID SHELLAC.—Pure orange, in bbls., $2.25 to $2.35 ; white, $2.35 to $2.45 per gal. ; in less quantities, 10c. extra.

PUTTY.—Bladders, in barrels, $2.25 ; bladders, in 100-lb. kegs, $2.40 ; bulk in bbls., $1.90 ; bulk, less than bbls. and up to 100 lb., $2.05 ; bladders, bulk or tins, less than 100 lb., $2.90.

PLASTER PARIS.—New Brunswick, $2 per barrel.

PUMICE STONE.—Powdered, $2.50 per cwt. in bbls. and 4 to 5c. per lb. in less quantity ; lump, 10c. in small lots and 8c. in bbls.

LIQUID PAINTS.—Pure, $1.20 to $1.40 per gallon ; No. 1, $1.10 per gallon.

BARN PAINTS.—65 to 70c. per gallon.

CASTOR OIL.—English, in cases, 9 to 9½c. per lb. and 10 to 10½c. for single tins.

LINSEED OIL.—Raw, 1 to 2 bbls., 67c.; boiled, 70c.; 3 to 5 bbls., raw, 66c.; boiled, 69c.; 6 to 9 bbls., raw, 64c.; boiled, 66c. delivered. To Toronto, Hamilton and London, 2c. less. All quantities of 10 bbls. and over of linseed oil sold only f.o.b. Toronto, Hamilton, London and Guelph.

TURPENTINE.—Single bbls., 78c.; 2 to 4 bbls., 77c. delivered. Toronto, Hamilton and London, 1c. less. For less quantities than barrels, 5c. per gallon extra will be added, and for 5-gallon packages, 50c. and 10-gallon packages, 80c. will be charged.

GASOLINE AND BENZINE.—We quote: Benzine, 18¾c. and gasoline, ordinary, 21¼c. and engine, 22¼c. f.o.b. Toronto.

WINDOW GLASS.

MONTREAL.

Wholesalers report a number of sorting-up orders this week, but the volume of business doing is not large. No quotable change has been made. Prices are as follows : First break, 50 ft., $2.10 ; second, $2.20 for 50 ft.; first break, 100 ft., $4 ; second break, $4.20 ; third break, $4.70 ; fourth break, $4.95.

TORONTO.

The market for glass has been exceptionally good during the past week, with prices about the same as last quoted. Quotations are : Under 26 in., $4.25 ; 26 to 40 in., $4.65 ; 41 to 50 in., $5.10 ; 51 to 60 in., $5.35 ; 61 to 70 in., $5.75 ; 71 to 80 in., $6.25 ; 81 to 85 in., $7 ; 86 to 90 in., $7.75. Toronto, Hamilton and London. Terms, 4 months, or 3 per cent. 30 days. Discount, 15 per cent.

AFTER COMBER'S QUAIL.

Congratulations are due to Thomas Beattie, the well-known hardware dealer of Comber, Ont., for the excellent shooting done by him last week. The vicinity of Comber is one of the best quail districts in Ontario, and many are the local hunters of that delicious bird. Among them Mr. Beattie ranks high as a sportsman and good shot. On this occasion he surpassed himself, securing a large number of quail, which testified to his first-class markmanship, as well as to his activity while in the field.

ADDING TO THEIR PREMISES.

P. & F. Corbin, of New Britain, Conn., are making extensive changes in their plant in order to increase their output. They have just completed a large seven-storey, fireproof building to be used for general manufacturing purposes, and are now at work on a new foundry building, to be 60 ft. wide and 600 ft. long, located on their property on the annex adjacent to the tracks of the New York, New Haven and Hartford Railroad. It is expected that the building will be ready for occupancy by January 1, as the mason work is now practically completed. These improvements will necessitate the employment of 100 additional iron moulders, 70 brass moulders and 500 extra help in general manufacturing.

Drumming For Trade—

The up-to-date hardware dealer will find that our specialties "make quite a noise," and produce excellent business.

In gas and electric fixtures we offer a line which is superior to anything on the market, not only as to variety and design, but wonderful value for the price.

In steam engineering specialties, such as Engineers' Clocks, Indicators, Steam Gauges, etc., the dealer carrying our line is always certain to command the most desirable trade.

The J.M.T. Steam Valve, too, is an ideal line to carry.

Its leadership is unquestioned. Over 1,000,000 of these valves are in use in all sections of the Dominion for steam, water, gas, ammonia, and sulphite.

Can we not talk to you?

MONTREAL, P.Q.

NOVA SCOTIA MARKETS.

Halifax, November 11, 1902.

FOR the last two weeks the hardwaremen report that they have been very busy, and that an unusually large amount of business has been done considering the season of the year when many lines are not specially available to increase trade. The dealers throughout the Province are buying largely, no doubt considering that the general prosperity of the country warrants them in doing so. Merchants along the shore ports have been placing large orders in time to secure the advantage of water carriage before winter comes on. The unusually fine weather for the season also tends to increase trade and lends facility to the movement of goods.

There is still a great demand for guns, ammunition and all kinds of sporting goods, from which the retailer who keeps a full line is reaping as much benefit as the wholesaler. There have also been good orders filled for skates, hockey sticks and other apparatus of the winter game, as well as the oval pigskin which the athletic youth delights to chase or carry over the field to the risk of life and limb.

Horse blankets, sleigh bells and robes, and other winter goods have been selling readily, both wholesale and retail. Lnmbermen's supplies also continue to be in good demand, more so than usual, as preparations are being made in all the big lumbering centres for a very heavy winter's work.

A general feeling prevails that there will be a continuation of the present activity. The general conditions in the country seem to give evidence of this. Payments for October were very well met, and showed, if anything, an improvement over the previous month. There is every indication that money will continue to be plentiful throughout the winter, and this fact gives confidence and a hopeful tone to business all around.

Builders' materials are still in very fair demand, and there will be considerable building operatlons carried on all winter if the weather is at all favorable. The building in the city of the big Citizens' Free Library, through the $75,000 gift of Andrew Carnegie, will create a big local demand in this line. It is expected that the work will be commenced at once—the site, which was the bete noir of the citizens—having been finally decided on.

The coal situation has created a heavy demand for stoves, stovepipes and fittings, and the dealers have been very busy supplying the demand for the last month, and will continue to be until the snow and frost comes. A representative of one of our largest stove foundries in Canada, in the city last week, stated that nearly every foundry is short—by hundreds of stoves—in filling their orders. The unusual activity of the dealers in the city bears out this statement. This is how the great coal strike has affected Canada.

The export from this port for the two weeks ending December 8 amounted to $367,066, appropriated as follows: West Indies, $99,600; United States, $134,955; Great Britain, $76,252; Newfoundland, $36,666; South America, $9,670; various foregn ports, $10,913. The amount for the corresponding period last year was $483,770.

R. C. H.

The immortal Shakespeare says,—
"the apparel oft proclaims the man."

The label *oft* proclaims the quality of the goods, but not always. For instance, take Decorators' Pure White Lead, one of the famous brands of the **Canada Paint Company.** It has a host of feeble imitators which are "dull, stale and unprofitable," but if the package bears the name of the **Canada Paint Company** it is genuine and may be purchased with every confidence. Another White Lead, the old-time painters' favorite at home and abroad, the "Elephant" genuine, is also innocent of all adulteration and, like the **Canada Paint Company's** Decorators' Pure, bears the following guarantee:

NO. 22.

No. 33 (double blade) is similar in construction and finish.

Something New!

THIS is an entirely new style of mincing knife of our own design. The shank is a flat tinned steel band, drawn tightly into a groove encircling the handle, the blade being riveted between the ends. This construction does away with any hole in the handle, which consequently cannot split or come loose. The handle itself is stained and shellacked, the whole making the neatest and strongest mincing knife ever put on the market.

MADE ONLY BY **The P. R. Cumming Manufacturing Co., Limited, Clarksburg, Ont.**

MARKETS AND MARKET NOTES

QUEBEC MARKETS.

Montreal, November 14, 1902.

HARDWARE.

WHILE the demand for general hardware has not been up to that of last week, as some of the steamers have made their last trips to points reached by navigation, there is yet a heavy movement, particularly with those centres which must be reached by railway, and are in consequence in a hurry to secure their supplies during the last week of the low freight rates. Prices on screen doors and windows, for 1903, to Montreal or Ottawa, have been given out and will be found in another column of this issue. An advance was made last week in the price of screen wire cloth.

SPRING HINGES.—The new list for 1903 on spring hinges for screen doors is as follows: No. 20, $10.50 per gross; No. 5, $20; No. 10, $12.25; No. 120, $20; No. 50, $30; No. 51, $10.

BARB WIRE.—There is nothing doing in this line. The price is scarcely more than nominal at $2.90 per 100-lb. keg, f.o.b. Montreal and $2.55 f.o.b. Cleveland.

GALVANIZED WIRE.—The market continues very quiet and uninteresting. Our quotations are as follows: Nos. 6, 7 and 8 gauge, $3.20; No. 9, $2.55; No. 10, $3.30; No. 11, $3.40; No. 12, $2.70; No. 13, $2.80; No. 14, $3.80; No. 15, $4.30; No. 16, $4.55; No. 17, $4.95; No. 18. $5.20. In carlots, f. o. b. Cleveland, the prices are: No. 9, $2.15; No. 12, $2.30; No. 13, $2.40, not dutiable. No. 10. $2.20; No. 11, $2.25; No. 14, $2.50; No. 15, $2.95; No. 16, $3.05, dutiable. In less than carlots, 12½c. per 100 lb. extra is charged.

SMOOTH STEEL WIRE.—In this wire there is no change whatever. Quotations are: Bright and annealed, $2.60 per 100 lb. f.o.b. Montreal, Toronto, Halifax, London, Hamilton and St. John. Net extras per 100 lb. are now as follows: Coppered wire, 60c.; tinned wire, $2; oiling, 10c.; spring wire, $1.25; best steel wire, 75c.; bright soft drawn, 15c.; special hay-baling wire, 30c.

FINE WIRE.—There is very little doing. The discount on fine wire remains at 25 per cent., with the following net extras: 1 and 2-lb. hanks, 25c. per 100 lb.; ½-lb. hanks, 37½c. and ¼-lb. hanks, 50c.

BRASS AND COPPER WIRE.—There is not much demand at present and the market is quiet. Discount is 62½ per cent.

FENCE STAPLES.—There is no new phase in this market to report. Trade is dull. Galvanized staples aee quoted at $3.25 per 100-lb. keg; bright at $2.90 per 100-lb. keg. For 25 and 50-lb. packages, 25c. extra is charged.

WIRE NAILS.—A small amount of business has transpired on this market on a basis of $2.55 per keg, in small lots and $2.50 in carlots f.o.b. Montreal, London, Hamilton, Toronto, Gananoque, Brantford, Windsor, Ont., St. John and Halifax.

CUT NAILS.—Nothing of importance has occurred on this market, which rules quiet at $2.45 per keg in small lots and $2.40 in carlots.

HORSENAILS.—Since the last advance in the price of "New Countersunk" heads, no further change is reported. Other lines are unchanged as to price. The movement continues active. We quote: "C" brand, 40, 10 and 7½ per cent. off; on "M" brand, "Oval," 57½ per cent.; "New City," 57½ per cent.; "New Countersunk," 65 per cent.

HORSESHOES.—These are still in good demand and a lively business is in progress at unchanged prices. We quote as follows: Iron shoes, light and medium, pattern, No. 2 and larger, $3.35; No. 1 and smaller, $3.60; snow pattern, No. 2 and larger, $3.60; No. 1 and smaller, $3.85; X L steel shoes, new light pattern, sizes 1 to 5, No. 2 and larger, $3.45; No. 1 and smaller, $3.70; feather-

Nickel-Plated Tea Kettles

THE "CLIMAX."

THE "PERFECTION"

The "CLIMAX"

is an extra heavy kettle—made of 18-oz. copper throughout. Has double-seamed **SPOUT.** Is finished with an extra coat of nickel and highly polished.

Made in two sizes, Nos. 8 and 9.

Not the cheapest but certainly the best Tea Kettle on the market.

The "PERFECTION"

is a high grade nickel-plated kettle. Has double-seamed **SPOUT** and seamless body.

Made in 7 sizes with flat bottoms. 3 sizes with pit bottoms.

The "Perfection" is splendid value, and a rapid seller as a medium-priced, high-grade kettle.

Each kettle carefully packed in a cardboard box.

weight, all sizes, 0 to 4, $5; toe weight, all sizes, 1 to 4, $6.25. Shoes, more than one size in a keg, 10c. per keg extra. F.o.b. Montreal only.

RIVETS AND BURRS.—Business in rivets and burrs is of a quiet nature at present and there is no new feature to note. The discounts are as follows: Best iron rivets, section carriage, and wagon box, black rivets, tinned do., coopers' rivets and tinned swedes rivets, 60 and 10 per cent.; swedes iron burrs are quoted at 55 per cent. off; copper rivets, with the usual proportion of burrs, 45 per cent. off and coppered iron rivets and burrs, in 5-lb. carton boxes are quoted at 60 and 10 per cent. off list.

BOLTS.—Trade continues quiet and the prices are unchanged all round. We quote: Norway carriage bolts, 55 per cent.; common, 50 per cent; full square carriage bolts, 55 per cent.; machine bolts, 50 and 5 per cent.; coach screws, 66 2-3 per cent.; sleighshoe bolts, 65 and 5 per cent.; blank bolts, 50 and 5 per cent.; bolt ends, 50 and 5 per cent.; plough bolts, 50 and 5 per cent. To any retailer an extra discount of 10 per cent. is allowed. Tire bolts, 67½ per cent.; stove bolts, 67½ per cent. Nuts, square, 3¼c. per lb. off list; hexagon nuts, 3¾c. per lb. off list. To all retailers an extra discount of ½c. per lb. is allowed.

SCREWS.—A few orders have been received this week for small lots, but the volume of business doing is small. The discounts are quoted as follows: Round head bright, 82½ and 10 per cent.; flat head bright, 87½ and 10 per cent.; brass, round heads, 75 and 10 per cent.; brass, flat heads, 80 and 10 per cent.

CORDAGE.—No further change in price is reported since the reduction of Thursday last. The inquiry is still somewhat light. We quote Manila, 14c.; British manila, 12c.; sisal, 12c. and lathyarn 11c.

BUILDING PAPER.—Jobbers report business fair considering the time of the year. Orders, however, are chiefly confined to small quantities. We quote: Tarred felt, $1.70 per 100 lb.; 2-ply, ready roofing, 85c. per roll; 3-ply, $1.10 per roll; carpet felt, $2.25 per 100 lb.; dry sheathing, 35c. per roll; tar sheathing, 45c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll; O K and I X L, 65c. per roll; heavy straw sheathing, $30 per ton; slaters' felt, 60c. per roll.

SCREEN WIRE CLOTH.—This has been advanced 2½c. and is now quoted at $1.40 per 100 square feet. The market is dull.

POULTRY NETTING.—There is no change and the market is quiet. We quote: English or Canadian netting, for 1903 delivery, as follows: 60 per cent. off on 2 x 2 mesh, 19 wire, and 50 per cent. off on 2 x 2 mesh, for heavier.

HARVEST TOOLS.—Trade is very quiet. The discount for 1903 is 60 and 10 per cent. off.

FIREBRICKS.—These are still moving somewhat slowly. No quotable change is reported. We quote: English, $16 to $21 and Scotch, $17 to $22 per 1,000.

CEMENT.—Some improvement is noted in the demand this week and the market is fairly active and steady. We quote as follows: Canadian cement, $1.90 to $2.25; German, $2.20 to $2.30; English, $2.15 to $2.25; Belgian, $1.70 to $1.95 per barrel ex-wharf, and American, $2.10 to $2.20 ex-cars.

SKATES.—There is a good demand and an active trade is doing. We quote as follows: Halifax pattern, 36c. per pair;

THIS IS WHAT

Elastilite Varnish

DOES.

It suits the dealer, because it always satisfies the customer, and, being a Registered Brand, it does not come into competition with ordinary makes of Varnish, thus protecting your profit.

In tins only from ½-pint to 1 gallon.

MANUFACTURED ONLY BY

The Imperial Varnish & Color Co. LIMITED

Toronto, Ontario, Canada.

Canadian Agents for Buehne's "Red, White and Blue" Brand Steel Wool.

Not "How Cheap" But "How Good"

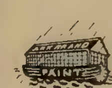
(OUR MOTTO)

That is the proposition facing the paint dealer who looks to the future and expects to establish a reputation. The problem is solved in

"Ark Brand" Paint.

It is not a cheap (and poor) paint, but it is as good as our experience has enabled us to make. It is based on the proper proportions, Zinc, Lead and Linseed Oil, and is better and more economical than any Strictly Pure White Lead ever produced. You owe it to yourself to stock "Ark Brand" Paint.

FREE—OUR PRACTICAL BOOKLET: "PAINT AND HOW TO USE IT."



Manufactured by

THE FRANCIS-FROST Co. Limited

TORONTO.

Canadian Distributing Agents for Grippin's Crack Filler.

nickel-plated, 65c.; ladies' nickel-plated, 60c.; ladies' concave nickel-plated, $1.35 plain hockey, 27c. to $1.35; nickel-plated hockey, 60c. to $2.50; double-end hockey, $1.50 to $3. Skate straps, 35c. to $1.35.

HOCKEY STICKS.—Along with skates there is a brisk trade doing in hockey sticks. Quotations follow: Best second-growth, goal keepers', $4.20 per dozen; ash, $2.90; elm, $2.25; boys' elm, $1.10; common, 90c. Regulation pucks, $1.50 per dozen.

SNOW SHOVELS.—Business continues fairly satisfactory in this line., and our quotations are as follows: "Habitant," $2.25 to $2.40; "Victor," 30 per cent. off; steel railroad shovels, 48 and 5 per cent. off.

FIRE SHOVELS.—These are still moving out rapidly. The prices are unchanged. Quotations are as follows: No. 70, $38\frac{1}{2}$ to 40c. per dozen; No. 55, 55 to 60c.; No. 57, $82\frac{1}{2}$ to 90c.; No. 60. $82\frac{1}{2}$ to 90c.; No. 65, 1.37\frac{1}{2}$ to $1.45; No. 80, 50 to 55c.; "Duplex," No. 7, $1.21; No. 9, $1.52; No. 11, $1.82.

LANTERNS.—There is a good demand for lanterns of all descriptions. We quote: Tilt, lift, or hinge, No. 0, $4 per dozen; Cold Blast, $7 per dozen; dashboard, No. 0, $5.75 per dozen; cold-blast dashboard, $9 per dozen. Extras are as follows: Japanning, 50c. per dozen; copper-plating cold blast, $2 per dozen. The prices quoted are f.o.b. London, Hamilton, Toronto, Belleville, Kingston and Montreal.

METALS.

No actual change in prices has been reported this week, although the position of bar iron has become stronger and some dealers are anticipating an advance. Tinplates on the American market are to be reduced 10 per cent. on December 1. Nothing of note has been learned during the week from the English market for tinplates, which is considered steady. There is still a great demand for all structural materials for buildings and bridges, and although facilities are increasing for the more prompt supply of such lines, there is no easing off to be seen in the market.

BAR IRON.—This is in good demand and as supplies are none too large, dealers are looking for an advance. The market is now very firm at the following prices: Merchants' bar, $1.95; horseshoe iron, $2.20 and extra refined, $2.35.

BLACK SHEETS.—There is no change in the situation. A fair trade is passing. We quote: 28 gauge, $2.65; 26 gauge, $2.60; 20 to 24 gauge, $2.50 and 8 to 20 gauge, $2.50.

GALVANIZED IRON.—The demand for galvanized iron is fair and a moderate trade is doing at the following prices: No. 28, Queen's Head, $4.40; Apollo, $10\frac{3}{4}$ oz., $4.40; Fleur de Lis, $4.15; Comet, $4.25 and "Bell" brand, $4.30. For less than case lots, 10c. extra is charged.

SOIL PIPE AND FITTINGS.—There is not much doing. Quotations are: Light soil pipe, 3 to 6 inch, 50 per cent., medium and extra heavy soil pipe, 2 to 6-inch, 60 per cent.; extra heavy soil pipe, 8-inch, 45 per cent.; light fittings, 2 to 6-inch, 50 and 10 per cent.; medium and extra heavy fittings, 2 to 6-inch, 60 per cent.; extra heavy fittings, 8-inch, 45 per cent.

PIG TIN.—This metal retains all its firmness, though no actual change in the prices is reported. We quote: Summerlee, $22.50 to $23.50, on wharf, exclusive of handling.

INGOT COPPER.—There is no change. We quote 13c. per lb.

INGOT TIN.—Tin continues quiet on this market. Straits tin sells at 28 to 29c.

PIG LEAD.—There is only a small amount of business doing in this line. The price in carlots is $2.90, and in less quantities, $3.25.

LEAD PIPE.—Business continues fairly good. No change in prices has been made. Composition and waste sell at 8c. and ordinary at 7c. The discount is $37\frac{1}{2}$ per cent.

IRON PIPE.—Prices on iron pipe are firm, owing to some shortage in supplies. This condition is likely to prevail until the end of the month. Quotations are now as follows: Standard pipe, per 100 feet, in lengths under 19 feet: Black, $\frac{1}{4}$, $2.40; $\frac{3}{8}$, $2.65; $\frac{1}{2}$, $2.85; $\frac{3}{4}$, $3.65; 1-in., $5.20; $1\frac{1}{4}$, $7.35; $1\frac{1}{2}$, $8.95; 2-in., $12.55. Galvanized, $\frac{1}{4}$, $3.20; $\frac{3}{8}$, $3.15; $\frac{1}{2}$, $3.85; $\frac{3}{4}$, $5; 1-in., $7.20; $1\frac{1}{4}$, $10.05; $1\frac{1}{2}$, $12.20; 2-in., $16.85. Extra heavy pipe, plain ends, are quoted per 100 feet as follows: Black, $\frac{1}{2}$, $4.20; $\frac{3}{4}$, $5.25; 1-in., $7.55; $1\frac{1}{4}$, $10.55; $1\frac{1}{2}$, $12.75; 2-in., $17.60. Galvanized, $\frac{1}{2}$, $5.20; $\frac{3}{4}$, $6.65; 1-in., $9.55; $1\frac{1}{4}$, $13.25; $1\frac{1}{2}$, $16; 2-in., $21.90. For threads and couplings 5 per cent. is added.

TINPLATES.—There has been no change on the local market. Jobbers report a fair demand. Charcoal tinplates are quoted at $4.75 to $5.25 and cokes, $4.25.

STEEL.—The market is quiet and unchanged as to price. We quote: Sleigh-

shoe, $2.05; tire, $2.20; bar, $2.05; spring, $2.85; reeled machinery, $2.75; toecalk, $2.70.

SHEET STEEL.—No change has been made and trade is quiet. We quote: Nos. 10 to 20, $2.50; 3-16, $2.50; ¼, 5-16 and ⅜, $2.40.

TOOL STEEL.—A few fair-sized orders have been received this week, but in general the market is quiet. We quote: Black Diamond, 8c.; Sanderson's, 8 to 12c., according to grade; Jessop's, 13c.; Leonard's, 7½c.; Jonas & Colver's, 8 to 15c.; "Air Hardening," 45 to 60c.

CANADA PLATES.—There is a fair demand. No new feature has developed. We now quote: 52s, $2.70 to $2.80; 60s, $2.85 to $2.90; 75's, $2.80 to $2.85; full polished, $3.75 and galvanized, $4.25 to $4.35; galvanized, 60's, $4.45 to $4.55.

TERNE PLATES.—Business is still quiet. The price is $7.50.

COIL CHAIN.—There is not much doing. No change has been made in the prices. We quote $5.85 to $6.25.

ANTIMONY.—We quote 10c.

ZINC SPELTER.—The market is quiet. We quote 5c.

SOLDER.—As usual, there is a steady demand for solder, and a good movement is reported at unchanged prices. We quote: Bar solder, 20c. and wire solder, 18c. per lb.

SCRAP METALS.

No change whatever has occurred in the prices of scrap materials during the week. The demand for machinery iron is still very good, and prices remain firm as quoted. Other lines are comparatively quiet. Our quotations are as follows: Heavy copper and wire, 10c. per lb.; light copper, 8c.; heavy red brass, 10c.; heavy yellow, 8¾c.; light brass, 5c.; lead, 2 to 2¼c.; zinc, 2½c.; iron, No. 1, wrought, $15; No. 2, $7 per ton; machinery scrap, $16; stove plate, $12; malleable and steel, $5; mixed country rags, 60 to 70c. per 100 lb.; old rubbers, 6¼ to 6½c. per lb.

HIDES.

Beef hides have gone down 1c. all round since our last report. Other lines are unchanged and the market is not particularly active. We quote: No. 1 hides, 9c.; No. 2, 8c.; No. 3, 7c. Calfskins, 8 to 10c.; lambskins, 60c.

MONTREAL NOTES

The prices on screen doors and windows and spring hinges for same for 1903 are out.

IMPROVED BUILDING MATERIALS.

ONTARIO MARKETS.

Toronto, November 14, 1902.

HARDWARE.

THE demand for all fall lines of hardware has been well maintained. Some of the boats have already started on their last trip to the upper lakes before the close of navigation, and jobbers are very busy trying to rush off as many orders as they can by the remaining boats. Rope has been reduced in price to meet the lower prices made by some English and Scotch manufacturers, who are endeavoring to find a market for the article in this country. The decline is 1c. on pure and British manila, and ½c. per lb. on sisal and single and double lathyarn. To meet the cut in the prices of wire made by the United States Steel and Wire Association last week, the prices of barb wire staples have been reduced for Canada and the new prices are $2.80 per 100 lb. for bright staples in 100-lb. kegs, with 25c. extra in 25 and 50-lb. boxes, and 20c. extra per keg for galvanized staples.

BARB WIRE.—No barb wire is being sold for immediate delivery, but the retail trade are buying quite a quantity for spring shipment at present prices. We quote as follows: $2.67½ from Cleveland and 12½c. less in carlots. From stock, Toronto, $2.90.

GALVANIZED WIRE.—There is nothing doing in galvanized wire. Quotations follow: Nos. 6, 7 and 8, $3.20 per 100 lb.; No. 9, $2.55; No. 10, $3.30; No. 11, $3.40; No. 12, $2.70; No. 13, $2.80; No. 14, $3.80; No. 15, $4.30; No. 16, $4.55. Nos. 6 to 9 base from Cleveland are quoted at $2.27½ in less than carlots and 12½c. less for carlots of 15 tons.

FINE STEEL WIRE.—Business in this line continues quiet. The discount is still 25 per cent.

SMOOTH STEEL WIRE.—There is not much demand for this line and prices are unchanged. We quote $2.60 per 100 lb. Oiling, 10c.; coppering, 60c. and tinning, $2 per 100 lb. extra. Shipping points Toronto, Hamilton, London and Montreal, with freights equalized on those points.

WIRE NAILS.—Trade in wire nails is keeping up well. We quote base price as follaws: $2.50 in carlots and $2.55 for less quantities. The shipping points are Toronto, Hamilton, London, Gananoque and Montreal.

CUT NAILS.—These are fairly active and unchanged in price. We quote base price at $2.50 per keg and 10c. less for carlots.

HORSE NAILS.—There is still a good trade for horse nails, and the discounts are now as follows: "C" brand, oval head, 40 and 10 and 7½ per cent.; on "M" brand, 50, 10 and 5 per cent.; "Monarch," 60 2-3 per cent.; "Countersunk" head, 60 per cent.

HORSESHOES.—These keep fairly active and the prices are unchanged. We quote: Iron shoes, No. 2 and larger, light, medium and heavy, $3.45; snow shoes, $3.70; light steel shoes, $3.55; featherweight (all sizes), $4.95; iron shoes, No. 1 and smaller, light, medium and heavy (all sizes), $3.70; snow shoes, $4; light steel shoes, $3.80; featherweight (all sizes), $4.95.

SCREWS.—The demand for screws, though not as great as it was, is still heavy and the market keeps bare of supplies. We quote the discounts as follows: Flat head bright, 87½ and 10 per cent. discount; round head bright, 82½ and 10 per cent.; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.; round head bronze, 65 per cent. and flat head bronze, 70 per cent.

RIVETS AND BURRS.—These are still in good demand and scarce. The prices are unchanged. We quote the discounts as follows: Iron rivets, 60 and 10 per cent. discount; iron burrs, 55 per cent.; copper rivets, with usual proportion of burrs, 45 per cent.; copper burrs alone, 30 and 10 per cent.

BOLTS AND NUTS.—The demand for bolts and nuts is, if anything, a little better than it was, but there is still a scarcity of them on the local market. We quote: Carriage bolts, common $1.00 list), 50 per cent.; carriage bolts, full square ($2.40 list), 55 and 10 per cent.; carriage bolts, Norway iron ($3.00 list), 55 and 10 per cent.; machine bolts, all sizes, 50 and 10 per cent.; coach screws, cone points, 66 2-3 and 10 per cent.; elevator shaft and whiffletree bolts, 50 per cent.

SPADES AND SHOVELS.—Manufacturers of spades and shovels are still finding it difficult to keep jobbers supplied with sufficient stocks to meet the demand. The discount is 40 and 5 per cent.

ROPE.—There is still a good demand for rope. The prices of pure and British manila have been reduced 1c. and of sisal and single and double lathyarn, ½c,

owing to offerings being made on the Canadian market of Scotch and English rope at lower prices than were ruling previous to this decline. We quote: Pure manila, 14c.; British manila, 12c.; sisal, 12c.; lathyarn, single, 11c. and double, 11½c.; sisal bed cord, 3-cord, 48 feet, 65c.; 60 feet, 80c.; 72 feet, 95c. per dozen.

HARVEST TOOLS.—These are quiet. The discount is 60 and 60 and 10 per cent.

LAWN MOWERS.—No trade is as yet being done in lawn mowers. Quotations are as follows: Woodyatt, 12-inch wheels, $7.50; Star, 12-inch wheels, $5.50; Daisy, 12-inch wheels, $4.90; Philadelphia, 10-inch wheels, $6; Ontario, 10-inch wheels, $12.75. The other sizes are in proportion. The discount is 50 per cent.

GREEN WIRE CLOTH.—This is quiet and the prices are unchanged at $1.40 per 100 square feet.

EAVETROUGHING, ETC.—There is still a considerable quantity of eavetroughing going out to various parts of the country. We quote: Eavetroughing, 10-in., per 100 ft., $3.10; conductor pipe, 2-in., per 100 ft., $3; 3-in., $4; 4-in., $5.25; 5-in., $6.75 and 6-in., $9.

CUTLERY.—Trade in cutlery is becoming active and will continue so till Christmas.

BUILDING PAPER.—There is still a good sorting trade in building paper of all kinds. The prices are unchanged. We quote: Dry sheathing, grey or straw, 35c. per roll; tar sheathing, grey or straw, 45c. per roll; dry fibre, 50c .per roll; tarred fibre, 60c. per roll.

ASH SIFTERS.—These are still active and scarce. The quotations are unchanged at $13.20 per gross.

TINWARE AND ENAMELLED WARE.—A good demand keeps up for the full lines of tinware, such as stoveboards, stovepipes, stove furniture, etc. Lanterns are also active.

STOVES AND RANGES.—The demand for these keeps up well.

SCREEN DOORS, ETC.—There is nothing doing at present in screen doors and windows. We quote: Screen doors, common, 2 or 3 panel, walnut stained, 3-in. style, $6.60; stained, yellow or green, $6.80; in natural colors, oil finish, $8.15; 4 in. style, 20c. per dozen extra.

CEMENT.—There are no new orders being taken for cement, and as the weather continues favorable for outside work the manufacturers are busy on outstanding contracts. We quote: Canadian Portland, $2.80 to $3.20; hydraulic, $1.35 per bbl. At the works the prices are $2.50 to $2.70 per bbl.

METALS.

The general market for metals keeps steady with no very heavy demand for anything. There is a large amount of material being delivered at present on the orders which were booked during the past spring and summer. The tin market outside was rather uncertain, being weak and strong by turns. Copper was dull with little business reported and few inquiries, excepting for small parcels, but in iron and steel, trade and industry are making steady progress.

PIG IRON.—The pig iron market continues strong and active. We quote: $23 for No. 1 and $22.50 for No. 2 at the Canadian furnaces. On track, Toronto, No. 2 Summerlee is quoted at $23.

STEEL BOILER PLATES.—A good, steady demand keeps up for steel boiler plates. The mills are reported sold up till April. The price is $1.80 per 100 lb. in carlots.

STEEL RAILS.—The prices are unchanged at $30 per ton for those for steam railways and $36 per ton for those for electric railways.

TOOL STEEL.—There is a good, heavy demand for this steel and the prices are firmly maintained. Quotations follow: "B C" and "Black Diamond," 10 to 11c.; Jessop's, Morton's and Firth's, 14c.; Jonas & Colver's, 8 to 15c.; ditto, "Air Hardening," 30 to 50c.; Chas. Leonards', 8 to 9c.; Park's "Silver," 12 to 14c.; Park's Special, 15 to 20c.

MILD STEEL.—The heavy demand for mild steel continues and the article is scarce. We quote $2.50 to $3 per 100 lb. f.o.b. Toronto.

BOILER TUBES.—There is a heavy trade doing in boiler tubes.

SPRING STEEL.—This metal is in active demand. The prices are strong at $3 to $3.50 on track, Toronto.

BAR IRON.—A heavy demand is reported for bar iron and the prices are strong and unchanged. Quotations are: $2.05 up base. Extras cut to length while rolling: 2 ft. and over, 10c. per 100 lb., 1 ft. and under 2 ft., 15c.; under 1 ft., 20c.; over 20 ft. by special agreement, according to length and size.

BLACK SHEETS.—These are in fair demand at present and the prices are unchanged. We quote: Common, $3.15 for 28 gauge, and dead flat, $2.50 for 26 gauge.

CANADA PLATES.—These are in good, steady demand, the colder weather having had the effect of increasing sales. We quote: All dull,, $2.90 to $3; half-polished, $2.85 to $3.10; all bright, $3.75 to $3.85.

GALVANIZED SHEETS.—There is a steady call for galvanized sheets. We quote as follows: Queen's Head, $4.50 for 28 gauge; American, $4.40 for 29 gauge; Bell brand, $4.30 for 28 gauge; Gordon Crown, $4.50 for 28 gauge.

TIN.—A moderate business is being done in tin. We quote $31 to $32 per 100 lb.

TINPLATES.—These are rather quiet. We quote: Charcoal, $4.75 to $5 and cokes, $4.25 per box.

COPPER.—There is very little being done in copper at present. Prices are as follows: Ingot copper, $13 per 100 lb. and sheet copper, $22 to $23.

BRASS.—This metal is unchanged. The discount is 15 per cent.

LEAD.—There is very little demand for lead. The prices are unchanged at $3.50 for pig lead and $3.75 per 100 ft. for bar.

IRON PIPE.—There is a good demand for iron pipe with a scarcity of stock, the mills being still behind with their orders. Quotations are as follows per 100 feet: ¼-inch, $2.40; ⅜-inch, $2.65; ½-inch, $2.85; ¾-inch, $3.65; 1-inch, $5.20; 1¼-in., $7.35; 1½-in., $8.95; 2-in., $12.55; galvanized, 1-inch, $7.20. Trade discount is 4 per cent. for carlots.

ZINC SPELTER.—The market is dull. The price is 5 to 6c. per lb.

ZINC SHEETS.—A fair amount of business in small lots is doing in zinc sheets. We quote: Cask lots, $6 to $6.25 and part casks, $6.25 to $6.50.

SOLDER.—This metal continues in active demand.

ANTIMONY.—A moderate demand is reported for antimony. We quote $9 per 100 lb.

PETROLEUM.

Business in oils is very brisk with a slight increase in crude and possibilities of an advance in refined in the course of a few days. We quote as follows:

..A..
STANDARD.
The cost of Axes per million feet of lumber taken out should be the best Standard. Under this Standard the CROWN JEWEL is the cheapest Axe in the market.

Dundas Axe Works, Dundas, Ont.
W.L. Haldimand, Jr., Eastern Agent, Montreal.

Lily White, Canadian, 15 to 15½c. in bbls.; Silver Light, Canadian, 16½ to 17c. in bbls.; Crystal Spray, water white, American, 18 to 18½c. in bbls.; Pennoline, best American imported, 19½ to 20c. in bbls. In bulk, 2c. per gallon less.

HIDES, SKINS AND WOOL.

HIDES.—The demand for hides is still moderate and the prices are unchanged. Quotations are as follows: No. 1 green, 8c.; No. 2 green, 7c.; No. 1 green, steers, 8½c.; No. 2 green, steers, 7½c.; cured, 8½ to 9c. per lb.

SKINS.—The demand is principally for calfskins. Our quotations are as follows: Veal skins, 6 to 14 lb. inclusive, No. 1, 10c.; No. 2, 8c.; do, 15 to 20 lb. inclusive, No. 1, 9c.; No. 2, 7c.; deacons (dairies), 60 to 70c. each; shearlings and lambskins, 60c.

WOOL.—There is little doing in the wool market. The quotations are steady at 13½c. for fleece and 7½c. for unwashed wool.

TALLOW.—Prices of tallow are weak at 6¼ to 7c. per lb.

SEEDS.

Local competition is forcing up the prices of alsike rather higher than the export market would warrant, so that the market here is rather nervous. The present quotations are $7 to $7.60 per 100 lb. for prime to choice seed. The prices for red clover are $6.25 to $6.60 per bushel outside, and timothy is quoted at $1.50 to $1.75.

COAL.

There is considerable coal being shipped to Toronto by boat, and it will continue so as long as navigation remains open. Hard coal is quoted at $8 per ton and soft coal at the international bridges is $6 per ton.

OLD MATERIAL.

The old material market is very busy. In fact, nearly all dealers have more work than they can attend to. The prices remain about the same as a week ago, and our quotations are as follows: Heavy copper and wire, 10c. per lb.; light copper, 8 to 8½c.; heavy red brass, 9½c.; heavy yellow brass, 8 to 8½c.; light brass, 5 to 5½c.; lead, 2 to 2¼c.; scrap zinc, 3c.; iron, No. 1 wrought, $13.00 per net ton; No. 2 wrought, $4.50; machinery cast scrap, $14 to $15; stove plate, $10; malleable and steel, $6 to $6.50; old rubbers, 6½c. per lb. and country mixed rags, 50c. per 100 lb.

MARKET NOTES.

The prices of barb wire staples have been reduced.

The prices of pure and British manila rope have declined 1c. and both sisal and single and double lathyarn rope have declined ½c.

A LOT OF ELEY'S SHELLS.

H. S. Howland, Sons & Co. have just received a large shipment of Eley's loaded shells. The demand for Eley's goods this season has been much greater than the supply, so that dealers who at present are short will be glad to have a chance to assort their stock again this season. See the advertisement of this firm as to the sizes and kinds they have now in stock on another page of HARDWARE AND METAL.

A BIG CONTRACT.

Mackenzie, Mann & Co. have just closed a contract with Gerald Lomer, Montreal, acting on behalf of German makers, for about 40,000 tons of steel rails and fastenings for their requirements on the Canadian Northern and their Nova Scotia roads. The competition was very keen for this contract, which is approximately the largest ever placed at one time in Canada.

Other contracts for very large quantities of steel rails have recently been placed by the Grand Trunk and Canadian Pacific Railways, the latter including a large contract for shipment round the Horn to Vancouver. German makers are also doing a very large business in steel rails, through their Canadian agency, to Mexico and Central America, also to Gulf ports in the United States. At the same time, it is stated that the German State railways are now arranging the relaying of their roads with heavier rails, which will undoubtedly soon put a stop to the possibility of further export business.

Marshall Smith, general merchant and hotelkeeper, Ladner, B.C., is advertising his hotel for rent.

THE CARE OF STOCK.

By A. Welsh Briton.

IN the organization of any industry there must be a system upon which to work so as to obtain the greatest amount of production or distribution with the least amount of labor, whether it be in the small departmental store of a remote village, or a large wholesale hardware establishment in the biggest city. It is necessary in each, if order is to be maintained and progress made, that some person be in charge of the stock and responsible for its good order. Where the keeping of stock is left to everybody, then, as in most cases, the stock is never kept in an orderly manner.

In a well-regulated retail hardware store, each clerk should have his duties to perform when not attending to customers; one to arrange and dress the windows, show-cases, etc., invariably the one to perform such work shows some ability in art, or be of a novel turn of mind, with some knowledge and judgment of seasonable wares. Another should be given charge of the stock, to see that all the shelves are properly filled and classified, to note in the want book as stock becomes low, to bring forward seasonable goods, and put away, nicely cleaned and papered, out-of-season stock, ready whenever required for future sale.

The stock-keeper should have a good memory and be able quickly to locate his wares, to have a place for everything, and no goods of a different class or kind to be placed behind other stock. Sales are often lost by the failure of clerks not following this plan. They discover too late, after the departure of their would-be customer, that they have the very article in stock required. This can be avoided by having one of the clerks made stock-keeper, and instead of the employer throwing away "Hardware and Metal" when through with it, he should give the clerks in turn a copy, and note the ones who take an interest in their work. He will be the one interested in his hardware paper.

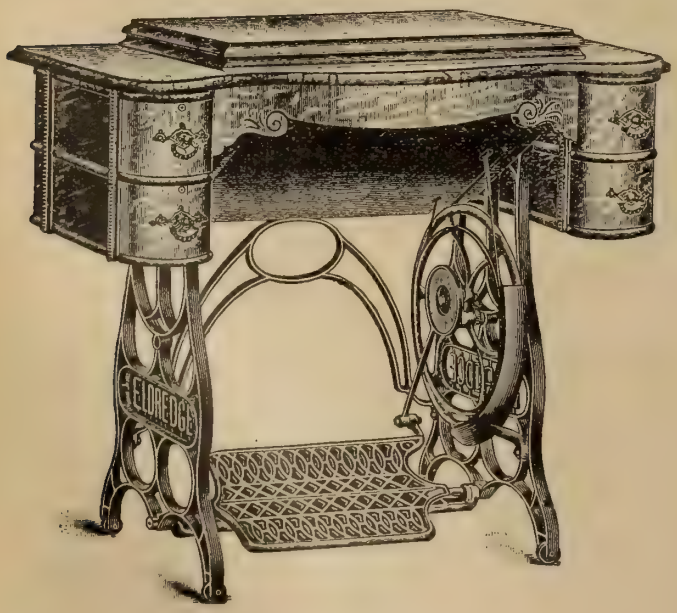
What is true of the retail store is more so of the wholesale house. You have in wholesale hardware establishments in Canada millions of dollars worth of stock, which by injudicious stock-keeping could easily depreciate if improperly kept. A good stock-keeper is the buyer's right hand and a big help to the clerks who put up orders; he also draws the attention of the travellers when they return from their trips that a certain line ought to be pushed, so that as far as possible, very little, if any, should be carried over.

The stock-keeper should be like the buyer, well ahead of his time, in keeping his stock before the visitors to the sample-room, and, above all, he should stop the senseless breaking open of original packages by clerks who are too lazy to properly open and tie up a package when putting up orders. Classification of stock is adopted by most wholesale houses, but very few handle their stock in such a manner that the youngest novitiate to the hardware business could pick out a certain package immediately.

The system adopted by most English and American houses is to shelve the stock by classification. The classified goods would run in consecutive numbers, or alphabetical order, e.g., locks designated by numerals would begin on the left with the lowest number and proceed to the right; those by letters would be carried in alphabetical order. B would naturally follow A, as No. 3,800 would precede No. 4,000, so if the stock of locks No. 3,950 were out it would show a vacant space between the former numbers, and the clerk putting up orders would waste no time by further search after a line "out of," but the indiscriminate placing of stock upon shelves when classified causes confusion when not arranged as suggested.

Next in importance is the assistance the stock-keeper should be to the buyer. One well versed in his stock is able quickly to hand the buyer a list of goods in stock in any particular line, who, in turn, immediately sees the requirements and keeps ahead accordingly with his regular lines. His seasonsable goods should be in stock at least two or three months before the season's requirements, first sending out his last season's goods; by so doing his stock is always in good shape. A stock-keeper, prompt and methodical, makes stocktaking at the end of the year a pleasure.

The Greatest Money-Maker



ever offered to the Hardwareman.

It's easy to sell such goods as these.

TORONTO.

THE following building permits were issued by the City Commissioner during the past week: D. B. Coon, two-storey attic and brick pair semi-detached dwellings, Roxborough street, for $7,000; Chas. Mould, one-storey detached brick dwelling, Campbell ave., $1,200; Thos. Robertson, two-storey brick addition to factory, Queen street east, $2,700; Charlotte Spears, two-storey dwelling, on Dupont street, $2,500; Wm. Worsfold, two-storey brick and stone dwelling, on Brock ave., $1,100; Mrs. Gullett, for a two-storey and attic brick dwelling, on Walker ave., $2,600; Mrs. L. Roberts, for a two-storey dwelling, Havelock street, $1,000; J. H. Tedd, two-storey and attic brick and stone dwelling, Victor avenue, $2,500; R. J. Lytle, pair semi-detached two-storey and attic solid brick dwellings, Smith street, $2,800; S. F. Aberdeen, two-storey and attic stone and brick dwelling, Gladstone ave., $2,500; Confederation Life, one-storey brick shed, $300; H. McBean, two-storey brick stable, Dundas street, $1,200; Domestic Supplies Co., Limited, two-storey factory, Esplanade $1,200; Samuel Crow, 2½-storey brick dwelling, Spadina Road, $4,500.

MONTREAL

The following were additional permits issued in Montreal during October: To A. Chennevert & Co., Dorion street, two three-storey buildings, size of each, 40 x 36, cost of each, $500; to G. Gelinas, on City Hall avenue, two-storey building, size 22 x 60, to cost $1,000; School Corporation, St. James Square, four-storey building, 152 x 100, cost $16,000; to S. Carsley & Co., Mount Royal ave. and Drolet street, five-storey building 75 x 18, cost $9,000; to E. Durand, one building, 25 x 30, cost $1,300; to Joseph Roy, Labell street, one building, 25 x 32, cost $500; to Olivet Baptist Church, on Dorchester street, building, 52 x 149, to cost $42,000; to Joseph Thomas, of St. Ignace street, three-storey building, 17 x 30, cost $800.

OTTAWA

The following building permits were issued at Ottawa during the past week: H. Sylvester, frame dwelling, Elm street, $400; Charles Hopewell, solid brick dwelling, Blackburn ave., $3,500; D. O'Connor, sr., brick addition, on Nepean street, $2,000; H. Morrison, brick-veneered dwelling, Ralph street, $1,300; Wm. Black, frame dwelling, MacLean street, $500; C. H. Stata, brick-veneered dwelling, Pretoria ave., $1,000; Mrs. George Mason, brick-veneered dwelling, Gilmour street, $3,000; Mrs. Elizabeth Gosselin, double frame dwelling, Henderson ave., $2,700; Wm. Arnold, alterations to shop fronts, Kent street, $500; S. L. Richard, brick-veneered dwelling on Cumberland street, $3,200.

PLUMBING AND HEATING CONTRACTS.

Guest & Co., Church street, Toronto, are putting in a new boiler for Dr. Beatty, Berkekey street.

W. R. Willis, plumber, Yonge street, Toronto, has the contract for two new houses on Scollard street.

Harrison & Robertson are supplying the heating apparatus for Thos. Moore's four houses on Spadina ave., Toronto.

The Toronto Furnace Company are installing the steam-heating system in the Roman Catholic church, Close avenue, Toronto.

The Bennett & Wright Co., Limited, of Toronto, have the contract for the heating of the building on Yonge street belonging to Ambrose Kent.

The heating contract for The Dominion Express Company's new offices in the Union Station, has been awarded to The Bennett & Wright Co., Limited, Toronto.

Wright & Co., Spadina ave., Toronto, have the plumbing contracts for Mr. Jones' house, St. Patrick street, and Donald McDonald's house on Church street.

AUTOMATIC VALVE TESTED.

Chief Tremblay, of the St. Cunegonde fire brigade is the inventor of a new automatic water valve. This valve was given a very severe test last week in the presence of several leading residents of St. Cunegonde, and the trial proved a success in every sense of the word. It is claimed for this valve that it possesses many improvements on the old system of water valves. The valve is constructed in three pieces, the body, bush, and the cut-off. The bush is permanently secured to the hydrant and embodies the main part of the valve. The body of the valve, to which the hose is attached, enters the hydrant through the bush. When operated with a key it works inside the bush by means of the opening thread.

BUILDING NOTES.

There is a new hotel being erected at Petrolea.

A company of United States gentlemen have purchased a site for a new hotel in Winnipeg.

The American Abel Engine and Threshing Co., of Winnipeg, are erecting a large warehouse.

The T. H. Pratt Company's new building at Hamilton will be completed about the first of next month.

Sullivan & Langdon, of Kingston, Ont., have secured the contract for the new armouries at London, Ont.

It is understood that The Cockshutt Plow Works will erect new premises in Brantford, Ont., that will cost $100,000.

Work on the Macdonald Institute in connection with the Agricultural College, Guelph, Ont., will be commenced shortly.

The new residence of Adam Lind, London, Ont., which is built of cement is now completed and has a very substantial appearance. Cement houses are growing favor throughout Ontario.

MANY BUILDINGS BEING ERECTED

Any person taking a tour of the streets of Montreal city could not help but notice the large number of new and handsome buildings in course of erection. The new Board of Trade building is rapidly nearing completion, and when finished will be a credit to Montreal. White stone is used on the front and sides of the building, while at the back the very best of white brick is being used. The new Coristine building at the corner of St. Nicholas and St. Peter streets is a magnificent establishment, being modernly fitted up throughout Rapid progress is being made with the new London, Liverpool and Globe building on St. James street, and it is expected that it will be ready for occupation by May of next year. The addition to Konig & Stuffman's building on Victoria Square is completed, and this building can now be counted as one of Montreal's sky-scrapers. The large addition being made to the Bank of Montreal, when completed, will transform this bank into one of the most magnificent in America.

A NEW HEATING CO.

The Standard Heating and Sprinkling Co., Montreal, has been organized. The head office will be in Montreal. The object will be to install heating plants, fire extinguishers, and also to carry on a general plumbing business. The capital will be $50,000. Mayor Cochrane, of Montreal is understood to be one of the chief promoters.

TWO PROFITABLE LINES FOR THE HARDWARE TRADE

They are **Bicycles**

The Bicycle trade is now on a sound business basis and offers a good profit to energetic hardwaremen who handle well-established lines, such as :

Cleveland, Massey-Harris, Brantford, and Perfect.

These bicycles are standards of excellence; made from the best materials obtainable, and by expert and highly-paid workmen. They sell on their merits. We want the hardware trade to handle them, and will make terms and prices that assure good profits.

Bicycle Sundries

People ride bicycles for several seasons now, and need new parts such as :

Tires,	Handlebars,	Saddles,
Rims,	Pedals,	Toolbags,
Brakes,	Spokes,	Grips, etc., etc.

These goods should form part of any up-to-date hardware stock. We, the largest manufacturers in this line in Canada, are the people to supply them.

Write us, mentioning "HARDWARE AND METAL."

CANADA CYCLE & MOTOR CO., Limited,

TORONTO JUNCTION, CANADA.

GOOD ADVERTISING.

A LARGE bread manufacturer in Toronto is at present announcing his intention of giving prizes for the best advertisements of his bread, written by the school children of the city. There is no entrance fee; only the children are advised to try a loaf of the bread before writing their copy, so that they can describe its good qualities accurately.

Here is a man who evidently believes in publicity, and he knows how to get it. It is all well enough to appeal to the men and women who have to purchase the bread, but it is a stroke of policy to start first with the children. Through them the whole family is bound to become interested and outsiders as well. If the average contestant doesn't let everyone within a radius of two miles know what he is doing he is no ordinary child.

This instance is cited here just by way of a hint. There may be merchants throughout the country who will find a helpful idea in this scheme. While it may not be advisable for the great majority of tradespeople to attempt it, yet a good many may be in a position to put it to the test.

* * *

In looking over a pile of newspapers the other day in a vain endeavor to find some bright and interesting grocers' advertisements, the writer came across a considerable white space in the centre of which appeared the important (?) announcement, "This space belongs to Blank, the dry goods merchant."

Looking at this so-called advertisement from a purely utilitarian point of view, what commercial advantage is it going to give Mr. Blank? Is it going to arouse the slightest interest on the part of the public in Mr. Blank's business? Pause, and think to what good purpose that white space might have been used. Surely, Mr. Blank, if he had any business worth advertising at all, might have put something in it to interest the average housewife. But no, he has lost the opportunity.

Advertising is a serious matter and should not be treated with levity. Moreover, it costs money and is expected to bring in returns. If a merchant is going to make an April fool joke of it, like Mr. Blank has done, he will have to take the consequences.

* * *

In last week's issue of The Toronto Moon, some fun was made of the great preponderance of advertising matter in the leading magazines of to-day. The periodicals were viewed from the standpoint of the advertising, as if that portion were the only part worthy of attention. When reference was made to the few pages of reading matter, they were put aside with a few remarks about their lack of interest and their uselessness.

All these may, of course, be pure and simple irony, but it has a vein of truth in it. There is no doubt that the advertising matter in the magazines has more attraction for some people than the literary portion. Even to the magazine reader the pages of advertising have a decided interest; so that all around the advertising matter forms a fair percentage of the total value of a magazine from the standpoint of the average reader.

* * *

"Ad World" is the title of a new monthly published in Montreal devoted to the interests of the advertising public and to the study of modern office methods.

* * *

There are few things that advertising can't do, no matter how good it may be or how wisely placed. It can't restore health and strength to a broken-down business that's drawing its last breath and hasn't enough vitality to take any nourishment. It can't sell enough of a poor article to make it profitable in the long run. It can't sell very much of a good thing if an equally good and well-advertised thing of the same kind is sold at a lower price. And it can't do the most good anyhow unless it is pretty good itself unless there's real thought and method in it—business arguments, interesting details, facts.

There are a few things that advertising can and will do—that it is doing right along for those who know how to use it. Advertising of the right sort will help any legitimate business under Heaven that deserves help. Backed by the right goods and prices it will do more to build up a business than any other one force known to the business world. Under its influence the small business will grow in that easy, continuous way that pays after spurts and booms are dead and forgotten. It widens and expands the big business along safe, sure lines. It will pull many a business out of the hole when it's a matter of finding a wider market for a good thing and finding it promptly. All this and more advertising has done, and is doing and will do.—American Machinist Mailing Card.

ELECTION OF OFFICERS.

On Saturday night, November 8, the Dominion Commercial Travellers' Association, at their meeting in Montreal, elected the following officers by acclamation :

President—J. Robinson, reelected.
Vice-President—George A Mann, reelected.
Treasurer—J. S. N. Dougall, reelected.
Directors—J. Paterson, A. D. Gall, P. J. Paradis, R. Booth, jr., S. A. Agnew.
Dinner Committee—L. O. Demer, Le-Sueur, Beauchamp, Mann, Dwyer, Cote, Murdock, Agnew, Dougall, Paradis, Doutre, Robertson, Paterson, Lefebvre, Gall and Evans.

JAPANESE ENAMELS.

For artistic decorative work and baths. A great variety of tints and colors.

OIL WOOD STAINS.

"ANCHOR" Oil Wood Stains are made from permanent pigments, and when applied to ordinary wood give a perfect imitation of the various woods indicated by the name of the stain.

VARNISH WOOD STAINS.

With one application "Anchor" Varnish Wood Stains will give to common woods a close imitation of the wood indicated by the name of the stain, with a fine glossy surface.

The above specialties are good sellers and money-makers.

IF I COULD TALK

I would say that you will study my welfare and true economy, by always using the "**C**" brand Horse Nails in putting on my shoes.

They will last longer, hold on better, and save you money, because you would not be put to the expense and trouble of getting my shoes renewed so often.

The Farrier will charge you just as much for putting on a set of shoes with the cheapest nail he can buy as he would if you insisted upon his using on your work only the "**C**" brand nails.

Test the claims of the makers of the "**C**" brand nails for yourselves by having your horses shod with them. They have stood the test for the past 37 years in Canada.

MANITOBA MARKETS.

WINNIPEG, November 10, 1902.

A STEADY trade is reported in all lines and there is one rather important change to note this week, that of a drop on galvanized iron. In paints, oils and glass, the trade is quiet owing to the increasingly cold weather. The fuel situation has improved to the extent of anthracite coal being dropped to $11 per ton. Dealers do not guarantee this price to continue should navigation close early and they be obliged to bring it in all rail. The tension of the situation is felt to be relieved. If a fairly good fall of snow should come early wood will, no doubt, drop from its present high figures.

The price list for the week is as follows:

Barbed wire, 100 lb	$3 30
Plain twist	3 40
Staples	3 95
Oiled annealed wire ... 10	3 42
" ... 11	3 48

BUILDING A NEW FACTORY.

The Russell & Erwin Manufacturing Co., of New Britain, Conn., have placed the contract with B. H. Hibbard for the construction of a new manufacturing building to be 50 ft wide, 200 ft. long, and seven storeys high. The construction will be fireproof throughout and the floors will have a capacity of 250 lb. per sq. ft., so that the building can be used for carrying all classes of manufactured goods. It is expected that this building will be completed and ready for use about February 1.

A good galvanized-iron-worker knows the different makes of his stock, and uses the one that pays him best.

from us your expectations will be realized. Our lines are all guaranteed to give entire satisfaction. Quality, the best.

ALEX. McARTHUR & CO., 82 McGill Street, MONTREAL.

PAPER MILLS: JOLIETTE, QUE. FELT FACTORY: HARBOR AND LOGAN STREETS, MONTREAL.

CURRENT MARKET QUOTATIONS

November 14, 1902.

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figures being for larger quantities and prompt pay. Large cash buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list, as the desire is to make it perfectly accurate.

Capital and Surplus, $1,500,000. **Offices Throughout the Civilized World.**
Executive Offices: Nos. 346 and 348 Broadway, New York City, U.S.A.

THE BRADSTREET COMPANY gathers information that reflects the financial condition and the controlling circumstances of every seeker of mercantile credit. Its business may be defined as of the merchants, by the merchants, for the merchants. In procuring, verifying and promulgating information, no effort is spared, and no reasonable expense considered too great, that the results may justify its claim as an authority on all matters affecting commercial affairs and mercantile credit. Its offices and connections have been steadily extended, and it furnishes information concerning mercantile persons throughout the civilized world.

Subscriptions are based on the service furnished, and are available only by reputable wholesale, jobbing and manufacturing concerns, and by responsible and worthy financial, fiduciary and business corporations. Specific terms may be obtained by addressing the Company at any of its offices. **Correspondence Invited.**

Some Good Reasons Why we claim your trade

FIRST—The brass we make is the standard by which all other brass is judged.

SECOND—It was good enough for good people 40 years ago, and now that we are making a better brass it ought to be good enough for the younger generation.

THIRD—WE ARE ON THE SPOT with a full and complete stock for shipment same day order is received. This alone is worth a good many dollars in these rush times.

FOURTH—We have issued a comprehensive catalogue classifying over a Million Pounds. It's here for the asking.

OUR TRADE A MARK
AUER LIGHT MANTLES
LONGEST LIFE & BRIGHTEST
OUR TRADE A MARK

A COMPARISON

TRASH

A cheap mantle gives a fair-light for a few nights, then grows dim and shrinks up to a "wasp-waist" like this:

The "Wasp-Waist"

Cheap chemical.

This is caused by the cheap chemicals which the manufacturer used.

QUALITY

A good mantle, which cannot shrink, made of the purest chemicals, is the only kind we put our trade mark A on. It guarantees you the best that is made and will satisfy your customers.

The Auer Light Mantle

Pure chemicals.

Lowest prices on mantles, shades, chimneys, globes and sundries.

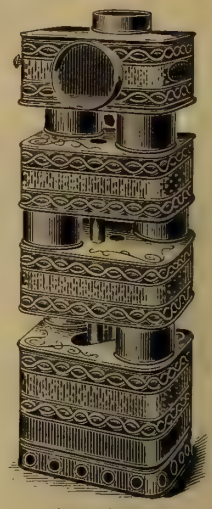
Write us if you are interested.

AUER LIGHT CO., MONTREAL.

THE WINNIPEG HEATER With New Dress

THE BEST HEATER ON THE MARKET.

Positively saves half the fuel in many cases.
Order a sample at once and put it in use.
Every one sold will sell others without your assistance.



Size, 17½ x14.
Height, 48 inches.

POINTERS:

The Winnipeg Heater is ornamental and does the work of a stove without extra fuel.

It is made out of heavy steel plate and arranged so that it can easily be taken apart and cleaned.

It will heat a room on the same floor as stove or an upstairs room.

It is constructed with flues for air circulation and prevents cold floors.

It has heat retaining pockets and will radiate heat when fire is very low.

It sells like "hot cakes" as soon as introduced.

It is not to be compared with any other drum on the market as it actually takes the place of a stove.

It absolutely prevents waste of heat out chimney.

ACT QUICKLY AS SELLING SEASON IS NOW ON.

The Winnipeg Heater will heat as large a room as the stove to which it is attached, without extra fuel.

ORDER A SAMPLE TO-DAY.

MANUFACTURED BY

The Metal Shingle & Siding Co., Limited

PRESTON, ONT.

Solid Steel Shovels

Stamped from one piece of solid Steel and secured to the handle with two bolts passing through two straps of steel at the back of the handle.

Better for snow than the old-fashioned wooden shovel, and strong enough for service around the barn. Finished in japan or galvanized. The low price we quote on them makes them fast sellers. If you have not heard about the price we will be glad to tell you.

THE HARDWARE MERCHANT AND THE BICYCLE.

AS the Christmas selling season draws to a close the wide-awake hardwareman begins to think of the goods that will net him a nice return in the coming spring and summer, and begins to select his lines accordingly. Not a few in so doing look out for the best things that are obtainable in the bicycle line. Time was when the hardware merchant dealt not in bicycles or in bicycle goods, but now those who have gone into this line claim to have found it the most profitable branch of their business.

Things have greatly changed in the bicycle business during the past few years, and there are now two great trades connected with it, namely, the bicycle proper and the bicycle supplies, such as tires, spokes, chains, etc.

The bicycle has seen its ups and downs as few other articles of commerce have, but it is now generally admitted that the business is on a sound basis. The day of fancy prices is gone, but gone also is the day of ruinous price-cutting which followed with the accumulation of large quantities of old stocks. The bicycle is now a steady article of commerce, recognized as being by thousands of people the most useful and economic means of modern transportation.

The sale of bicycles for the past few years has been below normal, and the next few years will see a marked increase wherever vim and energy characterize the selling agent. Prices will undoubtedly be firm and probably have an upward tendency as the recognized standard lines become more and more established.

Thus there is every inducement for the active hardware merchant to take up the bicycle as an important part of his business. There is nothing in it, however, for the man who is not active or progressive, or who is not seeking trade and taking every means to get it, but to the hardware merchant who is prepared to give some little attention and some energy to this department, there is a large trade with good profits and quick returns in the bicycle business.

CANADIAN OIL ADVANCING.

Business in Canadian petroleum is better to-day than it has been for years, and the price of crude oil has advanced from $1.76 to $1.93 per bbl. during the past month. It is claimed that the increased business is due to the coal strike, as quite a number of people are using oil for fuel.

COMPETITION VS. MONOPOLY.

WHILE it is only natural that men should try to create monopolies in order to escape competition, the latter is none the less the life of trade. Competition has no doubt its defects just as everything else of human creation. But business would suffer more from its absence than from its presence.

"A certain competition," says Emerson, "balances every gift and every defect." Competition is to many in business a defect. But the keener the competition the higher is the standard of business men it produces. This is its compensation.

Never in the history of the world was competition greater than it is to-day, but it is creating conditions in the commercial world that demand a higher state of efficiency in those who move and live and have their being therein. And this, fortunately, is not narrowing opportunities or minimizing ideals.

THE GLASS MARKET UNSETTLED.

THE trade in Toronto have been making their own prices on glass for some time. The eastern and western jobbers were unable to come to an agreement as to the price and terms on which they were to sell their glass, and hence for some time the prices have been thrown open.

Sales are now being made on a basis of 25 per cent. discount off the list given in our prices current. Some jobbers, however, are adhering to the old prices. The former price leaves jobbers a small margin of profit, and it is a strange thing that after keeping the market up all summer the jobbers are now cutting prices at a time of the year when the busy season is at its height and no supplies can be imported from the other side. It is hoped before long that the market will have gotten back its former basis.

THE PACIFIC CABLE AND TRADE.

WHILE from the Imperial standpoint the completion of the cable across the Pacific Ocean, connecting Canada and Australia, is a matter of no small moment, its chief importance to Canadians, after all, lies in its existence as an aid in developiug the trade and commerce of the country. And while in thus giving prominence to the commercial aspect of the matter one may be open to the charge of utilitarianism, we must not forget that we live in a commercial age and that the commercial interests of the country usually take precedence over others, except when the national honor is in question.

The stations of the new cable are wholly on British territory. This is scarcely of less importance to the commercial interests of the Empire than to its naval and military interests. This must be evident to everyone who has followed the discussion of the Pacific cable question during the past decade or two. The chief desideration sought, however, was cheaper cable rates. Owing to the monopoly possessed by The Eastern Extension Telegraph Co. the rates in the past have been excessive and an obstacle to the development of trade with Australia and the Orient. And had it not been for the machinations of this company it is altogether likely that the Pacific cable would have been in existence years ago.

The question has been more or less a topic of discussion for many years. At the conference in London in 1887 of representatives of the Imperial and Colonial Governments, and again at the Colonial Conference in Ottawa in 1894, it occupied a large share of attention, and resolutions favorable to the enterprise were adopted in both instances. In the former year a survey of the route was ordered to be made, but it was not until 1899 that it was completed. A committee, representing the Imperial and Colonial authorities, which had been appointed in 1896, reported in 1899, recommending the laying and maintenance of an all-British Pacific cable, the cost to be borne by the Mother Country and the colonies directly interested. Finally, in 1890, tenders were called for, the cable to be laid from Vancouver to Fanning Island, Fiji and Norfolk Island, branching from the latter island to New Zealand and Queensland. The tender was awarded to The Telegraph Construction and Maintenance Co., the cost to be £1,795,000, the line to be completed by the end of 1902. In July of last year the British Government announced that it would advance £2,000,000 for the construction of the cable, and that the maintenance charges would be borne as to five-eighteenths by the Home Government and as to the remainder by the colonies concerned. It was at the same time announced that the Board of Management would consist of three representatives of the Imperial Government and two representatives of Canada, and two of Australia and New Zealand.

Already the benefits of the new cable are being realized, a rate of about 56c. a word from Canada to Australia having been fixed, against 99c. by The Eastern Extension Line ; in fact, before the new cable was started the rate was $1.50 per word.

It is a matter for congratulation that the chief promoter of the Pacific cable is a Canadian, Sir Sanford Fleming. In season and out of season, when the interest of many was cold and the opposition formidable, his zeal was untiring. And if anyone is deserving of the thanks of the business men of Canada it is Sir Sanford Fleming.

OUTLOOK FOR THE BICYCLE.

THE appearance of the old-established and well-known cycling journal, The Cycling and Auto-Car News, indicates that those who ought to have an accurate idea of the possibilities of the bicycle trade are hopeful of next season's business in Canada. This journal is devoted exclusively to cycling affairs, and its appearance now, with a greater number of pages and more elegantly finished than for some time past, indicates a considerable revival in bicycle sentiment in Canada.

It is not strange that such should be the case, as the past year in England and on the continent has seen a very considerable revival in interest in the bicycle. Sales of bicycles in England and France have largely increased and the old-established houses there were able to declare a handsome dividend and set aside large reserve amounts; whereas a few years ago they were unable to meet their running expenses.

All this goes to indicate that the bicycle is coming back into popular favor in the countries where it had its first run, so that something similar may be expected in Canada within the next two seasons.

CARELESSNESS IN RETURNING GOODS.

WHEN goods are returned, no matter for what reason, it is only reasonable to demand that they should be put up in packages that will insure their reaching their destination in proper condition. That this is not always done has been demonstrated to HARDWARE AND METAL on several occasions lately. In some instances the goods were of delicate texture and the only protection they had from dirt and carelsss handling was the paper box or the paper in which they were originally wrapped for display on the shelves of the retail merchant. As a result, in many instances, the thin covering was torn and the goods exposed and damaged by contact with wet and mud. Naturally the wholesalers to whom the goods were returned were annoyed.

As long as goods are bought and sold the practice of returning them will exist to some extent, for we have not by any means yet reached the millennium when wholesalers make no mistakes in selling or in shipping and retailers no mistakes in buying. But to return goods in the way those were to which we refer is simply inexcusable. And in some instances it is impossible to conceive that the merchants who returned the goods could have been cognizant of the gross carelessness which was exhibited by those to whom they had entrusted the work of returning the goods.

It is evident from what we have cited that in some retail stores specific instructions need to be issued to those upon whom the duty of returning goods devolves.

BUSINESS CHANGES.

DIFFICULTIES, ASSIGNMENTS, COMPROMISES.

A WINDING-UP order of The National Cross-Ply Veneer Company, Limited, Toronto, has been granted, and J. P. Langley has been appointed curator.

The creditors of The Martini Cycle Co., Toronto, have held a meeting.

Aumond & Caty, contractors, Montreal, have assigned to Alex. Desmarteau.

Jude, Talbot & Fils, general merchants, St. Eulalie, Que., are offering to compromise.

Kent & Turcotte are the curators of The John McArthur Co., paints, etr., of Montreal.

The creditors of A. Brunell, sawmiller, Ste. Rosaire, Que., held a meeting on November 19.

The creditors of J. E. Heon, general merchant, St. Eulalie, Que., will meet on November 21.

G. A. Perry, general merchant, Dalhousie Station, Que., is offering 40c. on the dollar cash.

The creditors of M. Rousseau, general merchant, Warwick, Que., held a meeting on November 13.

A contestation of the demand of assignment made on him has been filed by Joseph Filion, contractor, Montreal.

William Irving, hardware merchant, of Austin, Man., has assigned to C. H. Newton, and his creditors meet on November 21.

PARTNERSHIPS FORMED AND DISSOLVED.

G. H. Brown, general merchant, Condie, Man., has admitted T. Higgie as partner.

Grooves & Rennie, agricultural implement agents, Fergus, Ont., have dissolved.

Helwig & Deeton, hardware and stove merchants, Hanover, Ont., have dissolved.

Frank O'Neil, harnessmaker, Moose Jaw, N.W.T. has admitted J. E. Chausen into partnership.

Wright, Cannon & Burnett, commission agents, Vancouver, B.C., have dissolved; Wright, Cannon & Co. continue.

SALES MADE AND PENDING.

The assets of M. Killeen, saddler, of Ottawa, have been sold.

The assets of Geo. Simser, contractor, South Indian, Ont., have been sold.

Robert Robertson, blacksmith, Minto, Man., is advertising his business for sale.

The assets of J. D. Lalonde & Co., general merchants, St. Benoit, Que., have been sold.

The assets of Grant Bros., hardware merchants, Ottawa, Ont., have been sold at auction.

Albert Dawson, blacksmith, of Port Lambton, Ont., is advertising his business for sale.

The business of the estate of Geo. E. MacRae, harnessmaker, Collingwood, Ont., is advertised for sale.

The real estate of F. J. K. Alexander, general merchant, St. Agathe and Little River, Que., has been sold by auction.

Six Good Reasons

why The Sherwin-Williams Agency is the most profitable business connection you can make are :

1. It brings with it business helps that will increase the sales in every department of your business.
2. It gives you a distinct advertising prestige over your competitors.
3. It enables you to give never failing satisfaction to your customers—it means paint that never goes wrong if properly used.
4. It practically shuts off competition in your territory.
5. It will enable you to sell more paint than you have sold before.
6. It means best goods, best advertising, best assistance and largest profits.

The detail of these reasons and many other reasons is explained in our B-13 booklet. If we are not represented in your town now, write for a copy to-day.

THE SHERWIN-WILLIAMS CO.

PAINT AND VARNISH MAKERS.

CLEVELAND.

CHICAGO, NEW YORK, NEWARK, MONTREAL, BOSTON, TORONTO, SAN FRANCISCO. KANSAS CITY.

CHANGES.

Lecours & Bourget, lumber merchants, Levis, Que., have registered.

Robert Harper, blacksmith, Norval, Ont., has sold out to G. Day.

Dunkner & Lemer, wood and coal dealers, Montreal, have registered.

Wm. Lueck, sawmiller, Williamsford, Ont., has sold out to Lueck Bros.

Phillip Burrows, blacksmith, Altamont, Man., is succeeded by J. R. McDonald.

William Robe, harnessmaker, of Alexandria, Man., has sold out to L. Kerr.

G. B. Ballard, general merchant, Listowel, Ont., has sold out to J. B. Douglas.

P. J. Austin, general merchant, Kingsbridge, Ont., has sold out to Charles Moss.

The Heaslip, Lawton Co., Limited, of Alameda, N.W.T., have sold out to J. J. Heaslip.

Ingle Blanchard, agricultural implement agent, Miami, Man., is succeeded by H. F. Hillis.

C. T. Bailey & Co., general merchants, Qu'Appelle, N.W.T., have sold out to A. E. Fitzgerald.

William Abrams, general merchant, of Waldheimer, N.W.T., has sold out to Jacob Jaugen.

Vant & Kalb, hardware merchants, of Bonanza, Yukon District, are succeeded by Vant & Weber.

Kenneth Ferguson, general merchant, of Glace Bay, N.S., has sold his grocery branch to J. A. Ferguson.

James Livingstone, carriage and agricultural implement agent, Paisley, Ont., is succeeded by James Bone, jr.

A. R. Hopper, banker and implement agent, of Alameda, N.W.T., has sold his implement business to Lawton & Scott.

The stock of the estate of Barker & Co., general merchants, Macleod, N.W.T., has been sold to R. T. Barker at 65c. on the dollar.

McBride & Schoeoleben, lumber merchants, Weyburn, N.W.T., have adopted the style of The Weyburn Lumber and Elevator Company.

FIRES.

G. W. Waggoner, general merchant, of Eden, Man., has sustained loss by fire.

W. A. Moffatt, agricultural implement agent, Alvinston, Ont., was burned out.

L. B. Baker, druggist and general merchant, Aylesford, N.S., has been burned out.

The stock of W. Baril & Son, sash and door factory, Montreal, was damaged by fire.

Dunn Bros., manufacturers of lumber, Grand Bay, N.B., have sustained slight damage by fire ; insured.

The Belleville Hardware Company, Limited, Belleville, Ont., manufacturers of locks and builders' hardware, have sustained loss by fire.

DEATHS.

August Reush, brickmaker, Yorkton, N.W.T., is dead.

Thomas Bearse, general merchant, of Corinth, Ont., is dead.

Alfred Domville, a former Hamilton boy, has been appointed manager of The New York Wheel Works, at Buffalo, N.Y.

THE C.I.F. QUESTION.

Editor "Hardware and Metal":

Sir,—Permit me to add a few words to the already lengthy controversy as to the interpretation of the contract in question under a c.i.f. sale. Mutual assent is understood to be embodied as one of the conditions in every contract. "Parties entering into any contract, when reducing these terms to writing, are not allowed to say there was a mistake in the same, or that they intended to agree to something different to its conditions: for the very object in putting the agreement in writing is to prevent disputes about what was intended." (Whenever the usuage of a particular trade gives use to a duty or obligation differing from the written stipulation, such duty or obligation may be enforced.)

"Usage is a matter of fact—not of opinion. Usage in trade is a course of dealing and mode of conducting transactions of a particular kind." It is a well-established fact that a c.i.f. sale is completed on delivery of the goods to the ship's agent, and receiving a bill of lading as an acknowledgment. A delivery to the carrier is a delivery to the consignee; therefore, on such delivery being completed, the property has passed into the possession of the buyer, who must pay the price according to the terms agreed upon. Even if the goods are destroyed or otherwise damaged, the goods are, from the moment of such delivery, entirely at the buyer's risk. They are his goods from the moment the property passes into his possession, as evidenced by a bill of lading.

The whole question in my mind, hinges upon the interpretation of commercial usage with reference to the insurance part of the contract. I think it is well established, at least as far as my experience goes, that the nature of the insurance will depend altogether upon the nature of the goods. On articles which I am in the habit of importing, our insurance policy is always understood to be "free from particular average." If I were importing a class of goods, which would be readily susceptible to damage by the action, say, of sea water, I should make it a condition of the contract that the risk would be fully covered (is "against all risks"), by the insurance policy provided by the seller of the goods. I should consider it my business, as a buyer, to ascertain what class of insurance was provided when I made the contract, quite as much as I would the class of goods I was buying. It is here where the application of mutual assent comes into play, and forms a very important feature in interpreting such a case. The buyer (as in the case in question), may say that he did not mean so and so: and the seller, on the other hand, may say that he only meant to do so and so. In such a case, if the contract has been reduced to writing, it must be intrepreted to be that which they both agreed upon.

Yours truly,
WM. SMAILL.

Editor "Hardware and Metal":

To my mind, and as I have always understood the term, when I buy goods c.i.f., the seller guarantees the f.o.b. cost, insurance and freight only; his liability ceases when the bill of lading is signed.

When I accept a c.i.f. offer, it should be with full knowledge of what kind of a policy, A. A. R. or F. P. A. the goods are to be insured under, and should a claim arise against the insurer, I recover in the same manner as though I had bought fo.b. and arranged my insurance. Should there be a claim from any fault of the carrier I recover as per bill of lading.

Should damage occur, through fault of shippers from bad packing or such, I claim on them; should goods become damaged from length of time in transit, but from no fault of either shipper or carrier, or from a cause not insured against, then the loss is mine.

The term c.i.f. is not synonymous with "Delivered"; as where one purchases c.i.f., the seller is not bound in case of loss to duplicate order as he would be were the goods bought "Delivered," as some of your correspondents would make out.

Yours truly,
EDW. STAIRS.

EARLY CLOSING IN MONTREAL

J. B. E. POIRIER, secretary of the Grocery Clerks' Association of Montreal, has written to a local paper as follows, regarding the movement for early closing in that city, to which we have at different times referred:

Sir,—The clerks of Montreal of different lines of business have organized themselves into an association called the "Early-Closing Society," of which I have been elected chairman.

The object of our organization is to induce our fellow-merchants and patrons to close their stores at a reasonable hour after 6 p.m. The movement has already been endorsed by the Grocers' Association of Montreal, which has asked its members to close their stores at 7 p.m. every Thursday night. The boot and shoe merchants and the retail dry goods merchants have also joined cause with us. The good work has already started and being put in operation in different parts of the city, especially in Point St. Charles. The merchants there are well contented because they can close their stores one night a week and are able to enjoy themselves with their families like other good citizens, and they hope that the movement will be kept up. Only they seem to have a certain fear that the movement will have a hitch, as one merchant, who has signed the agreement and has closed during three months, threatens to open his store on Thursdays, notwithstanding his agreement to join the others. This would be very serious, as one man opening his place of business forces his neighbors to do so as well, and so the whole line has to open up. As this merchant resides on Wellington street, right in the centre of business, I hope that he will stand by his agreement and not force all his confreres to open their places of business just on account of his opening his.

I would ask all ladies and buyers who generally do their shopping at night to be good enough to buy all their requisites during the day hours. By their doing so the merchants will have no pleasure in keeping their stores open at night. This is a favor I demand in the name of all the clerks of Montreal. The motto of all lady-buyers should be: "Day-shopping."

J. B. E. POIRIER,
Chairman of the "Early-Closing Society."

WOOD VS. IRON.

Much is being said about this being the age of iron, but it is no less the age of wood as some of the most important manufacturers of the day are in the line of woodenware. This is particularly true of the large and important Newmarket department of The United Factories, Limited. Among the many excellent articles of woodenware turned out by this large manufacturing establishment, one of the very best is its up-to-date snow shovel which, for lightness, strength and durability, far excels any of the iron or steel shovels being sold to-day. Now that the snowy season is approaching every dealer should handle this line which is destined to become the most popular snow shovel on the market.

THE TRAVELLERS MEET.

EVERY day for a week the travellers of The Canada Paint Co. from all over the Dominion have been meeting in a well-furnished apartment in the big establishment on William street discussing the affairs of the company with a view to remedying any defects that might creep in during the year and pushing forward the business generally. This is an annual event, and the company has been much benefited by it in the past.

Hard work is the rule at these meetings, which last from 9 in the morning until 6 in the evening, and the only liquids in sight of HARDWARE AND METAL'S representative, who was introduced, were two large cans of enamel paint, of which he was very kindly invited to partake—but declined on hearing the proportion of alcohol used.

Seats at the Academy of Music were reserved for the travellers to witness the production of "Sherlock Holmes," by Mr. Herbert Kelcey and Miss Effie Shannon, which was followed by a very enjoyable supper.

The Canada Paint Co.'s travelling staff is composed of about as "fit" a body of men as one might wish to meet.

STOVE POLISH FIRM'S CARDS.

The F. F. Dalley Co., Limited, stove polish manufacturers, Hamilton, are sending out, to all who wish it, a neat little card with the following humorous get-up on the back of it:

A Dutchman, addressing his dog, said, "You vas only a dog, but I vish I vas you, when you go mit your bed in you shust turn round dree dimes and lay down; ven I go mit the bed in I hav to lock up de blace, and wind up the clock and put the cat out, and ondress myself, and my frou vakes up and scolds, den de baby vakes up and cries and I have to valk him mid de house round, den maybe, ven I gets myself to bed it is time to get up again. Ven you get up you shust stretch yourself, dig your neck a leedle and you vas up. I haf to light de fire, put on de kiddle, scrap some mit my vife already and git myself breakfast. You play around all day and have plenty of fun. I haf to work all day and have blenty of drouble. Ven you die you vas dead; ven I die I haf to go to hell yet."

Please mention HARDWARE AND METAL when writing.

The president of The British Columbia Copper Company, James Frederick Sichenor, is dead.

MACHINERY AND ELECTRICAL SUPPLY DEPARTMENT

A MILLION DOLLAR COMPANY.

A MANUFACTURING company with a capital of $1,000,000 has been organized under the Ontario Companies' Act for the purpose of manufacturing the Henderson Roller Bearing in Canada. The demand for these bearings is reported to be steadily increasing, and from all parts of Canada as well as from various centres of the United States requests for the bearings have come in daily to the office. The company are making preparations for manufarturing on a large scale. Considerable of the stock has already been subscribed and applications are being received from leading investors for large blocks of stock in the company. The stock is now on sale and application for same may be made at the office, 403 Temple Building, Toronto. The stock is at present selling at par value, with a cash payment of 25 per cent., the remainder being subject to the call of the directors. There are no preference shares in the company.

The assets of the company consist of the patents for Canada, together with further improvements which may be made. They claim to have already developed the bearings to such a state of perfection that they are far superior to anything that has ever been offered to the public, and that general use is assured for them.

The company state that all their bearings that have been in operation have, by their continued use, demonstrated not only the reduction of friction, but the durability of the bearings, and wherever they have been used as a test they have proven so satisfactory that application has been made for a further supply to apply along similar lines.

NEW STREET-SWEEPING MACHINE

New street-cleaners is a machine which not only sprinkles streets, but also cleans and sweeps them. It is the invention of an engineer is Dusseldorf, Germany, and it works automatically.

Its component parts are a sprinkling wagon, a dump wagon and a device for raising dirt from the pavement. The driver, by moving a crank lowers the brush to the ground, and the moment the machine begins to move the brush begins to clean and the dirt is raised and thrown into the dump wagon. When the latter is filled, it is uncoupled and replaced by another.

As the dirt is raised the street is sprinkled, and in this way dust is avoided. Moreover, various experiments have shown that not only ordinary dirt, but also large stones and other weighty objects can be removed from the streets in this manner.

This useful machine will work as well in dry as in wet weather, and the brush is so constructed that it will thoroughly sweep even streets which have numberless curves and impressions. Horses are now drawing machines of this kind in a few German cities, but in the near future they will be replaced by motors. Experts say that it costs 40 per cent. less to clean streets with this machine than by the ordinary methods.—Sydney, C.B., Post.

THE GASOLINE ENGINE

IT is generally known that explosion is the principle on which gasoline engines are built, and that a mixture of air and gasoline exploded under pressure, and that the force thus exerted placed under perfect control through the medium of piston and fly-wheel is the method of utilizing the principle. The accompanying cut is an illustration of

one of the engines manufactured by The McLachlan Gasoline Co., Limited, Queen street east, Toronto. This company are having a very large sale of this machine, so large that they are compelled to double the size of their premises.

When one considers that a few years ago gasoline was virtually useless, it is easy to see how it is that this machine is demanding such a large sale.

The McLachlan Gasoline Engine Company do an extensive business through the western part of Canada, and have just received an order from the Government of the Northwest Territories for six of their five horse-power engines to be used in sinking shafts for oil throughout that part of the country.

A LARGE CONTRACT.

The Vancouver World publishes the following: W. Meredith, consulting engineer of The Vancouver Power Co., left yesterday for Coquitlam Lake. He states that the contract for supplying the 170 miles of copper wire which will be required for the transmission of the power from the North Vancouver power house to Vancouver, Westminster and other centres, has been let to The E. L. Phillips Electrical Works Co., of Montreal, the local agent for which is Mr. F. Darling, of the Molsons Bank Building. The contract price for the wire is in the vicinity of $35,000. The wire will weigh 150 tons, and will be delivered in three instalments, one-third in March, one-third in May and the balance in June, 1903.

UNDERGROUND WIRES.

The Bell Telephone Company intend applying to the City Council of Toronto for permission to put a portion of their wires underground. The company claim it is less expensive to keep the system in order by having the wires underground.

MACHINERY NOTES.

THE Ottawa Steel Casting Company, Limited, have been incorporated with a capital of $250,000.

The sheet-metal workers of Vancouver, B.C., organized a union last week.

A. C. Thompson's foundry at Sydney, C. B., is in the course of construction.

The Gananoque Spring and Axle Company, Gananoque, Ont., suffered a $10,000 loss by fire on November 15.

A fine 70 horse-power horizontal boiler has been shipped to Trussler Bros., of Trout Creek, Ont., by H. W. Petrie, Toronto.

Mackenzie & Mann, Toronto, have ordered $1,000,000 worth of steel rails for the C. N. R. from a steel concern in Germany.

The Canada Steel Shafting Company, Limited, Toronto, have been incorporated with a capital of $100,000. The head office will be in Toronto.

The Turner Lumber Co., of South River, Ont., have purchased a 150 horse-power engine to supply power for their plant. The engine was installed by H. W. Petrie, of Toronto.

The Niagara Falls Machinery and Foundry Co., Niagara Falls, Ont., have enlarged their plant by adding thereto a 14-ft. gap lathe and a 15-inch x 6-ft. screw-cutting engine lathe. This machinery was installed by H. W. Petrie, of Toronto.

A NEW SHIPBUILDING INDUSTRY.

A new shipbuilding industry is promised in Toronto, through the operations of a new company which has just received incorporation under the name of The Canadian Shipbuilding Company, Limited. Toronto capitalists are interested in this venture, the provisional board of directors being Frederic Nichols, William Mackenzie, Hon. Geo. A. Cox, W. R. Brock, M.P., and W. D. Mathhews. The capital of the company is $1,000,000, and the head office will be in Toronto. The company have powers to construct and navigate vessels, do a general forwarding business; also a wrecking business, and also acquire the rights of any companies already in existence.

PAINT, OIL AND BRUSH TRADES

HOW PAINTS ARE MIXED.

AN exchange has the following to say with regard to mixing paints :- The different liquids required for the mixing of the paint proper are all piped to the tanks. In each one the constant motion is kept up, stirring the contents round and round, while the color gradually combining with the oil and turpentine, is forced slowly out, in two heavy thick streams that resemble nothing so much as candy that is just arriving at the pulling stage. Some of the streams look edible, too, but with others, the likeness stops at the consistency

It is through these streams that the first blending of colors take place. Bright raw colors are made directly from the pigments. In almost every case one finds one of the two streams that are going down to the ground together, white, while the other is a strong color, which needs to be toned down.

After this mixing, comes the final grinding of the paint, and the addition of the different ingredients which are to settle its mission in life—for floor paints are ground with varnish, as are those for carriages and cars, more " drier " is put into some paints than others, and with some the difference is only in the fineness of the grinding.

The stones used for grinding paints are a peculiar kind of French burr, imported for the purpose, and very expensive. Some paints are ground three times, each time coming out noticeably finer and smoother.

Once having received the last grinding the paint is kept gently moving in the great tanks where it is stored. It is drawn off by big spigots into cans of different sizes, and it is here that one peculiarity of the large house comes in. For each can is not only measured—it is also weighed. A gallon must weigh just so much. As the can fills if the scales fall too soon, or not enough, work stops. Not another drop of that paint is sent out till the fault has been found out and rectified.

It is a unique method, and a good one. The cans are filled from the bottom. As soon as the paint has been poured in they are put on trucks and wheeled away over a series of little tracks, to have their bottoms soldered in and the labels stuck on. Every bottom has stamped upon it a number, so that the girl who pastes the labels can identify the cans, which otherwise would be all alike. But she knows the number that belongs to every brand of paint and uses her labels accordingly.

The track system runs all over the lower floor, switching the loaded trucks to the storage rooms, to wagons for local delivery, or to the railway cars, that stand ready to take the tons of paint over the country.

That is the way the paint is made—as the operation looks to an outsider. The wonderful part is the mixing and blending of colors. The foreman in the department where the paint is handled must have an absolutely accurate eye for color. He must know as he walks down past the long lines of giant tanks just the proper shade for the paint to every one. Then there are the rooms where new shades are made and tested, the rooms where are stored samples of absolutely correct paint, to which every batch must come up, and the rooms where the paints are tried on the surfaces for which they are intended, to see if they " spread " well, and have the proper grain and color.

For there are different paints for all kinds of surfaces, and for each use, the paint must be perfect of its kind.

CHEMICALS IN GLASS-MAKING.

IT is said by glass-makers that the glass windows of an ordinary house contain enough arsenic to kill a regiment of men—or women, for that matter. The arsenic is one of several articles besides sand that are used in making the useful transparent material, and deadly quantities of it are used, but when the finished product reaches the users of it there is absolutely no danger of poisoning.

In the ordinary glass factory the work is divided into many parts in two departments—the tankhouse and the pothouse. Tanks that will hold thousands of tons are used in the tankhouse, and in these the glass is melted. The glass manufactured in the pothouse is made in pots, and it is there that the arsenic is used. The heat in the tankhouse is so great that arsenic cannot be used there, for the reason that the drug is volatilized and escapes into the air.

When the fires are lighted and the tanks have been heated the glass mixture, consisting of glass, refuse, old glass, salt cake and sand, is dumped in, and as this melts and flows out, more of the materials used are put into the tanks. The molten mass seethes and "works," and when the salt water from the salt cakes is separated from it, the glass is skimmed. The " gatherer " then thrusts a blow-pipe in the mass until he has a large ball of it on the end of the pipe, and when this has been cooled and polished, a " blower " blows it first until it is shaped like an elongated pear and then into a large cylinder. The " snapper " then puts it through a process that enables him to remove the blow-pipe, and then the glass goes to the " flatteners " and their flattening ovens, where it is rolled out into sheets.

A greasy, dirty-looking coat of chemicals covers the glass when it is taken from the flattening ovens, and to remove this the sheets are placed in baths of sulphuric and hydrochloric acids, more or less diluted. Then they are cut into different sizes and made ready for packing. Hardly a scrap of glass is ever wasted. All the refuse goes back into the tank.—Paint, Oil and Drug Review.

JOHN McARTHUR ASSIGNS.

John McArthur, doing business in paints and oils at 354 St. James street, Montreal, has furnished a list of his creditors, among whom are The Baylis Manufacturing Co., $480.74, notes; J. MacMasterson & Co., $270.40, notes; F. W. Atkinson, $115, notes; Eastern Townships Bank, $295, note; C. C. McGee, mortgage, $500. The principal accounts are those of The Imperial Oil Co., $80 ; Canada Paint Co., $145 ; A. Ramsay, $125, and Wm. Campbell, $125.

PAINTERS' ORGANIZER RESIGNS.

P. H. Munson is no longer organizer of the Painters' and Decorators' Union. At a meeting of the union recently that officer sent in his resignation after an increase in his allowance had been voted down, and upon division, the resignation was accepted. Mr. Munson will henceforth be engaged as foreman for W. J. Sloan & Co., of New York, on the new King Edward Hotel, Toronto. His successor as organizer of the union will be appointed at the next meeting.

PAINT AND OIL MARKETS.

TORONTO.

THE weather is very favorable for the paint trade, and business is exceptionally good for this season of the year. There is a slight decrease in red lead, as will be noticed in our quotations. Gum shellac is a little stiffer this week. We quote :

WHITE LEAD.—Ex-Toronto, pure white lead, $5 to $5.25 ; No. 1, $4.62½ to $4.87½ ; No. 2, $4.25 to $4.50 ; No. 3, $3.87½ to $4.12½ ; No. 4, $3.50 to $3.75 in packages of 25-lb. and upwards ; ½c.

Standard Silver Co., LIMITED

31-41 Hayter St., TORONTO

THEIR 22ND ANNUAL MEETING.

THE twenty-second annual convention of The Sherwin-Williams Company, held at Cleveland during the first week of November was the largest and most successful in the history of the company. Each year the convention has increased in size, importance, and interest until it is now considered by the management the chief event of the business year. By means of these annual meetings, the officials keep in close touch with the representatives, get a better insight into trade conditions, and the representatives obtain a fuller knowledge of the paint business. It is an evidence of the company's broad and liberal policy of co-operation. The management is firmly convinced of the wisdom of the policy and believes that the conventions have contributed much toward the success of the business. The conventions engender enthusiasm, loyalty and good fellowship, and tend to make all more thoughtful and more thorough business men—more competent paint men.

Confidence was the keynote of this year's convention. The representatives were embued with enthusiastic confidence in The Sherwin-Williams Company, its products, and their own ability to push the sales. There was no word of dissatisfaction or hint of obstacles in the way of advancement. Everyone seemed confident of success.

There were many good reasons for this feeling of confidence. The convention marked the close of the most successful of the many successful years of The Sherwin-Williams Company. It has been a year of expansion along all lines. The increase in sales has far exceeded the estimates; a linseed-oil plant, in which the company are crushing, treating and refining their own linseed oil, has been established at Cleveland; the plants at Chicago, Montreal, and Newark have been materially enlarged; a new South-Western Division has been established at Kansas City; the export trade has advanced by leaps and bounds.

Although careful attention to business with valuable results was the feature of every session, social pleasures were not neglected. Enthusiasm and good fellowship were marked from the reception in the club room, Monday morning, until the last good-bye was said on Saturday. President Sherwin and General Manager Cottingham received an ovation when they arose to deliver addresses of welcome. Perfect sympathy and harmony between officials and salesmen were manifest during the week. Campaign and convention songs, and divisional yells enlivened proceedings and kept enthusiasm at a high pitch.

A smoker and entertainment was given in the club room of the company Tuesday evening, attended by the representatives and the managers and assistant managers of the various departments. This was the most sociable event of the week. Everyone got together and it was the happiest of reunions.

The annual banquet was held in the Cleveland Chamber of Commerce Auditorium, Friday evening. All the Cleveland employes and the visiting representatives were present, and 600 sat down at the tables. After dinner, speeches were delivered by Mr. Sherwin, Mr. Cottingham and representatives of the various divisions. The prizes for the different factory competitions were presented to the winners by President Sherwin, and souvenir badges were given to all at the banquet.

The convention was instructive and proved of genuine helpfulness to all in attendance. Representatives and managers received new views and new ideas. The sessions showed the officials and representatives that their interests were the same, and they left the conference a more united and vigorous force.

Geo. W. Boehner & Sons, planing millers, West Lahave Ferry, N.S., have dissolved partnership, and are succeeded by Boehner Bros.

MARKETS AND MARKET NOTES

ONTARIO MARKETS.

Toronto, November 21, 1902.

HARDWARE.

BUSINESS in wholesale hardware circles is keeping up well. No doubt the continued fine weather has had a good deal to do with this by enabling the mechanics and farmers to do a large amount of outside work, consequently there is a good deal of building going on and a lot of fencing being done. There have been no changes in prices, excepting an advance of 10c. per dozen in ash sifters. A large number of skates have been sent out and quite a quantity of cutlery is being sold for the Christmas trade.

BARB WIRE.—The conditions of this market are unchanged from last week. Quotations follow : $2.67½ from Cleveland and 12c. less in carlots. From stock, Toronto, $2.90.

GALVANIZED WIRE.—Trade in this line is slack. Our quotations are as follow : Nos. 6, 7 and 8, $3.20 per 100 lb. ; No. 9, $2.55 ; No. 10, $3.30 ; No. 11, $3.40 ; No. 12, $2.70 ; No. 13, $2.80 ; No. 14, $3.80 ; No. 15, $4.30 ; No. 16, $4.55. Nos. 6 to 9 base from Cleveland are quoted at $2.27½ in less than carlots and 12½c. less for carlots of 15 tons.

FINE STEEL WIRE.—There is not much business doing in this wire. The discount is 25 per cent.

SMOOTH STEEL WIRE.—This line is still quiet and featureless. The base price is quoted as follows : $2.60 per 100 lb. Oiling, 10c. ; coppering, 60c. and tinning, $2 per 100 lb. extra. Shipping points Toronto, Hamilton, London and Montreal, with freights equalized on those points.

WIRE NAILS.—These continue to be in good demand at unchanged prices. We quote the base price as follows : $2.50 in carlots and $2.55 for less quantities. The shipping points are Toronto, Hamilton, London, Gananoque and Montreal.

CUT NAILS.—A fair amount of business continues to be done in this line. We quote $2.50 per keg and 10c. less for carlots.

HORSE NAILS.—A good number of orders keep coming forward. Discounts are now as follows : " C " brand, oval head,, 40 and 10 and 7½ per cent. ; on " M " brand, 50, 10 and 5 per cent. ; " Monarch," 60 2-3 per cent. ; " Countersunk " head, 60 per cent.

HORSESHOES.—A good deal of business is reported doing in horseshoes. We quote: Iron shoes, No. 2 and larger, light, medium and heavy, $3.45 ; snow shoes, $3.70 ; light steel shoes, $3.55 ; featherweight (all sizes), $4.95 ; iron shoes, No. 1 and smaller, light, medium and heavy (all sizes), $3.70 ; snow shoes, $4 ; light steel shoes, $3.80 ; featherweight (all sizes), $4.95.

SCREWS.—A heavy demand continues for screws and there is still a shortage of the article on the market. Discounts are : Flat head bright, 87½ and 10 per cent. discount ; round head bright, 82½ and 10 per cent.; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.; round head bronze, 65 per cent. and flat head bronze, 70 per cent.

RIVETS AND BURRS.—These are active and scarce. The discounts are unchanged, and our quotations are as follows : Iron rivets, 60 and 10 per cent. discount ; iron burrs, 55 per cent. ; copper rivets, with usual proportion of burrs, 45 per cent. ; copper burrs alone, 30 and 10 per cent.

BOLTS AND NUTS.—There is still an active inquiry for bolts and nuts with a continued scarcity thereof on the local market. The discounts are quoted as follows : Carriage bolts, common ($1.00 list), 50 per cent. ; carriage bolts, full square ($2.40 list), 55 and 10 per

Nickel-Plated Tea Kettles

THE "CLIMAX."

The "CLIMAX"

cent.; carriage bolts, Norway iron ($3.00 list), 55 and 10 per cent.; machine bolts, all sizes, 50 and 10 per cent.; coach screws, cone points, 66 2-3 and 10 per cent.; elevator shaft and whiffletree bolts, 50 per cent.

SPADES AND SHOVELS.—These are still scarce owing to the inability of the manufacturers to promptly fill their orders. The discount is 40 and 5 per cent.

ROPE.—A good many orders keep coming forward for all lines of rope. The prices are unchanged. We quote: Pure manila, 14c.; British manila, 12c.; sisal, 12c.; lathyarn, single, 11c. and double, 11½c.; sisal bed cord, 3-cord, 48 feet, 65c.; 60 feet, 80c.; 72 feet, 95c. per dozen.

HARVEST TOOLS.—Jobbers are all sold up for next year's delivery. The discount is 60 to 60 and 10 per cent.

LAWN MOWERS.—These are very quiet. We quote: Woodyatt, 12-inch wheels, $7.50; Star, 12-inch wheels, $5.50; Daisy, 12-inch wheels, $4.90; Philadelphia, 10-inch wheels, $6; Ontario, 10-inch wheels, $12.75. The other sizes are in proportion. The discount is 50 per cent.

GREEN WIRE CLOTH.—Trade in this line is slow. The price is $1.40 per 100 square feet.

EAVETROUGHING, ETC.—Quite a quantity of eavetroughing is still moving out to all parts of the country. The prices are unchanged. Our quotations are: Eavetroughing, 10-inch, per 100 ft., $3.10; conductor pipe, 2-inch, per 100 ft., $3; 3-inch, $4; 4-inch, $5.25; 5-inch, $6.75 and 6-inch, $9.

CUTLERY.—All lines of cutlery are active and retailers this year seem to be laying in a greater supply than usual for the Christmas trade.

BUILDING PAPER.—A big business continues in building paper, the mild weather of this fall being favorable for a continuance of building operations longer than usual, and this is having its effect on the building paper market. We quote as follows: Dry sheathing, grey or straw, 35c. per roll; tar sheathing, grey or straw, 45c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll.

ASH SIFTERS.—There is an extra heavy demand for ash sifters this fall and a scarcity of supplies. The prices have been advanced 10c. per dozen, or $1.20 per gross. We quote $14.40 per gross.

TINWARE AND ENAMELLED WARE.—There has been quite a demand for tinware. Enamelled ware has been quiet.

STOVES AND RANGES.—The demand for stoves and ranges is not as great as it was last week, but there are still large numbers going out. The prices remain firm.

SCREEN DOORS, ETC.—Trade in screen doors and windows is quiet at present. We quote: Screen doors, common, 2 or 3 panel, walnut stained, 3-in. style, $6.60; stained, yellow or green, $6.80; in natural colors, oil finish, $8.15; 4-in. style, 20c. per dozen extra.

CEMENT.—The mild weather continues this week and keeps up the demand for cement. The manufacturers are busy filling orders that have been contracted for and are not in a position to accept new business. The prices continue steady. Quotations are as follows: Canadian Portland, $2.80 to $3.20; hydraulic, $1.35 per bbl. At the works the prices are $2.50 to $2.70 per bbl.

prices of ingot metals are more or less weak, finished materials in iron and steel are held firm. The tin markets outside are somewhat stronger, while copper is quiet and firm. The market in the United States for scrap iron shows signs of improving shortly, as the majority of the mills have secured contracts for all their requirements running through the year, and in some cases, through January.

PIG IRON.—A good demand keeps up for pig iron at unchanged prices. Our quotations are as follows: $23 for No. 1, and $22.50 for No. 2 at the Canadian furnaces. On track, Toronto, No. 2 Summerlee is quoted at $23.

STEEL BOILER PLATES.—These are active and unchanged. The price is $1.80 per 100 lb. in carlots.

STEEL RAILS.—These are quoted at $30 per ton for steam railways and $36 for electric railways.

TOOL STEEL.—A good active demand keeps up for tool steel and the market has an upward tendency. We still quote: "B C" and "Black Diamond," 10 to 11c.; Jessop's, Morton's and Firth's, 14c.; Jonas & Colver's, 8 to 15c.; ditto, "Air Hardening," 30 to 50c.; Chas. Leonards', 8 to 9c.; Park's "Silver," 12 to 14c.; Park's Special, 15 to 20c.

MILD STEEL.—This metal is scarce. with a good demand. The prices are unchanged at $2.50 to $3 per 100 lb. f.o.b. Toronto.

BOILER TUBES.—The market for these keeps active.

SPRING STEEL.—A heavy demand continues for this steel. We quote $3 to $3.50 on track, Toronto.

BAR IRON.—This market keeps strong and there is a scarcity of the article on the local market. The demand continues good. Our quotations are as follows: $2.05 up base. Extras cut to length while rolling: 2 ft. and over, 10c. per 100 lb., 1 lt. and under 2 ft., 15c.; under 1 ft., 20c.; over 20 ft. by special agreement, according to length and size.

BLACK SHEETS.—A fairly steady demand continues for black sheets. Quotations follow: Common, $3.15 for 28 gauge and dead flat, $2.50 for 26 gauge.

CANADA PLATES.—These are still moving out freely. We quote: All dull, $2.90 to $3; half-polished, $2.85 to $3.10; all bright, $3.75 to $3.85.

GALVANIZED SHEETS.—As the fine weather has permitted outside work to be done all along, it has had the effect of keeping up the demand for galvanized sheets. We quote: Queen's Head, $4.50 for 28 gauge; American, $4.40 for 29 gauge; Bell brand, $4.30 for 28 gauge; Gordon Crown, $4.50 for 28 gauge.

TIN.—There has been a brisk demand for tin this week. We quote $31 to $32 per 100 lb.

TINPLATES.—These have been in better demand. We quote: Charcoal, $4.75 to $5 and cokes, $4.25 per box.

COPPER.—Some business has been done in ingot copper io small lots. We quote: Ingot copper, $13 per 100 lb. and sheet copper, $22 to $23.

BRASS.—This market continues steady and unchanged. The discount is 15 per cent.

LEAD.—There has been a slight improvement in the demand for lead. Pig lead is quoted at $3.50 per 100 lb. and bar lead, $3.75.

IRON PIPE.—Deliveries from the manufacturers are coming forward more freely

Standard Paint & Varnish Works Limited

Makers of High Grade Varnishes, Japans, Paints, Colors & Enamels.

Windsor, Ont.

and the demand is active. We quote per 100 feet: ¼-inch, $2.40; ⅜-inch, $2.65; ½-inch, $2.85; ¾-inch, $3.65; 1-inch, $5.20; 1¼-in., $7.35; 1½-in., $8.95; 2-in., $12.55; galvanized, 1-inch, $7.20. Trade discount is 4 per cent. for carlots.

ZINC SPELTER.—Trade in this line continues light. Prices are unchanged at 5 to 6c. per lb.

ZINC SHEETS.—The demand has been more active. We quote: Cask lots, $6 to $6.25 and part casks, $6.25 to $6.50.

SOLDER.—This metal is in fair demand.

ANTIMONY.—Trade continues moderate. We quote $9 per 100 lb.

PETROLEUM.

The market for all grades of oil is very good, the only drawback being in getting cars to draw it to the city. We quote: Lily White, Canadian, 15 to 15½c. in bbls.; Silver Light, Canadian, 16½ to 17c. in bbls.; Crystal Spray, water white, American, 18 to 18½c. in bbls.; Pennoline, best American imported, 19½ to 20c. in bbls. In bulk, 2c. per gallon less.

HIDES, SKINS AND WOOL.

HIDES.—A moderate business continues in hides. We quote: No. 1 green, 8c.; No. 2 green, 7c.; No. 1 green, steers, 8½c.; No. 2 green, steers, 7½c.; cured, 8½ to 9c. per lb.

SKINS.—Calfskins and sheepskins are wanted. The other lines are less active. Our quotations are as follows: Veal skins, 6 to 14 lb. inclusive, No. 1, 10c.; No. 2, 8c.; do, 15 to 20 lb. inclusive, No. 1, 9c.; No. 2, 7c.; deacons (dairies), 60 to 70c. each; sheepskins, 65c.

WOOL.—The market is weak and unchanged. We quote 13½c. for fleece and 7½c. for unwashed wool per lb.

TALLOW.—The situation is unchanged. We quote 6¼ to 7c. per lb.

SEEDS.

There is not much doing in any lines on the list of seeds this week. For red clover, at outside stations, $6.50 to $6.75 will be paid. Alsike is worth $6.50 to $7 and timothy is nominal at $1.50 to $1.75. Higher prices will be paid for samples of extra fine quality, while inferior and lower grades would have to be bought at lower prices than the above to yield a fair margin of profit.

COAL.

The coal dealers are very patient and waiting their turn for coal. All the hard coal arriving in the city comes by boat from Oswego, and as there are only facilities for loading two boats at a time, it takes some time to get a cargo. Soft coal is a little easier this week. Hard coal is quoted at $8 per ton and soft coal at the international bridges is $5.50 per ton.

OLD MATERIAL.

Business continues to be brisk and the dealers are quite satisfied. The prices remain about the same as a week ago. We quote: Heavy copper and wire, 10c. per lb.; light copper, 8 to 8½c.; heavy red brass, 9½c.; heavy yellow brass, 8 to 8½c.; light brass, 5 to 5½c.; lead, 2 to 2¼c.; scrap zinc, 3c.; iron, No. 1 wrought, $13.00 per net ton; No. 2 wrought, $4.50; machinery cast scrap, $14.50 to $15; stove plate, $10; malleable and steel, $6 to $6.50; old rubbers, 6½c. per lb. and country mixed rags, 50c. per 100 lb.

EASTLAKE

STEEL SHINGLES

are made so carefully and accurately that they are fitted together with perfect ease.

Their patent side lock is the best shingle "wrinkle" you ever came across. It's a great help to be able to apply them so quickly and easily.

They are the popular lightning, rust and fire proof roofing.

Eastlakes are the best selling roofing stock you can carry. Read up our catalogue.

Metallic Roofing Co., Limited

TORONTO. MONTREAL. WINNIPEG.

QUEBEC MARKETS.

Montreal, November 21, 1902.

HARDWARE.

BUSINESS in the wholesale hardware trade is still quite active, though the heavy shipments of the past couple of weeks have eased off to a considerable extent, owing to the higher freight rates. Fence staples have been reduced from 10 to 25c. Malleable pound fittings have also gone lower, being now discounted at 25 per cent., instead of 23 4-5 per cent.

LAWN MOWERS—Prices for 1903 delivery follow: 10½-inch wheel by 12-inch cutter, $7.50; by 14-inch cutter, $8.00; by 16-inch do, $8.50; by 18-inch do, $9.00; by 20-inch do, $10.00. Star, 9-inch wheel by 12-inch cutter, $5.50; by 14-inch do, $5.75; by 16-inch do, $6. Daisy, 8-inch wheel by 12-inch cutter, $4.90; by 14-inch do, $5.10; by 16-inch do, $5.30. Philadelphia pattern, 7½-inch wheel by 10-inch cutter, $6; by 12-inch do, $6.50; by 14-inch do, $7; by 16-inch do, $7.50. Grass boxes are quoted as follows: 12-inch, $2.25; 14-inch, $2.25; 16-inch, $2.50; 18-inch, $2.50; 20-inch, $2.75. The discount on all the above is 50 per cent. off.

BARB WIRE.—The market is dull. The price is now $2.90 per 100-lb. keg f.o.b. Montreal, and $2.55 f.o.b. Cleveland.

GALVANIZED WIRE.—A very small amount of business has been done in this wire during the week. The prices from stock are as follows: Nos. 6, 7 and 8 gauge, $3.20; No. 9, $2.55; No. 10, $3.30; No. 11, $3.40; No. 12, $2.70; No. 13, $2.80; No. 14, $3.80; No. 15, $4.30; No. 16, $4.55; No. 17, $4.95; No. 18, $5.20. In carlots, f. o. b. Cleveland, the prices are: No. 9, $2.15; No. 12, $2.30; No. 13, $2.40, not dutiable. No. 10, $2.20; No. 11, $2.25; No. 14, $2.50; No. 15, $2.95; No. 16, $3.05, dutiable. In less than carlots, 12½c. per 100 lb. extra is charged.

SMOOTH STEEL WIRE.—The market is still quiet and without feature. Quotations follow: Bright and annealed, $2.60 per 100 lb. f.o.b. Montreal, Toronto, Halifax, London, Hamilton and St. John. Net extras per 100 lb. are now as follows: Coppered wire, 60c.; tinned wire, $2; oiling, 10c.; spring wire, $1.25; best steel wire, 75c.; bright soft drawn, 15c.; special hay-baling wire, 30c.

FINE WIRE.—There has been no change and a small amount of business is doing. The discount is 25 per cent, with the following net extras: 1 and 2-lb. hanks, 25c. per 100 lb.; ½-lb. hanks, 37½c. and ¼-lb. hanks, 50c.

BRASS AND COPPER WIRE.—There is very little doing. The discount on both wires is 62½ per cent.

FENCE STAPLES.—A reduction in price has been made, amounting to 25c. per 100-lb. keg in galvanized staples and 10c. in bright. Prices now are: Galvanized, $3 per 100-lb. keg; bright, $2.80, with an extra 25c. for 25 and 50-lb. packages.

WIRE NAILS.—There has been no quotable change and the market is still quiet at $2.25 per keg in small lots and $2.50 in carlots, f.o.b. Montreal, London, Hamilton, Toronto, Gananoque, Brantford, Windsor, Ont., St. John and Halifax.

CUT NAILS.—A few orders have been received, but the market is seasonably quiet and unchanged at $2.45 per keg in small lots and $2.40 in carlots.

HORSE NAILS.—Prices remain steady and unchanged. There is an active inquiry. Our quotations are as follows: "C" brand, 40, 10 and 7½ per cent. off; on "M" brand, "Oval," 57½ per cent.; "New City," 57½ per cent.; "New Countersunk," 65 per cent.

HORSESHOES.—Trade continues brisk in horseshoes. No quotable change has been made, and our quotations are as follows: Iron shoes, light and medium pattern, No. 2 and larger, $3.35; No. 1 and smaller, $3.60; snow pattern, No. 2 and larger, $3.60; No. 1 and smaller, $3.85; X L steel shoes, new light pattern, sizes 1 to 5, No. 2 and larger, $3.45; No. 1 and smaller, $3.70; featherweight, all sizes, 0 to 4, $5; toe weight, all sizes, 1 to 4, $6.25. Shoes, more than one size in a keg, 10c. per keg extra. F.o.b. Montreal only.

RIVETS AND BURRS.—Not much business is doing in these lines. Prices are unchanged. Quotations are as follows: Best iron rivets, section carriage, and wagon box, black rivets, tinned do., coopers' rivets and tinned swedes rivets, 60 and 10 per cent. ; swedes iron burrs are quoted at 55 per cent. off ; copper rivets, with the usual proportion of burrs, 45 per cent. off and coppered iron rivets and burrs, in 5-lb. carton boxes are quoted at 60 and 10 per cent. off list.

BOLTS.—The demand has been very light and the market quiet during the past week. There is no quotable change to report. We quote the discounts : Norway carriage bolts, 55 per cent. ; common, 50 per cent ; full square carriage bolts, 55 per cent.; machine bolts. 50 and 5 per cent.; coach screws, 66 2-3 per cent. ; sleighshoe bolts, 65 and 5 per cent.; blank bolts, 50 and 5 per cent.; bolt ends, 50 and 5 per cent. ; plough bolts, 50 and 5 per cent. To any retailer an extra discount of 10 per cent. is allowed. Tire bolts, 67½ per cent. ; stove bolts, 67½ per cent. Nuts, square, 3¼c. per lb. off list ; hexagon nuts, 3¾c. per lb. off list. To all retailers an extra discount of ½c. per lb. is allowed.

SCREWS.—There is not much doing this week. Our quotations are : Round head bright, 82½ and 10 per cent. ; flat head bright, 87½ and 10 per cent. ; brass, round heads, 75 and 10 per cent. ; brass, flat heads, 80 and 10 per cent.

CORDAGE.—Trade is quiet and prices unchanged. We quote as follows : Manila, 14c.; British manila, 12c.; sisal, 12c.; lathyarn, 11c.

BUILDING PAPER.—A fair demand is reported this week and a moderate business is doing at steady prices. We quote : Tarred felt, $1.70 per 100 lb.; 2-ply, ready roofing, 85c. per roll ; 3-ply, $1.10 per roll ; carpet felt, $2.25 per 100 lb. ; dry sheathing, 35c. per roll ; tar sheathing, 45c. per roll ; dry fibre, 50c. per roll ; tarred fibre, 60c. per roll ; O K and I X L, 65c. per roll ; heavy straw sheathing, $30 per ton ; slaters' felt, 60c. per roll.

SCREEN WIRE CLOTH.—The market is very quiet. The price is $1.40 per 100 square feet.

POULTRY NETTING.—The discounts on Canadian or English poultry netting for delivery in 1903 are : 60 per cent. off on 2 x 2 mesh, 19 wire, and 50 per cent. off on 2 x 2 mesh, heavier.

HARVEST TOOLS.—The discount for 1903 delivery is 60 and 10 per cent.

FIREBRICKS.—Nothing of importance has occurred on this market. We quote: English, $16 to $22 and Scotch, $17 to $22 per 1,000.

CEMENT.—A good trade is doing in cement. Prices are unchanged. We quote as follows : Canadian cement, $1.90 to $2.25 ; German, $2.20 to $2.30 ; English, $2.15 to $2.25 ; Belgian, $1.70 to $1.95 per barrel ex-wharf, and American, $2.10 to $2.20 ex-cars.

SKATES.—An active movement still continues in skates. Our quotations are as follows : Halifax pattern, 36c. per pair ; nickel-plated, 65c.; ladies' nickel-plated, 60c.; ladies' concave nickel-plated, $1.35 plain hockey, 27c. to $1.35 ; nickel-plated hockey, 60c. to $2.50 ; double-end hockey, $1.50 to $3. Skate straps, 35c. to $1.35.

HOCKEY STICKS.—Trade is still good and quotations are as follows: Best second growth, goal keepers', $4.20 per doz.; ash, $2.90 ; elm, $2.25 ; boys' elm, $1.10 ; common, 90c. Regulation pucks, $1.50 per dozen.

SNOW SHOVELS.—There is a good demand but no change in prices has been made. Quotations follow : "Habitant," $2.25 to $2.40 ; "Victor," 30 per cent. off ; steel railroad shovels, 48 and 5 per cent. off.

FIRE SHOVELS.—A fairly good business is still doing. Our quotations follow: No. 70, 38½ to 40c. per dozen ; No. 55, 55 to 60c.; No. 57, 82½ to 90c.; No. 60, 82½ to 90c.; No. 65, $1.37½ to $1.45 ; No. 80, 50 to 55c.; "Duplex," No. 7, $1.21 ; No. 9, $1.52 ; No. 11, $1.82.

LANTERNS.—The market is active and prices are steady. Quotations are as follows : Tilt, lift or hinge, No. 0, $4 per dozen ; Cold Blast, $7 per dozen ; dashboard, No. 0, $5.75 per dozen ; cold-blast dashboard, $9 per dozen. Extras are as follows : Japanning, 50c. per dozen ; copper-plating cold blast, $2 per dozen. The prices quoted are f.o.b. London, Hamilton, Toronto, Belleville, Kingston and Montreal.

METALS.

There has been no striking feature in the local market for metals during the week. Most lines, especially sheet metals, are in fairly active movement. Bar iron and iron pipe continue scarce. A better movement in coil chain is reported between importers and wholesale dealers.

BAR IRON.—There is a fairly good demand. The tone of the market continues firm on account of the scarcity prevailing. No quotable change has been made. We quote : Merchants' bar, $1.95 ; horseshoe iron, $2.20; extra refined, $2.35.

BLACK SHEETS.—There is a fair movement at unchanged prices, which are as follows : 28 gauge, $2.65; 26 gauge, $2.60; 20 to 24 gauge, $2.50 and 8 to 20 gauge, $2.50.

GALVANIZED IRON.—There is a moderate demand for this metal. Prices are as follows ; No. 28, Queen's Head, $4.40 ; Apollo, 10¾-oz., $4.40 ; Fleur de Lis, $4.15; Comet, $4.25; and "Bell" brand, $4.30. For less than case lots, 10c. extra is charged.

SOIL PIPE AND FITTINGS.—There is but little doing. Quotations are : Light soil pipe, 3 to 6 inch, 50 per cent., medium and extra heavy soil pipe, 2 to 6-inch, 60 per cent.; extra heavy soil pipe, 8-inch, 45 per cent.; light fittings, 2 to 6-inch, 50 and 10 per cent.; medium and extra heavy fittings, 2 to 6-inch, 60 per cent.; extra heavy fittings, 8-inch, 45 per cent.

PIG IRON.—Summerlee is quoted this week at $23 to $23.50 f.o.b. Montreal. Canadian pig iron is very scarce with some dealers.

INGOT COPPER.—There is little doing. The price is 13c.

INGOT TIN.—The price has not been changed, Straits tin still selling at 28 to 29c.

PIG LEAD.—A small amount of business has been done this week. The price in carlots is $2.90 and in smaller lots, $3.25.

LEAD PIPE.—A moderate inquiry is reported this week. Composition and waste sell at 8c. and ordinary at 7c. The discount is 37½ per cent.

IRON PIPE.—It is now almost an impossibility to obtain iron pipe, and it is stated that deliveries cannot be made till December. Our quotations are as follows : Standard pipe, per 100 feet, in lengths under 19 feet : Black, ¼, $2.40 ; ⅜, $2.65 ; ½, $2.85 ; ¾, $3.65 ; 1-in., $5.20; 1¼, $7.35; 1½, $8.95; 2-in., $12.55.

Let us talk the matter over with you, we can SHOW YOU.

CAVERHILL, LEARMONT & CO.

Wholesale Hardware Merchants **MONTREAL.**

Galvanized, ¼, $3.20 ; ⅜, $3.45 ; ½, $3.85 ; ¾, $5 ; 1-in., $7.20 ; 1¼, $10.05 ; 1½, $12.-20; 2-inch, $16.85. Extra heavy pipe, plain ends, are quoted per 100 feet as follows : Black, ½, $4.20 ; ¾, $5.25 ; 1-in., $7.55 ; 1¼, $10.55 ; 1½, $12.75 ; 2-in., $17.-60. Galvanized, ½, $5.20 ; ¾, $6.65 ; 1-in., $9.55 ; 1¼, $13.25 ; 1½, $16 ; 2-in., $21.90. For threads and couplings 5 per cent. is added.

TINPLATES.—These have been steady on the market and no change is reported. The price of cokes is now $4.25 and of charcoals, $4.75 to $5.25.

STEEL.—There is only a small demand now. We quote: Sleighshoe, $2.05; tire, $2.20; bar, $2.05; spring, $2.85; reeled machinery, $2.75; toecalk, $2.70.

SHEET STEEL.—Business is quiet and prices are unchanged. We quote: Nos. 10 to 20, $2.50; 3-16, $2.50; ¼, 5-16 and ⅜, $2.40.

TOOL STEEL.—The demand for this steel has not improved and the market is quiet. Quotations are as follows : Black Diamond, 8c.; Sanderson's, 8 to 12c., according to grade ; Jessop's, 13c.; Leonard's, 7½c.; Jonas & Colver's, 8 to 15c.; "Air Hardening," 45 to 60c.

CANADA PLATES.—There is a fair demand. We quote: 52s, $2.70 to $2.80; 60s, $2.85 to $2.90; 75s, $2.80 to $2.85; full polished, $3.75 and galvanized, $4.25 to $4.35 ; galvanized, 60s, $4.45 to $4.55.

TERNE PLATES.—The demand is slight and no change is to be reported in the prices. We quote $7.50.

COIL CHAIN.—There is an improvement in the demand. During the past week a number of good orders have been received by importers. Quotations are : No. 6, 12½c.; No. 5, 10½c.; No. 4, 10c.; No. 3, 9½c.; ¼-in., 7¼c. per lb.; 5-16, $5; 5-16 exact, $5.25; ⅜, $4.25; 7-16, $4.05 ; ½, $3.95; 9-16, $3.85; ⅝, $3.55; ¾, $3.50; ⅞, $3.45; 1-inch, $3.45. In carload lots an allowance of 10c. is made.

SHEET ZINC.—The market is still quiet. The price is $5.85 to $6.25.

ANTIMONY.—This sells at 10c., though the demand is only moderate.

ZINC SPELTER.—The market remains quiet and unchanged. The price is 5c.

SOLDER.—Bar solder is quoted at 20c. and wire solder at 18c. The movement is still active.

SCRAP METALS.

There is a fair movement in most lines of scrap metals and prices are well maintained. Copper is about the only line that is dull. Machinery scrap is a little higher, owing to the increased competition for it. Malleable and steel are also higher, and rubbers have taken a stronger position. We quote: Heavy copper, and wire, 10c. per lb.; light copper, 8c.; heavy red brass, 10c.; heavy yellow, 8¼c. light brass, 5c.; lead, 2 to 2¼c.; zinc, 2½ to 2¾c.; iron, No. 1 wrought, $15 to $16; No. 2, $7 per ton; machinery scrap, $15 to $16; stove plate, $12; malleable and steel, $6; mixed country rags, 60 to 70c. per 100 lb.; old rubbers, 6½ to 6¾c. per pound.

HIDES.

The market is fairly active. We quote : No. 1 hides, 9c.; No. 2, 8c.; No. 3, 7c. Calfskins, 8 to 10c.; lambskins, 60c.

MONTREAL NOTES

Linseed oil is 2c. lower.

Fence staples have been reduced in price.

Malleable pound fittings are 1 1-5 per cent. lower.

NOVA SCOTIA MARKETS.

Halifax, November 18, 1902.

THE hardware business for the last week has been up to the average in all seasonable lines, and all dealers are fairly busy. The volume of business done up to date is quite satisfactory and the conditions prevailing give encouragement for a good business right through the season. Much difficulty is still experienced in getting orders filled in some lines by the manufacturers, but this condition, no doubt, prevails everywhere on account of the firm position of the iron and steel markets and the great demand for lines in which these articles are used. With the exception of cordage all lines of hardware are firm.

* * *

The position in cordage is peculiar. Dealers state that British manufacturers have travellers in the Canadian field who are selling cordage direct to the retailers, and at prices below those recently prevailing. The dealers claim that the British manufacturers can do this with profit, as the article sold is inferior to the Canadian make. To meet the competition a general reduction has been made and the prices now quoted are as follows : Manila, 14c. base; sisal, 12c. ; lath and shingle yarn (single), 11c. and double, 11¼c.

* * *

The forced cut seems to have taken the trade unaware, as foreign competition had not been expected; and as there was every indication of firmness in cordage lines, heavy stocks had been laid in to meet the ever-growing demand of the Canadian trade. Rather than carry over

these large stocks the cut has been made. No doubt the decline in prices will only continue for a short period, as it is considered by the trade that the foreign competition has been efficiently met.

* * *

In this connection it may be mentioned that in the Maritime Provinces there are some 43 jobbers who handle from 10 to 150 tons of cordage of all kinds each year. Out of these there are nine in Halifax who handle in all about 600 tons. Those in a position to understand the conditions of the trade state that, considering the firmness of hemp, which largely controls the market prices of the manufactured article, prices must soon rise again to the normal position. In the meantime, the retailers who have purchased the cheaper imported article may have learned a wholesome lesson.

The trade barometer runs fairly high for the last week, amounting to $230,745, apportioned as follows: Great Britain, $83,484; West Indies, $89,548; United States, $32,504; Brazil, $9,670; Newfoundland, $9,068; Germany, $5,720; France, $650.

R. C. H.

CATALOGUES, BOOKLETS, ETC.

HANDBOOK ON PATENTS.

MUNN & CO., of New York, the publishers of The Scientific American, have just issued a valuable little book on the general question of patents, caveats, designs, trade-marks, copyrights, etc. There are over 50 pages o matter, which describe carefully all that a man desirous of securing a patent should know. Several pages are taken up with a useful collection of abstracts of important legal decisions in patent cases.

A NEAT CATALOGUE.

The Garvin Machine Co., New York, favor us with a copy of their latest catalogue. It is a very neat book of 56 pages, and is full of valuable information for the machine and hardware trade. Every page contains an illustration of some machinery manufactured by this firm. A copy of the catalogue will be forwarded by writing The Garvin Machine Co., Spring and Varick streets, New York. Mention HARDWARE AND METAL when writing.

A TIME-SAVING METHOD OF SECURING KNOWLEDGE.

The 5½" hand-drill with cut teeth and double gear. We think there is nothing offered to the trade to-day that will compare with this one in ability and chuck capacity. It has two speeds, regulated and controlled by quick change. A three-jawed chuck that will hold from 0 to ⅜", a finished cocobolo handle, and is capable of drilling ⅜" holes in iron and steel. Ask your jobber for Goodell-Pratt Co.'s catalogue. These goods are carried by all the leading wholesale trade. Decatur, Bull & Co., Montreal, are sole Canadian agents.

WINDSOR RETAIL MERCHANTS

AT the annual meeting of the Windsor, Ont., branch of the Retail Merchants' Association of Canada, held recently at Windsor, the following officers were elected for the coming year: President, A. E. Edgar; vice-president, C. C. Schumacher; secretary, B. G. Davis; treasurer, Geo. H. Wilkinson; auditor, A. J. McTavish. The board of directors will consist of the officers and the following merchants: James Pennington, J. E. D'Avignon, N. J. Clinton, W. A. Sweet and Geo. H. Nairn.

The meeting was an enthusiastic one and the association promises to make

President A. E. EDGAR.

itself known in the welfare of the city.

The association has done much in the past year in the way of removing objectionable schemes from trade and spreading sociability among its members.

D. M. LAMBERT DEAD.

After an illness of two weeks, D. M. Lambert, manager of The Bailey Cutlery Co., Limited, Brantford, Ont., died on November 12 at the age of 28 years. The success Mr. Lambert had already achieved in the business world gave promise of a very successful future. His untimely demise is deeply regretted both in the business and social world. "Hardware and Metal" extends its sympathies to his bereaved friends.

PARIS GREEN AGAIN.

The Canada Paint Co. are well to the front as regards the manufacture of paris green, which may be seen by their advertisement. They have started to manufacture in Toronto and Montreal and will turn out immediately 250 tons, and, if the demand warrants it, another 50 or 100 tons. Their green met with extraordinary success last year, and the company are bound to meet the demand for a first-class article and keep the money in the country. There is no necessity nowadays to import paris green when the market can be well supplied by home manufacturers.

PRESENTATION TO A. DUNN.

A. Dunn, superintendent of The Consumers Cordage Co., Limited, Montreal, was presented with an address and silver smoking set on Tuesday night, November 18, by Division No. 2, A.O.H., of which he is president. The presentation took place at his residence on the occasion of his silver wedding.

AS GOOD AS THE BEST.

The Consumers Cordage Co., Limited, Montreal, sent out to the trade, under date of November 15, the following circular in regard to their manila rope:

"Having had many inquiries from customers, in regard to the quality of hemp used in manufacturing our "British" manila rope, we wish to emphasize the fact that this brand contains pure manila only.

"We guarantee it equal in every respect to the manila cordage exported to this country from Great Britain, and offered in this market."

PERSONAL MENTION.

Mr. F. O. Lewis, of Lewis Bros., Montreal, was in Toronto last Saturday.

Mr. Robert Munroe, of The Canada Paint Co., Montreal, was in Toronto this week.

Mr. David Phillip, manufacturers' agent and broker, Winnipeg, Man., is on a business trip to Toronto and Montreal.

The well-known wholesale and retail hardware dealer, Mr. A. M. Bell, of A. M. Bell & Co., Halifax, N.S., was in Montreal last week.

Mr. E. K. Spinney, of Yarmouth, N.S., one of the heaviest jobbers and retailers in the hardware trade of the Maritime Provinces, was in Montreal last week.

Mr. William Abbott, manufacturers' agent, 13 St. John street, Montreal, has been confined to the house for several days, owing to a rather severe injury to his ankle which he received last week.

H. A. Hodge, president of the Quebec Southern Railway, says the plans for the tunnel under Montreal harbor are ready and will be submitted to the Government at Ottawa at once. The plans are for a double track from the south shore to a central station in the heart of Montreal. The width of the tunnel will be 27 feet and it will be 21 feet high. Its greatest depth will be 15 feet below the water bed and will be constructed with concrete and stone masonry with an enamelled brick lining.

WINDOW GLASS.

Send in your specification now and secure good sizes before the assortments get broken up. Large stocks are now arriving, but so are orders, and many good sizes are sent out as fast as they come to hand. Then when arrivals cease, prices generally stiffen up for the winter. Buy now.

STAR, DIAMOND, DOUBLE.

Rolled, Ornamental, Cathedral, and all kinds of glass.

A. RAMSAY & SON
MONTREAL.

The Fairbanks Company

MONTREAL. - - - - - VANCOUVER.

HEATING AND PLUMBING

NEW GAS PLANT.

THE Halifax Electric Tramway Company have decided to have two new gas plants installed, and they will equip a gas house second to none in Canada, expending $25,000 in improvements on the equipment purchased from The People's Heat and Light Company. When the equipment is completed it will have a capacity of 810,000 cubic feet per day, as against about 350,000 to-day, and it is the hope of the company to be able to furnish a better gas at a cheaper rate than it can be furnished to-day.

The contract for installing the carburetted gas plant has been awarded to The Western Gas Construction Company, of Fort Wayne, Ind., and the agreement is to put in at the old gas works, south of the lumber yard, a carburetted apparatus with a capacity of 450,000 cubic feet of gas per day. Oil figures largely in the process of gas generating, the gas taking its illuminating power from the vaporized oil.

The contract for furnishing the oil has been awarded to The Imperial Oil Company. The plant is to be ready by February 15. This carburetted system is installed at Montreal, Toronto, London, Ont., Ottawa, and other parts of Canada.

The other plant to be installed is a coal gas plant and the contract has been awarded to Adam Weber & Co., of New York City. It is to have a capacity of 360,000 cubic feet per day. It will be thoroughly modern and up-to-date and will be ready early in the spring.

DEATH OF FREDERIC TUDOR.

The heating trade will learn with regret of the death of Frederic Tudor, who passed away at his home in Lincoln, Mass., recently, at the age of 56 years. Mr. Tudor was formerly a heating contractor, and well-known both in Canada and the United States. He invented many devices for use on heating apparatus, such as thermostats, fractional valves, steam regulators, etc. Among other important pieces of work he installed the heating and ventilating systems in the Metropolitan Opera House in New York, the Court House at Pittsburg, Pa., and the Walker Building of the Massachusetts Institute of Technology in Boston. The latter was designed by Professor S. Homer Woodbridge, and declared impracticable by many contractors. But Mr. Tudor considered it feasible and installed it in such a manner that it proved a success. Mr. Tudor delved deeper into the principles governing the operation of extensive heating plants than most of his confreres and left behind him many working examples of his ideas that have been adopted at home and abroad.

A BUSY FIRM.

Guest & Co., Church street, Toronto, are a busy firm at present. They have so many contracts for plumbing and heating that they find it almost impossible to handle the work. This firm are also handling the "Brilliant" gas tip. It is a patented tip and is guaranteed to save from 10 to 50 per cent. in gas bills.

STEAM AND HOT-WATER TRADE.

A decided benefit has been derived by the whole trade from the policy that has prevailed in the marketing of steam and hot-water goods during the year. It is only during recent years that the trade began to see where their business could be bettered and be made more satisfactory to everybody. It is a frequent occurrence now for the manufacturers to hold meetings and discuss the best methods of improving the steam and hot-water system. By this means the public are deriving at least 50 per cent. more benefit from their heating apparatus.

PLUMBING AND HEATING CONTRACTS.

Fiddes & Hogarth, King street east, Toronto, are putting in the hot-water heating in Capt. Trigg's house on Walker avenue.

The plumbing and heating of the Board of Trade Building, Montreal, is being done by J. W. Hughes. He is using Gurney's radiators on the job.

Guest & Co., Church street, Toronto, have a contract for Joseph Wormsley, Sackville street. They also have a gas-fitting contract for N. Smith, Pembroke street.

Fullerton Bros., Yonge street, Toronto, are remodelling the plumbing system for A. G. Strathy, Jarvis street. They also have three plumbing contracts on Shaw street and two on Crawford street.

E. Lesperance, plumber, St. Catherine street, Montreal, has just completed the contract for the plumbing, lighting and heating of a row of 18 houses belonging to F. Tremblay, on Sherbrooke street, between St. Dominique and St. Hippolyte streets. He used all American heaters and radiators on this job. He also has a contract for the plumbing of 12 houses on Massue street.

BUILDING PERMITS ISSUED.

TORONTO.

ALTHOUGH it is getting late in the season there is still a good number of building permits being issued. The following is a list of those issued by the City Commissioner during the past week: Essery & Ross, three-storey stone and brick stable, McFarren's Lane, for $3,500; S. W. McMichael, one-storey brick addition to storage building, Bay street, $500; E. Gordon Wills, pair semi-detached two-storey and attic brick dwellings, on Brunswick ave., $5,000; Fred J. Goodman, pair semi-detached two-storey brick dwellings, Delaware avenue, $4,000; W. Murray, two-storey and attic brick and stone detached dwellings, corner Crescent and Scarth Roads, $4,200; F. R. Baumhand, two-storey roughcast workshop and stable, Margueretta street, $250; S. Richardson, two detached two-storey brick dwellings, Maynard avenue, $5,000.

BUILDING NOTES.

Dr. O. Richer is erecting a fine dwelling at the corner of Lafontaine Park and Chambord street, Montreal.

John W. Peck & Co. are having plans prepared for the erection of a four-storey factory building on Elmire street, Montreal.

Brantford has issued 172 building permits so far this year, being eight more than for the whole of last year. The estimated cost of these building permits is $204,980.

The Department of Public Works is calling for tenders for the erection of an isolated block at St. Francois, on the Island of Orleans. The plans can be seen at the Public Works Department, Ottawa, at the Post Office in Quebec city, and at the Public Works Office, Merchants Bank Building, Montreal. The tenders must be in by Friday, November 28.

MONTREAL CONTRACTS.

Jos. Thibeault, plumber and steamfitter, 401 St. James street, has the contract for the plumbing, heating and roofing of the St. Leon R. C. church at Westmount, which amounts to $4,000. He also has contracts for heating and plumbing for cottages of Mr. Bennett, of Maisonneuve, amounting to $900, and for heating and plumbing and roofing of Mr. Picard's house on Sherbrooke street, representing a sume of $6,000.

"Business is good," said Mr. Thibeault, when asked as to the condition of trade, "and the outlook is very bright." Mr. Thibeault remarked that one objectionable feature reliable plumbers had to contend with at present was that work was being done by incompetent plumbers, which, in a measure, reflected upon the plumbing trade as a whole.

ADVERTISING TALKS.

By A. B. Caswell.

THERE are three essential points which the retail merchant will do well to observe in his advertising :

1. Right mediums.
2. Right goods.
3. Right way of using the mediums for the goods.

First—Right mediums. This is a question which causes no small amount of worry to the advertising manager of large concerns where general publicity is desired. The number of mediums is something enormous, and each presses some claim peculiar to itself as good and sufficient reason why its columns should be patronized. This, however, is not a matter which need greatly concern the average retailer, whose local daily or weekly is his only newspaper medium. Where there is only one paper in the town it is not difficult to choose, and in cases where there might be two or three, both might be used or a choice made of the best medium. Every local merchant has a pretty good idea as to their circulation, standing, etc., in the community. The merchant cannot appreciate too much the value of the judicious use of printers' ink. Space in a well-read paper, properly managed, cannot fail to produce results. Run your ad. regularly, daily or semi-weekly or weekly, as the case may be, but regularly, and let each advertisement be as near like a personal call upon your customer or prospective customer as possible. Besides the benefit to be derived from persistent advertising through the medium of the local papers, there are other methods, all of which are a means towards the end. For instance, neat window displays with cards drawing attention to the goods and telling their price is good advertising. Though a stationary advertisement, that is, one which can only be seen by the passing public, yet its general effect is always good. Many merchants pay large salaries to expert window-dressers, recognizing the importance of an attractive window from an advertising standpoint. Another good medium is the delivery wagon. It is a constantly moving advertisement, and will be seen in all parts of the community during a day. Many of the larger stores use their delivery wagons as a means for daily announcements to the public, placing showcards offering particular wares on the sides of the wagon and changing them daily, or as often as desired. An attractive wagon in itself, with the name of the owner neatly lettered upon it, is a cheap as well as an effective advertisement. I say cheap, because a delivery wagon is a necessity anyway to most retail stores, and an attractive outfit costs no more to keep up and little more to possess than a vehicle that would be discreditable.

Second—Right goods. I think I have said enough for the present with regard to mediums, and now just a word as to "Right Goods." Too much importance cannot be attached to the merit of the goods advertised. Any article properly advertised can be put upon the market for a time, but it cannot be expected to remain there unless it has merit to back up its advertising, and this is the secret of the meteor-like career of all sorts of quack merchandise which flash across the commercial sky and as quickly disappear into the darkness of oblivion again. They have not the staying qualities. Let me strongly advise the merchant to beware of advertising anything to possess merit which it has not. If you wish to run out some damaged goods, or goods of inferior quality, state openly that such is the case and that for this reason they are being sold at a sacrifice, etc., but never lose sight of the fact that "Honesty is the best policy." Good goods and honest, straightforward statements regarding them, once proved to be honest or backed up by an honest merchant will go farther towards building up a business than all the fake advertising in the world. Even our old friend, P. T. Barnum, who perhaps knew the value of advertising better than anybody else in America, used to say "You can fool all the public part of the time, and you can fool part of the public all the time, but you can't fool all the public all the time."

Third.—The right way of using the mediums for the goods. This comes last but is not the least important subject of this article. What I have just said above may also be taken as the keynote of this heading. A plain straightforward statement of facts is the prime feature of good advertising. Having once got the confidence of the public in this way there is no reason why you should not keep it. A catchy headline, neat display, and the judicious use of cuts all assist in adding to the attractiveness of the advertisement.

I also favor giving prices, though some object to this, saying that they do not want their opposition to know what they are doing. Rest assured your opposition knows all about what you are doing, whether you advertise or not, and his taking such an interest in your affairs is complimentary rather than otherwise. The public like prices and are going to buy at the store where they see that such-and-such a thing costs so much rather than at the store where such-and-such a thing is selling at a "very low price." These ambiguous statements are too much like a leap in the dark for this enlightened age. Give the public honest facts and figures if you want them to give you their confidence in return.

FARMERS' WAGGON PAINTS

FOR USE ON

FARM WAGGONS, CARTS, BARROWS, TOOLS, ETC.

"ANCHOR BRAND" are the best wearing, quickest drying and give a much better finish than any other.

CARRIAGE GLOSS PAINTS

GOING THROUGH HARDWARE MERCHANTS' CHANNEL.

It is a well-known fact that much of the silverplate trade of Canada is going through the hardware merchant's channel rather than through the jewellery store, to which it might be said to more legitimately belong. This is a trade which at one time was almost solely carried on by the jewellers, many of whom enjoyed a good margin of profit on it, larger, indeed, than they should have. But the days of large profits are gone, and when the public find that the same article can be obtained in another store down the street at less cost, they are not slow in learning to make their purchases there. Thus it was that the jeweller, who was suspected of asking a higher price for an article than he should have done, lost a large percentage of the silverplate business, which has gone to the hardware trade, a class of men believed to be satisfied with less profit. And the go-ahead hardware merchant has not been slow to take advantage of this opportunity. At this time of the year a neatly-displayed selection of silverware is a sure seller. Christmas, with its host of full-pursed buyers—for the season has been a bountiful one and Canada has, indeed, been blessed in this respect—will soon be here, and merchants who have not a stock of this useful and ornamental line of goods in hand, will lose their opportunity to a more enterprising competitor.

Little Girl.—Please, sir, mamma wants a spool of red silk.

Crusty Shopkeeper.—Why didn't your mother have sense enough to tell you the exact shade of red?

Little Girl.—She did, sir; she said about the color of your nose.—Chicago News.

PAINTS We manufacture these brands:—"LION," "PEERLESS," "OWL," "RAVEN" also Ready-mixed House and Floor Paints, Roof, Barn, Bridge and Brick Paints, Coach Colors, Varnishes, Japans, etc. Our prices will interest you. Write us,

The Ottawa Plant Works, Ottawa, Ont.

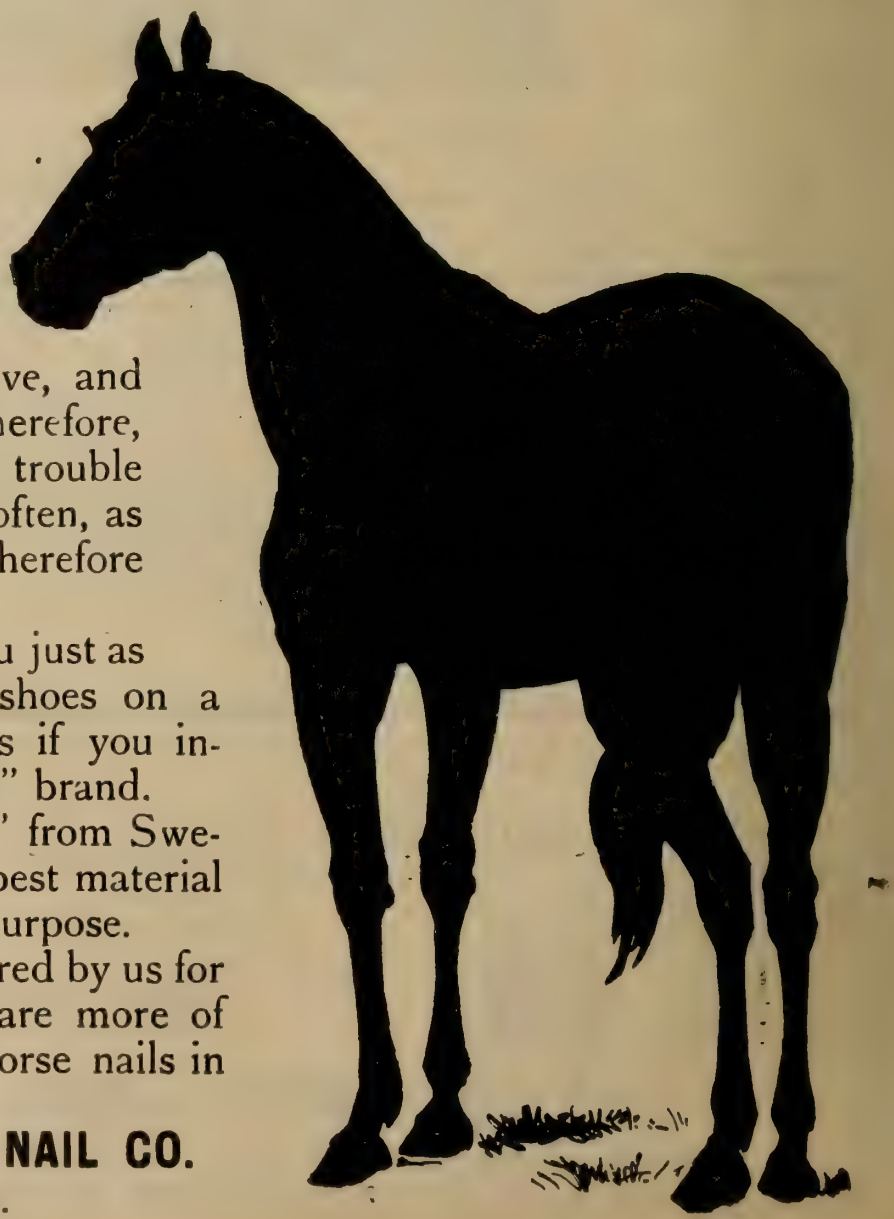
It will pay you to send us your specifications.

Hobbs Manufacturing Co., Limited, London, Canada.

COULD I TALK



"I would say that you will study my welfare and true economy, by always using the "**C**" brand nails for my shoes!"

They are the easiest to drive, and will last longest; you will therefore, not be put to the expense and trouble of getting shoes removed so often, as when using "cheap" and therefore inferior horse nails.

The Farrier will charge you just as much for putting a set of shoes on a horse with "cheap" nails, as if you insisted upon his using the "**C**" brand.

Every nail is "hot forged" from Swedish charcoal steel rods, the best material known in the world for this purpose.

They have been manufactured by us for the past 37 years. There are more of them sold than any other horse nails in Canada.

75 YEARS. ESTABLISHED 1825. 75 YEARS.

MANITOBA MARKETS.

WINNIPEG, November 17, 1902.

THERE is a good, steady trade, and all lines of Christmas goods show an active sorting demand.

There are a few changes in the prices of hardware. Ropes are down ½c. per lb. Barbed wire is 5c. lower, staples, also, are 5c. lower. Harvest tools are 60 and 10 per cent., as against 60 per cent. Turpentine has advanced 4c. per gal., and coal oil of all grades shows an advance of ½c. per gallon.

The price list for the week is as follows:

Barbed wire, 100 lb	$3 25
Plain twist	3 40
Staples	3 90
Oiled annealed wire 10	3 42
" 11	3 48
" 12	3 56
" 13	3 66
" 14	3 76

ADDING TO THEIR STOCK.

The Batty Stove and Hardware Company, York street, Toronto, have secured the agency and full control for Toronto and the surrounding district of the "Jewel" stoves and ranges made by The Burrow, Stewart & Milne Co., of Hamilton, and will carry a complete stock of these goods in their warerooms, Toronto, together with a full line of repairs. The advertisement of this firm appears on another page of "Hardware and Metal."

APOLLO BEST BLOOM
GALVANIZED IRON

The metal-worker who uses common galvanized iron makes his business harder to do and harder to get; and, of course, his profits less.

CURRENT MARKET QUOTATIONS.

November 21, 1902.

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figures being for larger quantities and prompt pay. Large cash buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list, as the desire is to make it perfectly accurate.

BRADSTREET'S

Capital and Surplus, $1,500,000. **Offices Throughout the Civilized World.**

Executive Offices: Nos. 346 and 348 Broadway, New York City, U.S.A.

THE BRADSTREET COMPANY gathers information that reflects the financial condition and the controlling circumstances of every seeker of mercantile credit. Its business may be defined as of the merchants, by the merchants, for the merchants. In procuring, verifying and promulgating information, no effort is spared, and no reasonable expense considered too great, that the results may justify its claim as an authority on all matters affecting commercial affairs and mercantile credit. Its offices and connections have been steadily extended, and it furnishes information concerning mercantile persons throughout the civilized world.

Subscriptions are based on the service furnished, and are available only by reputable wholesale, jobbing and manufacturing concerns, and by responsible and worthy financial, fiduciary and business corporations. Specific terms may be obtained by addressing the Company at any of its offices. **Correspondence Invited.**

Some Good Reasons Why we claim your trade

FIRST—The brass we make is the standard by which all other brass is judged.

SECOND—It was good enough for good people 40 years ago, and now that we are making a better brass it ought to be good enough for the younger generation.

THIRD—WE ARE ON THE SPOT with a full and complete stock for shipment same day order is received. This alone is worth a good many dollars in these rush times.

FOURTH—We have issued a comprehensive catalogue classifying over a Million Pounds. It's here for the asking.

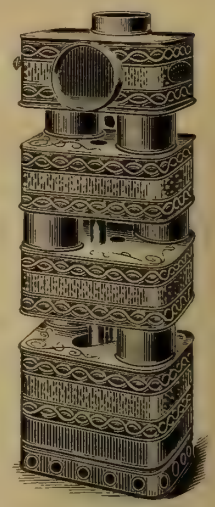
THE WINNIPEG HEATER With New Dress

THE BEST HEATER ON THE MARKET.

Positively saves half the fuel in many cases.
Order a sample at once and put it in use.
Every one sold will sell others without your assistance.



Size, 17½ x 14.
Height, 48 inches.

POINTERS:

The Winnipeg Heater is ornamental and does the work of a stove without extra fuel.

It is made out of heavy steel plate and arranged so that it can easily be taken apart and cleaned.

It will heat a room on the same floor as stove or an upstairs room.

It is constructed with flues for air circulation and prevents cold floors.

It has heat retaining pockets and will radiate heat when fire is very low.

It sells like "hot cakes" as soon as introduced.

It is not to be compared with any other drum on the market as it actually takes the place of a stove.

It absolutely prevents waste of heat out chimney.

ACT QUICKLY AS SELLING SEASON IS NOW ON.

The Winnipeg Heater will heat as large a room as the stove to which it is attached, without extra fuel.

ORDER A SAMPLE TO-DAY.

MANUFACTURED BY
The Metal Shingle & Siding Co., Limited
PRESTON, ONT.

Solid Steel Shovels

Stamped from one piece of solid Steel and secured to the handle with two bolts passing through two straps of steel at the back of the handle.

Better for snow than the old-fashioned wooden shovel, and strong enough for service around the barn. Finished in japan or galvanized. The low price we quote on them makes them fast sellers. If you have not heard about the price we will be glad to tell you.

GRAND TRUNK PACIFIC.

IT has been officially announced by Mr. Hays, the general manager, that the Grand Trunk Railway System is to be expanded into a transcontinental line. The vast stretch of territory north of the boundary line between Lake Superior and the Pacific Ocean is to be traversed by a third parallel line of railway at some distance north of the two other lines. The new road will be known as the Grand Trunk Pacific Railway, but will remain a part of the Grand Trunk Railway System.

Big as the project is, it will by no means be as great an undertaking as was the building of the Canadian Pacific Railway. The Canadian Northwest is now a land of great possibilities and boundless resources for the growing of wheat and cattle, and abounding in mineral wealth. It possesses a wheat belt larger than that of the Western United States. The Peace River Valley, hitherto almost unopened to commerce, is capable of producing the finest wheat on the continent of America.

Commencing at either Gravenhurst or North Bay, the new transcontinental line will traverse New Ontario, rich with minerals, timber and fisheries ; Manitoba, which is only just beginning to grow wheat on the scale it can be produced there; the Saskatchewan Valley, the recesses of which have hardly yet been explored by the white man; the rich wheat producing districts of the valley of the Peace River, a very small fraction of the land surface of which has as yet been subdued by the plough ; the district of Northern Alberta with its vast areas of woodland and much coal, to probably pass over the Rockies at the Pine River Pass, 500 miles north of the International boundary line, and 220 miles north of the Yellow Head Pass, which will probably be used by the Canadian Northern.

This new line is to be completed in about five years after the surveys are made. And by that time the output of the Northwest of last year of 70,000,000 bushels of wheat will be greatly expanded.

The railway accommodation in the Northwest is no longer equal to the task of moving the grain crop of that part of the country.

There is every indication that as soon as the Grand Trunk reaches the Pacific it will bid for a share of the trade of that ocean. No doubt but that a great part of the products of the country it will traverse will be carried off to the British and other markets from ports on the Pacific.

The terminals of this railway, as well as those of the Canadian Pacific and Canadian Northern, will become great shipping ports, the importance of which will be enhaced by the completion of the Trans-Isthmian Canal.

The importance the building of this great road will have on the trade of this country is too vast to contemplate. The millions of dollars spent on the building of this great transcontinental line means work for thousands of laborers, activity in our great steel industries and expansion of business for the merchants of Canada. A large home market will be provided for the products of the garden and the dairy, the common articles of food dealt in by the merchant. It means a heavy increase in population which will give our merchants more than they can do to attend to its wants.

BICYCLE SUNDRIES AND THE HARDWARE TRADE.

THERE are not many people who are yet thoroughly alive to the business that is now being done and is to be done in bicycle supplies. Riders of bicycles now use their wheels for several seasons, and so are continually requiring additional equipment, and also parts and sundries for replacement. These articles are standard goods, similar in many ways to a large proportion of the stock carried by hardware dealers. They should, therefore, be handled by the hardware trade rather than by any other class of retail dealers.

The volume of business in this line is rapidly increasing, and the margin of profit on bicycle sundries is good, so that there is every inducement for hardwaremen to take up such standard lines of bicycle supplies as are daily called for in every town during the bicycle season.

DISSATISFACTION WITH CUSTOMS RULINGS.

WHEN the late Hon. Clarke Wallace, M.P., took hold of the Customs Department he made radical changes in the administration. He had been a successful general store keeper and miller. He worked on business principles. His predecessors followed red tape and rules, and seemed to consider most importers unconvicted criminals.

Hon. Mr. Paterson, as HARDWARE AND METAL anticipated, has followed in Mr. Wallace's footsteps. He was a good business man himself, and the important appointments have, as a rule, been given to experienced business men.

In the last few years there has been less friction than at any time. The officials have been generally fair and reasonable in their dealings with the public.

There has, however, been more or less dissatisfaction with many of the rulings by local appraisers and by the decisions from Ottawa. With less prosperous times there will be much more complaint.

Importers at one point have had to pay a much higher duty than those at another. We know of cases where Montreal importers found it more profitable to have some invoices passed in Toronto or at some other point, and vice versa. These differences often enable one importer to undersell another and still make a nice profit.

Rulings have come from Ottawa that have been most inconsistent and showed positive ignorance. One week a special ruling will be sent out for the guidance of collectors. A few weeks later upon an appeal from another port an entirely different decision will be given on practically the same question.

It is not the fault of the officials at Ottawa. It is the fault of the system.

Long ago a remedy was urged in these columns. Its adoption was promised, and an attempt was made to carry it out.

It was that the special appraisers at the leading ports should meet at regular intervals to discuss all questions on which there was a difference of opinion. Their conclusions should be submitted to the Minister for final action.

Generally he would concur, but there would be cases where he might hear the importer and, looking at the matter from the broader standpoint, decide against the view of the Board of Appraisers.

OUR FLAX SEED CROPS.

A gentleman interested in the paint and oil business has lately returned from Manitoba, and speaks in glowing terms of the crops, not only of wheat and other cereals, but of flax seed, which in Manitoba this year is a record crop. It is a matter of some wonderment why the growing of this cereal has not long ago been given the attention by farmers that has been given to oats, barley, wheat, etc. It is certainly a profitable article for them to grow, and the demand in Canada is sufficient to absorb a great and increasing quantity of seed.

This year, probably for the first time, the whole amount of seed necessary for consumption in Canada has been produced here. The Manitoba crop will amount to 600,000 bushels at least; and this, with what has been grown in Ontario, is sufficient to supply Canadian crushers with enough material for linseed oil to answer all requirements in the Dominion for the year.

This is a long step in the right direction, and if another is taken we will have flax seed for export in addition to enough for home consumption.

RECIPROCITY WITH CANADA.

IT is gratifying to note the interest that is being manifested in Canada lately by the business men of the United States. Perceiving that the rapid expansion of the Great West, and the industrial activity prevalent from sea to sea has created a valuable market in this country for various products of the factory, foundry and the mine, a movement has been started in the Northern States of the Republic having for its object the effecting of reciprocity with Canada.

The National Reciprocity League, a newly-formed organization officered by prominent men of the Western States will hold a convention at Detroit on December 10 and 11, to consider the question fully and formulate plans for the conducting of a vigorous campaign to bring about the desired result.

At this convention the United States workers for reciprocity with Canada are expected to unite their forces to make a demand on Washington to request the re-convening of the Joint High Commission which adjourned in 1898. Should that body assemble, the supporters of this plan believe that there would result a trade treaty acceptable to both countries. It is claimed that during the past year there has been a radical change in the sentiment of the United States as to having closer trade relations with Canada.

The rapid way in which Canada is being invaded by settlers from the United States during the past two years, and the consequential great commercial and industrial growth of the country, have caused the merchants and manufacturers of the United States a desire to gain admittance to this market to sell their goods. There is now growing up in their minds a fear that this country will go elsewhere for outlets for her surplus products and buy where she sells her goods, if the United States Administration persists much longer in her attitude towards this country in regard to the high tariff which they are at present maintaining.

The value of our imports from the United States for the fiscal year ending June 30, 1902, amounted to $120,814,750, while to the United States we exported $71,196,505.

THE CEMENT INDUSTRY.

There has just closed a successful season for the cement industry. During this year more than twice the quantity of cement was used than the year before. The Trent Canal, elevators at Montreal and Port Arthur, and large undertakings at Winnipeg were responsible for the big business that has been transacted in cement. Large quantities also were used in municipal work in the cities and towns of the Dominion, where its lasting qualities are proving its suitability for permanent construction and building purposes. Large quantities are also now being used in railway construction.

The demand for the article has been much in excess of the ability of the Canadian manufacturers to supply, and consequently September to October there were considerable importations of the article from Belgium, Germany and England.

THE C.I.F. QUESTION.

BY AN IMPORTER AND EXPORTER.

HAVING followed the C.I.F. question for the last four or five weeks in your valuable journal, I would ask you to kindly permit me to here define the difference between the terms C.I.F., F.O.B., and Delivered.

COST, FREIGHT AND INSURANCE.

Take for example barbed wire at £13 per ton C.I.F. Montreal. The seller here agrees to sell the wire on wharf at Montreal at the above price, which is equal to $2.84 per 100 lb. without other charges, except wharfage or cartage in Montreal. The buyer taking delivery here must pay these charges. It must be expected that the seller intends to deliver his goods in good order and condition (unless otherwise specified).

DEFINITION OF F.O.B.

F.O.B. means goods sold free on board (for example, say Liverpool), at £12 per ton, in good order and condition. In this case, when goods are delivered to the transportation company and the bill of lading signed, the seller's risk ceases, and the buyer must provide his own insurance and pay all other charges, such as freight from Liverpool, duty, wharfage and cartage in Montreal. If he does not insure the goods properly he (the buyer) must be responsible for all loss, and sellers can claim full amount due them.

DELIVERED GOODS.

Sold "delivered Montreal" means the cost of goods plus all other charges, such as freight, duty, wharfage, insurance and cartage to your place of business.

There is no doubt that if the goods are not in perfect order that the buyer can refuse to take delivery of them, or in case of a shipment being lost the buyer can oblige the seller to duplicate or replace the lost shipment, whereas, in C.I.F. and F.O.B. instances, the seller is not understood to replace such lost shipments.

It is, however, clearly understood everywhere that a seller is responsible for good delivery until shipments have arrived at point of destination, as mentioned on sales or contract note.

If you sell eggs C.I.F. Manchester, Eng., you are liable for all risks until goods are landed there. If eggs are damaged by sea water, and if you have not insured against all risks (A.A.R.) there is no doubt, but you will have to suffer the loss, as in order to save a little on insurance you insured otherwise not covering your goods fully.

Suppose you had shipped your eggs by a schooner and insured F.P.A., and the shipment arrived rotten in Manchester, who would be liable to lose? The shipper, no doubt. He should have shipped by a steamer, knowing fully the class of goods sold, and if he wanted to save a little on freight charges he must take all the risk on himself.

When an agent, merchant or manufacturer is selling goods "C.I.F." it is generally because he wants to favor a certain transportation company with his freight and a certain insurance company with his insurance, probably because he has a commission or a special rate from both, and by that way make more on his goods.

Suppose that the transportation company would cease transporting goods to Montreal, and the seller could not secure the special rate that Mr. Agent had secured at first, who would pay the difference? The seller to be sure.

Having sold C.I.F. Mr. Seller is then liable for all charges and all risks until goods are landed in Montreal in good order, freight and insurance fully paid. This is the case.

Montreal, November 25.

INQUIRIES ABOUT CANADIAN GOODS.

Among inquiries received by the Canadian Section of the Imperial Institute are the following:

A firm of merchants in London are open to take up a first class Canadian lawn mower, and invites correspondence from manufacturers of same.

A Dublin house asks for names of Canadian dealers who can supply turkey quills in considerable quantities.

A London house would like to hear from Canadian owners of slate quarries who could ship large quantities of roofing slates of first-class quality.

[The names of the firms making the above inquiries can be obtained on application to the Editor of HARDWARE AND METAL.]

A THREAT TO SUE.

EDITOR HARDWARE AND METAL, — I struck a little the "swiftest" thing in the way of business this week that I ever saw. While in the store of one of my customers he showed me a statement for goods purchased in September, 60 days from October 1st. On November 12 he received a statement in the regular way, which was all right except for the fact that written in pencil on one side of the statement was the following: "We do not want to make you any costs, but unless we hear from you by return mail we shall hand to our attorney for collection."

Now, two questions arise: 1st. Can a man who is perfectly solvent be sued before an account is due? 2nd. What recourse has this man in case he is sued, and it is reported in trade papers, commercial bulletins, etc.?

WANDERER.

DEATH OF MRS. McCORMICK.

Mrs. J. C. McCormick, wife of Mr. J.C. McCormick, managing director of The Dominion Wire Co., Limited, died suddenly at Montreal on November 25. Mr. McCormick is well known in business circles both in Canada and the United States, and sympathy is expressed on all sides at his berevement. HARDWARE AND METAL joins with the friends of Mr. McCormick in expressing sorrow at his loss.

PRICE LIST MAKES CONTRACT.

ON November 20, Judge Morson handed down a written judgment in a case tried by him in the Divisional Court, Toronto. The E. W. Gillett Co., of Toronto, sued W. H. Gillard & Co., of Hamilton, to get $19.84, balance on a yeast bill, having sent the usual circular of prices. These prices, the defence maintained, were raised, or, rather the price of the yeast, the only line of Gillett's goods bought by Gillard, was raised, because that was the only line bought by the Hamilton firm. The Toronto firm denied this, and relied upon its published catalogue of prices, which has a clause stating that prices are "subject to change without notice." The judge said: "There is no question but that any vendor can sell at what price he pleases, and can change these prices from time to time as he sees fit; but this he cannot do if he has fixed his prices by contract with his customers. In this case the sending of the price list was an offer to sell the yeast at the prices mentioned in it; and the ordering of yeast by the defendants was an acceptance of that offer, and that constituted a contract at prices quoted; and the shipping of the yeast must be taken as having been done under this contract, which fixed the price and which price the plaintiffs, therefore, could not change as they sought to do. The plaintiffs can charge the defendants only the price quoted in the wholesale list; which the defendants paid before action, and the plaintiffs cannot recover the increased price claim, which is $19.16. I find judgment for the defendants, with costs."

GOOD ADVERTISING.

Notes by Miss Nora Laugher, Toronto.

ADVERTISING to bring business is very like fattening pigs for the market—you must keep right on with it. No man succeeds in fattening a pig by feeding it well one day and famishing it the next, neither can the merchant put money in his purse by advertising a portion of the year and neglecting it the remainder. An ad. must be continued—driven right home as it were. To advertise correctly is to advertise continuously. Merchants who have gained wisdom by experience thoroughly realize that very few people reply to an ad. the first time that it is brought before their notice. Of course, this does not apply to women and bargains. The very first bargain ad., if well written and catchily set, usually strikes home where it is intended to. I am speaking of some staple article which must be advertised steadily, but with proper variation and judgment, of course, in literary composition and typesetting.

* * *

When an ad. appears but once a week in a daily paper people forget that they ever saw it. Speaking of women and bargains: Men may laugh, but women will shop, and quite right they are. Shopping is a part of woman's work. It is generally compulsory upon her, for Adolphus George scorns the idea of entering the store to ask for canned peas at three for a quarter, or socks for little Jimmy at six pairs for 50c. He would much prefer lording it around and paying 12½c. per can for peas and 25c. per pair for his son and heir's hose upon any ordinary occasion. He has a soul above bargain day. Woman, on the other hand, does not have to be coaxed or coerced into shopping, she knows it is her bounden duty, just as sweeping the parlor, cooking the dinner and dressing the children. Necessity compels her as the housewife, to economize.

* * *

The one thing every merchant must keep in view who wishes to reap the best results from the money expended in advertising is to conduct his business and make his announcements that the public will recognize the business integrity of the house and the entire reliability of any announcement he may make. This must be a fundamental principle of permanent success.

* * *

The next thing is to have his announcements so prepared that not only will their literary construction be above criticism, but with such a knowledge of primary ideas and the typesetter's art that he will be able to properly emphasize the leading thoughts of lines of goods by an appropriate display of type. It is only thus that the public in these days of universal advertising and rapid living can be induced to read and act upon his announcement, which, to the man who is paying for it, is of more importance than all the other combined ads. in any medium.

* * *

Like the farmer, the advertiser sometimes finds that the harvest follows the planting very quickly, while, at other times, the result is slower. So much depends upon the character of the seed, the knowledge of the sower of the required conditions, and the field or the soil in which it should be sown.

COLD WEATHER HARDWARE.

Let us remind you of the coming need for . . . . . .

Galvanized and Japanned Coal Hods and Stove Shovels.

This also is the time to think about . . . . . .

Galvanized and Polished Sheet Iron.

We are prepared to supply your requirements at short notice and favorable prices.

BLACK BROS. & CO.,
HALIFAX.

SEASONABLE.

* * *

Any dealer who has good, reliable articles to dispose of and takes space judiciously in good mediums to bring those articles before the public with well-written ads. cannot fail to stir up a demand.

* * *

An ad. should be crisp and convincing; it should be well constructed so that it will catch the eye at once. Many a merchant has good and bright ideas regarding his own advertising, but lacks the ability to express them properly. Then, again, others have the ability to write their own advertisements, if they had time to concentrate their thoughts upon them. These men should remember that there are now many ad.-writers both ready and willing for a reasonable remuneration to put into correct and business-bringing form the ideas of the advertiser and see that the printer makes the mechanical work in displaying them prominently conform to the purpose of the advertisement.

DUTY ON SAMPLES.

S. B. KAHNWEILER, a representative of a New York firm of his own name, has recently had some trouble with the Canadian Customs officials, which reminds us that commercial travellers' samples, with the exception of a very few, are subject to duty. Mr. Kahnweiler crossed the border with two valises containing razors, toilet sets, etc., worth, as he claimed, $67.80. He passed the Customs officers without paying the duty, and in Montreal the samples were seized, in spite of his protests that the Customs officials had not asked him to pay duty and that he should not be blamed for the neglect.

Pending an investigation the samples were held in the hands of the Customs.

The Canadian tariff law on travellers' samples is thorough. As an example, it might be mentioned that the duty on gloves or boots could not be avoided by carrying only one of each pair. The tariff calls for duty to be paid on the half pair. The object of this is explained as having been designed to prevent two travellers for the same foreign house entering Canada by different points, each with a line of odd articles, as odd shoes or gloves, articles which would be of no commercial value, and then meeting at some point in that country sorting up the samples and thus cheating the Customs. The articles exempted are those which are entirely without commercial value, such as odd buttons and other articles of like nature, and these are allowed to enter free of duty.

Wm. F. Pushelburg, general merchant, Broadhagen, Ont., has sold out to A. W. Eickmeier.

BUSINESS CHANGES.

DIFFICULTIES, ASSIGNMENTS, COMPROMISES.

PIERRE CANTARA, contractor, of Ottawa, has assigned, and his creditors met on November 28.

C. Audet, general merchant, Roberval, Que., has assigned to V. E. Paradis.

M. Rousseau, general merchant, Warwick, Que., is offering to comprromise.

J. E. Heon, general merchant, St. Eulalie, Que., is offering to compromise.

A demand of assignment has been made on Aumond & Caty, contractors, Montreal.

W. A. Paterson, general merchant, of Brysonville, Que., is offering to compromise.

The creditors of J. Boucher, general merchant, St. Adrien, Que., have held a meeting.

A. E. Morris & Co., general merchants, Wallace, N.S., are offering to compromise at 60c. on the dollar.

McMillan & Day, agricultural implement agents, Owen Sound, Ont., have dissolved, and A. McMillan continues.

Knowdell & Hodgson, dealers in stoves and tinware, Vancouver, B.C., have dissolved partnership; R. C. Hodgson continues.

B. S. Whitman, mason, of Lawrencetown, N.S., has assigned to the official assignee, and his creditors met on November 27.

PARTNERSHIPS FORMED AND DISSOLVED.

James Thomas & Bros., contractors, of Montreal, have dissolved.

Millette & Bail, sash and door factory, Farnham, Que., have dissolved.

The Alpha Paving Company, contractors, Montreal, have dissolved.

Denis & Lemaire, general merchants, of St. Cesaire, Que., have dissolved.

F. F. Powell & Co., roofers and contractors, Montreal, have registered a new partnership.

Lee & Sheppard, hardware and stove dealers, Goderich, Ont., have dissolved; W. C. Lee continues.

SALES MADE AND PENDING.

The Alberni Shingle Mill, Victoria, B.C., is to be sold by the sheriff.

The assets of Jos. Pineau & Co., general merchants, Bic, Que., have been sold.

The assets of Adrien Barette, general merchant, St. Tite, Que., have been sold.

The business of F. W. Foster, general merchant, Ashcroft, B.C., is for sale by tender.

Thos. Therriault, blacksmith, Watford Station, Que., is advertising his business for sale.

The assets of the estate of Cumming & Co., general merchants, Ferguson, B.C., have been sold by auction.

CHANGES.

T. Costen & Co., gunsmiths, Montreal, have registered.

Wm. D. Tristin, blacksmith, Chatham, Ont., is closing up there.

Loftus & Co., cement roofing merchants, Montreal, have registered.

William White, blacksmith, Brandon, Man., has given up business.

Robert Robertson, blacksmith, Minto, Man., is giving up business.

You Become a Partner

when you accept

THE SHERWIN-WILLIAMS AGENCY.

You at once become a partner with the acknowledged leaders in the paint and varnish manufacturing industry.

You have at your service all the advertising helps and promoting methods that have made THE SHERWIN-WILLIAMS CO. successful.

Our assistance never stops until the products are sold to the consumer. We place in your hands the most effective system for securing new trade and holding the old ever employed. We have a perfect organization to give you systematic, progressive aid. No other Company does as much. No Company could do more.

There are no other paint products so well known. They are sold everywhere and have given satisfaction everywhere. Sell them and you satisfy your customers and satisfy yourself. That means success. The details of our proposition are contained in the "B-13" booklet—write for it to-day.

Scott & Naismith, agricultural implement dealers, Wawanesa, Man., are succeeded by Naismith Bros.

FIRES.

McCallum & Co., hardware merchants, Slocan, B.C., have sustained damage by fire.

John McGilley, carpenter, Antigonish, N.S., was burned out, sustaining a loss of about $200.

DEATHS.

C. D'Amour, sash and door factory, of Hull, Que., is dead.

Angus McLeod, of the firm of Angus McLeod & Co., sawlog contractors, etc., Orillia, Ont., is dead.

TWO GENERAL STORES.

THE village of Thedford, Ont., contains two very neat general stores. One is owned by A. Beattie & Co., of St. Marys, and is managed by E. Newkirk, a young man, enterprising and businesslike. Your correspondent had a look all over this store and was surprised to see how well arranged and displayed the goods were. The stock carried is quite large, but room is found for adequate display. Altogether this store is a model of neatness and shows in every part of it evidences of the care and attention expended upon it by Mr. Newkirk and his staff of clerks.

The other general store at Thedford is conducted by Mackenzie & Meldrum, both young men of bright ideas and up-to-date methods. The building is quite new, which fact has given the opportunity for the employment of modern ideas in the arrangement of goods. The grocery stock is so arranged as to be within easy reach at all times, and placed in such a way that every article can be seen at a single glance. The window dressing was particularly good.

These two young men and Mr. Newkirk deserve credit for having made it possible for the village of Thedford to boast of having two of the best general stores of any village of the size in Ontario.

HIGHER TARIFF ON LEAD.

BUSINESS men in British Columbia are getting up a strong argument for higher tariff on lead and the products into the manufacture of which lead enters.

A gentleman, who is the owner of several mines in that part of the country, says that the price of lead is so low that most of the mines have been closed. The owners cannot afford to pay the miners the ruling wage and work the mines at a profit. The cost of living is so high that, it is claimed, the miner could not exist on less than the wage he demands.

The United States Smelter Trust is striving to keep all Canadian mines closed. They have a fixed price for United States lead, but will buy no Canadian lead at that price. This Trust is too powerful for the owners of Canadian lead mines, and the Government is being asked to help them by giving a bounty temporarily on all lead exported. This, it is claimed, would only have to be continued for a few years, as the population of Manitoba and the Territories promises in a few years to be large, and that, ultimately, the entire product of the Canadian lead mines will be needed in the home market.

This gentleman claims that the Province of British Columbia has a grievance, and the Dominion Government should do something immediately.

LEAD TRUST ORGANIZED.

The Lead and Lead Product Trust is an assured fact. The proposed capital of $80,000,000 has been taken up, and there is little doubt but that a new company called The National Union Feed and Oil Co. will be launched, taking in The National Lead Co. and The American Smelting and Refining Co., as well as The United States Metal Selling Co., under the charter of The Union Lead and Oil Co., incorporated for $15,000,000 about a year ago.

The Standard Oil Co. is interested heavily in this lead combination, besides the principal lead and lead product manufacturers of New York and Brooklyn.

It is reported that the firms of Glasgow Lead Works, Canada Lead and Saw Works, Montreal Rolling Mills, of Montreal, are included in the trust.

NEW DISCOUNT SHEET.

The R. McDougall Co., Limited, Galt, Canada, are at present issuing a new discount sheet to the trade, making revised prices on all lines of pumps. It will be to the advantage of all users of this line of goods to secure a copy if it has not already come to hand. Special and general catalogues are at all times ready to be sent free on request.

MACHINERY AND ELECTRICAL SUPPLY DEPARTMENT

THE STATIONARY ENGINEERS.

THE Canadian Association of Stationary Engineers has been in existence for the past 12 years or more, having been organized as a purely educational institution for the benefit of young men who wished to become competent to handle a steam plant. In order to keep to the high ideal aimed at a clause in the constitution made it clear that the association was not a trade union, but that each member was left free to work for what wages he pleased, and that the sole object of the association was the educational improvement of its members. On these principles the association made steady headway until nearly 20 branches were formed. The chief meetings were held in the winter, and were devoted to discussing problems in steam engineering, in asking and answering questions, and in listening to lectures and papers. Professors in colleges, educationists and experts in mechanical and technical subjects frequently gave the association their services gratuitously in this work, and the associations have been helped financially and otherwise by manufacturers and owners of steam plants who sympathized with the work of the organization.

For some time past, however, efforts have been made to draw the association as a whole into the trade unions, but up to last month the members have practically all held to their first principle and kept apart from the unions. Now, however, following the drift of affairs on the other side of the line, a branch of the International Union of Steam Engineers, a labor union of the United States, has been formed in Toronto. Its president is A. M. Wickens, engineer of the Parliament Buildings, who has been known as "the father of the Canadian Association of Steam Engineers" in Ontario. The new union starts with a membership of about 60, and the officers are as follows: A. M. Wickens, president; W. Outhwaite, vice-president; Jas. Bannon, recording secretary; B. Doyle, financial secretary; James Huggett, treasurer; John Fox, conductor; H. S. Barker, doorkeeper.—The Canadian Engineer.

A NEW DEPARTMENT

The Fairbanks Company are giving considerable attention to their new machine tool department. T. S. Stephens is head of this branch of the warehouse. They have a well-stocked showroom on Craig street, Montreal, and quite an assortment of planers, lathes, drills of all kinds, pipe-threading machinery and milling machines. The same care and attention is being given to the new department as has always been shown to the mill-supply business.

MACHINERY AND ELECTRICAL NOTES.

NEWTON BROS., woollen goods manufacturers at Sarnia, Ont., have sold their mill machinery to John F. Morley, of Dundas. Mr. Morley has started a new industry at Dundas, manufacturing fine felt goods, such as felts for piano covers, etc. He is occupying the old screw factory building in the Valley City, and is already doing a good business.

The Amherstburg extension of the Windsor electric railway will be completed about the first of the year.

The Hatch Electric Smelting Company, Sault Ste. Marie, Ont., will have a temporary plant in operation in about 30 days.

The Gee Electrical Engineering Company, Toronto, has become insolvent, and E. R. C. Clarkson has been appointed permanent liquidator.

A 5 horse-power vertical steam engine and a large duplex steam pump were shipped to Isaac McNaughton, of Trenton, N.S. The shipment was made by H. W. Petrie, Toronto.

The Midland Engine Works, Midland, Ont., have purchased a large lathe and a steam hammer. The firm have also bought out the foundry plant of The Ronald Fire Engine Company, of Brussels.

An electric outfit, consisting of a motor, band saw, and all accessories for the manufacture of a patented cabinet chair, was delivered to C. Fournier, 43½ Adelaide street west, Toronto, by H. W. Petrie, Toronto.

The Dominion Canister Company, of Dundas, Ont., have installed a fine 20-in. iron shaper. This machine is fitted with automatic down-feed and all the latest improvements. The machine was purchased from H. W. Petrie, Toronto.

ALCOHOL MOTORS IN GERMANY.

THE recent agricultural fair at Halle has shown the wonderful strides that Germany has made within the last 18 months in alcohol motors. This is due, according to a U. S. consular report, to a great extent to the personal interest taken in the subject of the use and application of alcohol for trade purposes by the Emperor, and also to the low price at which this spirit for fuel purposes (containing about 90 per cent. of pure alcohol) is furnished all over Germany—a quart costing only about 5 cents.

The great advantages of a spirit motor over the ordinary steam engine are that it is always ready for use, without preliminary warming up; it can be filled, oiled and started in from two to three minutes; there is no constant supplying of coal and water, and no danger of fire or explosion; no permits are required from Government authorities, and there is no compulsory inspection; the spirit is easily obtainable in all districts; there is no smoke or smell; and the weight of a portable spirit motor is about one-half that of a portable steam engine of equal power.

With regard to cost, a large German firm that exhibited at Halle showed 6 to 8 horse-power portable alcohol motors for $973.30; 10 to 12 horse-power motors for $1,265.29, and 16 to 20 horse-power motors for $1,581.61. In the tests made, one trial showed a consumption of 0.42 kilogram (0.92 lb.) of 86 per cent. spirit and 0.37 kilogram (0.81 lb.) of a mixture of one-fifth benzol and four-fifths 86 per cent. spirit, in both cases per brake horse-power per hour.

LOWEST TENDER GETS IT.

The contract for the new generator and engine for the Toronto City Hall has been awarded by the Board of Control to The United Electric Company, the lowest tenderers. The matter was again taken up by the Board on Wednesday, as the Council has twice sent the matter back to them, because they favored the tender of The Canadian General Electric Co., which was $430 higher. After considerable discussion it was awarded to The United Electric Company for $1,900.

J. F. Alexander, general merchant, of Teulon, Man., has sold out to T. Cook.

PAINT, OIL AND BRUSH TRADES

PHYSICAL EFFEOT OF TURPENTINE

IT has been the writer's personal experience to know a number of carriage painters who have been so weakened and debilitated through the effects of turpentine as to be forced to permanently discontinue painting, says a contributor to Varnish. As against these cases he is aware of only one retired from active service on account of white-lead poison. The day of quick painting, with its accompanying rapid processes of surfacing, out of which white lead has in no inconsiderable proportion been stricken as an obstructing factor, has largely eliminated the issue of lead poisoning. But turpentine, like the eternal course of the seasons, we have always with us. From the pot to the finisher's flowing bowl, turpentine serves a purpose beyond the capacity of any known subject.

The painter is thus brought into free and unlimited contact with it. In fact, he becomes fairly saturated with the pungent and penetrating fluid. And apparently unsatisfied with the quantity absorbed in the system through the normal and ordinary course of shop operations, he not infrequently washes his hands in the fluid. Indeed, many painters in mad haste to "wash up" at whistle time become addicted to the habit of erasing paint smears from the hands or other visible parts of the cuticle by the aid of a generous supply of turpentine. Familiarity breeds contempt, and contempt is a highly dangerous state of mind to exercise in respect to the use of the pine tree's fruit.

The action of turpentine upon the system results in weakening the digestive functions, disturbing the nervous system and inflaming the urinary organism. In a general way the entire physical being is attacked through constant exposure to the fumes of turpentine, and rendered unduly susceptible to disease.

The palsied hand, the rebellious stomach, the nerveless limbs, astrophied joints and unresponsive muscles testify to the withering effects of turpentine upon the human system, and they alike witness the necessity of rigid attention to the approved laws of hygiene.

The carriage painter, chief among men in respect to the quantity of health terminative substances constantly imbied, should seek by all the power of well-ordered personal habits to command good health. Good health has a value compared to which even gold does not glitter. Be temperate in all things. Keep clean. Observe regular hours for sleep. Adhere to a strictly nutritious diet. Aim to get strong and work hard to stay so. The perfect man physically is not an easy victim to the assaults of turpentine or to the insidious poisons. Use turpentine as a paint thinner, not as a skin cleaner. Thus may your days of acquiring riches in the paint shop be long continued.

HOUSE PAINTING BY MACHINERY.

AMONG the latest labor-saving devices is one which purposes to relieve the house and roof painter of the bulk of his work. The machine, says the new Penny Magazine, consists of a set of revolving brushes, driven by compressed air, and guided by hand. There is a rubber house connected between the brushes and a paint tank. The paint is forced from the tank to the brushes, the pressure being easily regulated. As the brushes revolve, one within the other, they are guided up and down and along until the whole surface of the wall has been gone over. A contest between a house-painter and the painting machine was recently held to determine the merits of the latter. Two flat surfaces, each 10 feet by 200 feet were selected. The painter working by hand completed his task in 16 hours, using four gallons of paint. The machine did its work in three hours and twenty minutes, and used only two and one-half gallons of paint. As far as the actual workmanship was concerned, the results seemed to favor the man as against the machine. His brush had given an extra dab of paint to hide the rough spots and knots here and there, and had curled around corners and joints to make the job a complete one. The painting machine was found to have distributed a perfectly even coating of paint over the entire surface, but leaving the corners and depressions which required going over by hand. While the machine will maintain a decided advantage as far as speed, economy and workmanship are concerned on a large and perfectly smooth surface, it is not likely to interfere seriously with the work of the average painter, whose brush has to travel over very uneven surfaces, and into and around many a nook and corner before the work is satisfactorily completed.

NOTES OF THE TRADE.

Kennedy & Lambert, painters, St. John, N.B., have dissolved.

Edmund Shellman, dealer in paints, Montreal, is offering to compromise at 30c. on the dollar.

PAINT AND OIL MARKETS.

MONTREAL

NEW prices on paris green are out bright and early this year, and will be found included in the quotation list below. It will be noticed that prices are for the present considerably lower. The linseed oil and turpentine markets do not show any marked change here this week, in spite of the fluctuations in the English market. There, linseed oil has been very strong, with advancing prices within a week or so, but during the past few days the market reacted to some extent. Turpentine, on the other hand, while weak some days ago, has gained strength lately. In the paint trade there is nothing new to report. The close of navigation developed the usual falling off in orders, but as stocks in merchants' hands throughout the country are not heavy, a fairly good sorting-trade is looked for this winter. We quote:

GROUND WHITE LEAD.—Best brands, Government standard, $5.15 to $5.25; No. 1, $4.77½ to $4.87½; No. 2, $4.40 to $4.50; No. 3, $4.02½ to $4.12½; No. 4, $3.65 to $3.75, all f.o.b. Montreal. Terms, 4 months, or 3 per cent. off for cash in 30 days.

DRY WHITE LEAD.—$5.25 in casks: kegs, $5.50.

DRY WHITE ZINC.—Pure dry, in casks, 6¼c.; in 100-lb. kegs, 6¾c. No. 1 zinc, in casks, 5¼c.; in 100-lb. kegs, 5¾c.

WHITE ZINC (ground in oil)—Pure, 25-lb. irons, 8c.; No. 1, 7c.; No.2, 6c.

PUTTY.—We quote: Bulk, in bbls., $1.90 per 100 lb.; bulk, in less quantity, $2.05; bladders, in bbls., $2.25; bladders, in 100 or 200-lb. kegs or boxes, $2.40; in tins, $2.55 to $2.65; in less than 100-lb. lots, $3 f.o.b. Montreal, Ottawa, Toronto, Hamilton, London and Guelph. Maritime Provinces, 10c. higher, f.o.b. St. John and Halifax.

ORANGE MINERAL.—Casks, 7c.; 100-lb. kegs, 7¼c.; smaller quantities, 8¼c.

RED LEAD.—Genuine red lead, in casks, $4.50; in 100-lb. kegs, $4.75; in less quantities, $5.75 per 100 lb. No. 1 red lead, casks, $4.25; kegs, $4.50, and smaller quantities, $5.50.

LITHARGE.—Ground, casks, 5c.; less quantities, 5½c.; flake litharge, casks, $5.25; smalls, $5.75 per 100 lb.

LINSEED OIL.—Raw, 64c.; boiled, 67c. In 5 to 9 bbls., 1c. less. Terms, net cash in 30 days. Delivered in Ontario, be-

WINDOW GLASS.

Send in your specification now and secure good sizes before the assortments get broken up. Large stocks are now arriving, but so are orders, and many good sizes are sent out as fast as they come to hand. Then when arrivals cease, prices generally stiffen up for the winter. Buy now.

SEAL OIL.—48 to 50c.

COD OIL.—35 to 37½c.

PARIS GREEN.—Petroleum barrels, 13¼c. per lb.; arsenic kegs, 13½c.; 50 and 100-lb. drums, 14c.; 25-lb. drums, 14½c.; 1-lb. packages, 15c.; ½-lb. packages, 17c.; 1-lb. tins, 16c.; ½-lb. tins, 18c.

TORONTO.

The market is somewhat quieter than it has been for some time. Linseed oil has declined 2c. all round. There are rumors afloat that some dealers are receiving orders for future deliveries at considerably lower prices than are quoted for present delivery, and that this has been going on for a week or ten days. It is also claimed that these prices for futures are below the cost of English oils. We include the prices of the different grades of glue in this week's quotations. We quote:

WHITE LEAD.—Ex-Toronto, pure white lead, $5 to $5.25; No. 1, $4.62½ to $4.87½; No. 2, $4.25 to $4.50; No. 3, $3.87½ to $4.12½.; No. 4, $3.50 to $3.75 in packages of 25-lb. and upwards; ½c. per lb. extra will be charged for 12½-lb. pkgs.; genuine dry white lead in casks, $5.02½.

RED LEAD.—Genuine, in casks of 560 lb., $4.50 to $4.75; ditto, in kegs of 100 lb., $5; No. 1, in casks of 560 lb., $3.75 to $4; ditto, kegs of 100 lb., $4.25.

LITHARGE.—Genuine, 6 to 6½c.

WHITE ZINC.—Genuine, French V.M., in casks, $6 to $6.25; Lehigh, in cgsks. $6.00.

SHINGLE STAIN.—In 5-gallon lots, 60 to 75c. per gallon.

PARIS WHITE.—90c. to $1 per 100 lb.

WHITING.—65c. per 100 lb.; Gilders' whiting, 80c.

GUM SHELLAC.—In cases, 35c.; in less than cases, 40c. per lb.

LIQUID SHELLAC.—Pure orange, in bbls., $2.25 to $2.35; white, $2.35 to $2.45 per gal.; in less quantities, 10c. extra.

GLUES.—Broken sheet, in 200-lb. bbls., 8½c. per lb.; cabinet glue, in bbls., 12c.; emery glue, in bbls., 17½c.; bookbinders', ground, 10½c.; finest American, white, 19c.; No. 1 American white, 15c. per lb.

PUTTY.—Bladders, in barrels, $2.25; bladders, in 100-lb. kegs, $2.40; bulk in bbls., $1.90; bulk, less than bbls. and up to 100 lb., $2.05; bladders, bulk or tins, less than 100 lb., $2.90.

PLASTER PARIS.—New Brunswick, $2 per barrel.

PUMICE STONE.—Powdered, $2.50 per cwt. in bbls. and 4 to 5c. per lb. in less quantity; lump, 10c. in small lots and 8c. in bbls.

LIQUID PAINTS.—Pure, $1.20 to $1.40 per gallon; No. 1, $1.10 per gallon.

BARN PAINTS.—65 to 70c. per gallon.

CASTOR OIL.—English, in cases, 9 to 9½c. per lb. and 10 to 10½c. for single tins.

LINSEED OIL.—Raw, 1 to 2 bbls., 65c.; boiled, 68c.; 3 to 5 barrels, raw, 64c.; boiled, 67c.; 6 to 9 barrels, raw, 62c.; boiled, 65c. delivered. To Toronto, Hamilton and London, 2c. less. All quantities of 10 bbls. and over of linseed oil sold only f.o.b. Toronto, Hamilton, London and Guelph.

TURPENTINE.—Single bbls., 78c.; 2 to 4 bbls., 77c. delivered. Toronto, Hamilton and London, 1c. less. For less quantities than barrels, 5c. per gallon extra will be added, and for 5-gallon packages, 50c. and 10-gallon packages, 80c. will be charged.

GASOLINE AND BENZINE.—We quote: Benzine, 19¼c. and gasoline, ordinary, 21¼c. and engine, 22¼c. f.o.b. Toronto.

WINDOW GLASS.

MONTREAL.

The market is entirely unchanged, and although some small orders are received, business is very quiet. Quotations are as follows: First break, 50 ft., $2.10; second, $2.20 for 50 ft.; first break, 100 ft., $4; second break, $4.20; third break, $4.70; fourth break, $4.95.

TORONTO

There has been a brisk movement in glass for the past couple of days, with the prices remaining the same. Quotations are as follows: Under 26 in., $4.25; 26 to 40 in., $4.65; 41 to 50 in., $5.10; 51 to 60 in., $5.35; 61 to 70 in., $5.75; 71 to 80 in., $6.25; 81 to 85 in., $7; 86 to 90 in., $7.75. Toronto, Hamilton and London. Terms, 4 months, or 3 per cent. 30 days. Discount, 15 per cent.

SUDDEN DEATH.

James Learmonth, of Bowmanville, Ont., a painter by trade, was found dead in a room off the office of the Bennett House, in that town, on the evening of November 21. He was seen entering the room shortly before, and when found was in a sitting position. The deceased was subject to heart trouble.

AN ADVANCE IN STOVES.

The Western Association of Stove Manufacturers were in session in Chicago, Ill., on November 18, and decided to increase the price of all kinds of stoves 5 per cent. The increase in the cost of coke, at least 50 per cent., and iron, 60 to 70 per cent. in the past three years, is the reason given for the increase.

ON THE QUI VIVE FOR CHRISTMAS.

Up-to-date merchants do everything in their power to facilitate buyers in selecting gift goods during the holiday season. For displaying small articles attractively nothing is half so appropriate as Boeckh's adjustable display tables, which can be used as either tables or shelves. They are the most useful things extant for the Christmas store, and are as ornamental as they are useful. United Factories, Limited, Toronto, have issued a booklet of these goods which is cheerfully furnished to dealers on request.

THINK IT OVER!

If BRANDRAM'S B.B. GENUINE WHITE LEAD is the best in the world, does it not stand to reason that a paint which contains it would also be the best?

If the price of the best is no dearer than others, and if our advertising is up to date,

WHY NOT

BRANDRAM'S B.B. WHITE LEAD
REGISTERED TRADE MARK
MANUFACTURERS LONDON ENGLAND

HENDERSON & POTTS,

HALIFAX and MONTREAL.

Suits Everybody.

THIS IS WHAT

Elastilite Varnish

DOES.

It suits the dealer, because it always satisfies the customer, and, being a Registered Brand, it does not come into competition with ordinary makes of Varnish, thus protecting your profit.

In tins only from ½-pint to 1 gallon.

MANUFACTURED ONLY BY

The Imperial Varnish & Color Co. LIMITED

Toronto, Ontario, Canada.

Canadian Agents for Buehne's "Red, White and Blue" Brand Steel Wool.

THE LIFE OF PAINT

Pure Linseed Oil is the life of paint. It gives binding properties, elasticity and durability to paint. The best paint for outside work. Contains the largest amount of pure linseed oil. All "cheap" and many "dear" paints contain petroleum oils or alkaline water compounds. They dry greasy or in flat spots and streaks. They fade rapidly and dust or chalk off.

"Ark Brand" Paint

is a pure linseed oil and permanent pigment paint.

EVERY CAN GUARANTEED.

FREE—Our Practical Booklet, **"Paint, What to Use and How to Use It."**

MARKETS AND MARKET NOTES

QUEBEC MARKETS.

Montreal, November 28, 1902.

HARDWARE.

MANY of the boats have now stopped running for the season, and shipments have, in consequence, eased off somewhat. But wholesalers are still quite busy with winter goods. Such lines as snow shovels, skates, etc., are in excellent demand. Fire shovels and coal hods have also been moving more rapidly of late. Bar iron and sleighshoe steel are quoted higher this week. In the light hardware lines there have been no changes in prices during the week. Weather strips are one of the rapid moving lines at present.

BARB WIRE.—There is nothing of interest to report in this market. Trade is dull and the price is $2.90 per 100-lb. keg f. o. b. Montreal, and $2.55 f.o.b. Cleveland.

GALVANIZED WIRE.—There is but little doing. Our quotations, from stock, are now as follows: Nos. 6, 7 and 8 gauge, $3.20; No. 9, $2.55; No. 10, $3.30; No. 11, $3.40; No. 12, $2.70; No. 13, $2.80; No. 14, $3.80; No. 15, $4.30; No. 16, $4.55; No. 17, $4.95; No. 18, $5.20. In carlots, f. o. b. Cleveland, the prices are: No. 9, $2.15; No. 12, $2.30; No. 13, $2.40, not dutiable. No. 10, $2.20; No. 11, $2.25; No. 14, $2.50; No. 15, $2.95; No. 16, $3.05, dutiable. In less than carlots, 12½c. per 100 lb. extra is charged.

SMOOTH STEEL WIRE.—Business continues very quiet. Our quotations are as follows: Bright and annealed, $2.60 per 100 lb. f. o. b. Montreal, Toronto, Halifax, London, Hamilton and St. John. Net extras per 100 lb. are now as follows: Coppered wire, 60c.; tinned wire, $2; oiling, 10c.; spring wire, $1.25; best steel wire, 75c.; bright soft drawn, 15c.; special hay-baling wire, 30c.

FINE WIRE.—No improvement is reported in this market, which is still quiet. The discount is 25 per cent., with net extras as follows: 1 and 2-lb. hanks, 25c. per 100 lb.; ½-lb. hanks, 37½c. and ¼-lb. hanks, 50c.

BRASS AND COPPER WIRE.—The discount remains at 62½ per cent.

FENCE STAPLES.—There is no further change to report. A very few orders are being received, and we quote: Galvanized, $3 per 100-lb. keg; bright, $2.80, with an extra 25c. for 25 and 50-lb. packages.

WIRE NAILS.—These are moving slowly at unchanged prices. We quote as follows: $2.55 per keg in small lots and $2.50 in carlots, f.o.b. Montreal, London, Hamilton, Toronto, Gananoque, Brantford, Windsor, Ont., St. John and Halifax.

CUT NAILS.—A small amount of business is doing in cut nails, small lots selling at $2.45 per keg and carlots at $2.40 per keg.

HORSENAILS.—Business continues to be brisk, and prices are maintained. We quote: "C" brand, 40, 10 and 7½ per cent. off; on "M" brand, "Oval," 57½ per cent.; "New City," 57½ per cent.; "New Countersunk," 65 per cent.

HORSESHOES.—The market is still quite active for horseshoes. There has been no actual change in prices. We quote: Iron shoes, light and medium, pattern, No. 2 and larger, $3.35; No. 1 and smaller, $3.60; snow pattern, No. 2 and larger, $3.60; No. 1 and smaller, $3.85; X L steel shoes, new light pattern, sizes 1 to 5, No. 2 and larger, $3.45; No. 1 and smaller, $3.70; featherweight, all sizes, 0 to 4, $5; toe weight, all sizes, 1 to 4, $6.25. Shoes, more than one size in a keg, 10c. per keg extra. F.o.b. Montreal only.

RIVETS AND BURRS.—These are moving rather slowly and the market is without feature. We quote as follows: Best iron rivets, section carriage, and wagon box, black rivets, tinned do., coopers' rivets and tinned swedes rivets, 60 and 10 per cent.; swedes iron burrs are quoted at 55 per cent. off; copper rivets,

DECORATED TEA POT.

DECORATED COFFEE POT.

Do You Get Your Share of the Money Spent at Xmas Time?

We have novelties in Decorated Enamelled Ware which make good, sensible gifts, sell well and give the dealers a wide margin of profit.

The accompanying engravings give only a faint idea of the rich hand work on these goods. Better illustrations are given on the colored pages of our Tinware Catalogue.

All lines enamelled in two colors (dark blue and white), and extra decorated for Xmas trade.

Prompt shipment guaranteed.

with the usual proportion of burrs, 45 per cent. off and coppered iron rivets and burrs, in 5-lb. carton boxes are quoted at 60 and 10 per cent. off list.

BOLTS.—The jobbers report a small amount of business this week. The discounts are quoted as follows: Norway carriage bolts, 55 per cent.; common, 50 per cent; full square carriage bolts, 55 per cent.; machine bolts, 50 and 5 per cent.; coach screws, 66 2-3 per cent.; sleighshoe bolts, 65 and 5 per cent.; blank bolts, 50 and 5 per cent.; bolt ends, 50 and 5 per cent.; plough bolts, 50 and 5 per cent. To any retailer an extra discount of 10 per cent. is allowed. Tire bolts, 67½ per cent.; stove bolts, 67½ per cent. Nuts, square, 3¼c. per lb. off list; hexagon nuts, 3¾c. per lb. off list. To all retailers an extra discount of ¼c. per lb. is allowed.

SCREWS.—There is no change whatever in this market. The discounts are: Round head bright, 82½ and 10 per cent.; flat head bright, 87½ and 10 per cent.; brass, round heads, 75 and 10 per cent.; brass, flat heads, 80 and 10 per cent.

CORDAGE.—We hear of no change in the price this week. Trade is quiet. We quote: Manila, 14c.; British manila, 12c.; sisal, 12c.; lathyarn, 11c.

BUILDING PAPER.—Some business has transpired during the week. We quote: Tarred felt, $1.70 per 100 lb.; 2-ply, ready roofing, 85c. per roll; 3-ply, $1.10 per roll; carpet felt, $2.25 per 100 lb.; dry sheathing, 35c. per roll; tar sheathing, 45c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll; O K and I X L, 65c. per roll; heavy straw sheathing, $30 per ton; slaters' felt, 60c. per roll.

SCREEN WIRE CLOTH.—This is quoted at $1.40 per 100 square feet. There is almost nothing doing.

POULTRY NETTING.—The discounts for 1903 delivery, on Canadian or English netting, are: 60 per cent. off on 2 x 2 mesh, 19 wire, and 50 per cent. off on 2 x 2 mesh, heavier.

HARVEST TOOLS.—These are discounted at 60 and 10 per cent. off for delivery in 1903.

FIREBRICKS.—There is no change. Trade is quiet at $16 to $22 for English and $17 to $22 per 1,000 for Scotch.

CEMENT.—The movement in cement is fairly active. No quotable change has been made, and our quotations are as follows: Canadian cement, $1.90 to $2.25; German, $2.20 to $2.30; English, $2.15 to $2.25; Belgian, $1.70 to $1.95 per barrel ex-wharf, and American, $2.10 to $2.20 ex-cars.

SKATES.—These are moving out very rapidly at present, and the prices are unchanged from last week. Quotations follow: Halifax pattern, 36c. per pair; nickel-plated, 65c.; ladies' nickel-plated, 60c.; ladies' concave nickel-plated, $1.35 plain hockey, 27c. to $1.35; nickel-plated hockey, 60c. to $2.50; double-end hockey, $1.50 to $3. Skate straps, 35c. to $1.35.

HOCKEY STICKS.—There is an active demand in this line. We quote: Best second growth, goal keepers', $4.20 per doz.; ash, $2.90; elm, $2.25; boys' elm, $1.10; common, 90c. Regulation pucks, $1.50 per dozen.

SNOW SHOVELS.—Business in snow shovels is very good and shipments are going forward rapidly. Our quotations are still as follows: "Habitant," $2.25 to $2.40; "Victor," 30 per cent. off; steel railroad shovels, 48 and 5 per cent. off.

FAIR DEALING.

WHEN we sell a pump and guarantee it we expect to be dealt with fairly. If the article we guarantee is given a fair trial and gets broken or does not act rightly through any fault of ours, we are willing to take it back and make it right.
But if the article be carelessly handled and broken, we, of course, would not expect to pay for it, and we are sure no fair-dealing merchant would ask us to do so.

RETURNED
APR -5 1904

FIRE SHOVELS.—The demand is brisk for these goods and the market is active. and our quotations are now as follows: No. 70, 38½ to 40c. per dozen; No. 55, 55 to 60c.; No. 57, 82½ to 90c.; No. 60, 82½ to 90c.; No. 65, $1.37½ to $1.45; No. 80, 50 to 55c.; "Duplex," No. 7, $1.21; No. 9, $1.52; No. 11, $1.82.

COAL HODS.—Business in coal hods is this week very active. List prices are as follows: Japanned, 16-in., $4.50 per doz.; 17-in., $4.80; 18-in., $5.10; with gold band, 17-in., $5.10; 18-in., $5.40. Galvanized, 16-in., $6.20; 17-in., $6.50; 18-in., $6.80 per doz. The discount is 45 per cent.

LANTERNS.—There is still a good demand for lanterns, and the market is active. Our quotations are as follows: Tilt, lift or hinge, No. 0, $4 per dozen; Cold Blast, $7 per dozen; dashboard, No. 0, $5.75 per dozen; cold-blast dashboard, $9 per dozen. Extras are as follows: Japanning, 50c. per dozen; copper-plating cold blast, $2 per dozen. The prices quoted are f.o.b. London, Hamilton, Toronto, Belleville, Kingston and Montreal.

METALS.

The general tone of the metal market is firm, and on one or two lines prices have advanced. Bar iron is about 5c. higher, and steel has also gone up. The scarcity of ingot tin is a feature of the market.

BAR IRON.—The price of bar iron has advanced 5c., on account of the scarcity on the market at present. The tone of the market is firm for all lines. We quote gs follows: Merchants' bar, $2; horseshoe iron, $2.25; extra refined, $2.25 and forged iron, $2.20.

BLACK SHEETS.—A fair amount of business is doing. Prices are unchanged. We quote: 28 gauge, $2.65; 26 gauge, $2.60; 20 to 24 gauge, $2.50 and 8 to 20 gauge, $2.50.

GALVANIZED IRON.—The demand is fairly good this week. No quotable change has occurred. Quotations are as follows: No. 28, Queen's Head, $4.40; Apollo, 10¾-oz., $4.40; Fleur de Lis, $4.15; Comet, $4.10, and "Bell" brand, $4.30. For less than case lots, 25c. extra is charged.

SOIL PIPE AND FITTINGS.—These are moving slowly and there is no new feature to the market. We quote: Light soil pipe, 3 to 6 inch, 50 per cent., medium and extra heavy soil pipe, 2 to 6-inch, 60 per cent.; extra heavy soil pipe, 8-inch, 45 per cent.; light fittings, 2 to 6-inch, 50 and 10 per cent.; medium and extra heavy fittings, 2 to 6-inch, 60 per cent.; extra heavy fittings, 8-inch, 45 per cent.

PIG IRON.—The price of Summerlee is $23 to $23.50 f.o.b. Montreal. The scarcity of pig iron still continues.

INGOT COPPER.—There is only a light demand. We quote 13c.

INGOT TIN.—This has become scarce. Two of the largest dealers have been completely sold out of tin.

PIG LEAD.—There is nothing new to report in this market. We quote $2.90 in carlots and $3.25 in small lots.

LEAD PIPE.—There has been no change made in lead pipe. The price of composition and waste is 8c. and of ordinary, 7c. Discount, 37½ per cent.

IRON PIPE.—Retailers can now procure what iron pipe they require. There has been no quotable change, and we quote as follows: Standard pipe, per 100 feet, in lengths under 19 feet: Black, ¼,

Standard Paint & Varnish Works Limited

Makers of High Grade Varnishes, Japans, Paints, Colors & Enamels.

Windsor, Ont.

$2.40 ; $\frac{3}{8}$, $2.65 ; $\frac{1}{2}$, $2.85 ; $\frac{3}{4}$, $3.65 ; 1-in., $5.20; $1\frac{1}{4}$, $7.35; $1\frac{1}{2}$, $8.95; 2-in., $12.55. Galvanized, $\frac{1}{4}$, $3.20 ; $\frac{3}{8}$, $3.45 ; $\frac{1}{2}$, $3.85 ; $\frac{3}{4}$, $5 ; 1-in., $7.20 ; $1\frac{1}{4}$, $10.05 ; $1\frac{1}{2}$, $12.-20; 2-inch, $16.85. Extra heavy pipe, plain ends, are quoted per 100 feet as follows : Black, $\frac{1}{2}$, $4.20 ; $\frac{3}{4}$, $5.25 ; 1-in., $7.55 ; $1\frac{1}{4}$, $10.55 ; $1\frac{1}{2}$, $12.75 ; 2-in., $17.-60. Galvanized, $\frac{1}{2}$, $5.20 ; $\frac{3}{4}$, $6.65 ; 1-in., $9.55 ; $1\frac{1}{4}$, $13.25 ; $1\frac{1}{2}$, $16 ; 2-in., $21.90. For threads and couplings 5 per cent. is added.

TINPLATES.—These are going moderately well at unchanged prices. Cokes sell at $4.25 and charcoals at $4.75 to $5.25.

STEEL.—There has been an advance in the price on this market. We quote as follows : Sleighshoe, $2.10 ; tire, $2.20; bar, $2.05; spring, $2.85; reeled machinery, $2.75; toecalk, $2.60; machinery (iron finish), $2.10; mild steel, $2.05; square harrow, $2.15.

SHEET STEEL.—There is no change. We quote: Nos. 10 to 20, $2.50; 3-16, $2.50; $\frac{1}{4}$, 5-16 and $\frac{3}{8}$, $2.40.

TOOL STEEL.—Business is quiet in this line and no quotable change is to be noted. Our quotations are as follows : Black Diamond, 8c.; Sanderson's, 8 to 12c., according to grade ; Jessop's, 13c.; Leonard's, $7\frac{1}{2}$c.; Jonas & Colver's, 8 to 15c.; "Air Hardening," 45 to 60c.

CANADA PLATES.—The price is unchanged. A moderate inquiry prevails. Quotations are: 52s, $2.70 to $2.80; 60s, $2.85 to $2.90; 75s, $2.80 to $2.85; full polished, $3.75 and galvanized, $4.25 to $4.35 ; galvanized, 60s, $4.45 to $4.55.

TERNE PLATES.—The market is quiet and shows no new feature. The price is $7.50.

COIL CHAIN.—There is some movement in chain, but the market is not active, and our quotations are still as follows : No. 6, $12\frac{1}{2}$c.; No. 5, $10\frac{1}{2}$c.; No. 4, 10c.; No. 3, $9\frac{1}{2}$c.; $\frac{1}{4}$-in., $7\frac{1}{4}$c. per lb.; 5-16, $5; 5-16 exact, $5.25; $\frac{3}{8}$, $4.25; 7-16, $4.05 ; $\frac{1}{2}$, $3.95; 9-16, $3.85; $\frac{5}{8}$, $3.55; $\frac{3}{4}$, $3.50; $\frac{7}{8}$, $3.45; 1-inch, $3.45. In carload lots an allowance of 10c. is made.

SHEET ZINC.—There has been no change in the price of sheet zinc, which is quoted at $5.85 to $6.25. There is not much doing.

ANTIMONY.—Trade is quiet. The price is still 10c.

ZINC SPELTER.—The movement in this article is still light. The price is 5c.

SOLDER.—This goes as usual with no change to note. Bar solder is worth 20c. and wire solder, 18c.

SCRAP METALS.

The demand on most lines has been light and prices are lower on heavy copper and wire and on heavy yellow brass. Machinery scrap, owing to the small supplies and increased demand, has advanced, and stove plate is also higher. Copper is a drug on the market at present. We quote as follows : Heavy copper and wire, 9c. per lb.; light copper, 8c.; heavy red brass, 10c. ; heavy yellow, $8\frac{1}{2}$c.; light brass, 5c.; lead, 2 to $2\frac{1}{4}$c.; zinc, $2\frac{1}{2}$ to $2\frac{3}{4}$c.; iron, No. 1 wrought, $15 to $16; No. 2, $7 per ton; machinery scrap, $16 to $16.50; stove plate, $13; malleable and steel, $6; mixed country rags, 60 to 70c. per 100 lb.; old rubbers, $6\frac{1}{2}$ to $6\frac{3}{4}$c. per pound.

HIDES.

Beef hides are 1c. lower all round. The market is quiet and without special feature. We quote: No. 1 hides, 9c.; No. 2, 8c. No. 3, 7c. Calfskins, 8 to 10c.; lambskins, 60c.

The Popular Ceilings For Practical People.

We claim that our Metallic Ceilings and Walls are the very best style interior finish made.

Sanitary—Artistic—Fireproof—exceedingly durable, and capable of an immense amount of variety in coloring and effect.

They satisfy all buyers—no imperfections—no stinting of qua ity—highest-grade materials and workmanship throughout.

If you're wise you'll always carry them in stock.

Metallic Roofing Co., Limited

TORONTO. MONTREAL. WINNIPEG.

RAW FURS.

We give below the prices ruling for raw furs for the next three months. Offerings of furs are fairly good in all lines, excepting coat coon skins, which are likely to be scarce. The report for the October, 1902, fur sales, shows a decline from last March of 20 per cent. in red fox, silver fox, and bear ; an advance of 10 per cent. in lynx; a decline of 10 per cent. in otter ; while marten, mink and fall muskrat realized old prices. Taken as a whole, however, prices paid this year are fairly good. We quote :

ONTARIO MARKETS.

Toronto, November 28, 1902.

HARDWARE.

THERE is still a steady volume of business in all fall lines of hardware, and prices have been well maintained, there being no change for the week to report except a decline of 5c. in Mrs. Potts sad irons. A good deal of cutlery has been going out for the Christmas trade, and there has been a heavy demand for snow shovels this week.

MONTREAL NOTES.

Steel has advanced.
Bar iron is 5c. higher.
New prices on paris green are out.

Building paper, skates and winter goods have also been selling freely. There has been, in some quarters, a scarcity of enamelled ware, and trade in horseshoes

and nails, which has been experiencing a lull during the past three weeks, has been stimulated to a great extent by the change in the weather.

BARB WIRE.—There has been no improvement in the market for barb wire and prices are unchanged. The base price is as follows: $2.67 from Cleveland; in carlots, 12½c. less. From stock, Toronto, $3.

GALVANIZED WIRE.—There is very little demand for galvanized wire. Quotations are as follows: Nos. 6, 7 and 8, $3.15 to $3.35 per 100 lb.; No. 9, $2.65 to $2.85; No. 10, $3.20 to $3.40; No. 11, $3.25 to $3.45; No. 12, $2.80 to $3; No. 13, $2.90 to $3.10; No. 14, $3.75 to $3.95; No. 15, $4.30; No. 16, $4.55. Nos. 6 to 9 base from Cleveland are quoted at $2.27½ in less than carlots.

FINE STEEL WIRE.—This market is dull and featureless. The discount is 25 per cent.

SMOOTH STEEL WIRE.—There is little doing in this line. The prices are unchanged. We quote: $2.60 per 100 lb. Oiling, 10c.; coppering, 60c. and tinning, $2 per 100 lb. extra. Shipping points, Toronto, Hamilton, London and Montreal, with freights equalized on those points.

WIRE NAILS.—These are in fairly good demand. We quote: $2.50 in carlots and $2.55 in less quantities. The shipping points are Toronto, Hamilton, London, Gananoque and Montreal.

CUT NAILS.—A moderate amount of business has been transacted in cut nails. The base price is $2.50 per keg. Carlots, 10c. less.

HORSE NAILS.—Trade in these, which has been dull for the past few weeks, has become more active. The discounts are as follows: "C" brand, oval head, 40 and 10 and 7½ per cent.; on "M" brand, 50, 10 and 5 per cent.; "Monarch," 60 2-3 per cent.; "Countersunk" head head, 60 per cent.

HORSESHOES.—The demand for horseshoes has improved considerably this week with the stormy weather. Our quotations are: Iron shoes, No. 2 and larger, light, medium and heavy, $3.45; snow shoes, $3.70; light steel shoes, $3.55; featherweight (all sizes), $4.95; iron shoes, No. 1 and smaller, light, medium and heavy (all sizes), $3.70; snow shoes, $4; light steel shoes, $3.80; featherweight (all sizes), $4.95.

SCREWS.—The demand for screws is not as great as it was, but they are still scarce, and our quotations are as follows: Flat head bright, 87½ and 10 per cent. discount; round head bright, 82½ and 10 per cent.; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.; round head bronze, 65 per cent. and flat head bronze, 70 per cent.

RIVETS AND BURRS.—A good demand keeps up for rivets and burrs and the market is bare of supplies. Discounts follow: Iron rivets, 60 and 10 per cent. discount; iron burrs, 55 per cent.; copper rivets, with usual proportion of burrs, 45 per cent.; copper burrs alone, 30 and 10 per cent.

BOLTS AND NUTS.—The demand for these still keeps greater than the supply. Our quotations are as follows: Carriage bolts, common ($1.00 list), 50 per cent.; carriage bolts, full square ($2.10 list), 55 and 10 per cent.; carriage bolts, Norway iron ($3.00 list), 55 and 10 per cent.; machine bolts, all sizes, 50 and 10 per cent.; coach screws, cone points, 66 2-3 and 10 per cent.; elevator shaft and whiffletree bolts, 50 per cent.

SPADES AND SHOVELS.—These are quiet. We quote 40 and 5 per cent. discount.

ROPE.—There is still a fair inquiry for rope. Quotations are as follows: Pure manila, 14c.; British manila, 12c.; sisal, 12c.; lathyarn, single, 11c. and double, 11½c.; sisal bed cord, 3-cord, 48 feet, 65c.; 60 feet, 80c.; 72 feet, 95c. per dozen.

HARVEST TOOLS.—These continue inactive, the jobbers having all sold out for next year's delivery. The discount is 60 to 60 and 10 per cent.

LAWN MOWERS.—There is not much call far lawn mowers yet. Quotations are as follows: Woodyatt, 12-inch wheels, $7.50; Star, 12-inch wheels, $5.50; Daisy, 12-inch wheels, $4.90; Philadelphia, 10-inch wheels, $6; Ontario, 10-inch wheels, $12.75. The other sizes are in proportion. The discount is 50 per cent.

GREEN WIRE CLOTH.—There is little or no movement in this line. We quote $1.40 per 100 square feet.

EAVETROUGHING, ETC.—This line remains quite active. Our quotations now are: Eavetroughing, 10-inch, per 100 ft., $3.10; conductor pipe, 2-inch, per 100 ft., $3; 3-inch, $4; 4-inch, $5.25; 5-inch, $6.75 and 6-inch, $9.

CUTLERY.—Trade in all lines of cutlery is brisk.

BUILDING PAPER.—The demand keeps up well for building paper. Quotations are as follows: Dry sheathing, grey or straw, 35c. per roll; tar sheathing, grey or straw, 45c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll.

ASH SIFTERS.—Quite a number of ash sifters are still going out. The price is unchanged. We quote $14.40 per gross.

TINWARE AND ENAMELLED WARE.—Tinware remains quite active. Some lines of enamelled ware have been scarce.

STOVES, RANGES, ETC.—The demand for stoves, which had slackened off a little, was stimulated by the snowstorm of this week, there arising a big call for heaters.

SCREEN DOORS, ETC.—There is not much business doing in screen doors and windows. We quote: Screen doors, common, 2 or 3 panel, walnut stained, 3-in. style, $6.60; stained, yellow or green, $6.80; in natural colors, oil finish, $8.15; 4-in. style, 20c. per dozen extra.

CEMENT.—The demand for cement has dropped with the stormy weather, but manufacturers have little or no stocks to offer. The prices are unchanged. We quote: Canadian Portland, $2.80 to $3.20, hydraulic, $1.35 per barrel. At the works the prices are $2.50 to $2.70 per bbl.

METALS.

The general metal trade continues heavy and there is quite free booking for future delivery. There is at present a great shortage of Canadian pig iron, due to the Canadian furnaces being much hampered by the scarcity of coke. The price of silver tin abroad has further declined to another lowest price on record. Cable advices from Wales state that a committee has been formed among the manufacturers to arrange for the closing down of all Welsh tinplate mills one week in every month until the prices improve, and a general impression is abroad that about 40 per cent. of the mills in the United States are closed. In copper there has been a big drop on the London market, and that metal there has reached the lowest point touched since last January.

PIG IRON.—Canadian pig iron has been scarce this week, and the furnaces are

much hampered by a shortage in the supply of coke. We quote: $23 for No. 1 and $22.50 for No. 2 at the Canadian furnaces. On track, Toronto, No. 2 Summerlee is quoted at $23.

STEEL BOILER PLATES.—A good demand continues for steel boiler plates. We quote $1.80 per 100 lb. in carlots.

STEEL RAILS.—Prices for steel rails remain unchanged. We quote $30 per ton for steam railway rails and $36 for electric railways rails.

TOOL STEEL.—The market for tool steel keeps strong and active. We quote: "B C" and "Black Diamond," 10 to 11c.; Jessop's, Morton's and Firth's, 14c.; Jonas & Colver's, 8 to 15c.; ditto, "Air Hardening," 30 to 50c.; Chas. Leonards', 8 to 9c.; Park's "Silver," 12 to 14c.; Park's Special, 15 to 20c.

MILD STEEL.—A good demand keeps up for this steel, which is still scarce and firm. We quote $2.50 to $3 per 100 lb. f.o.b. Toronto.

BOILER TUBES.—There is a good demand for boiler tubes.

SPRING STEEL.—This metal continues in heavy demand. Quotations are $3 to $3.50 on track, Toronto.

BAR IRON.—Some sizes of bar iron are still scarce on this market and the prices are firmly maintained. Quotations are: $2.05 up base. Extras cut to length while rolling: 2 ft. and over, 10c. per 100 lb.; 1 ft. and under 2 ft., 15c.; under 1 ft., 20c.; over 20 ft. by special agreement, according to length and size.

BLACK SHEETS.—These are still in steady demand. We quote: Common, $3.15 for 28 gauge and dead flat, $2.50 for 26 gauge.

CANADA PLATES.—These are in good demand. Our quotations are: All dull, $2.90 to $3; half-polished, $2.85 to $3.10, and all bright, $3.75 to $3.85.

GALVANIZED SHEETS.—A moderate amount af business is being done in these. We now quote: Queen's Head, $4.50 for 28 gauge; American, $4.40 for 29 gauge; Bell brand, $4.30 for 28 gauge; Gordon Crown, $4.50 for 28 gauge.

TIN.—The outside tin markets are depressed and the prices in London, Eng., have touched the lowest point on record. The local demand is slackening off. We quote $31 to $32 per 100 lb.

TINPLATES.—The demand for tinplates has much improved and there has been a considerable call for 14 x 20's. Quotations are as follows: Charcoal, $4.75 to $5 and cokes, $4.25 per box.

COPPER.—The business doing in ingot copper is principally in small lots. We quote: Ingot copper, $13 per 100 lb. and sheet copper, $22 to $23.

BRASS. There is a moderate amount of business doing in brass. The discount is 15 per cent.

LEAD.—Pig lead has been quiet. Quotations follow: Pig lead, $3.50 per 100 lb. and bar lead, $3.75 per 100 lb.

IRON PIPE.—The demand keeps up well for iron pipe. Our prices follow: Per 100 feet: ¼-inch, $2.40; ⅜-inch, $2.65; ½-inch, $2.85; ¾-inch, $3.65; 1-inch, $5.20; 1¼-in., $7.35; 1½-in., $8.95; 2-in., $12.55; galvanized, 1-inch, $7.20. Trade discount is 4 per cent. for carlots.

ZINC SPELTER.—Trade in this line is quiet. We quote 5 to 6c. per lb.

ZINC SHEETS.—There has been a good demand for zinc sheets. We quote: Cask lots, $6 to $6.25 and part casks, $6.25 to $6.50.

SOLDER.—A moderate amount of business keeps up in solder.

ANTIMONY.—A fair trade is reported for antimony and the prices are unchanged at $9 per 100 lb.

PETROLEUM.

There are several changes to note in the price of oils this week, a slight advance taking place in all grades. We quote: Lily White, Canadian, 16c. in bbls.; Silver Light, Canadian, 17½c. in bbls.; Crystal Spray, water white, American, 19c. in bbls.; Pennoline, best American imported, 20½c. in bbls. In bulk, 2c. per gallon less.

HIDES, SKINS AND WOOL.

HIDES.—There is a steady business doing in hides, with an accumulation of stock. We quote as follows: No. 1 green, 8c.; No. 2 green, 7c.; No. 1 green, steers, 8½c.; No. 2 green, steers, 7½c.; cured, 8½ to 9c. per lb.

SKINS.—These find a ready sale on the market. Quotations are as follows: Veal skins, 6 to 14 lb. inclusive, No. 1, 10c.; No. 2, 8c.; do, 15 to 20 lb. inclusive, No. 1, 9c.; No. 2, 7c.; deacons (dairies), 60 to 70c. each; sheepskins, 65c.

WOOL.—The Old Country market for wool has improved much this fall, enabling holders here to get rid of their accumulated stock and as this better feeling continues, the market here is much stronger and prices of fleece wool have advanced ½c. We quote: Fleece wool, 14c. and unwashed wool, 7½c. per lb.

TALLOW.—This market is quiet and

prices are likely to be lower. We quote 6¼ to 7c. per lb.

SEEDS.

Trade in seeds continues quiet. Prices at outside stations are unchanged at $6.50 to $6.75 for red clover; $6.50 to $7 for alsike and $1.50 to $1.75 for timothy.

COAL.

There has been a great demand for hard coal this week, and dealers are endeavoring to satisfy everybody. The Welsh coal has arrived, but as yet the exact price of it is not known. Hard coal is quoted at $8 per ton and soft coal at the international bridges is $5.50 per ton.

OLD MATERIAL.

The storm of yesterday is a drawback to dealers in old material, although up to the present they have been very busy. We quote: Heavy copper and wire, 10c. per lb.; light copper, 8 to 8½c.; heavy red brass, 9½c.; heavy yellow brass, 8 to 8½c.; light brass, 5 to 5½c.; lead, 2 to 2¼c.; scrap zinc, 3c.; iron, No. 1 wrought, $15 per net ton; No. 2 wrought, $4.50; machinery cast scrap, $15.50 to $16; stave plate, $10; malleable and steel, $6 to $6.50; old rubbers, 6½c. per lb. and country mixed rags, 50c. per 100 lb.

MARKET NOTES.

Mrs. Potts sad irons have declined 5c.

Ice creepers are 10 per cent. dearer this season.

NOVA SCOTIA MARKETS.

Halifax, November 24, 1902.

TRADE in all seasonable lines of hardware continued exceptionally good through the last week, and the general conditions prevailing are very satisfactory. Payments continue to be well met, and unusually good reports are coming in from all over the Maritime Provinces. Now that the year is well along to its close, the merchants are looking over matters to see how their business stands. In most instances the trade agree that for the volume of business done and the generally healthy conditions of trade prevailing, this year will be a record one. They also agree that the outlook for next year is promising. Business throughout the year has been somewhat handicapped in the iron and steel lines, but with increased output and the ending of the coal strike, the manufacturers will no doubt be able to fill their orders more promptly, and the firmness of prices in these lines will have a tendency to abate.

* * *

Speaking of the recent cut in cordage, a prominent dealer is of the opinion that there will shortly be an advance again to the old rates—the cut only being made to meet the competition of cheap material being sold direct to the retailers. This grade of cordage was sold largely in New Brunswick last year and gave very poor satisfaction. The dealers here claim that it will only be sold successfully one season in Nova Scotia, as the very best quality is required in this Province for the various marine purposes. Some dealers are preparing for an advance even beyond recent quotations, when the object of the cut has been accomplished.

* * *

Though there have been no reductions of importance in iron and steel, it is generally considered that there is an easier tone to the market, principally on account of the increased output of Canadian furnaces, and somewhat lower prices are forecast. A notable reduction is that of tin, on which a 10 per cent. lower quotation is announced to take effect on December 1. There has been considerable demand for this article of late as the lobster canneries are about commencing to make up next season's supply of cans. The cut mentioned has been made by The American Tinplate Company in competition with the Welsh mills. The demand for black-sheet iron has been heavy of late, no doubt owing to the fitting up of extra stoves in buildings which formerly used furnaces when anthracite coal could be had in the market. The dealers still report a heavy business in heating stoves, and some foundries are contemplating advances in prices.

* * *

The export business for the last week has been very heavy, amounting to $251,729, as compared with $183,603 for the corresponding week last year. Shipments to the several countries are as follows: Great Britain, $121,624; United States, $44,703; West Indies, $71,182; Newfoundland, $7,200; Italy, $3,000; France, $2,500; Germany, $1,500.

R. C. H.

OFFERING SKATES.

H. S. Howland, Sons & Co. offer a first-class skate, in Boker's hockey skate. This make of skate has been on the Canadian market for quite a long time and has given great satisfaction, and the retail trade everywhere are now selling the article. This firm carry in addition to the hockey skate, several good lines of spring skates, as Gunn's pattern, Mic-Mac, Regal and Chebucto. They claim their stock of Boker's and Starr is complete.

TRADING IN FURS TO-DAY.

First of all, when an Indian arrives to trade at a Hudson Bay post, then, furs in the pack must be sorted, silver fox worth $500 separated from cross fox and blue and white worth from $10 down, according to quality, and from common red fox worth less. Twenty years ago it was no unusual thing for the Hudson's Bay Co. to send to England yearly 10,000 cross fox skins, 7,000 blue, 100,000 red, half-a-dozen silver. Few wolf skins are in the trapper's pack, unless particularly fine specimens of brown Arctic and white Arctic, bought as a curiosity, and not for value as skins. Against the wolf the trapper wages war as against a pest that destroys other game, and not for its skin. Next to muskrat, the most plentiful fur will be that of the rabbit or varying hare. Buffalo was once the staple of the hunter. What the buffalo was, the white rabbit is to-day. From it the Indian gets clothing, tepee covers, blankets, thongs, food. From it the white man, who is a manufacturer of furs, gets grey fox, and chinchilla, and seal in imitation. Except one year in seven, when a rabbit plague spares the land by cutting down their prolific numbers, the varying hare is plentiful enough to sustain the Indian.

ANOTHER LARGE PLANT.

THE Sherwin-Williams Co. are about to greatly extend their manufacturing operations in Canada. Recently they purchased through Messrs. J. Stevenson, Brown & Co. 120,000 feet of land on Atwater avenue, Montreal, and here they will put up a large plant for the manufacture of paints, etc. The price paid for the land was $20,000.

The success of their paints in Canada, as in other countries, has made this step imperative, and those of the trade who handle the S. W. paints will be glad to hear of the intended branching out of the Canadian end of this firm.

The company have already a good-sized factory in Montreal, at the corner of St. Antoine and St. Genevieve streets, besides their establishment in Toronto, but these facilities are not sufficient to supply the growing demand for their paints and varnishes in Canada.

The new factory will be equipped with the best and most improved machinery, and a large number of hands will be given employment.

PERSONAL MENTION.

M. H. Roper, representing Alexander Gibb, is now on his fall trip through the Maritime Provinces. He has found business in that part of the country in a very good condition, and expresses the utmost satisfaction with the reception his goods have met.

"How do you feel?" asked the physician of the parson.

"I feel for-giving," replied the good man.

"And you?" he asked of the auctioneer.

"As usual, for-bidding," answered the red-flag follower.

"And you?" queried the M.D. of the Kentucky colonel.

"Oh, you know me, doc," replied the Kentuckian. "I'm always for-get-full."—Exchange.

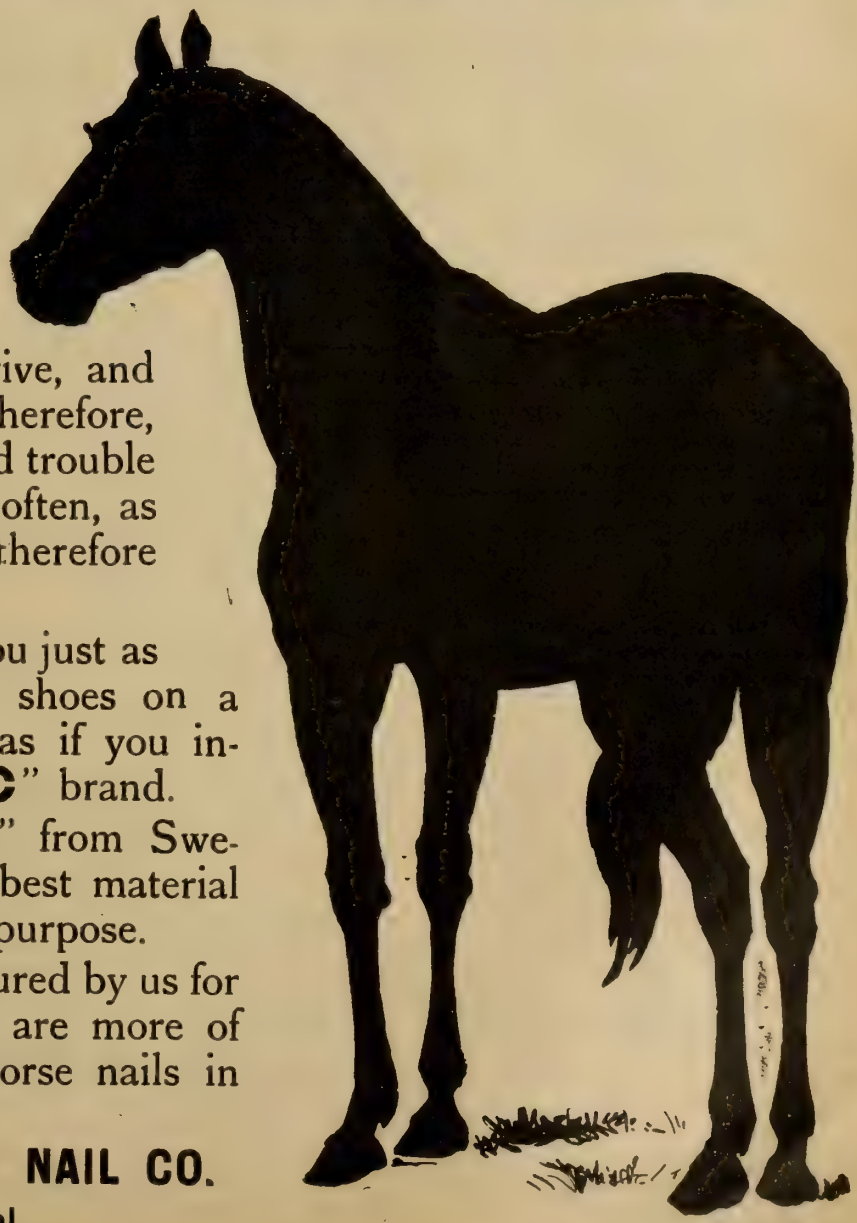
COULD I TALK

"I would say that you will study my welfare and true economy, by always using the '**C**' brand nails for my shoes!"



They are the easiest to drive, and will last longest; you will therefore, not be put to the expense and trouble of getting shoes removed so often, as when using "cheap" and therefore inferior horse nails.

The Farrier will charge you just as much for putting a set of shoes on a horse with "cheap" nails, as if you insisted upon his using the "**C**" brand.

Every nail is "hot forged" from Swedish charcoal steel rods, the best material known in the world for this purpose.

They have been manufactured by us for the past 37 years. There are more of them sold than any other horse nails in Canada.

CANADA HORSE NAIL CO.
Montreal.

HEATING AND PLUMBING

PLUMBERS RAISE THE PRICE.

THE master plumbers of Toronto held a meeting Tuesday night in the Strathcona Chambers and decided that the price list for steamfitters, gasfitters and plumbers shall hereafter be at a uniform rate of 65c. per hour, such rate to go into effect immediately. This is an advance of 15c. on the price that prevailed before the strike in the summer. But since the strike the master plumbers have been gradually raising the price, so that the advance has not been sudden from 50 to 65c.

They also decided that the working hours would be from 8 a.m. to 5 p.m. daily, except Saturdays, when the hours shall be from 8 a.m. to 12 noon. Overtime after 5 p.m. daily and 12 noon on Saturdays was fixed at a time and a half, instead of time and a quarter, as it was formerly, and on Sundays and legal holidays, double time. President Robert Ross occupied the chair.

BUILDING NOTES.

The City Commissioner advises a limit of 14 storeys to the buildings of Toronto.

Mrs. West, Lewis street, Ottawa, is building a brick dwelling at a cost of $4,800.

J. L. Orme & Son, of Ottawa, are losing no time in rebuilding their burned structure. A permit for the new building has been issued, and it will be one storey higher than before. It will cost $15,000.

PLUMBING AND HEATING CONTRACTS.

TORONTO

A plumbing and heating system is being installed in the Canada Life Building, at Winnipeg, by Cotter Bros., of that city.

The plumbing and heating of the three houses for John Laxton, Parkdale, Toronto, is being done by John Ritchie Company, Limited.

Keith, Fitzsimons & Company, of King street west, Toronto, have the contract for the heating and plumbing of the new Simpson House, Lindsay.

The John Ritchie Company, Limited, Adelaide street, Toronto, are putting in the heating apparatus for J. K. Fisken's building, Lombard street.

Geo. Harper, of Goderich, Ont., has the contract for the plumbing and heating of the Grand Trunk Railway Company's new station in that town.

Harrison & Robertson, plumbers, of Toronto, are receiving several contracts from out of town. They are installing a new plumbing and heating system in the hospital at Walkerton, Ont.

MONTREAL

J. W. Hughes, plumber and steamfitter, of this city, has been awarded the contract for the plumbing and heating for the estate of Caverhill, 93 St. Peter St.

WAGES SINCE 1869.

The increase in wages paid mechanics and laborers connected with the building trades in the United States since 1869 has nearly kept pace with the advance in the price of bricks and bill stuff; as the following table shows, which gives prices per hour during the years from 1869 to 1902:

	1869.	1879.	1902.
Bricklayers	.34	30	60
Carpenters	34	20	56
Gasfitters	25	30	50
Hod-Carriers and other laborers.	21	17	37½
Marble cutters	32	25	55
Marble polishers	20	17	44
Masons	34	30	65
Painters	27	25	44
Plasterers	39	30	62
Plumbers	27	30	50
Roofers	32	25	50
Stonecutters	34	30	55

This, remarks National Builder, shows a healthy increase in the rate of wages for labor, and, with almost a corresponding increase in the prices of several kinds of building material, the cost of building now is from 25 to 35 per cent. higher than ten years ago, depending somewhat on the class of building erected. The wages of workmen employed in the building trades are more than double what they were 40 years ago. The cost of living has also doubled, and rents, as a rule, have more than doubled.

GAS AND HOT-AIR PIPES.

"C. S.", Phillipsburg, N.J., writes Metal Worker as follows: "I have seen the inquiry of 'A. L. R.' in The Metal Worker of November 8 and am not much surprised that the gas should pass off through the hot-air pipe when there is no other escape for it. Some outlet must be provided, for, as long as fire continues, the coal will liberate the gas and make trouble. The fire burns freely as the result of the draft in the chimney, but the use of a tight damper would increase the trouble rather than relieve it. While it would check the fire effectively, it would also force the gas that was made, until the fire died out, to escape through opening not designed for that purpose. If 'A. L. R.' will cut an opening in the side of his smoke pipe about 3 x 6 inches, just above his damper, and arrange on the outside of the pipe a slide which will close this opening or leave it all or partly open, he will be able to check his fire by means of the damper and supply the draught to the chimney through the opening in the pipe, while the damper in it, left partially open, will allow the gas generated by the fire to escape. The feed-door can be entirely closed and the opening in the pipe provided by means of the slide will supply the draught to the chimney so that it will not draw air from the fire and make it burn too freely. It is not a difficult matter to arrange such a slide on the back of the stove pipe, where it will not detract from the appearance."

BUILDING PERMITS ISSUED.

THE following building permits were issued by the City Commissioner, Toronto, during the past week:

William Moss, pair semi-detached two-storey and attic brick dwellings, Arthur street, $3,500.

Charles Boles, one-storey frame and roughcast dwelling, Essex street, $300.

Bachrack & Co., alterations to store, Yonge street, $800.

Wm. Grant, alterations to dwellings, Sorauren avenue, $500.

Thomas Coughlin, two-storey dwelling, brick and roughcast, Bolton avenue, for $1,000.

J. Wheller, pair semi-detached stone and brick dwellings, Concord avenue, $3,400.

H. M. Deeth, two-storey and attic brick dwelling, Concord avenue, $2,100.

The Toronto Railway Company, one-storey storing-shed, King street east, for $7,000.

E. Jameson, two-storey roughcast dwelling, Robinson street, $800.

A. Hutchison, 2½-storey brick dwelling, Havelock street, $3,500.

W. A. Elliott, two-storey brick dwelling, McDonnell avenue, $1,700; W. A. Elliott, two-storey and attic brick dwelling, McDonnell avenue, $3,600.

W. R. Maddock, four-storey brick wall, York street, $800.

H. H. Fudger, alterations to dwellings, Maple avenue, $2,000.

A. T. Gowanlock, alterations and two-storey brick addition, Gwynne avenue, for $3,000.

R. Dinnick, three pairs semi-detached 2½-storey brick and stone dwellings, Wells street, $12,000.

MANAGERS AND REPRESENTATIVES OF THE SHERWIN-WILLIAMS CO., PAINT AND VARNISH MAKERS.

From a photograph taken during the 22nd Annual Convention at Cleveland, November 3rd to 8th, 1902

SHERWIN-WILLIAMS CONVENTION.

WITH this number we present a half-tone, taken from a photograph of the managers and representatives of The Sherwin-Williams Company, paint and varnish makers. The picture was taken in front of the general offices of the company during their 22nd annual convention, held in Cleveland, November 3 to 8, mention of which was made in our last issue.

There is nothing that illustrates more clearly the growth of the company than a comparison of the photographs showing the attendance at each year's convention. Not a year passes without additions to the travelling force, and when it is considered that during the year of 1902 22 new salesmen were added to their travelling force, all of whom go on entirely new territories, it will readily be seen that the company is still growing at a healthy and vigorous pace.

Not only is this true of their business in the United States, but it is also very forcefully true of their progress in Canada. In fact, their business on this side has developed so rapidly and to such an extent that it has become necessary for them to increase their facilities, and about January 1, they will open a distributing depot in Winnipeg, to take care of their large trade in Manitoba and the Northwest Territories. The depot will be located at 147 Bannatyne street east, and will be in charge of D. B. Ross, who has been representing them for some time in the Northwest.

That Canadians want and use good paint is proven by the marvellous growth of this company in Canada within the last few years. Each year the advancement has been marked, the plants have been enlarged and improved, new territories covered, new salesmen added to the staff, and new products listed. This year the company has been compelled to make several extensions in order to keep pace with the growing sales. Large additions to its varnish factory at Montreal were completed early in the year. A four-storey extension to the Toronto warehouse is in course of construction, and plans have been drawn for an entirely new paint factory at Montreal, which will be built during the coming year and will materially increase the company's facilities. It will be the largest plant outside of Cleveland.

When the warehouse at Winnipeg is opened The Sherwin-Williams Company will be established in 12 cities on this continent. The growth of the company has been remarkable even in these days of rapid industrial development. Thirty years ago a beginning was made in a small one-storey building in Cleveland. Now, the company's facilities for manufacturing and distributing paint products are the largest, not only in North America, but in the whole world.

MANITOBA MARKETS.

Winnipeg, November 21, 1902.

BEYOND the fact that business is good and prices firm in all lines there is practically nothing to say for the hardware market this week.

Jobbers report collections fair. The fuel situation is again causing some uneasiness as reports have been received that no more anthracite is to be expected at Fort William this season, and the dealers have advanced prices to cover the all-rail rate, and American anthracite is now quoted at $13.50 and likely to advance further. Owing to the absence of snow and the shortage of cars, wood is growing scarce.

The price list for the week is as follows:

Barbed wire, 100 lb.	$3 25
Plain twist	3 40
Staples	3 90
Oiled annealed wire ... 10	3 42
" ... 11	3 48
" ... 12	3 56
" ... 13	3 66
" ... 14	3 76
" ... 15	3 91

Annealed wires (unoiled) 10c. less.

NOTES.

The Manitoba Cement Company, who own large cement fields near Morden, are preparing to erect a 1,000-barrel capacity factory in the early spring.

The James Smart Manufacturing Company have arranged for new premises in the Orange Memorial Hall on Princess street, which is now in course of construction.

The Port Huron Company, Limited, for the purpose of manufacturing agricultural tools, have sought incorporation here and will open large premises in the spring. The capital stock is $100,000.

The Cockshutt Plow Company and The McLaughlin Carriage Company are having work on their new buildings pushed as rapidly as possible, and the prospects are good for the buildings being covered in before the cold weather sets in. There has been considerable delay on The Cockshutt building, owing to the shortage of cut stone.

Don't waste good work
on poor galvanized iron
—unless you want to be
taught by experience.

Apollo is good.

OUR

2 and 3 PLY READY ROOFING,
BUILDING PAPERS,
SHEATHING AND CARPET FELT,
COAL TAR PRODUCTS,
HANGING AND PRINT PAPER,
BROWN AND MANILLA WRAPPING,

are all guaranteed to give entire satisfaction. Quality, unequalled. Handling our lines means increased business for the merchant.

ALEX. McARTHUR & CO., 82 McGill Street, MONTREAL.

PAPER MILLS: JOLIETTE, QUE. FELT FACTORY: HARBOR AND LOGAN STREETS, MONTREAL.

CURRENT MARKET QUOTATIONS.

November 28, 1902

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figures being for larger quantities and prompt pay. Large cash buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list, as the desire is to make it perfectly accurate.

BRADSTREET'S

Capital and Surplus, $1,500,000. **Offices Throughout the Civilized World.**
Executive Offices: Nos. 346 and 348 Broadway, New York City, U.S.A.

THE BRADSTREET COMPANY gathers information that reflects the financial condition and the controlling circumstances of every seeker of mercantile credit. Its business may be defined as of the merchants, by the merchants, for the merchants. In procuring, verifying and promulgating information, no effort is spared, and no reasonable expense considered too great, that the results may justify its claim as an authority on all matters affecting commercial affairs and mercantile credit. Its offices and connections have been steadily extended, and it furnishes information concerning mercantile persons throughout the civilized world.

Subscriptions are based on the service furnished, and are available only by reputable wholesale, jobbing and manufacturing concerns, and by responsible and worthy financial, fiduciary and business corporations. Specific terms may be obtained by addressing the Company at any of its offices. **Correspondence Invited.**

JAS. A. McGOLDPIN
156-162 Duke Street, TORONTO.

SEALED TENDERS addressed to the undersigned, and endorsed "Tender for Heating Apparatus, Postal Station, C., Toronto, Ont.," will be received at this office until Monday, 15th December, inclusively, for the construction of a hot water heating system at Postal Station, C., Toronto, Ont., according to plans and specification to be seen at the office of S. G. Curry, Architect, Toronto, Ont., and at the Department of Public Works, Ottawa.

Tenders will not be considered unless made on the form supplied, and signed with the actual signatures of tenderers.

An accepted cheque on a chartered bank, payable to the order of the Minister of Public Works, equal to ten per cent. (10 p.c.) of the amount of the tender, must accompany each tender. The cheque will be forfeited if the party decline the contract, or fail to complete the work contracted for, and will be returned in case of non-acceptance of tender.

The Department does not bind itself to accept the lowest or any tender.

By order,
FRED. GELINAS,
Secretary.

Department of Public Works,
Ottawa, 1st December, 1902.

Newspapers inserting this advertisement without authority from the Department will not be paid for it

Some Good Reasons Why we claim your trade

FIRST—The brass we make is the standard by which all other brass is judged.

SECOND—It was good enough for good people 40 years ago, and now that we are making a better brass it ought to be good enough for the younger generation.

THIRD—WE ARE ON THE SPOT with a full and complete stock for shipment same day order is received. This alone is worth a good many dollars in these rush times.

FOURTH—We have issued a comprehensive catalogue classifying over a Million Pounds. It's here for the asking.

TRANSPORTATION DELAYS.

SHORTAGE of cars is a favorite topic for newspapers to discuss now-a-days, and the public hears frequently through their columns of the delays occasioned in the transportation of wheat, coal and other commodities to their destinations due to such shortages.

But there are other delays equally annoying of which the public hears but little. Whether or not these delays are occasioned by the aforementioned shortage of cars or by other causes matters little. They exist and they cause annoyance to many merchants.

When a wholesale house finds that it takes a railway company 10 days to convey goods to their warehouse from a mill not 200 miles distant, it is decidedly a condition of affairs that demands an investigation and a remedy. It savours too much of the early days of last century when pack horses were the most rapid means of transportation. If, as was suggested, the shortage of cars at this season of the year lies at the root of the matter, it is abundantly time that some means of overcoming the shortage should be adopted, and the railways assisted in their work of construction. If, on the other hand, the trouble is due to carelessness or mismanagement, stern steps should be taken to make the nation's carriers better servants of the public.

WHY STOVEMAKERS ARE HAPPY.

IT is not the rule for stove manufacturers to delight in a continuance of mild weather well into December, but such is the case this year. The demand for stoves from all over Canada has been so increased in volume that had a really cold snap set in early in November it is almost certain that there would have been a blockade of orders, with the consequent result of frequent cancellations.

The continuance of mild weather has, therefore, enabled most of the foundries to keep up their orders, and prolonged buying to much later than usual. The Toronto branch of one of the leading foundries last week sent in to the foundry an order for two cars of stoves. This seems like so much extra business, for, as a rule, buying from the foundries generally ends before December 1.

Value your customers' friendship and make it lasting and well merited by guaranteeing satisfaction at all times.

A BUSINESS ROMANCE.

FIFTEEN or twenty years ago Colonel Pope was known as one of the most successful American manufacturers.

When the modern bicycle was developed he went extensively into their manufacture and soon became the leader by making good wheels and letting the people know it.

The American Bicycle Co. was formed, combining all the leading makers. Colonel Pope's business was included, and he has not, until lately, been much heard of. He became a director of the combination. Its promoters hoped, by reducing expenses, to make greater profits, and this was a reasonable proposition.

One of the first things the directors of the new company did was to cut off the advertising entirely. Colonel Pope opposed this move very strongly. He said to do so would be ruinous. The other directors persisted, and Colonel Pope resigned and sold all his interest in the Trust at a handsome figure.

The company made a disastrous failure in a much shorter time than Colonel Pope anticipated, and the creditors called on him and begged him to make an effort to put the business on a paying basis again.

At a meeting of the creditors the other day he presented an encouraging report as a result of his investigations. He gave it as his opinion that the cessation of advertising killed the bicycle business.

"The way to revive it," he declares, "is to resume advertising, which was cut off to reduce expenses, forgetful that there would also ensue a reduction in revenues.

"That is my idea for the future—to advertise. There is a future for the bicycle yet, but it will take advertising to develop it."

TO PROMOTE TRADE IN HOME PRODUCTS.

LAST Summer a lady from Western Canada was visiting Quebec. She wanted a pair of gloves. She liked the style of workmanship on a very neat pair of kids that were shown in the retail store in that old city, and she wanted to know where they were made. After some hesitation the merchant admitted they were made in Quebec. This interested her very much and she went to the factory and saw them being made. Not one of them had the word "Canada" or any lettering to show that these excellent gloves were made in the Dominion.

In several of the leading cities there is a society called "Imperial Daughters of the Empire." It is composed of most of the prominent women of the place. In Toronto Mrs. Nordheimer is the head of the society. They have done a great deal for Canadian affairs.

The lady who found the gloves in Quebec is a member, and at one of the meetings shortly after her return she mentioned her experience. Several other women had similar stories to tell about other goods made in Canada, but which most people thought could not be made here. The matter was generally discussed, and it was eventually resolved to hold a small exhibition of articles of purely Canadian manufacture. The Canadian Manufacturers' Association was approached and their assistance asked. At first the ladies' proposition was not very enthusiastically received, because manufacturers are so frequently held up by all sorts of schemes, and this looked like another scheme. They were assured that this was not a plan to make money for a ladies' society. All the ladies wanted was to allow the people of Toronto to see and know something of Canadian products, and that all they wanted the manufacturers to do was to send in a small exhibit, and possibly pay a nominal sum to cover the actual expenses of the share of space they occupied in the hall or building where the exhibition would take place, and for expenses of advertising, and so on.

The Manufacturers' Association have now promised the ladies every assistance. A building is under offer, and it is likely the exhibition will take place about the end of January. If the space is limited it is proposed to select exhibits from among articles made in Canada, but which are also largely imported, leaving out, if necessary, such articles as Canada exports in greater quantities than she imports. Possibly, if a large enough building is obtained, many of these can be exhibited.

It is quite possible that the branches of the Daughters of the Empire in some of the other Canadian cities will hold similar exhibitions immediately after the one in Toronto, but nothing definite seems to have been decided about that.

This scheme is one of the very best for making known to the best class of buyers what Canada can do in every line of manufacture. Most schemes of this sort are fakes. This is the first one we have ever endorsed, and in the last 16 years we have criticized many.

We will be glad to give any further information regarding this exhibition to our readers who desire it, and put them in touch with the working secretary as soon as one is selected by the society.

THE DEMAND FOR BICYCLES.

THE question is often asked why it is that there has been such a tremendous falling off in the demand for bicycles. Of course no one theory can be offered which will account for all the changes in the bicycle trade. Undoubtedly there was a demand for the wheel which was far in exeess of normal conditions, and a reaction from this situation was inevitable. Further than this, however, there is no doubt that one reason why fewer ales are made now than formerly is that dealers do not put the same energy into their selling that they once did. In the days when the bicycle was the popular article of fashion, dealers were actively canvassing for trade in their own locality; to-day too many of them wait for the trade to come to them, and the result is seen in the number of sales obtained.

It is the opinion of the manufacturers of the bicycle and of the most successful dealers that if agents will put the same energy and activity into pushing good standard wheels of to-day, as they did some years ago, that there will be as much money in the bicycle business for the dealers as there ever was.

A DEMORALIZING PRACTICE.

A GOOD many men are still reaping the whirlwind of the recent period of inordinate speculation on the stock market, and not a few of those who were once rich are now poor.

While no one should glory over the losses which have been and are being suffered by speculators in margins, one cannot but recognize that a salutary lesson is being taught.

Suddenly-acquired riches are not the best kind of riches. "Easy come, easy go" is an old proverb that we seem inclined to forget these days. But whether suddenly-acquired riches are good or bad, the spirit which characterizes those who set out to acquire them by investing their small savings in them is certainly demoralizing. The gambling spirit which it cultivates is certainly not conducive to the public weal. But that is not the only objectionable feature about the practice. Another, and one that is scarcely less objectionable, is the spirit of unrest that it breeds. Merchants who are dominated by it are no longer satisfied with the money-making methods of ordinary business. These are dull, prosy and uninteresting. It is the $500 invested in margins, which, by the turn of the market, will produce $5,000, that gives zest to life. And thus, instead of watching for opportunities to develop and increase business, merchants and clerks who are victims of the stock-speculating fever are intent on watching the fluctuations of the stock market.

Nothing can be said against the practice of purchasing stocks outright, particularly for investment purposes. But merchants cannot look after their own business, or clerks the affairs of their employers when they are possessed with the stock-speculating fever. And the times of reaction which we have been experiencing during the past month or two teach us that it pays better in the long run to be faithful to the duties that legitimate business demands than by neglecting them to chase the wild will 'o the wisp of stock market speculation.

THE C. I. F. QUESTION.

BY A. C. LESLIE & CO.

WE have read with interest the various letters in your columns on the "C.I.F." question," in connection with which we have had considerable experience ourselves. We think the whole question practically resolves itself into what the seller in Britain or other European countries means when he quotes C.I.F., as in these matters the practice of the country from which quotation is given must be understood to apply, unless there is a distinct agreement or understanding to the contrary. We have submitted this question to several of our Brtish friends, both manufacturers and merchants, all of whom state positively that their understanding is that a C.I.F. sale does not necessarily bind the shipper to cover any goods "With Average" or "Against All Risks," even if such goods are of a damagable nature. Some of these sellers go so far as to stamp a clause on all letters bearing C.I.F. quotations to the effect that insurance will be effected "F.P.A." only, and that they will accept no responsibility as to marine risks. One of these firms adds that they have, for reasons of their own, made a practice for some time of covering damagable goods "With Average," but those buying from them understand this, but at the same time assert decidedly that they are not bound to do so, and that selling C.I.F. is done as an accommodation to the buyer, to let him know what his goods are going to cost at the point of delivery, not at all for the benefit of the seller. Some of your correspondents are very positive in their view to the contrary, but we have no hesitation in saying that, unless they have reason to know that the seller is quoting subject to insurance "against all risks," they have no case in law for anything beyond F.P.A. insurance.

BY THE CANADA HARDWARE CO., LIMITED.

We are just in receipt of a letter from "Mancunian," one of the largest exporters in Manchester, Eng., who had his views of the C. I. F. question expressed in your issue of Nov. 8 last.

In his letter to us he says: "Although in the letter in question we stated our views on the C. I. F. question generally, for your information we might say that all our shipments to Canada are insured A. P. A., that is to say against all risk free of 3 per cent. damage. The principal goods we ship to the Dominion are galvanized and black sheets and tinplates."

This covers our case. We also received the following letter from a leading manufacturers' agent here, who quoted us for English goods. We wrote asking him what was meant by C. I. F. (he having quoted on this basis). His reply was: "We beg to advise you that we insure our goods according to the usual custom in connection with the class of goods imported. That is to say, if a certain line of goods are in the usual way insured W. P. A., and we insured F. P. A. to save something on the cost of insurance, we think we would be responsible."

In conclusion, we would say that it appears from the different opinions we have received from the various exporting houses direct and through your paper that it is the custom to insure goods liable to damage by sea water or otherwise W. P. A. or A. A. R., that is to say, against all risk, and only goods which could not be damaged, such as billets, pig iron, block tin, etc., should be insured F. P. A., the seller being liable if he does not insure accordingly.

BY "MANCUNIAN," MANCHESTER, ENGLAND.

I am glad to see the legal interpretation in your issue of November 8, which upholds my previous letter.

No legal authority would for one instant maintain that anyone had the absolute right to a receipt for money paid unless such payment concerned him. And yet the authority quoted states that "it is not sufficient to tender the bill of lading without the insurance policy." Does not this prove that the insurance does most nearly concern the buyer? Indeed, the compulsion to surrender the policy to the buyer proves that he is the one and only one nearly concerned, else why should he have the policy?

"Montrealer's" argument re not giving cost price is not really important. Any merchant quoting C.I.F. will also quote cost price if desired. As a matter of fact, so long as the buyer gets his goods at, say, $2.50 C.I.F., it does not matter to him whether the cost is $2 or 2c. The only price he wants is the one which he has to pay.

If Canadian buyers want to insure the seller taking the risks until delivery, let them buy on "delivered and duty paid" terms. In this case the seller's responsibility is not completed until he has paid the duty, which cannot, of course, be done until the goods arrive. With a C.I.F. price, I repeat, the contract is completed on the seller's part by the delivery of a clean bill of lading and insurance policy to the buyer, or to the buyer's agent.

The buyer should stipulate specially if A.P.A. insurance is required. My firm covers all shipments to Canada A.P.A., but then our goods are not general manufactured hardware lines, but sheet and bar metals etc., and the difference in rate between A.P.A. and F.P.A. insurance is so slight on these goods that we cover A.P.A. in our clients' interests. We arrange with many clients to cover them for 10 per cent. over value, so that in case of a loss we recover from the insurance company an amount which covers the goods and pays for loss of sale. At the same time we maintain that F.P.A. insurance would be legally a fulfilment of a C.I.F. sale, there being nothing in the term C.I.F. to indicate the nature of the insurance, and any other than the usual F.P.A. should form the matter of a special agreement.

SOLD ONLY RETAIL BUSINESS.

An item appeared in HARDWARE AND METAL of November 8, stating that the Dawson and Vancouver business of McLennan, McFeely & Co., Limited, wholesale and retail hardware merchants had been taken over by The Yukon Hardware Co. McLennan McFeely & Co., Limited, inform HARDWARE AND METAL that only their retail business in Dawson City was disposed of.

CHRISTMAS BUYING SIMPLIFIED.

Adequate arrangements for displaying goods to advantage are necessary in every up-to-date store. Especially during the weeks preceding Christmas is this need most keenly felt. Merchants who desire to secure suitable display tables and shelves will find Boeckh's adjustable stands both useful and ornamental. United Factories, Limited, Toronto, issue a booklet describing these goods, which they will mail to inquirers on request.

HOWLAND'S HOCKEY TEAM.

The hockey team of H. S. Howland, Sons & Co., Limited, was reorganized on Wednesday night for the coming season. The following officers were elected:

Hon. President—Peleg Howland.
Hon. Vice-President—Geo. W. Howland.
President—H. A. Gunn.
Vice-Presidents—J. Bolton Reade and E. J. White.
Sec.-Treas—R. T. Freek.
Committee—Geo. Mitchell (manager), E. B. Ryan, R. B. Roy and E. T. Butler.

Two years ago the Howland team won the Commercial Championship, and as this season's aggregation is looked upon as being even stronger, it may be expected to give a good account of itself.

INDUSTRIAL GOSSIP.

FORT WILLIAM has organized a "10,000 Club," the object of which is to promote industries and develop the town to reach a population of 10,000 in the near future, the present number of people being 5,000. Mayor Dyke feels hopeful that the next two years will see at least 2,000 to 3,000 additional population, as the result of incoming industries, together with the general development.

The Pigeon River Lumber Co.'s mill has shut down for a month for repairs.

James Millar and George Brussels have bought the rolling mills at Guelph.

Copper of good quality has been discovered at Bancroft, Hastings county.

A one-sixth interest in the Raleigh oil field gusher has been sold to Dr. Fairbanks, jr., of Petrolea, for $20,000.

Sutherland, Innes & Co., hoop and stave manufacturers, Chatham, Ont., have offered to remove their mills to St. Thomas for a consideration.

The town of Essex has carried a by-law to grant concessions to a company to locate a factory for the manufacture of automobiles and steam specialties.

The Brantford Screw Co., Brantford, has been incorporated with $150,000 capital and the following directors: Lloyd Harris, C. Cook, F. Grobb, E. L. Goold and John Muir, all of Brantford.

President Hanrahan, of the Sydney Board of Trade, has received a letter from a large New York dyeing concern asking if the conditions would warrant the establishment of a branch in Sydney, N.S.

The National Petroleum Co., of Petrolea, has been incorporated, with headquarters in Guelph. It has a capital of $40,000 and the following directors: Geo. A. McGillivray, London; Wm. McLachlan and A. W. Alexander, Guelph.

The limits of the new Raleigh oil fields seem to be limited. A second well, drilled about half a mile north of the Gurd gusher, turned out a dry hole. The opinion of the experts is that the trend of the oil is the other way. Extraordinary excitement was created in Chatham by the curious find of oil in an abandoned artesian well.

W. J. Lindsay, of St. Thomas, is representing a company which offers to establish a wire fence and nail manufacturing concern, guaranteeing to employ 100 men 300 days per year, and to pay taxes on a fixed amount for a stated period; to invest $120,000 in plant and buildings. All they ask is $25,000 bonus and a fixed assessment of $75,000. The name of the proposed concern is The Imperial Wire and Steel Co.

The Ogilvie Flour Mills have entered an agreement with the Fort William Council to erect fireproof buildings, a mill capable of manufacturing 1,500 bbls. per day and an elevator to hold at least 500,000 bush., on conditions which will be voted on by the people of Fort William on January 5. If this vote is favorable the consent of the Ontario Legislature will have to be obtained, upon which the construction of the works will be at once proceeded with.

Mr. Knapp, promoter of the Knapp roller and tubular boats, is endeavoring to get a bonus of $60,000 and a free site in Sydney, N. S., on condition that a shipbuilding plant be established there. Structural steel for two vessels, he says, has already been ordered in England, and can be landed at Sydney when the yard is completed. He expects to be able to launch the first steamer on the opening of St. Lawrence navigation, claiming that the Rothschilds are willing to back up his project.

MANITOBA CEMENT CO.

The prospectus of The Manitoba Cement Co. is out. It contains, among other things, a list of the directors, it tells of the uses of cement and some large works in which cement was largely used. The lift-lock on the Otonabee River, part of the Trent Canal, the largest of that kind of lock in the world. It is constructed entirely of cement, over 30,000 bbls. being used.

A VIEW BY A U. S. CONSUL.

The United States Consul-General stationed at Montreal has sent in his report to Washington, in which he states that there are various enterprises in Canada run by American capital. The list embraces some thirty or more companies, among which are the Canadian Coal and Steel Co., capital of $6,000,000; the Federal Sugar Refining Co., with a capital of $600,000; and another million-dollar factory is about to be established at Toronto to manufacture agricultural implements, and will employ 400 hands. Their output will be $1,500 worth of machinery yearly.

THE CHRISTMAS GLOBE.

A Canadian production that all Canadians may well be proud to send into any other country is the annual Christmas number of The Toronto Globe. This year The Globe's Christmas number reaches a very high standard from a literary, artistic and mechanical point of view. Besides the book itself, with its beautifully lithographed cover, and many pages of Christmas stories and interesting photo-engravings, there are six handsome supplements, two lithographed in colors and the others tinted half-tones. One of the large colored plates is from a painting by J. D. Kelly. The price of this number, 50c., is very low considering the high quality of its contents.

INQUIRIES ABOUT CANADIAN GOODS.

The following were among the recent inquiries relating to Canadian trade received at the Canadian Government office in London:

1. The addresses of some Canadian oyster merchants have been asked for by a firm desirous of obtaining samples of Caraquet and other varieties.

2. A firm importing oats in large quantities desire to be placed in touch with reliable shippers in Canada.

3. Inquiry is made by importers in London for names of Canadian producers of fruit pulp of good quality.

4. A correspondent asks to be furnished with addresses of Canadian sawmillers handling white pine and sawing small stuff. Sizes to be any length, from 2 ft. 2½ in. wide, 3-16 in. thick, free from knots, sap and shakes.

5. A firm of belting manufacturers in the North of England desire to hear from a first-class Canadian firm of engineers' merchants or general merchant importers having a good connection among mills, factories and steam-users generally, with a view to the appointment of an agency for the Dominion.

6. A Liverpool firm of produce importers is anxious to secure a consignment agency for Canadian bacon, and wish to get into touch with a reliable packer.

[The names of the firms making the above inquiries can be obtained on application to the Editor of HARDWARE AND METAL.]

The ONTARIO TACK CO.
Limited
HAMILTON, ONT.

THE STOVE INDUSTRY IN HAMILTON

HAMILTON, which, from the time of the establishment of the present Gurney-Tilden Company, in 1843, has forged ahead as a great stove and furnace producing centre, shows this year an activity in this line far in advance of any previous year. The increased impetus has been effected from various causes, the general prosperity of the country having much influence on the general demand, while the threatened dearth of coal has created a large demand for air-tight sheet-iron heaters, which are now being produced in large numbers from the moulding rooms. So great has been the demand for these latter stoves that many of the companies have been forced to curtail the production of their standard stoves to meet this requirement. Even The Gurney-Tilden Company, with its four large moulding shops and its 375 workmen, find themselves getting behind with their orders.

The lock department of this company, which is of recent development, is now greatly increased, and many firms which have hitherto bought American goods are purchasing these articles from The Gurney Tilden Co. A lock supplement, illustrating these goods, is now being prepared by the advertiser for the firm, Mr. Hewson.

The Burrow-Stewart & Milne Company, Limited, Hamilton, report a most considerable increase on their business of last year, which was also much in advance of that of any previous year in the history of the company. Their show-room presents an immense range of their "Jewel" stoves, which are now being produced at the rate of about 16 per day.

Among the numerous lines shown by this company, the "Coral Jewel," for town and city trade, with its duplex fire box and latest style of shell decoration, and the "Gypsy Jewel" range cook and the "Crown Jewel" steel range, embodying as they do many of the best and most recent features in stove construction, are worthy of special note.

A most convenient stove manufactured by this company is the Souris "Grand Jewel," which is furnished with either duplex grates for hard coal, or special grates for burning soft coal, and the different qualities of coal obtained in the Canadian Northwest.

The "Grand Jewel," made in four sizes, square, and four sizes with tank, is a most substantial and highly-finished wood cook. This is the first cast-iron stove ever to be fitted with a sheet-steel oven with patent bracing which prevents warping and cracking.

A stove now for the first time in their showroom is the "Retort Jewel," one evolved from the exigencies of the past season. This is made in four sizes, a soft and hard-coal heater with nickel top ring and nickel foot rail, and a name plate which may be used as a teapot shelf.

In coal heaters this company is showing the modern and "Ideal Jewel," made in two sizes, with or without ovens. A complete line of gas ranges is also in hand. The "Imperial Standard" scales manufactured by The Burrow, Stewart & Milne Co., are also in great demand at present.

The company report a large demand for the "Dominion Jewel," now advertised in "Hardware and Metal."

The Burrow, Stewart & Milne Co., of Hamilton, have lately acquired considerable property to the north of their present plant with a view to extending their buildings early next year. The warehouse and moulding rooms will be considerably extended.

Berger's Paris Green, Largest Seller in Canada.

There is more Berger's Pure English Paris Green sold in Canada than any other brand.

It's the greatest bug-killer known, and that's what makes it popular with dealer and consumer.

If you want to secure the paris green trade of your district get BERGER'S.

It's the most satisfactory.

We are agents for Canada. Write us ***now*** for prices.

THE SHERWIN-WILLIAMS CO.
PAINT AND VARNISH MAKERS.
CHICAGO, NEW YORK, CLEVELAND. NEWARK, MONTREAL, BOSTON, TORONTO, SAN FRANCISCO. KANSAS CITY.

A ST. JOHN VISITOR

Mr. C. S. Archibald, representing The Maritime Nail Co., Limited, and The Portland Rolling Mills, Limited, St. John, N.B., has been in Montreal during the week visiting the wholesale trade. Mr. Archibald has come from the west, having been on a business trip to Sault Ste. Marie, where he took the opportunity to inspect the Clergue plants. He was struck by the fact that, owing to having the latest and most improved machinery, an immense amount of work has been done by comparatively few men.

Mr. Archibald reports business in the Maritime Provinces to be in excellent condition, the various rolling mills having had one of the best seasons in their history.

TRADE WITH WEST INDIES.

Mr. Jacob Jesurum, the British Consul at Curacoa, Danish West Indies, has been in Montreal and Toronto for some time making arrangements to have Canadian firms represented in that country. He received a great deal of help in his mission from the Canadian Manufacturers' Association. The Montreal firms which will now have a business connection with the Danish West Indies are: The Thomas Davidson Manufacturing Co., the Eclipse Acetylene Gas Co., Montreal Suspender and Umbrella Manufacturing Co., and the Canadian Preserved Butter Co. Toronto firms include Dunlop Tire Co., Francis-Frost Co., Heintzman & Co., Pugsley, Dingham & Co., Toronto Carpet Manufacturing Co., Eckhardt Casket Co., and A. R. Clarke & Co.

Mr. Jesurum has been inquiring into the manufactures of Canada, and has come to the conclusion that there are great opportunities to work up a large trade with the Danish West Indies.

CHAT.

THE Anchor Line Steamship Co., will build another trans-Atlantic steamer, like the ss. Columbia, of 10,000 tons burden. The new vessel will be ready by 1904.

N. D. McKinnon has started a new store at Weyburn, N.W.T.

Fire destroyed $26,000 worth of property at Bathurst, N.B.

Wm. Mackay, the millionaire lumberman, of Ottawa, is dead.

The Rathbun Company have five shanties operating on the line of the Central Ontario Railway.

Oliver Seibert has left Berlin for Guelph, Ont., where he becomes foreman of The Taylor-Forbes Co.

The Macadamite Metal Company, of St. John, N.B., may take the building of the old Ossekeag Stamping Co., at Hampton.

Campbell & Halstead have purchased option on the mineral paint deposit found some time ago by ex-Mayor McCarthy at Rat Portage.

The Revenue of the Dominion Customs for the last five months was $15,058,746, an increase of $1,763,069 over the same period last year.

D. A. Cameron, of the General Passenger Department of the C.P.R., will leave Winnipeg shortly for Yokohama, where he will enter business.

The Dominion Wrought Iron Wheel Co., of Toronto, have decided to build a factory at Orillia, Ont., for the manufacture of wheels for wagons, traction engines, etc.

Railroaders are in force around Strathcona, Alta. Representatives of the G. T. R. and C. P. R. surveyors are there, and the 2nd vice-president of the C. N. R. is expected shortly.

I. W. Housser, cashier of The Massey Harris Co., at Winnipeg, was presented with a solitaire ring and a complimentary address on the occasion of his departure for Calgary, where he assumes the management of the Alberta business of the company.

The British Columbia Lumber and Shingle Manufacturers' Association have decided to advance the price of shingles 10c. per 1,000 on April 1 next. The reason for the increase is that wages have advanced 25 per cent., logs, 40 per cent., and insurance rates have also been increased.

Gauthier, Cote & Freres, general merchants, St. Cyrille de Wendover, Que., have registered.

MACHINERY AND ELECTRICAL SUPPLY DEPARTMENT

MACHINERY AND ELECTRICAL NOTES.

An Act to incorporate The Dominion Institute of Amalgamated Engineering will be sought for at the coming session of Parliament.

The machinery for the new Copp foundry at Fort William will be installed during the winter months.

A large chucking lathe has been shipped to The Pillow-Hersey Manufacturing Co., Montreal, by H. W. Petrie, Toronto.

An Act to incorporate the Dominion Institute of Amalgamated Engineering will be sought for at the coming session of Parliament.

The C.P.R. have decided to double their works at Toronto Junction, says Master Mechanic Sprague. They now employ 500 hands.

The Intercolonial Railway has lost one of its most valued construction mechanics, by the death of George S. Allan, of the Halifax shops.

Essex ratepayers on Monday carried a by-law granting certain concessions to an automobile company, which intends to establish works there.

The plant of The Stratford Peat Fuel Company, near Stratford, Ont., was destroyed by fire on Friday night. The engine, boiler and press were totally wrecked.

A new pulp mill is being erected at St. George, N.B. It will be 65 x 120 feet, exclusive of the boiler house, and will be lighted by electricity and be steam heated.

The Nott Bicycle Factory, which some time ago passed into the possession of the St. Catharines Council, has been sold to The Lamb Wire Fence Co., for $10,000.

Haley & Sons, woodworkers, St. Stephens, N.B., are making large additions and will erect another mill to be run by electrically transmitted power next year.

A 100 H.-P. Wheelock tandem compound engine has been installed by The Brussels Electric Light Company, Brussels, Ont., the engine being procured from H. W. Petrie, Toronto.

The Ross-McLaren sawmills, about three miles above New Westminster, have been bought by a syndicate represented by L. W. David, of the Monarch Lumber Mills, Blaine, Wash. The mills will be equipped to employ about 200 hands.

A 19 x 44-in. No. 2 Petrie boiler, made especially for heating and cooking purposes, has been installed by Mr. Dart, of Toronto. The large stock of these boilers shown are attracting much attention at present in H. W. Petrie's warehouse, 141-145 Front street, Toronto.

M. E. Bermingham, of the Kingston Locomotive Works, has brought out 61 skilled mechanics from Germany. It is intended to put a night force and day force at wark in the locomotive works, thus doubling the output, hence the necessity of importing the German mechanics.

The Consumers' Gas Company, of Toronto is adding to its plant another water-gas installation which will produce 800,000 cubic feet of gas per day, thus increasing the capacity of the present works by about 20 per cent. This extension will be completed by the middle of the present month.

An experiment of interest to manufacturers has been tried on the Michigan Central Railway. A smoke consumer is situated near the firebox, and is so arranged that with proper firing no smoke issues from the stack, but is used again for fuel. This little concern, it is stated, has proven to be a very economical feature, and if the results are satisfactory after a thorough test, they will be used on all engines.

A No. 5 "Jewel" automatic engine was shipped to G. W. Peteman, Bond Head, Ont., by H. W. Petrie, Toronto, this week. This engine is fast becoming a favorite means of developing power for electric plants, and, in fact, for any purpose that a high speed, thoroughly reliable automatic engine can be used for. By reason of its being perfectly governed, the governor acting directly on the balanced valve, its speed is always constant.

TRACTION LINES TO BE MERGED

The nine large New York traction lines, with a total capital of $217,000,000 and a track mileage of 969.09, are to be merged. These lines last year carried a total of 1,077,629,600 passengers, of whom 422,000,000 were carried by The Metropolitan Street Railway; 303,097,000 by The Brooklyn Rapid Transit, and 223,000,000 by The Manhattan.

ELECTRICAL LIGHTING IN CANADA.

THE annual report of George Johnson, Dominion Statisticcian, shows that electric lighting, especially of incandescent lights is steadily growing in Canada. The number of arc lights used in the Dominion has increased from 10,389 in 1898 to 12,884 in 1902, and of incandescent lights, from 461,615 in 1898 to 995,056 in 1902. Reckoning each arc lamp as equal to ten incandescents, the use of electricity as a light-giver has developed from 565,505 lamps in 1898 and 943,676 in 1901 to 1,123,896 in 1902.

Out of the total of 312 companies, Ontario has 195, or 62½ per cent. As the proportion of Ontario's population is 40.6, it is plain that the Province has adopted the electric light to a greater extent than the other Provinces. In 110 Ontario cities, towns and villages electricity is used for lighting, 20 of the municipalities owning their own plants.

Of the cities Montreal leads in the use of electricity, having 2,474 arc and 184,978 incandescents; Toronto has 1,672 arcs and 100,000 incandescents; Ottawa has slightly more than Quebec, having 650 arcs and 93,207 incandescents, compared with Quebec's total of 607 arcs and 80,000 incandescents. Hamilton follows with 606 arcs and 33,058 incandescents, with London in sixth place with 351 arcs and 20,000 of the smaller lights.

SALE OF ELECTRICAL WORKS.

The attention of machinists and electricians is directed to the advertisement in this issue of the sale of the assets and business of The Gee Electrical Engineering Co., Limited, 11 Colborne street, Toronto, by tender up to noon, December 9, 1902. Persons desiring to tender may see the plant and stock at the premises. As there is about $9,000 worth of plant, etc., there will likely be much that would be worth purchasing.

INSURANCE GOES UP.

An extra fire insurance rate will be imposed shortly upon the storage of automobiles run by gasoline engines. This decision was reached by the Toronto branch of the Canadian Fire Underwriters' Association at their regular monthly meeting. The extra rate will be charged subject to a guarantee in the policy that the reservoirs shall be filled in daylight and that no artificial light or fire of any kind be allowed on the premises. The application of the extra rate has been left in the hands of the secretary of special ratings.

BOILER-ROOM TALK.

By "Old Bill" the engineer to his striker "Jake."

"GET down off that box, Jake, and wheel another barrel of coal on to the scales. Did I ever tell you how we come to weigh our coal? Well, one day a slick-looking young fellar showed up, saying he was from The Fairbanks Company's office, and wanted to know what kind of valves we was using. I told him near as I could, for it was a tough question. We had so many different kinds. The fellar had some sample valves with him, and after speakin' his little piece to me, said he'd like to see the superintendent. I showed him up and the old man, who wasn't feelin' very well that day, just glared at him over his glasses, and sez, 'Well, what do you want?' The feller took his medicine like a little major, and sez he had been out in the boiler room talkin' over the question of valves with me, and while there he had been surprised at the way my striker was pushin' the coal into the furnace. The old man said he did not see what business it was of his, or how he was going to help matters any.

"That last remark was what the feller had been lookin' for, and he just sailed right in and gave the old man a good talk on the amount of coal it took to run our plant. When he finished, the superintendent was lookin' interested, and I was about the maddest man you ever seen, to think of a young feller coming up from the city and tellin' me how much coal it ought to take to do my work.

"When the old man see I was mad he was all the more interested, and the outcome of the whole matter was, that the feller called off an order for those Fairbanks' coal scales and an invitation from the boss to call again when they was set up, and see how I was operatin'.

"He wasn't long in making his second call. These agents usually come often enough; and by that time I was gettin' interested myself, and was tryin' to see how little coal I could use in a day and keep up steam.

"The feller gave me a pleasant 'Howdo,' and although I was still feelin' a little frosty, I kind o' wanted to see what he would do and have to say next. I gave him one of those social handshakes which a 'floater' gets when he is introduced to a successful politician, after election, and he started in. He sez: 'Let's see you stoke the fire!'

"So I grabbed my favorite shovel and made the coal fly, hopin' he would notice what a clean swing I made and how nicely I scattered the coal over the grate. I had always thought I could beat the earth at this trick, and that if I had the chance could sow grass-seed off the edge of a coal shovel so even that when it come up you would think the lot was turfed down by hand.

"Well, the feller sez, 'That ain't the right way to stoke that boiler,' and I was mad again. But he didn't seem to notice my feelin's and sez—'Pile the coal up in the front end of the firebox, and when it cokes push it back.'

"I tried his way, and although it took a little more of my time from reading the daily papers and playin' cards, I have stuck to it ever since. Say, we saved the cost of those scales in six months, and the old man was so tickled that he won't even order a bit of waste without its from The Fairbanks Company.

"You know, Bill, over at the power plant—he was tellin' me about the hopper scale Fairbanks are putting in for him. The scale is built around the hopper that holds five tons, and the hull thing's hung inside the sidewalk. If we had more head room, we could have put one in here. Strange, these architect fellers never seems to think of scales when they make the plans.

"There are good men travelling for that company, who have helped me out from some hard problems since then, and although they almost always work the boss for a nice order, some way or other, usin' their goods has saved us a lot of money and trouble.

"Hurry up with that coal, Jake, and I will tell you later on how I come to pull out all the valves in this plant and used Fairbanks instead."

OIL POPULAR AS STEAMSHIP FUEL.

Oil is now being used on nearly all the large steamers plying between San Francisco and the Orient. It is reported to cost less than half as much as coal, and so much of it can be taken in the bunkers of a steamer that no fuel stations are needed along the voyage. From three to four days can be cut off the round trip between San Francisco and the Far East, and freight rates have dropped to such a low point that the coal-using ships cannot compete. It is said that three million dollars' worth of ships on the Pacific, in the coal-carrying trade, have had to change their business within the last two years.

Germany is also experimenting with oil as fuel. It is being used as an auxiliary fuel on the China station, and the German steamship companies now have six steamships that burn nothing else. No less than 30 regular oil-supplying stations for ships already exist and the number is rapidly increasing. It has been calculated that the use of oil fuel increases the radius of action of a warship by 50 per cent. weight for weight, and by nearly 90 per cent. if all the coal space can be utilized for oil-storage.

NEW FIREPROOF MATERIAL.

A new fireproof material, or rather a new combination of fireproof substances, is described by the London correspondent of The Scientific American. It is the invention of a Russian officer, who has named it "uralite," from the mountain range where its chief constituent, asbestos, is found in large quantities. The asbestos is ground to a fine pulp, and pressed into sheets, which are glued together and saturated with soluble glass. The material thus obtained, which can be treated like wood, is waterproof, is not affected by climate, and is an electric insulator, besides being twice as strong as Portland cement, and hence valuable for floors and ceilings. The price is about 7c. per square foot.

JUDICIAL SALE

OF THE

Assets and Business of the

Gee Electrical Engineering Company,

Limited.

Sealed tenders will be received, addressed to the Master-in-Ordinary, Osgoode Hall, Toronto, and marked "Tenders in the Gee Electrical Engineering Company, Limited," up to 12 o'clock noon of the 9th day of December, 1902, for the purchase of the following assets of the said company, the business of which is now being continued by the Liquidator, that is to say:

1. Plant—Machinery	$5,450 00	
" Tools, Pulleys, Belting, Patterns, etc	3,046 80	
	$8,496 80	
Subject to liens for purchase money	564 79	
		$7,932 01
2. Merchandise—(a) Motors and Dynamos	$4,366 00	
Merchandise - (b) Motors and Dynamos, unfinished	1,630 00	
Merchandise—(c) Chandeliers	239 23	
		$6,235 23
3. Supplies		1,980 79
4. Shop Fittings and Furniture		971 50

The stock and stock sheets and detailed schedule of the machinery, with the amounts due for liens, can be seen at the premises, No. 11 Colborne Street, Toronto, or upon application to the Liquidator, at his office, 33 Scott St., Toronto.

Terms of Sale:—Ten per cent. cash; balance in equal portions in two or four months, with interest at seven per cent., secured to the satisfaction of the Liquidator, but in the event of the assets not being sold en bloc, but in portions or lots, the terms of sale shall be ten per cent. cash, balance in one month, with interest at seven per cent., secured to the satisfaction of the Liquidator.

Tenders will be opened at the office of the Master-in-Ordinary, Osgoode Hall, Toronto, at 12 o'clock noon, on the 9th day of December, 1902, when all tenderers are requested to be present.

The tenders must be accompanied by a marked cheque, payable to the Liquidator, for ten per cent. of the amount of tender, which will be returned if the tender is not accepted, and each tenderer shall state in his tender how much he will give for each group or lot over and above the lien thereon. Should the amount of said lien in group one be varied before the sale a certificate setting out such variation will be read by the Master, in the presence of the parties tendering, before the tenders are opened.

Lot two above mentioned is subject to the payment by the purchaser to the Liquidator of all sums expended by the Liquidator in the completion of part (b) of said lot. Particulars of such expenditure may be procured from the Liquidator, and will be read by the Master in the presence of the parties tendering before the tenders are opened.

The highest or any tender not necessarily accepted. The other conditions of sale are the standing conditions of court as far as applicable.

For further particulars and conditions of sale application may be made to the Liquidator or his Solicitor.

Dated at Toronto, this 21st day of November, 1902.

NEIL M'LEAN, Chief Clerk, M.O.
E. R. C. CLARKSON, Liquidator.

W. M. DOUGLAS, Solicitor for Liquidator, 70 Home Life.

PAINT, OIL AND BRUSH TRADES

MAKING CASTOR OIL.

CASTOR OIL is made principally in California, Italy, Mexico and India, but most extensively in California.

There are two distinct processes of extracting the oil from the seed, i.e., expression and decoction. While the latter process is adopted in Italy and India, the Californian manufacturers and most of the Mexican manufacturers obtain the oil in the following manner:

After gathering the seeds in the fall of the year they are placed in drying furnaces for an hour or so for a sufficient time to soften the seeds, as the greater percentage of the oil contained in a seed can be obtained when the seed is soft. After they have been removed from the dryer they are placed in the press, similar to a cider press, and the seeds are crushed. The oil runs into a large bowl directly beneath this press and is mixed with about an equal portion of water and boiled for one and one-half or two hours —thus precipitating the albumen and other impurities. When cool there will be a thin scum on top which is skimmed off, the water and oil are then separated, sometimes by running the water off and sometimes by "baling" out the oil, which is placed in the "sun tanks"— (tanks of metal exposed to the sun) where it bleaches for eight or ten hours and is then removed to the store-room where it is placed in barrels, carboys, etc., ready for the market. Some of the trees in California reach a height of 50 feet, and the seeds from one tree contain as much as 15 gallons of pure oil.

In more northern latitudes the castor-oil plant rarely grows higher than three feet and is used for ornamental purposes, while in warmer countries it becomes a tree.—Porto Rico Trade.

AMERICAN STANDARD WICKS.

All dealers in refined illuminating oils receive frequent complaints of the quality of oil, which complaints, if thoroughly investigated, would often prove to be due to the use of wicks of inferior quality. To overcome this source of trouble The Standard Oil Company, Toronto, have spent considerable thought and money to produce a wick which would give satisfaction. This wick is now being introduced to the Canadian trade by The Queen City Oil Company, Toronto, and as it is of pure quality and oil draws well through it the demand for it has justified the time and expense spent on its production. The wick is called the "American Standard Wick."

A REDUCTION IN PAINT BRUSHES.

A circular has recently been sent to the trade announcing a reduction in the price of brushes by The United Factories, Limited. The new catalogue is in the printer's hands and will be mailed shortly. This will show prices to have been generally revised and lowered, so the trade should make it a point to secure a copy of the new list. The reductions have been made in brushes in spite of the fact that the tendency of bristles is upward and the probability that an advance will have to be again made in the spring.

BROOM CORN STEADY IN VALUE.

"There are some inferior grades of broom corn offering at reduced prices, but it is altogether unsatisfactory stuff, red, crooked and seedy, of a quality we wouldn't buy," said E. C. Boeckh, of The United Factories, Limited, on Thursday. "The better grades of broom corn, however, remain quite stiff and the prices of brooms are likely to be well maintained in consequence."

AN ATTRACTIVE WAREHOUSE.

THE improvements to the warehouse and show-rooms of The United Factories, Limited, have been completed, the result being one of the most attractive and commodious warehouses in Toronto. As one enters the premises the arrangement is seen to be simple and practical. A large corridor runs down the middle of the building with on either side separate offices for the invoice, accountant and sales departments, as well as for the president, E. C. Boeckh, and the secretary-treasurer, A. W. Wills. The compartment divisions are all made of quarter oak and ornamental plate glass, with sliding doors and all other modern conveniences. The show-rooms are at the rear, and as has always been the case, the display of brushes, woodenware, etc., are shown in such a manner as to give buyers a ready and satisfactory examination of them.

The United Factories, Limited, have also opened a new warehouse at 71-73 Dundas street, London, Ont., where a full stock will be carried as is now done in Toronto and Montreal.

GOOD CROP OF FLAXSEED.

The flaxseed crop of Manitoba, where the bulk of this product is grown, has been well sold up and has proved of uniformly good quality. A considerable quantity has been shipped to Ontario during the past few weeks, the price ranging from 98c. to $1.05 per bushel. These prices do not affect the linseed oil market materially, as much flaxseed has to be imported and the market is based on the price of the imported product.

PAINT AND OIL MARKETS.

MONTREAL

CONSIDERABLE business has been done in paris green during the past week, as all the leading jobbing houses are inclined to take advantage of the lowest schedule price at present in force. There are rumors afloat of an attempt to be made to form a combination in the United States on similar lines as were arranged three or four years ago, and if this proves to be correct there will be little or no competition from that market. Linseed oil has been reduced 2c. and turpentine 1c. per gallon. In the primary market both lines are fluctuating considerably, but the general trend of the market has been lower. In the paint trade orders have been coming in more freely during the past week and our prediction in last week's issue in regard to winter business seems even more likely to be filled. We quote:

GROUND WHITE LEAD.—Best brands, Government standard, $5.15 to $5.25; No. 1, $4.77½ to $4.87½; No. 2, $4.40 to $4.50; No. 3, $4.02½ to $4.12½; No. 4, $3.65 to $3.75, all f.o.b. Montreal. Terms, 4 months, or 3 per cent. off for cash in 30 days.

DRY WHITE LEAD.—$5.25 in casks; kegs, $5.50.

DRY WHITE ZINC.—Pure dry, in casks, 6¼c.; in 100-lb. kegs, 6¾c. No. 1 zinc, in casks, 5¼c.; in 100-lb. kegs, 5¾c.

WHITE ZINC (ground in oil)—Pure, 25-lb. irons, 8c.; No. 1, 7c.; No.2, 6c.

PUTTY.—We quote: Bulk, in bbls., $1.90 per 100 lb.; bulk, in less quantity, $2.05; bladders, in bbls., $2.25; bladders, in 100 or 200-lb. kegs or boxes, $2.40; in tins, $2.55 to $2.65; in less than 100-lb. lots, $3 f.o.b. Montreal, Ottawa, Toronto, Hamilton, London and Guelph. Maritime Provinces, 10c. higher, f.o.b. St. John and Halifax.

ORANGE MINERAL.—Casks, 7c.; 100-lb. kegs, 7¼c.; smaller quantities, 8¼c.

WINDOW GLASS.

Send in your specification now and secure good sizes before the assortments get broken up. Large stocks are now arriving, but so are orders, and many good sizes are sent out as fast as they come to hand. Then when arrivals cease, prices generally stiffen up for the winter. Buy now.

STAR, DIAMOND, DOUBLE.

Rolled, Ornamental, Cathedral, and all kinds of glass.

A. RAMSAY & SON

Boeckh's Adjustable Tables Encourage the Buying Habit.

OPERATING:
Boeckh's Toronto Factories.
Bryan's London Factories.
Cane's Newmarket Factories.

UNITED FACTORIES, LIMITED.

Head Office : TORONTO.

MONTREAL BRANCH : 1 and 3 DeBresoles St.

LONDON BRANCH : 71 Dundas St.

RED LEAD.—Genuine red lead, in casks, $4.50 ; in 100-lb. kegs, $4.75 ; in less quantities, $5.75 per 100 lb. No. 1 red lead, casks, $4.25 ; kegs, $4.50, and smaller quantities, $5.50.

LITHARGE.—Ground, casks, 5c. ; less quantities, 5½c.; flake litharge, casks, $5.25 ; smalls, $5.75 per 100 lb.

LINSEED OIL.—Raw, 62c.; boiled, 65c. In 5 to 9 bbls., 1c. less. Terms, net cash in 30 days. Delivered in Ontario, between Montreal and Oshawa, at 2c. per gal. advance.

TURPENTINE.—Single barrels, 75c.; 2 to 4 barrels, 74c. Terms, net cash in 30 days.

SHELLAC VARNISH.—Pure white, $2.35 to $2.45 ; orange, $2.25 to $2.35.

MIXED PAINTS.—$1.20 to $1.45 per gallon.

CASTOR OIL.—8¾ to 9¼c. in wholesale lots, and ½c. additional for small lots.

SEAL OIL.—48 to 50c.

COD OIL.—35 to 37½c.

PARIS GREEN.—Petroleum barrels, 13¼c. per lb.; arsenic kegs, 13½c.; 50 and 100-lb. drums, 14c.; 25-lb. drums, 14½c. ; 1-lb. packages, 15c.; ½-lb. packages, 17c.; 1-lb. tins, 16c.; ½-lb. tins, 18c.

TORONTO.

There is very little movement, so wholesalers are stock-taking and hustling for season's contracts with carriage and implement men. The markets generally are steady, but linseed oil and turpentine continue at the reduction made on Friday last, 2c. per gallon in linseed oil and 1c. per gallon in turpentine. White zinc is 25c. higher in casks. Paris green is receiving considerable attention from the trade, as the development of the system of spraying throughout the Province presages a big season's trade in this line. The opening quotations are given below. We quote:

WHITE LEAD.—Ex-Toronto, pure white lead, $5 to $5.25 ; No. 1, $4.62½ to $4.87½ : No. 2, $4.25 to $4.50 ; No. 3, $3.87½ to $4.12½.; No. 4, $3.50 to $3.75 in packages of 25-lb. and upwards ; ½c. per lb. extra will be charged for 12½-lb. pkgs.; genuine dry white lead in casks, $5.02½.

RED LEAD.—Genuine, in casks of 560 lb., $4.50 to $4.75; ditto, in kegs of 100 lb., $5; No. 1, in casks of 560 lb., $3.75 to $4; ditto, kegs of 100 lb., $4.25.

LITHARGE.—Genuine, 6 to 6½c.

WHITE ZINC.—Genuine, French V.M., in casks, $6.25; Lehigh, in casks, $6 to $6.25.

SHINGLE STAIN.—In 5-gallon lots, 60 to 75c. per gallon.

PARIS WHITE.—90c. to $1 per 100 lb.

WHITING.—65c. per 100 lb. ; Gilders' whiting, 80c.

GUM SHELLAC.—In cases, 35c. ; in less than cases, 40c. per lb.

LIQUID SHELLAC.—Pure orange, in bbls., $2.25 to $2.35 ; white, $2.35 to $2.45 per gal. ; in less quantities, 10c. extra.

GLUES.—Broken sheet, in 200-lb. bbls., 8½c. per lb.; cabinet glue, in bbls., 12c.; emery glue, in bbls., 17½c.; bookbinders', ground, 10½c.; finest American, white, 19c.; No. 1 American white, 15c. per lb.

PUTTY.—Bladders, in barrels, $2.25 ; bladders, in 100-lb. kegs, $2.40 ; bulk in bbls., $1.90 ; bulk, less than bbls. and up to 100 lb., $2.05 ; bladders, bulk or tins, less than 100 lb., $2.90.

PARIS GREEN.—Petroleum bbls., 13¼c. per lb.; arsenic kegs, 13½c.; 50 and 100-lb. drums, 14c.; 25-lb. drums, 14½c.; 1-lb. packages, 15c.; ½-lb. packages, 17c.; 1-lb. tins, 16c.; ½-lb. tins, 18c.

PLASTER PARIS.—New Brunswick, $2 per barrel.

PUMICE STONE.—Powdered, $2.50 per cwt. in bbls. and 4 to 5c. per lb. in less quantity ; lump, 10c. in small lots and 8c. in bbls.

LIQUID PAINTS.—Pure, $1.20 to $1.40 per gallon ; No. 1, $1.10 per gallon.

BARN PAINTS.—65 to 70c. per gallon.

CASTOR OIL.—English, in cases, 9 to 9½c. per lb. and 10 to 10½c. for single tins.

LINSEED OIL.—Raw, 1 to 2 bbls., 63c.; boiled, 66c. ; 3 to 5 barrels, raw, 62c.; boiled, 65c.; 6 to 9 barrels, raw, 60c. ; boiled, 63c. delivered. To Toronto, Hamilton and London, 2c. less. All quantities of 10 bbls. and over of linseed oil sold only f.o.b. Toronto, Hamilton, London and Guelph.

TURPENTINE.—Single bbls., 77c.; 2 to 3 bbls., 76c. delivered. Toronto, Hamilton and London, 1c. less. For less quantities than barrels, 5c. per gallon extra will be added, and for 5-gallon packages, 50c. and 10-gallon packages, 80c. will be charged.

GASOLINE AND BENZINE.—We quote: Benzine, 19¼c. and gasoline, ordinary, 21¼c. and engine, 22¼c. f.o.b. Toronto.

WINDOW GLASS.

MONTREAL.

Considerable glass has been moving during the past week and dealers expect good business for the next couple of weeks. There is a slight change in our quotations from last week, which it would be well to make note of. We quote as follows : First break, 50 feet, $2; second, $2.10 for 50 feet; first break, 100 feet, $3.80; second break, $4 ; third break, $4.50; fourth break, $4.75.

TORONTO

The movement of glass keeps active, with the market fairly steady though prices are still open and competition keen. Quotations are : Under 26 in., $4.25 ; 26 to 40 in., $4.65 ; 41 to 50 in., $5.10 ; 51 to 60 in., $5.35 ; 61 to 70 in., $5.75 ; 71 to 80 in., $6.25 ; 81 to 85 in., $7 ; 86 to 90 in., $7.75. Toronto, Hamilton and London. Terms, 4 months, or 3 per cent. 30 days. Discount, 15 per cent.

NOTES.

There is a slight decrease in the price of glass.

Several orders for paints for future delivery have been booked during the past week.

Louis A. Robitaille, agent and importer, Quebec, has filed a declaration that he intends to carry on business at Quebec as merchant, importer and manufacturer of paints, oils, etc., under the firm name of The Quebec Oil Company, and that he is the only member of the above firm.

THE OFFICE

DEVOTED TO THE OFFICE STAFF OF BUSINESS ESTABLISHMENTS.

"MAKING THE PLACE."

IN times of great political excitement a motion to "suspend rules" is in order. In time of stress, when a young man is seeking to earn a livelihood, we suggest that he suspend the rule of looking about for a position and see what he can do to fill a need unknown or unrecognized.

Where a definite routine of labor is involved it is easy to secure help, and those positions are usually filled, with a waiting list behind each. But there are labors to be performed, work to be done, skill of hands or alertness of mind or grasp of some "How" that requires a person of peculiar fitness, but which that person must himself discover and to which he must fit himself.

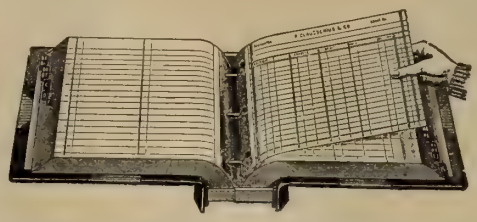
There is room in every factory for more "help" than there is. Every office could find employment for the extraordinary help which is wanted (unconsciously, no doubt) additional to what there is. The young man who is hunting for a position had better give up his quest and see if he can't make place for himself where his peculiar manner of doing things, or fitness for certain operations, or talent for creating, may find useful application. To such we would say, go to a merchant or manufacturer or manager and show him where you fit into his affairs, wherein you can serve him to his profit, and you won't get anything but an interested hearing. If you go to those same men asking if there is a vacant place, involving known factors or detail or routine, you are quite sure to meet the ready "No." To-day's business genius makes his place and fills it by the very force of his capacity to do something better or differently from others (which, not infrequently, is all that is required to make it better) and to point out just where he could step in and fit, he will secure a speedy recognition and success will follow as surely as day follows night. Every man knows what he wants, but every man doesn't know what others want. Learn that and meet the demand.

MISDIRECTED MAIL MATTER.

Out of an annual total of four thousand million of pieces of mail matter sent in Great Britain, ten millions were not delivered owing to defective addresses. The loss incident to these millions of errors would sustain a hospital for broken promises. Not merely is a two-cent stamp wasted when a letter goes astray, but we know the widespread collateral losses often involved even in a single case of non-delivery. Concentrated attention to the moment's work would prevent most of the waste inclusive under misdirected mail; and it seems a pity that an instant's mind wandering, or the quick carelessness of a wobbling pen should be permitted to do so much harm.

OFFICE ACCESSORIES.

Hart & Riddell, manufacturing stationers, Wellington street, Toronto, are introducing the Opalla Loose-Leaf Ledgers. The cut below shows the new office device



unlocked ready for removal or insertion of sheets. The Opalla Loose-Leaf Ledger works easier, looks better, lasts longer and costs less than any other expanding ledger.

Its object is to eliminate all inactive, closed or dead accounts, transferring them to a transfer ledger where sheets can be kept in their same relative position ready for reference at all times, leaving the current ledger free from all except active accounts.

In the loose-leaf ledger the account is always under the proper tab, as the index is distributed through the entire ledger in the proper order, saving time. The insertion and removal of its sheets makes of the loose leaves a perpetual ledger.

UTILITY OF WANT BOOK.

How many dealers are there who keep a "Want Book?" A want book is practically a ledger made up from the stock account and shows at a glance what may be needed. Dealers frequently fall into a habit, and a very careless one it is, of waiting until a traveller comes along, and then going over his stock in a listless sort of a way with the object of finding out what is needed. What they need most of all is a record of what they want or are likely to want at any given date. If goods in any line run low, or there is apt to be a demand for them in excess of present supplies, jot the item down on the book and see that they are ordered at the first opportunity. Don't wait for the traveller to point out your necessities, although he is a very valuable assistant in your line of business at times, and is always worth cultivating for the knowledge that's in him, but use the book as a sort of automatic memory and look into it at regular intervals. No one can be expected to remember all the daily wants that come up for filling.

ABOUT OUR "WANT COLUMN."

We have every disposition to aid such of our friends as happen to be seeking positions. Many employers are reading our papers and we consider we can best serve all concerned by inserting advertisements of "Situations Wanted" under such headings. We are doing this and here call particular attention to the fact, believing that the wanted and wanting may come together to mutual advantage if they will use the columns of our magazines for their purposes.

To those who wish to employ office help our columns offer opportunities to reach a very large audience of interested, intelligent workers.

If you are buying general publicity, of if you wish to place your goods before every class of business men through a medium which brings immediate returns, "The Office" is the place for your advertisement.

It points the way to the placing of your story to more than 25,000 thrifty and progressive business men in prosperous sections each month at a rate much lower than is offered by any other similar paper in Canada. Business men line up, and we will show you what we can do for you!

The Right Hand of the Sales Department.

From time to time the Print Shop of St. Catharines has issued a little magazine known as "Impressions" advocating good printing and advertising.

It has met with so much success that we have decided to issue it every month and embody in its table of contents each issue special features by experts on the various phases of advertising; for instance, in the January number will be found:

Cover design by Gatchel & Manning, of Philadelphia.

The Follow Up System for Advertisers by J. B. Hendrickson, the card index expert of Rochester. To the advertiser who is unacquainted with this plan this article is worth many times the subscription price. It contains information that has cost a number of firms hundreds of dollars to find out.

A Criticism of Trade Paper Advertising by Lillian Gertrude Keyes, of New York. Miss Keyes, who conducts the campaign of advertising for the Semi-Ready Clothing Company is certainly an authority whose articles will be of great value to all advertisers.

As I See It by E. St. Elmo Lewis, of Philadelphia. A great many of you have "asked Lewis about it," and you found his advice sound.

All of which should prove to be a wonderful help to your sales department.

When you consider that this publication is issued by the Print Shop, whose work as printers of De Luxe editions of advertising is so well known, it is a guarantee that each issue will inspire readers to do better and more profitable work along advertising lines.

In fact, do you know where you could spend a dollar to better advantage. Just fill out one of the coupons and send it in.

MARKETS AND MARKET NOTES

QUEBEC MARKETS

Montreal, December 5, 1902.

HARDWARE.

THERE have been few actual changes in prices this week, but an active trade has been doing in most lines, particularly in cutlery and other goods for the Christmas trade. Owing to bad roads, visitors to the market from near country points have been somewhat fewer in number, though the city trade is excellent. Sleigh bells, snow shovels, etc., are moving rapidly. "Enterprise" meat choppers are now discounted at 33 1-3 per cent. off, instead of 30 per cent. No other quotable changes have been made.

BARB WIRE.—There is nothing doing in this line and the price remains at $2.90 per 100-lb. keg f.o.b. Montreal, and $2.55 f.o.b. Cleveland.

GALVANIZED WIRE.—Trade continues quiet in this wire and there is nothing of importance to report. Our quotations are now as follows : Nos. 6, 7 and 8 gauge, $3.20 ; No. 9, $2.55 ; No. 10, $3.30 ; No. 11, $3.40 ; No. 12, $2.70 ; No. 13, $2.80 ; No. 14, $3.80 ; No. 15, $4.30 ; No. 16, $4.55 ; No. 17, $4.95 ; No. 18, $5.20. In carlots, f. o. b. Cleveland, the prices are : No. 9, $2.15 ; No. 12, $2.30 ; No. 13, $2.40, not dutiable. No. 10, $2.20 ; No. 11, $2.25 ; No. 14, $2.50 ; No. 15, $2.95 ; No. 16, $3.05, dutiable. In less than carlots, 12½c. per 100 lb. extra is charged.

SMOOTH STEEL WIRE.—The demand is still light this week. Quotations are as follows : Bright and annealed, $2.60 per 100 lb. f. o. b. Montreal, Toronto, Halifax, London, Hamilton and St. John. Net extras per 100 lb. are now as follows : Coppered wire, 60c.; tinned wire, $2 ; oiling, 10c.; spring wire, $1.25 ; best steel wire, 75c.; bright soft drawn, 15c.; special hay-baling wire, 30c.

FINE WIRE.—There is only a small amount of business doing this week. The discount on fine wire is 25 per cent. with the following net extras: 1 and 2-lb. hanks, 25c. per 100 lb.; ½-lb. hanks, 37½c. and ¼-lb. hanks, 50c.

BRASS AND COPPER WIRE.—There is no change and no improvement in the demand. The discount is 62½ per cent.

FENCE STAPLES.—There is very little demand for staples. No quotable change is reported and galvanized sells at $3 per 100-lb. keg; bright at $2.80 per 100-lb. keg; 25 and 50-lb. packages, 25c. extra.

WIRE NAILS.—A few orders have been received this week, but the market on the whole is quiet at unchanged prices. We quote as follows: $2.55 per keg for small lots and $2.50 in carlots, f.o.b. Montreal, London, Hamilton, Toronto, Gananoque, Brantford, Windsor, Ont., St. John and Halifax.

CUT NAILS.—The market is quiet and has developed no new feature. The price per keg, in small lots, is $2.45 and in carlots, $2.40.

HORSE NAILS.—There is still a good demand for horse nails and the market is active. No changes have been made in prices, and our quotations are as follows : "C" brand, 40, 10 and 7½ per cent. off; on "M" brand, "Oval," 57½ per cent.; "New City," 57½ per cent.; "New Countersunk," 65 per cent.; "Monarch," 65 per cent.; "Peerless," 50 and 7½ per cent.

HORSESHOES.—These are moving out well. Prices are unchanged, and we quote : Iron shoes, light and medium, pattern, No. 2 and larger, $3.35 ; No. 1 and smaller, $3.60 ; snow pattern, No. 2 and larger, $3.60 ; No. 1 and smaller, $3.85 ; X L steel shoes, new light pattern, sizes 1 to 5, No. 2 and larger, $3.45 ; No. 1 and smaller, $3.70 ; featherweight, all sizes, 0 to 4, $5 ; toe weight, all sizes, 1 to 4, $6.25. Shoes, more than one size in a keg, 10c. per keg extra. F.o.b. Montreal only.

RIVETS AND BURRS.—The demand is still light for these. Discounts are : Best iron rivets, section carriage, and wagon box, black rivets, tinned do., coopers' rivets and tinned swedes rivets, 60 and

DECORATED TEA POT.

DECORATED COFFEE POT.

Do You Get Your Share of the Money Spent at Xmas Time?

We have novelties in Decorated Enamelled Ware which make good, sensible gifts, sell well and give the dealers a wide margin of profit.

The accompanying engravings give only a faint idea of the rich hand work on these goods. Better illustrations are given on the colored pages of our Tinware Catalogue.

All lines enamelled in two colors (dark blue and white), and extra decorated for Xmas trade.

10 per cent.; swedes iron burrs are quoted at 55 per cent. off; copper rivets, with the usual proportion of burrs, 45 per cent. off and coppered iron rivets and burrs, in 5-lb. carton boxes are quoted at 60 and 10 per cent. off list.

BOLTS.—There has been no improvement in the demand, which is still small. We quote the discounts as follows: Norway carriage bolts, 55 per cent.; common, 50 per cent; full square carriage bolts, 55 per cent.; machine bolts. 50 and 5 per cent.; coach screws, 66 2-3 per cent.; sleighshoe bolts, 65 and 5 per cent.; blank bolts, 50 and 5 per cent.; bolt ends, 50 and 5 per cent.; plough bolts, 50 and 5 per cent. To any retailer an extra discount of 10 per cent. is allowed. Tire bolts, 67½ per cent.; stove bolts, 67½ per cent. Nuts, square, 3¼c. per lb. off list; hexagon nuts, 3¾c. per lb. off list. To all retailers an extra discount of ½c. per lb. is allowed.

SCREWS.—Business is rather quiet this week and the market is without new feature. The discounts are as follows: Round head bright, 82½ and 10 per cent.; flat head bright, 87½ and 10 per cent.; brass, round heads, 75 and 10 per cent.; brass, flat heads, 80 and 10 per cent.

CORDAGE.—The market is quiet and unchanged. We quote: Manila, 14c.; British manila, 12c.; sisal, 12c.; lathyarn, 11c.

BUILDING PAPER.—Some jobbers report a fair demand for building paper, and our quotations are still as follows: Tarred felt, $1.70 per 100 lb.; 2-ply, ready roofing, 85c. per roll; 3-ply, $1.10 per roll; carpet felt, $2.25 per 100 lb.; dry sheathing, 35c. per roll; tar sheathing, 45c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll; O K and I X L, 65c. per roll; heavy straw sheathing, $30 per ton; slaters' felt, 60c. per roll.

SCREEN WIRE CLOTH.—Trade is dull and the price is $1.40 per 100 square feet.

FIREBRICKS.—But little business has transpired in firebricks. English sell at $16 to $22 and Scotch at $17 to $22 per 1,000.

CEMENT.—There is a fairly good trade doing. We quote: Canadian cement, $1.90 to $2.25; German, $2.20 to $2.30; English, $2.15 to $2.25; Belgian, $1.70 to $1.95 per bbl., ex-wharf, and American, $2.10 to $2.20 ex-cars.

SKATES.—There is still a good movement in all lines of skates. We quote as follow: Halifax pattern, 36c. per pair; nickel-plated, 65c.; ladies' nickel-plated, 60c.; ladies' concave nickel-plated, $1.35 plain hockey, 27c. to $1.35; nickel-plated hockey, 60c. to $2.50; double-end hockey, $1.50 to $3. Skate straps, 35c. to $1.35.

HOCKEY STICKS.—Demand for these is very brisk. Quotations are: Best second growth, goal keepers', $4.20 per doz.; ash, $2.90; elm, $2.25; boys' elm, $1.10; common, 90c. Regulation pucks, $1.50 per dozen.

SNOW SHOVELS.—These are moving out rapidly. No quotable change has been made, and we quote: "Habitant," $2.25 to $2.40; "Victor," 30 per cent. off; steel railroad shovels, 48 and 5 per cent. off.

FIRE SHOVELS.—Jobbers report an active demand for fire shovels this week, and our quotations are now as follows: No. 70, 38½ to 40c. per dozen; No. 55, 55 to 60c.; No. 57, 82½ to 90c.; No. 60 82½ to 90c.; No. 65, $1.37½ to $1.45; No. 80, 50 to 55c.; "Duplex," No. 7, $1.21; No. 9, $1.52; No. 11, $1.82.

COAL HODS.—These are now moving forward rapidly, and the market is ac-

tive. The list prices are quoted as follows: Japanned, 16-in., $4.50 per doz.; 17-in., $4.80; 18-in., $5.10; with gold band, 17-in., $5.10; 18-in., $5.40. Galvanized, 16-in., $6.20; 17-in., $6.50; 18-in., $6.80 per doz. The discount is 45 per cent.

LANTERNS.—A good business is doing in lanterns. Prices are unchanged. We quote: Tilt, lift or hinge, No. 0, $4 per dozen ; Cold Blast, $7 per dozen ; dashboard, No. 0. $5.75 per dozen ; cold-blast dashboard, $9 per dozen. Extras are as follows : Japanning, 50c. per dozen ; copper-plating cold blast, $2 per dozen. The prices quoted are f.o.b. London, Hamilton, Toronto, Belleville, Kingston and Montreal.

METALS.

The local metal market shows no change of importance this week. Pig iron has continued to stiffen somewhat in price, and tinplates on the English market have shown some strength. Steel on the foreign markets is in better demand, and business for prompt delivery is active.

BAR IRON.—The market keeps firm under a fairly good inquiry. No further change in price has taken place. Prices are as follows : Merchants' bar, $2; horseshoe iron, $2.25; extra refined, $2.25 and forged iron, $2.20.

BLACK SHEETS.—These are unchanged in price. There is a moderate demand. We quote : 28 gauge, $2.65; 26 gauge. $2.60; 20 to 24 gauge, $2.50 and 8 to 20 gauge, $2.50.

GALVANIZED IRON.—This moves out fairly well considering the season of the year, and our quotations are as follows : No. 28, Queen's Head, $4.40 ; Apollo, 10¾-oz., $4.40 ; Fleur de Lis, $4.15; Comet, $4.10; "Bell" brand, $4.05. For less than case lots 25c. extra is charged.

SOIL PIPE AND FITTINGS.—There is not much doing. Quotations are: Light soil pipe, 3 to 6 inch, 50 per cent.; medium and extra heavy soil pipe, 2 to 6-inch, 60 per cent.; extra heavy soil pipe, 8-inch, 45 per cent.; light fittings, 2 to 6-inch, 50 and 10 per cent.; medium and extra heavy fittings, 2 to 6-inch, 60 per cent.; extra heavy fittings, 8-inch, 45 per cent.

PIG IRON.—Summerlee is now quoted at $24 to $24.50 f.o.b. Montreal. The market continues very firm and is not expected to ease off for some months.

INGOT COPPER.—No change is reported this week. We quote 13c.

INGOT TIN.—Tin is still scarce on this market and prices are firm.

PIG LEAD.—The price is unchanged. A small amount of business has been done. We quote $2.90 in carlots and $3.25 in small lots.

LEAD PIPE.—Composition and waste sell at 8c. and ordinary at 7c. The discount is 37½ per cent.

IRON PIPE.—There is a good demand and the market is fairly active. Prices follow : Standard pipe per 100 feet, in lengths under 19 feet : Black, ¼, $2.40 ; ⅜, $2.65 ; ½, $2.85 ; ¾, $3.65 ; 1-in., $5.20; 1¼, $7.35; 1½, $8.95; 2-in., $12.55 Galvanized, ¼, $3.20 ; ⅜, $3.45 ; ½, $3.85 ; ¾, $5 ; 1-in., $7.20 ; 1¼, $10.05 ; 1½, $12.-20; 2-inch, $16.85. Extra heavy pipe, plain ends, are quoted per 100 feet as follows : Black, ½, $4.20 ; ¾, $5.25 ; 1-in., $7.55 ; 1¼, $10.55 ; 1½, $12.75 ; 2-in., $17.-60. Galvanized, ½, $5.20 ; ¾, $6.65 ; 1-in., $9.55 ; 1¼, $13.25 ; 1½, $16 ; 2-in., $21.90. For threads and couplings 5 per cent. is added.

SAMPLE ROOM, 13 ST. JOHN STREET,
MONTREAL.

TINPLATES.—The English market is reported steadier, and according to some authorities prices show a tendency to stiffen. Locally, cokes are still quoted at $1.25 and charcoals at $4.75 to $5.25.

STEEL.—No further advance is quoted this week in this market and prices are unchanged. Our quotations are as follows: Sleighshoe, $2.10; tire, $2.20; bar, $2.05; spring, $2.85; reeled machinery, $2.75; toecalk, $2.60; machinery (iron finish), $2.10; mild steel, $2.05; square harrow, $2.15.

SHEET STEEL.—There is only a fair trade doing. We quote: Nos. 10 to 20, $2.50; 3-16, $2.50; ¼, 5-16 and ⅜, $2.40.

TOOL STEEL.—There is not much doing. Our quotations are as follows: Black Diamond, 8c.; Sanderson's, 8 to 12c., according to grade; Jessop's, 13c.; Leonard's, 7½c.; Jonas & Colver's, 8 to 15c.; "Air Hardening," 45 to 60c.

CANADA PLATES.—Some demand is experienced for Canada plates, but there is not a great deal of business doing. Quotations are: 52s, $2.70 to $2.80; 60s, $2.85 to $2.90; 75s, $2.80 to $2.85; full polished, $3.75 and galvanized, $4.25 to $4.35; galvanized, 60s, $4.45 to $4.55.

TERNE PLATES.—There is nothing of importance to report on this market, which is quiet at $7.50.

COIL CHAIN.—The movement in chain keeps up. Quotations are as follows: No. 6, 12½c.; No. 5, 10½c.; No. 4, 10c.; No. 3, 9½c.; ¼-in., 7¼c. per lb.; 5-16, $5; 5-16 exact, $5.25; ⅜, $4.25; 7-16, $4.05; ½, $3.95; 9-16, $3.85; ⅝, $3.55; ¾, $3.50; ⅞, $3.45; 1-inch, $3.45. In carload lots an allowance of 10c. is made.

SHEET ZINC.—Trade continues quiet and the price is $5.85 to $6.25.

ANTIMONY.—We quote 10c.

ZINC SPELTER.—There is but little doing. The price is 5c.

SOLDER. A fairly good business is doing. Bar solder sells at 20c. and wire solder at 18c.

RAW FURS.

Offerings of furs this week have continued fair and there is no feature to be noted on the market. Prices are as follows:

	Large	Medi'm	Small	Kitts	Fall Beaver $2.00 to $2.50 per pound.	Spring Beav $3.00 to $3.25 per pound.

SCRAP METALS.

There is no change to report in the market for scrap materials. Machinery scrap is still scarce and firm, and our quotations are as follows: Heavy copper and wire, 9c. per lb.; light copper, 8c.; heavy red brass, 10c.; heavy yellow, 8½c.; light brass, 5c.; lead, 2 to 2¼c.; zinc, 2½ to 2¾c.; iron, No. 1 wrought, $15 to $16; No. 2, $7 per ton; machinery scrap, $16 to $16.50; stove plate, $13; malleable and steel, $6; mixed country rags, 60 to 70c. per 100 lb.; old rubbers, 6½ to 6¾c. per pound.

HIDES.

Prices are unchanged and there is a fair amount of business doing. Prices are as follows: No. 1 hides, 9c.; No. 2, 8c.; No. 3, 7c. Calfskins, 8c. to 10c.; lambskins, 60c.

MARKET NOTES.

Pig iron has advanced.

"Enterprise" meat choppers are 3½ per cent. lower.

"Bell" brand, galvanized iron, is now quoted at $4.05.

ONTARIO MARKETS.

Toronto, December 5, 1902.

HARDWARE.

THE hardware trade has kept up steadily, and, in fact, so far this month the business seems to be even better than it was last month. There is no doubt that December will turn out a good month, with a large demand for skates, fancy sleigh bells, cutlery, scissors, razors and all kinds of table cutlery; ivory and celluloid knives, spoons, plated hollow ware and such lines as are staple for presents of all kinds. A good deal of money is in circulation among the people generally this year, and therefore they ought to buy liberally. The jobbers' stocks of these goods are fairly well assorted. Trade this fall has, in these and other lines, being particularly heavy. There has been an advance in the prices of game traps. Some cutting in prices has been going on and the manufacturers have endeavored to stop it continuing any longer. The jobbers, so far as it is, have been selling on little margin. The discount on "Victoria" traps is now 70 to 75 per cent. There is a scarcity in some of the sizes, as the demand has been heavy.

BARB WIRE.—This market continues quiet. We quote the base price as follows: $2.67½ from Cleveland, and in carlots, 12½c. less. From stock, Toronto, $3.

GALVANIZED WIRE.—There has been no improvement in trade in this line and the prices are unchanged. Our quotations are as follows: Nos. 6, 7 and 8, $3.15 to $3.35 per 100 lb.; No. 9, $2.65 to $2.85; No. 10, $3.20 to $3.40; No. 11, $3.25 to $3.45; No. 12, $2.80 to $3; No.

OUR CATALOGUE

An Encyclopaedia For Builders.

In it you will find full information about all the popular Sheet Metal Building Materials used so universally by up-to-date workers.

If you're not posted, read up our catalogue—it's full of practical information.

You can't cater to the best and biggest building trade without our lines.

When ordering from us you're certain of highest quality, for that's our specialty.

Metallic Roofing Co., Limited

TORONTO. MONTREAL. WINNIPEG.

13, $2.90 to $3.10; No. 14, $3.75 to $3.95; No. 15, $4.30; No. 16, $4.55. Nos. 6 to 9 base from Cleveland are quoted at $2.27½ in less than carlots.

FINE STEEL WIRE.—There is little doing in this line at present. The discount is 25 per cent.

SMOOTH STEEL WIRE.—Trade keeps quiet. We quote: $2.60 per 100 lb. Oiling, 10c.; coppering, 60c. and tinning, $2 per 100 lb extra. Shipping points, Toronto, Hamilton, London and Montreal, with freights equalized on those points.

WIRE NAILS.—There is still a fair number of orders coming forward for wire nails at unchanged prices. Quotations are as follows: $2.50 in carlots and $2.55 in less quantities. The shipping points are Toronto, Hamilton, London, Gananoque and Montreal.

CUT NAILS. Quite a few orders keep coming forward for cut nails. We quote $2.50 per keg.

HORSE NAILS.—A good demand continues for horse nails and the market is steady and unchanged. Discounts are as follows: "C" brand, oval head, 40 and 10 and 7½ per cent.; on "M" brand, 50, 10 and 5 per cent.; "Monarch," 60 2-3 per cent.; "Countersunk" head, 60 per cent.

HORSESHOES.—There is a heavy demand for these. Quotations are as follows: Iron shoes, No. 2 and larger, light, medium and heavy, $3.45; snow shoes, $3.70; light steel shoes, $3.55; featherweight (all sizes), $4.95; iron shoes, No. 1 and smaller, light, medium and heavy (all sizes), $3.70; snow shoes, $4; light steel shoes, $3.80; featherweight (all sizes), $4.95.

SCREWS.—Trade has slackened down a little for screws owing to the drawing near of the end of the year, but the demand is still more than the jobbers can supply. The discounts are quoted as follows: Flat head bright, 87½ and 10 per cent. discount; round head bright, 82½ and 10 per cent.; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.; round head bronze, 65 per cent. and flat head bronze, 70 per cent.

RIVETS AND BURRS.—The market for rivets and burrs is still active. Discounts are: Iron rivets, 60 and 10 per cent. discount; iron burrs, 55 per cent.; copper rivets, with usual proportion of burrs, 45 per cent.; copper burrs alone, 30 and 10 per cent.

BOLTS AND NUTS.—An active market continues for these with a scarcity for the article. Discounts follow: Carriage bolts, common ($1.00 list), 50 per cent.; carriage bolts, full square ($2.40 list), 55 and 10 per cent.; carriage bolts, Norway iron ($3.00 list), 55 and 10 per cent.; machine bolts, all sizes, 50 and 10 per cent.; coach screws, cone points, 66 2-3 and 10 per cent.; elevator shaft and whiffletree bolts, 50 per cent.

SPADES AND SHOVELS.—Not much business is being done in spades and shovels at present. The discount is unchanged at 40 and 5 per cent.

ROPE.—The demand for rope keeps up well. Quotations are as follows: Pure manila, 14c.; British manila, 12c.; sisal, 12c.; lathyarn, single, 11c. and double, 11½c.; sisal bed cord, 3-cord, 48 feet, 65c.; 60 feet, 80c.; 72 feet, 95c. per dozen.

HARVEST TOOLS.—There is not much doing at present in harvest tools. The discount is 60 to 60 and 10 per cent.

LAWN MOWERS.—These are still quiet. We quote: Woodyatt, 12-inch wheels, $7.50; Star, 12-inch wheels, $5.50; Daisy, 12-inch wheels, $4.90; Philadelphia, 10-inch wheels, $6; Ontario, 10-inch wheels, $12.75. The other sizes are in proportion. The discount is 50 per cent.

GREEN WIRE CLOTH.—Trade in this line is slack and the price is unchanged at $1.40 per 100 square feet.

EAVETROUGHING, ETC.—These lines are not moving out quite as freely as they were, and our quotations are as follows: Eavetroughing, 10-inch, per 100 ft., $3.10; conductor pipe, 2-inch, per 100 ft., $3; 3-inch, $4; 4-inch, $5.25; 5-inch, $6.75 and 6-inch, $9.

CUTLERY.—A good active demand is reported for cutlery for the holiday trade.

BUILDING PAPER.—This article is still in good demand. Our quotations are as follows: Dry sheathing, grey or straw, 35c. per roll; tar sheathing, grey or straw, 45c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll.

ASH SIFTERS.—A fair number of orders for ash sifters keep coming forward. We quote $14.40 per gross.

TINWARE AND ENAMELLED WARE.—There keeps up quite a volume of business in tinware. Enamelled ware is quiet.

STOVES, RANGES, ETC.—There is a little falling off in the demand for stoves. The season seems to be about over, but certain lines, however, are still active, such as cooking stoves and base burners. So great has been the demand for all kinds of stoves that even yet some manufacturers have not filled their orders.

SCREEN DOORS, ETC.—No movement of any account is reported in screen doors and windows, and the prices remain unchanged. We quote: Screen doors, common, 2 or 3 panel, walnut stained, 3-in. style, $6.60; stained, yellow or green, $6.80; in natural colors, oil finish, $8.15; 4-in. style, 20c. per dozen extra.

CEMENT.—There is some cement going out, but a great part of the outside work has ceased for the season. Quotations are: Canadian Portland, $2.80 to $3.20; hydraulic, $1.35 per barrel. At the works the prices are $2.50 to $2.70 per bbl.

METALS.

The general metal business keeps up well and the jobbers are satisfied. Sales are being made now in the various lines for delivery extending over the first half of 1903. On the London, Eng., market tin advanced and again declined, and business abroad in this metal is dull and stagnant with consumers. The outside scrap iron markets are quiet and prices are easy despite the fact that repeated rumors were abroad that some dealers were likely to be caught short of the metal.

PIG IRON.—The scarcity of Canadian pig iron continues, the furnaces being short of coke. We quote: $23 for No. 1 and $22.50 for No. 2 at the Canadian furnaces. On track, Toronto, No. 2 Summerlee is quoted at $23.

STEEL BOILER PLATES.—The demand is well maintained. The quotations are steady at $1.80 per 100 lb. in carlots.

STEEL RAILS.—These are firm at $30 per ton for steam railway rails and $36 for electric railway rails.

TOOL STEEL.—The demand for tool steel keeps heavy and the prices are firm. Our quotations are still as follows: "B C" and "Black Diamond," 10 to 11c.; Jessop's, Morton's and Firth's,

FRANKEL BROS.

92 Wellington St., MONTREAL.

116-130 George St., TORONTO.

14c. ; Jonas & Colver's, 8 to 15c.; ditto, "Air Hardening," 30 to 50c.; Chas. Leonards', 8 to 9c. ; Park's "Silver," 12 to 14c.; Park's Special, 15 to 20c.

MILD STEEL.—There continues a scarcity of mild steel and the market is strong. Prices are $2.50 to $3 per 100 ℔. f.o.b. Toronto.

BOILER TUBES.—These are in heavy demand.

SPRING STEEL.—The market for this steel is active. We quote $3 to $3.50 on track, Toronto.

BAR IRON.—This market continues strong. Our quotations are as follows: $2.05 up base. Extras cut to length while rolling: 2 ft. and over, 10c. per 100 ℔., 1 ft. and under 2 ft., 15c.; under 1 ft., 20c.; over 20 ft. by special agreement, according to length and size.

BLACK SHEETS.—For the time of the year there is a good, steady demand for black sheets. Prices are: Common, $3.15 for 28 gauge and dead flat, $2.50 for 26 gauge.

CANADA PLATES.—There is a steady trade being done in Canada plates, and prices are as follows: All dull, $2.90 to $3; half-polished, $2.85 to $3.10, and all-bright, $3.75 to $3.85.

GALVANIZED SHEETS.—The demand has improved for galvanized sheets. We now quote: Queen's Head, $4.50 for 28 gauge; American, $4.40 for 29 gauge; Bell brand, $4.30 for 28 gauge; Gordon Crown, $4.50 for 28 gauge.

TIN.—Trade in this metal is quiet. The outside markets are weak and inactive. We quote $31 to $32 per 100 ℔.

TINPLATES.—These are still in good demand. We quote the base price as follows: Charcoals, $4.75 to $5 and cokes, $4.25 to $4.50 per box.

COPPER.—There has been an improvement in the business in ingot copper during the week. We quote: Ingot copper, $13 per 100 ℔., and sheet copper, $22 to $23.

BRASS.—This metal is unchanged. The discount is 15 per cent.

LEAD.—Pig lead continues quiet. We quote: Pig lead, $3.50 per 100 ℔. and bar lead, $3.75 per 100 ℔.

IRON PIPE.—There is a heavy demand for iron pipe and a scarcity of the same. The prices are firm with an upward tendency. We quote as follows per 100 feet: $\frac{1}{4}$-inch, $2.40; $\frac{3}{8}$-inch, $2.65; $\frac{1}{2}$-inch, $2.85; $\frac{3}{4}$-inch, $3.65; 1-inch, $5.20; $1\frac{1}{4}$-in., $7.35; $1\frac{1}{2}$-in., $8.95; 2-in., $12.55; galvanized, 1-inch, $7.20. Trade discount is 4 per cent. for carlots.

ZINC SPELTER.—The demand for zinc spelter has slightly improved. We quote 5 to 6c. per ℔.

ZINC SHEETS.—These are active. The prices are as follows: Cask lots, $6 to $6.25 and part casks, $6.25 to $6.50.

SOLDER.—This article is unchanged.

ANTIMONY.—There has been a better inquiry for antimony. We quote $9 per 100 ℔.

PETROLEUM.

Prices are $\frac{1}{2}$ to 1c. per gallon higher, and are stiff at the advance. The Union Petroleum Company quote their prices as follows: Lily White, Canadian, 17c. in bbls.; Silver Light, American, 19c. in bbls.; Crystal Spray, water white, American, 20c. in bbls.; Pennoline, best American imported, 22c. in bbls. In bulk, 2c. per gallon less. The Queen City Oil Co. quote their brands in Toronto as below: Sarnia Prime White, 17c.; Sarnia Water White, 19c.; Family Safety, $19\frac{1}{2}$c., in barrels; Pratt's Astral, 19c. in bulk.

HIDES, SKINS AND WOOL.

HIDES.—These are moving out freely. The prices are steady and unchanged. We quote: No. 1 green, 8c.; No. 2 green, 7c.; No. 1 green, steers, $8\frac{1}{2}$c.; No. 2 green, steers, $7\frac{1}{2}$c.; cured, $8\frac{1}{2}$c. to 9c. per ℔.

CALF SKINS.—A fair amount of business is being transacted. We quote: Veal skins, 6 to 14 ℔. inclusive, No. 1, 10c.; No. 2, 8c.; do, 15 to 20 ℔. inclusive, No. 1, 9c.; No. 2, 7c.; deacons (dairies), 60 to 70c. each.

SHEEPSKINS.—These are active and have advanced 10c. We quote 75c.

WOOL.—The market keeps improving. We quote: Fleece wool, 14c. and unwashed wool, $7\frac{1}{2}$c. per ℔.

TALLOW.—The market continues depressed. The demand is light and stocks are accumulating. We quote $6\frac{1}{4}$ to 7c. per ℔.

SEEDS.

There are light offerings of red clover and alsike at outside points. The farmers are commencing to market their alsike more freely. We quote at outside points: Red clover, $6.25 to $6.75; alsike, $6.50 to $7 and timothy, $1.60 to $1.85.

COAL.

The Welsh coal, the arrival of which was noted a week ago, has aroused considerable dissatisfaction, owing to the presence

of a large proportion of slack in its composition. It is selling in a retail way at $8 per ton. Soft coal is steady at $5.50 per ton at international bridges.

OLD MATERIAL.

There is a good business doing, with prices steady and unchanged. We still quote: Heavy copper and wire, 10c. per lb.; light copper, 8 to 8½c.; heavy red brass, 9½c.; heavy yellow brass, 8 to 8½c.; light brass, 5 to 5½c.; lead, 2 to 2½c.; scrap zinc, 3c.; iron, No. 1 wrought, $13 per net ton; No. 2 wrought, $4.50; machinery cast scrap, $15.50 to $16; stave plate, $10; malleable and steel, $6 to $6.50; old rubbers, 6½c. per lb. and country mixed rags, 50c. per 100 lb.

NOVA SCOTIA MARKETS.

Halifax, December 2, 1902.

THE hardware trade has not been so active during the last week as previously, although there is considerable trade in some of the seasonable lines. However, a slack season is now expected, and the various houses will put in their spare time in preparing for the annual stock-taking, which must now be attended to very soon. In reviewing the year's work so far the dealers generally are quite satisfied, and expect that the total volume will exceed last year.

* * *

The trade in building materials, though slackened to a very great extent, has been fair, and a very large trade is still being done in lumberman's supplies, including axes, chains, etc.

* * *

Travellers on their way home for the holiday season brought in considerable volume of orders and also, what is quite as valuable, very encouraging reports of the state of business, and these have a tendency to show that the prospect for next summer's business is very bright. A hopeful, progressive feeling prevails throughout the Province, and considerable building operations are in contemplation, to open up next spring, preparatory orders for which will help trade through the winter season.

* * *

In conversation with a firm which deals largely in milling and mining supplies, we were informed that this has been a very busy season and a heavy business has been done. Here, too, the prospects for trade next season are very encouraging. New mills or mines are being opened up in many new districts, or the work is strongly in contemplation.

* * *

There is no particular change in the cordage situation, except that a little more cutting is being done, it is said, both by the Canadian and the British concerns. One dealer here is of the opinion that it may not be a fact that the English cordage, lately sold direct to the retailers at a largely cut rate, is of a much inferior quality after all. The British roperies, or the principal ones, buy their raw material direct from the producers, which is not the case with the Canadian roperies. This is one advantage the British roperies have, which enabled them to meet the Customs charge in Canada of 25 per cent., and under the preferential tariff they have the advantage of one-third off this, reducing it very materially. This situation will eventually adjust itself, and old prices may be resumed. The agents of the British roperies, will, however, sell direct to the retailers just as long as they are enabled to sell to the wholesalers, who, as members of the association, are debarred from buying from them, or else lose the advantage of minimum wholesale prices within the association.

* * *

The exports for the week ending Saturday amounted to $118,209—about the same as for the corresponding week last year. Shipments were to the following places: West Indies, $66,474; United States, $30,011; Great Britain, $12,908; Newfoundland, $8,416; Italy, $400.

R.C.H.

SHIPPING HOCKEY SKATES.

H. S. Howland, Sons & Co., Limited, are shipping many hockey skates all over the country. The game of hockey is likely to reach its height this season and so the demand for hockey skates is very heavy. H. S. Howland, Sons & Co., Limited, report that they are selling largely Boker's and The Starr Manufacturing Co.'s Skates. The Starr Manufacturing Co. this season, in addition to the "Chebucto" and the "Mic-Mac," have got out a new skate the "Regal" (Lunn's pattern), which this company state is having quite a run.

CANADIAN HARDWAREMEN AT NEW ORLEANS.

T. B. Lee and J. Hardy, president and secretary respectively of the Canadian Wholesale Hardware Association, have returned from New Orleans, where they attended the convention of the National Hardware Association as representatives of the Canadian organization. They had a thoroughly enjoyable time, although, with the temperature at 75 and the humidity at 84, they experienced what it was to be bitten by Louisiana musquitoes, which do not sing, as do the Canadian description, before they bore into the bodies of their victims.

TORONTO HARDWARE SECTION

The hardware section of the Toronto branch of the Retail Merchants' Association of Canada held a meeting in their rooms on Bay street, Toronto, on Thursday evening, November 27. The attendance was satisfactory and Chairman E. R. Rogers presided.

The chief business of the evening was to discuss the coming general convention of the association at Hamilton next February and to settle what arrangements they were to make as to speakers and the papers they were to have read at the gathering. It was decided to have several meetings at this convention for the exclusive benefit of the hardware merchants attending and to discuss matters of interest and importance to the hardware trade. A meeting will be held later on to finally arrange the above matters.

Numerous applications for membership were received from outside points, and the prospects were reported bright for the formation of a number of hardware sections of the association in various parts of the country.

There has been a satisfactory increase in the membership of the Toronto branch of the hardware section.

ADVANCE IN BICYCLES.

FOR the first time in several years, says Northwest Trade, bicycle prices are not declining. The bicycle has at last found a reliable and stable position in the list of merchantable commodities and prices are on a basis more satisfactory to all of the trade. Prices for next year have been announced and the new schedules show a considerable advance. The figures for 1903 are from $1 to $3 per wheel higher than during the year past. For years the demand for bicycles has been smaller than the output and competition forced prices down below the cost of production. This continued until last year when the bicycle combination sold a large part of their output at prices that yielded no profit if they did not yield a loss, in order to make trouble for the independent manufacturers. This kind of campaigning discouraged some of the independents and forced the Trust in to a reorganization.

This year for the first time since bicles ceased to be the rage the situation is on a business basis. There is a steady demand for wheels up to certain limit, and the output has been whittled to that limit. Instead of endeavoring to drive competitors out of business the combination are willing to take orders at a profit and allow the independents to stay.

The independent companies have their output for the coming year about sold and some of them have withdrawn from the market.

Everything in the bicycle sundry line has advanced with the exception of tires, which have declined. The advance is due principally to the higher price of steel and other raw material used in the manufacture of sundries. There are no important improvements on the 1903 wheel, but the finish is better. Dainty colors will be the rule on many of the high-grade wheels. The trade is now principally in the hands of the hardware retailer.

J. Reid, grocer, Edmonton, N.W.T., is giving up business.

CANADIAN GOODS FOR CANADIANS.

COULD I TALK

"I would say that you will study my welfare and true economy, by always using the '**C**' brand nails for my shoes!"

They are the easiest to drive, and will last longest; you will therefore, not be put to the expense and trouble of getting shoes removed so often, as when using "cheap" and therefore inferior horse nails.

The Farrier will charge you just as much for putting a set of shoes on a horse with "cheap" nails, as if you insisted upon his using the "**C**" brand.

Every nail is "hot forged" from Swedish charcoal steel rods, the best material known in the world for this purpose.

They have been manufactured by us for the past 37 years. There are more of them sold than any other horse nails in Canada.

CANADA HORSE NAIL CO.
Montreal.

HEATING AND PLUMBING

PLUMBING AND HEATING NOTES.

GUS. CASLAKE, a popular young plumber, recently engaged with John Read & Co., plumbers, Stratford, has removed to Collingwood, where he takes a similar position.

Poirier & McDougall have registered partnership as plumbers and tinsmiths in Waterloo, Ont.

The Canadian Krrosene Heat and Light Co. are applying for incorporation at Fredericton, N.B.

A. A. McMichael, of the James Robertson Co., Limited, Toronto, who has been on a six weeks' visit in Great Britain, is expected home about December 15.

The Toronto jobbers are having such difficulty in getting supplies of iron pipe from the manufacturers that it is possible prices may be soon put up a few points locally.

The British Columbia Electric Railway and Light Co., Vancouver, have received and are installing a new electric dynamo capable of supplying 10,000 16-c.p. lights. This will give Vancouver capacity for 70,000 incandescent lights.

The United States Consul-General at Montreal states that a plant for the manufacture of porcelain enamelled baths will be established in Quebec by Americans, and the plant, when erected, will be large enough to supply the demand of the Dominion.

There should be a good demand for heating apparatus for the stations along the new Temiskaming Railway, which the Ontario Government is costructing. Already 13 miles of the road have been built, 700 men being engaged on the job.

At a public meeting, presided over by Mayor Unwin, the citizens of Moose Jaw, Assa., passed the following resolution: "That the time has arrived when the town should put in a system of waterworks, sewerage and electric lighting." As the resolution was carried by a large majority, it is probable that it will be put into practical effect.

PLUMBING AND HEATING CONTRACTS.

MONTREAL.

The plumbing and heating in the Caverhill Block, 93 St. Peter street, is being refitted by J. W. Hughes.

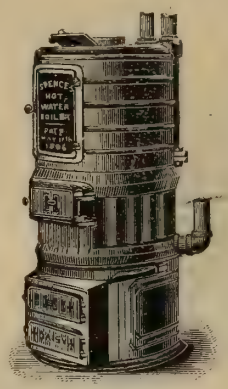
The plumbing, heating and sprinklers for The United Machinery Co. are being supplied by J. W. Hughes.

J. W. Hughes, St. Antoine street, has the contract for the plumbing and heating of the new Olivet Baptist church, St. Augustin street.

Ballantyne & Co., plumbers, etc., 159 St. Antoine street, Montreal, are endeavoring to close up part of their contract work before the new year, and report an exceptionally successful season. They have the plumbing and heating contracts for the Bellevue department house, Liverpool, London and Globe Insurance building, R. J. Inglis' new store on St. Catharine street, and a large amount of small work that is usually done at this time of the year.

MONTREAL'S FAVORITE.

The hot-water system of heating is well established and demands the greater part of the trade throughout the Province of Quebec. Warden King & Son, manufacturers of the "Daisy" hot-water furnace, is one of the oldest established houses in Montreal, and they find their business in this line is increasing all the time. This furnace, an illustration of which we herewith produce, will burn soft coal, coke or wood satisfactorily. There are about 25,000 of these heaters inuse at present throughout Quebec and Ontario. During the past year the firm have shipped over 1,400 heaters, and have not received a single complaint. Their head office is 637 Craig street.



TORONTO PLUMBERS SATISFIED.

"The warm weather in November," remarked a Toronto plumber on Wednesday, "has been a big boon to Toronto plumbing houses. The contract work during the summer has been so brisk that we have found it impossible to keep ahead of our work. It has been useless to look for men, as they cannot be had. Every one is engaged. So if there had been a really cold snap we would have been just pestered with 'hurry up' repair orders which we could not handle. So we would have been in hot water all the time."

"How are you now?" asked HARDWARE AND METAL.

"We are just getting things cleaned up, and the cold snap can come along any time and break as many pipes as usual. We can handle the business now."

THE TRADE IN MONTREAL.

The plumbing and heating trades of Montreal are just closing one of the most successful years in their history. Every jobber in the city is very busy and does not anticipate a slackness for some time to come. There are lots of men to be had, but a competent man need not be out of work for a single day. Jobbers in general are of the opinion that it is more profitable to employ a large staff of men rather than run their shops at night till 10 or 11 o'clock. There has been a large demand for soil pipe fittings and cast iron steam fittings, and there is all likelihood of an advance in prices before long.

BUILDING PERMITS ISSUED.

MONTREAL.

The following permits were issued during the month of November for new buildings:

John Watson, Razel street, $2,500.
J. B. Gratton, Sherbrooke street, $2,500.
James Morgan, Alexander street, $1,200.
Geo. Gauvreau, Parc Lafontaine, $5,000.
Delphis Lacombe, St. Audie street, $1,000.
Louis Malo, Mount Royal, $1,000.
Wm. Robb, Drummond street, $200.
Henry Morgan & Co., Union avenue, $2,500.
Jas. E. Gamblay, Huntley street, $400.
Joseph Venne, Joliette street, $1,300.
C. Dignard & Cie, Lafontaine street, $10,000.
H. R. Gutheil, Amherst street, $1,200.
J. J. Beauregard, Beaubien street, $1,500.
St. Denis Club, Laval avenue, $3,000.
S. D. Vallieres, Pontiac street, $800.
James R. Wilson, Fortification Lane, $6,000.
A. Marsau, Frontenac street, $800.
G. Marcoux, Mount Royal, $5,000.
S. Pennycade, Grand Trunk street, $2,200.
M. Desire, St. Audie street, $4,000.

BUILDING NOTES.

A new station is being erected by the C. P. R. at Fergus, Ont.

A new opera house may be built in Hamilton at the corner of Bay and King streets.

The Cowan Hardware Co., London, are putting a new front and back to their retail store.

The site for a new collar and cuff factory at Berlin, Ont., was chosen last week by the Berlin Council.

Architect Mills, of Hamilton, will ask for tenders for new offices for the Hamilton Bridge Works in a few days.

Business in the Vancouver post office has grown so remarkably that an agitation is being made for a new post office building.

Vancouver plumbers are figuring on tenders for a summer hotel which Mr. Galbraith, of Agassiz, B. C., intends erecting at Gibson's Landing, Howe Sound.

The Toronto Council has decided to submit to popular vote a proposal to spend $50,000 on a sanitarium in Toronto, but they must approve of the plans in detail before a vote on the matter is taken.

The Toronto Plate Glass and Importing Company, Toronto, sustained a small loss by fire which is covered by insurance.

DEATHS.

Wm. Mackey, lumber merchant, Ottawa, is dead.

E. E. Ponsford, of Ponsford Bros., contractors, St. Thomas, Ont., is dead.

DOMINION COAL CONTRACT.

The contract between the Dominion Coal Co. and the New England Gas and Coke Co., Boston, Mass., for their supply of coke has been concluded. Besides securing a price of $1.95 per ton, for a period of five years, a minimum of 45,000 tons of coal per month and a maximum of 65,000 tons is provided for. The Dominion Coal Co. is to create and maintain a surplus of 50,000 tons of coal at the works of the Coke Co. at Everett, and be ready at any time within two years to provide a further supply of coal sufficient for 250 new ovens. This would mean an addition of about 30,000 tons per month, or, altogether, about 1,000,000 tons per year for the Coke Co.'s 650 ovens.

The agreement between the two companies can be terminated by the Coke Co. on six months' notice, but cannot be terminated by the Coal Co.

Apollo galvanized iron commands more money and shorter credit—at wholesale—than any other—but saves the worker money.

CURRENT MARKET QUOTATIONS.

December 5, 1902.

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figures being for larger quantities and prompt pay. Large cash buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list, as the desire is to make it perfectly accurate.

BRADSTREET'S

Capital and Surplus, $1,500,000. **Offices Throughout the Civilized World.**
Executive Offices: Nos. 346 and 348 Broadway, New York City, U.S.A.

THE BRADSTREET COMPANY gathers information that reflects the financial condition and the controlling circumstances of every seeker of mercantile credit. Its business may be defined as of the merchants, by the merchants, for the merchants. In procuring, verifying and promulgating information, no effort is spared, and no reasonable expense considered too great, that the results may justify its claim as an authority on all matters affecting commercial affairs and mercantile credit. Its offices and connections have been steadily extended, and it furnishes information concerning mercantile persons throughout the civilized world.

Subscriptions are based on the service furnished, and are available only by reputable wholesale, jobbing and manufacturing concerns, and by responsible and worthy financial, fiduciary and business corporations. Specific terms may be obtained by addressing the Company at any of its offices. **Correspondence Invited.**

For Sale by all Wholesale Dealers

Some Good Reasons Why we claim your trade

FIRST—The brass we make is the standard by which all other brass is judged.

SECOND—It was good enough for good people 40 years ago, and now that we are making a better brass it ought to be good enough for the younger generation.

THIRD—WE ARE ON THE SPOT with a full and complete stock for shipment same day order is received. This alone is worth a good many dollars in these rush times.

FOURTH—We have issued a comprehensive catalogue classifying over a Million Pounds. It's here for the asking.

No. 33 (double blade) is similar in construction and finish.

Something New!

THIS is an entirely new style of mincing knife of our own design. The shank is a flat tinned steel band, drawn tightly into a groove encircling the handle, the blade being riveted between the ends. This construction does away with any hole in the handle, which consequently cannot split or come loose. The handle itself is stained and shellacked, the whole making the neatest and strongest mincing knife ever put on the market.

THE METRIC SYSTEM IN CANADA.

RE the metric system in Canada, the Hon. M. E. Bernier, Minister of Inland Revenue, says he is satisfied the metric system is infinitely superior to our complicated system of weights and measures.

The hon. gentleman is doing all in his power to educate the public to the advantages of the system by distributing charts and other material to illustrate the system to the high schools throughout the country, and he will approach the Governments of the Provinces to have the distribution extend to the common schools.

In this the hon. gentleman is only discharging his duty, as it is an assured fact that the metric system will be in use in all the civilized countries of the world at no distant date.

Mr. S. W. Stratton, of the National Bureau of Standards for the United States at Washington, predicts that the system will be universally used within two years. Mr. Stratton has just arrived home from a two years' tour of the world in the interest of his office and is considered an authority on the subject.

The system was legalized in Canada by an Act of the Dominion Parliament in 1867 (chap. 104, section 21), and all contracts based on it are enforceable at law.

In several countries it is the only system in use, and on account of its exactness is used exclusively for scientific purposes. It is based on a measure of length, the original being a bar of platinum, made by one Broda in 1840 at Paris, where the original bar is still preserved. Since it is sure to be put into practical use in Canada, it devolves on all persons connected with trade to do their share toward educating the masses.

We append a table of measure for weight and bulk :

The litre is the unit of capacity. It is legal at 1.0567 quarts, liquid measure.

10 centi litres c l = 1 deci litre d l.
10 deci litres d l = 1 litre l.
10 litres l = 1 deka litre d l.
10 deka litres d l = 1 hekto litre h l.

The gram is the unit of weight. It is legal at 15.432 grains troy.

10 milligrams m g = 1 centigram c g.
10 centigrams c g = 1 decigram d g.
10 decigrams d g = 1 gram g.
10 grams g = 1 dekagram d g.
10 dekagrams d g = 1 hektogram h g.
10 hektograms h g = 1 kilogram k g.
10 kilograms k g = 1 myriagram m g.
10 myriagrams m g = 1 quintal q.
10 quintals or 1,000 kilograms are 1 metric ton m t.

BICYCLE ACCESSORY BUSINESS.

THERE is a general feeling among a good many dealers that because the sale of bicycles has dropped off during the past few years, the sale of bicycle equipment has also dropped off to a corresponding extent.

This is a very mistaken view, as will be seen after a moment's reflection. In the days when the bicycle was at the height of its popularity, riders used it for only one season, exchanging it the next year for a new machine, consequently they required very few parts for replacement during the season. Nowadays the rider uses his bicycle for two, three, four or five years, and during that time has to purchase considerable new equipment. The result is today that there are possibly 10 wheels being ridden for every one that is being sold, and the market that is open to dealers in bicycle sundries is to supply the 10 wheels that are being ridden, not the one that is being sold.

OUR NEW YORK OFFICE.

The MacLean Publishing Co.'s New York office has been changed from Room 443 to Room 802, New York Life Building, 346 Broadway.

Mr. W. T. Robson, the New York correspondent of HARDWARE AND METAL is now better able than ever to keep our readers posted on what is being done by the most up-to-date business men in New York.

Any of our subscribers who happen to be visiting the great United States metropolis will find our own and other Canadian newspapers on file.

IMPORTANT JUDGMENT IN PIG IRON CASE.

JUDGMENT was given in the Exchequer Court, Ottawa, on December 5, in the case of the Dominion Iron & Steel Company vs. the King, being the outcome of a claim for $196,967.15 under the Dominion statutes for bounty on pig iron. The decision of the court is in favor of the plaintiff for the full amount claimed.

Aside altogether from the amount involved, the case is one of the most interesting to the iron and steel trades ever before a Canadian court.

Under the Dominion statutes the Government is authorized to pay bounties on steel ingots, puddled iron bars and pig iron made in Canada, that is to say, on steel ingots manufactured from ingredients of which not less than 50 per cent. of the weight thereof consists of pig iron made in Canada a bounty of $3 per ton. On puddled iron bars manufactured from pig iron made in Canada, a bounty of $3 per ton. On pig iron manufactured from ore, a bounty of $3 per ton on the proportion produced from Canadian ore, and $2 per ton on the proportion produced from foreign ore.

As pointed out by HARDWARE AND METAL when proceedings were instituted, the Auditor-General had refused, on legal advice, to sign the certificates of the company for the bounty on pig iron which had been transferred from the blast furnace to the open hearth furnaces to be transformed into steel without first being made into pigs. In other words, it was held that before the bounty could be earned the iron must first of all be made into pigs.

Judge Burbidge holds in effect that, in the usage of the trade of the ironmaster and those familiar with the process of manufacturing steel from pig iron, the term "pig iron" includes that substance in a liquid or molten state as well as in its solid form.

We think that most people, after carefully weighing the matter, will agree that the decision of the court is proper.

The concrete fact must not be overlooked that the purpose of Parliament was the encouragement of the iron and steel industry of the country. And while by perhaps a number of people the principle of bounties is looked at with disfavor, that should not cloud their minds to the intention of the Act. If, therefore, the purpose was to develop the iron and steel industry of Canada, the makers of pig iron should not be denied the customary bounty because they choose to employ the most modern and scientific methods for the production of iron and steel. To argue from any other premises would be tantamount to advocating the employment of the iron and steel-making methods of yesterday instead of those of to-day.

Fortunately the court has taken the broad and not the narrow view of the question.

THE COAL SITUATION.

ANTHRACITE coal is still scarce in Toronto. The dealers report that the cold weather has so much increased the demand for the article that their supplies of it have been exhausted and they are only able to make deliveries when a cargo or shipment comes in direct from the mines. The demand for hard coal is now enormous. Nobody was able to secure any quantity for use during the summer or fall, and so the citizens and small dealers have made a rush all at once to obtain their requirements.

Coal has been slowly coming to Toronto from the mines for about five weeks, but the supplies received were not half sufficient to keep the city going, let alone permit the delivery of any to points outside the city. Therefore, if the weather is cold, many people will suffer from lack of coal, but if it keeps reasonably mild for the season of the year everyone ought to get along by the exercise of economy. The dealers at present claim they have no hard coal to offer, but almost any quantity of soft coal, broken up in small sizes, can be obtained from them. Some people are, therefore, not slow to hint that the dealers are not anxious to sell hard coal while they have lots of small sizes of soft coal to get rid of.

At the mines coal is being mined in large quantities and quickly shipped to various points in the State of New York and the other States dependent upon the Pennsylvanian mines for their fuel. While navigation was open there were large quantities forwarded by water to ports on the Upper Lakes. The coal merchants of Toronto claim that owing to the above fact there have not been large deliveries so far to nearer points like Toronto. Navigation is now closed, and it is expected that from this time out the receipts in Toronto will be larger than they have been up to the present time. Several cargoes are now on their way across Lake Ontario for that city, but have been delayed by adverse winds for some days. Shipments will henceforth come in by rail, and it is claimed that not so much difficulty will be experienced in getting sufficient quantities of anthracite coal to keep the city going.

It is difficult to predict whether there will be further advance in prices or not. The dealers are recticent on this matter and will not express an opinion on the question.

Owing to the enormous demand at the mines the independent operators have advanced the prices nearly 100 per cent. and are asking $6.50 per ton for the anthracite. The Trust, however, has not advanced prices, still quoting $3.50 at the mines.

The middlemen at Buffalo are asking $8.50 per ton. The Trust has not been able to supply all the demand and so the dealers have had to buy partially their coal supplies from the independent operators. One large coal firm of Toronto stated that it bought about 60 per cent. of its coal from the Trust and the other 40 off the independent operators. Should the demand at the mines increase greatly the dealers will, of necessity, be forced to buy a larger percentage off the latter, and hence prices here would likely advance.

MANUFACTURERS' EXHIBITION.

It has been found impossible to get a building in Toronto in which to hold an exhibition of domestic manufactures. The Daughters of the Empire, under whose auspices the exhibition was to be held, have examined many places, but could not find one suitable.

The idea, however, has not been abandoned. They have the promise of a suitable building for the spring. As soon as the matter is arranged we will make an announcement for the information of manufacturers who may wish to exhibit.

Christmas Suggestions for Customers.

Cut the following list out and place it in a prominent position in your store. It will be useful to your customers, and will mean money to you. It has been carefully compiled, and contains a list of articles handled by a hardware merchant, and suitable for Christmas presents.

IT is oftentimes quite a difficult matter for customers to decide, when purchasing Christmas presents, just what they ought to buy for their friends and relatives. If they have no definite idea beforehand, they are liable to become muddled when faced by the complex display of a varied stock. Consequently, a merchant who is anxious to make sales will be prepared to utilize all possible means to help these customers come to a decision.

The following list is intended to assist the merchant in these efforts. It contains a variety and assortment of articles, all of which should make excellent presents. These are placed in as convenient a form as space will allow, and customers, who take the leisure to glance over them, will very likely be assisted in making their decision. Articles that they might never otherwise have thought of will be brought to their notice and an opportunity will be given the merchant to at least describe his goods. The latter may receive from the list useful hints in making up his stock, as articles are often overlooked in the hurry of making a selection:

Plated Ware, especially Spoons, Forks, Knives.
Children's Sets.
Enamel Ware (sets).
Fancy Lamps.
Carpet Sweepers.
Cutlery.
Case Cutlery.
Manicure Sets.
Toilet Sets.
Shaving Sets.

Cartridge Belts.
Game Bags.
Duck Calls.
Goose or Crane Calls.
Moose Calls.
Léather-and-Corduroy Hunting Coats.
Hunting Knives and Other Hunting Assessories.
Snowshoes.
Skis.
Toboggans.
Fishing Rods and Reels.
Bicyles.
Mrs. Potts Sad Irons.

TRADE DISCOUNTS.

SEVERAL trade journals have recently published articles on the amount the merchant would save if he discounted his bills promptly, even if he bad to borrow the money to pay them from the banks. But some people have taken a different view of the matter, and in The St. Paul Trade, Minor C. Badger writes on the subject as follows:

I have been considerably amused by the articles published at different times in regard to the amount saved by discounting bills, and especially at the rate of interest. Take the hat and cap line, for instance, with terms 10 days less 6 per cent., 30-5, 60-4 four months net. If he discounts in 10 days at 6 per cent. he gets $6 for the use of $100 for 110 days, or at the rate of 19 9-10 per cent. per annum. If he takes the 30 day discount he gets 5 per cent. for 90 days, or 20 per cent. per annum. If he takes the 60 day discount then he gets 24 per cent. for his money, which is the best rate of interest he can get, and, of course, would pay him better than the 10 day discount at a trifle less than 20 per cent. per annum.

But let us see how it works in actual business. Theory is all right sometimes, but actual workings are different. As a general proposition, the average country merchant buys of his hat house two bills a year, one in the spring and one in the fall, so that he can get this discount only twice a year—not three times at 6 per cent., nor four times at 5 per cent., nor five times at 4 per cent., but only twice, no matter which discount he takes; so that while 4-60 is figuring at 24 per cent. per annum, he only gets 8 per cent.; and while the 6-10 figures scant 20 per cent. per annum, he really gets 12 per cent.

While figures do not lie they are sometimes very misleading, and the man who figures on 20 per cent. interest by discounting his hat bills, will come to the conclusion that some one was mistaken.

Now, as to the actual amount saved; any country merchant can "work" his jobber fot 60 days' extra time without interest by simply taking it when the bill is due, so that in borrowing of his banker he must take that into consideration. In this part of the world the bankers are in it for what they can make out of it, and 12 per cent. is not at all bad for one who wants to borcow; 10 per cent. is a very reasonable rate, and is just a fair average. So he borrows at 10 per cent. and gets at the most 12 per cent., making a profit of only 2 per cent. per annum in the transaction, an amount too small to look at considering the trouble to get the loan.

WELSH TIN TRADE DEPRESSED.

A despatch from London, Eng., states that the Welsh tin trade has been seriously depressed, so that a joint meeting of plate manufacturers and workmen has decided to close the factories one week each month from now till the end of March. Canada has during the past year taken from Great Britain (the great bulk of which comes from Wales) $1,400,000 of tin plates and sheets, an increase of about $650,000 over imports of the previous year.

A SEASONABLE LINE.

SILVERWARE as it was and silverware as it is to-day are two very different propositions. Silverware a generation or two ago was the possession only of the rich and coveted by the masses. We read of rare old silver plate in the treasury vaults of ancient families, valued among their proudest possessions. True, it is still of great worth, because of its age or connection with some historical event, but a few dollars of Canadian money, well spent, will purchase silver plate far more beautiful and of quality to suit the buyer's purse. Those who insist on the best can have it, while modern methods have come to the aid of the manufacturer, enabling him to turn out very beautiful goods of quality fully suitable to the tastes of the majority, and at prices eminently in keeping with the moderate sized purse.

At this time of the year nothing can be be more popular for a Christmas gift than a pretty piece of silverware. Many hardware merchants who are handling this line of goods report brisk trade already, while the Canadian manufacturers of silver plate are working overtime to supply the demand.

GOOD ADVERTISING.

Notes by Miss Nora Laugher, Toronto.

DON'T rail against your competitor in your ads. If you do, people will form the conclusion that he is hurting your business, and this would hardly be possible unless he handles a better grade of goods, or by larger purchases can offer his goods at lower prices.

* * *

Remember that the more you advertise an honest article the more it will advertise you. Honesty is the best policy both in the matter of reliable goods and the way you advertise them.

* * *

John Wanamaker, that king of advertisers, has always pursued that policy. He is a living illustration of what fair methods and honest dealing can do. Many merchants would think it a little overdone in an instance that came before my notice recently. A Toronto gentleman, with whom I am well acquainted and whose veracity cannot be doubted, while visiting New York called at a large store, intending to purchase a tea-gown to take home as a present to his wife. The saleswoman displayed some very handsome gowns, but the one he set his heart upon purchasing was quite unlike any of the rest—a very artistic garment priced at $27. He selected this one and tendered the amount for payment. As he intended taking the next train home to Toronto, he, of course, desired to carry the parcel with him. He was rather chagrined, after waiting some few minutes to see the saleswoman return to him, not with a neat parcel, but with the chosen gown still hanging over her arm. He was still more surprised when she explained that he could not purchase that particular tea-gown, as it had a tiny flaw at the extreme edge of the hem. The $27 was handed back to him and at first he began to think himself the victim of a small swindle. Wanamaker did not wish to sell the gown at the price. He demanded to see the supposed blemish. It seemed so trifling when brought to his notice that he still wished to possess the gown at the figure named, but the saleswoman declared she would not be allowed to sell it at any price. He persuaded her to go back to the manager of that department, and was exceedingly surprised to find that, as he desired it, they would make the price $17. Of course, he took the gown, and as it was too long and had to be shortened, the tiny hole in the hem did not signify.

* * *

Honesty in business is not, however, confined to the United States, nor to the great Wanamaker. It is the basic principle of hundreds of large and small stores in our own fair Dominion, and they find it a paying principle, too. Not long ago in one of the largest departmental stores in Toronto, a young man one bargain day (no doubt instructed by his better-half), purchased a pretty and jaunty little coat for his wife. When it arrived home it proved to be a little too large, and was returned to the big store for alteration. Unfortunately, by mistake, it was sent away to another lady, some miles out of town, and for the time seemed irretrievably lost. The young man was naturally much annoyed at its non-arrival. Upon interviewing the manager of the mantle department, he was shown several other coats with the request that he would select one. He did so, selecting a stylish coat priced $11, and was agreeably surprised to find that he was not charged one cent extra. He had purchased a coat for $3 in the first instance and the slight delay had not really inconvenienced his wife; yet here was one offered him, better and smarter in every respect and out of new stock which had just arrived from New York. In due course the first coat was returned, and he was at once advised by mail that he could have it also at the price originally paid.

* * *

The Thanksgiving turkey is hardly digested when the progressive merchant begins to consider the all-important question of Christmas advertising. He naturally desires to do even more business than he did the previous year. He realizes that his large volume of trade must increase if he gives both goods and ads. the careful study they merit. Good advertising and good display not only bring a greatly increased business, but give a chance to swell the number of regular customers when prices and selling methods are what they should be.

Many merchants have the erroneous idea that the easiest time of the year to advertise is Christmas time. They think that people are in the buying humor and that anything in the way of an advertisement is good enough to catch the public. Those people never made a greater mistake. Don't do slipshod advertising at Christmas. Don't do it at any time of the year.

* * *

Do your best to help people in their purchasing. Have your goods displayed in the most attractive and suggestive manner. Display your gift-goods for man, woman and child separately — a great aid to buyers. If your advertising space is large enough talk various lines and keep each line apart with a separate heading. Tell why each is especially desirable if you have room. Take each line and present its good qualities as forcibly as possible. Talk it up plain and well.

The progressive merchant will see the wisdom of good booklet, folder, or circular advertising as an aid to his newspaper advertising. I believe that at no time of the year is a well-gotten-up booklet or concise, well-written circular more valuable than just before or at the commencement of the Christmas trade season. A highly important part of advertising nowadays is the booklet, folder or circular. But it must tell just the right story—it must contain a maximum of description in a minimum of space. Attractive type and good illustrations must be used in the booklet to secure first, attention, then careful perusal, otherwise the booklet will be "flat, stale, and unprofitable," and soon find its proper level in the waste-paper basket.

* * *

With regard to Christmas newspaper advertising, it is a good idea to make a list of the various gift-goods—make a separate list, one for man, one for woman, one for child. State prices on list if possible.

Many merchants find it feasible to offer to lay aside any article upon payment of a small deposit and deliver at the customer's convenience. Remember that at no time of the year is satisfactory service and prompt delivery so much appreciated as during the holiday time. It is well to promise this in your ads. and it is better still to keep your promise.

* * *

I often wonder if progressive and conscientious advertisers ever consider how much good they are doing commercially for the advancement of their country. Advertising in Canada has not only created new industries all over the Dominion, but it has greatly added to Canada's wealth. Advertisements, in addition to being an educative power to the home-born citizen, help to instruct and elevate the foreign population, who thereby gain a better idea of their adopted country and teach foreigners the advantage of using the goods they find in this country and the profit there is in

adopting modern western methods. Advertisements ofttimes put them on the road to fortune.

Canadian railroad advertising has induced thousands of United Statesers (I do not think our cousins across the border have the sole right to the use of the term "Americans" any more than Russians would have to the exclusive use of the term Europeans) and other foreigners to visit our picturesque country, the result being a large influx of population which has been of unquestionable advantage to the Dominion. There is room, however, for much improvement and development of this line of advertising from which our country should reap much larger advantage.

* * *

That remarkably gifted writer, Thomas McQueen, who will long be remembered as indefatigably trying to build up a native literature amongst us, often ended his eloquent editorials with the earnest appeal, "Will nobody write a few songs for Canada?" Well, there are Canadian song-writers and there are Canadian ad.-writers, and the latter are also nobly doing their part for their country.

* * *

At the passing of the year, we, who are interested in advertising, naturally look back to the short age of the ad. and its wonderful evolution. Fifteen or twenty years ago advertising was largely a mystery to the Canadian merchant. He was, however, regarding it seriously, much as he might contemplate some new business venture—as an experiment. Then there suddenly sprang into bloom the advertising writer to preach the new gospel of advertising. Most wise men have come from the East, yet I have reason to believe that the advertising specialist, like young Lochinvar, came out of the west. That he has preached his gospel well, and that he is here to stay, is well evidenced by the fact that he is here now and "talkin' yet." He is here, firstly, because it taxes the ability of the merchant or the manufacturer to know his own business. It is not to be expected that he should know another business in addition. The business of advertisement-writing is decidedly a business—I was about to say a profession. Advertising is no small thing to be trifled with. If handled carelessly or injudiciously it may mean the sinking of many dollars, even small fortunes. On the other hand, good advertising backed up by the right kind of storekeeping saves money by building business and by building it thoroughly. Secondly, the art of newspaper-making is studied from an interior point of view by the advertisement-writer. He has to do this to know his business. He has to learn all about type—what styles go harmoniously together—when to use borders—when not to use them—whether or not a line will "come in" in a certain size and style, and last, but not least, how to write good, common-sense English and convert it into convincing talk to interest purchasers.

* * *

What manufacturer himself would have time to sit down and think out such splendid and unique advertising as the Sapolio "Spotless Town" literature of Artemus Ward, or the famous "Jim Dumps" Force Food ads., created by that clever woman Miss Minnie Maud Hanff?

* * *

Wise old Tupper wrote: "Policy counselleth a gift, given wisely and in season; and policy afterwards approveth it, for great is the influence of gifts."

At no season of the year does a gift seem so appropriate as at Christmas or the New Year. The sagacious man of business fully realizes this. He knows there is no success without popularity; he has learned by experience that customers should talk favorably of him and his store. In securing this good-will useful advertising novelties are exceedingly helpful. They may take the form of a calendar, a small match-box, key ring with celluloid tag which opens, showing owner's name and address, a blotter, memo tablet, postage-stamp holder, car-ticket case, small looking glass, or a hundred-and-one different things on which could be displayed a little advertisement of the donor.

A useful advertising novelty is a good lead pencil, but it must be a good lead pencil, or the recipient will be apt to divide his profanity between the pencil itself and the firm that sent it. If you give a pencil give one of the good kind that will prompt a person to write an order with it for your goods.

* * *

If the small novelty the business man presents to each of his customers is something useful, as it should be, it is preserved indefinitely by the receiver and thus becomes a constant reminder of the merchant's generous and up-to-date business methods.

* * *

A small gift at Christmas or New Year and honest dealing every day of the year makes a customer satisfied with the merchant and his store. Remember that a satisfied customer is one of the best ads. a merchant can have, for mouth-advertising cuts as great a figure to-day as it did 50 years ago.

* * *

Remember every week of this new year that your ad. next week will be more profitable if your ad. this week gives the people what they want and the goods delivered are on a par with your promises.

Wm. Thomson, general merchant, of Thurso, Que., has changed his style to Thomson & S.

"QUICK SELLERS."

That is the dealers' verdict of

THE SHERWIN-WILLIAMS PAINTS

The best goods in the world are no good to the merchant unless he can sell them quickly and profitably.

The Sherwin-Williams Paints, besides being the best made, are the best known. They are systematically advertised. Our business methods create a demand for them, their quality holds and increases the trade. Once used, they're always used.

We do not drop our work with you when your order is filled; we begin then to work *for* you. We never stop. We are always at your service.

Our system of direct-advertising to the consumer is the most effective and complete ever employed. It brings customers to your store and sells the paint.

Summed up, good goods and good methods bring success every time.

Write to-day for our "B 13" booklet. It explains in detail the business methods that have brought success to us and to our dealers.

THE SHERWIN-WILLIAMS CO.

PAINT AND VARNISH MAKERS.

CLEVELAND.

CHAT

FIRE, originating in the boiler-room, destroyed J. A. Hewett's planing mill, Grimsby, Ont.

Three barges arrived on Saturday, at Toronto, with Welsh coal.

The Ontario Government have issued a proclamation raising the village of Alexandria to a town.

Fire damaged the hardware store of Sutherland & Stelck at Dauphin, Man. Mr. Sutherland is from Wingham, Ont.

Barnett & Record expect to have the C. N. R. storage elevator at Port Arthur ready for the storage of grain by the last of January.

H. H. Dawson, late manager of The Wells Hardware Co'.s store at Fort Frances, has gone to Fort William to take charge of the retail business of A. Dawson.

Brandon, Man., is facing a fuel famine the waterworks may have to shut down, it being almost impossible to obtain wood of any kind, and of hard coal there is none.

The Merritton fire brigade was called out to disperse the G.T.R. bridgemen because they were going to pull down the old wooden bridge across the G.T.R. tracks.

David Schurman, who has been in charge of the Massey-Harris business at Charlottetown, P.E.I., for many years, has been transferred to Wolfville, N.S., were he takes charge of the Western N.S. and P.E.I. department.

A. Westman, hardware merchant, who has occupied the store at 111 Dundas street, London, for the past 34 years, is moving into the larger store at 121 Dundas street, five doors east. Their new premises will give this old-established and respected firm double the floor space and afford their customers much more comfort and convenience in dealing with them as well as providing Mr. Westman with more room for a larger stock.

James Wright & Co., London, Ont., wholesale dealers in carriage hardware, bar iron, pipe, carriage trimmings, etc., have moved recently into their fine, new, brick building on Clarence street. This building is five storeys high, including basement, and has a floor space of 37,200 sqr. ft., being 110 ft. long by 70 ft. wide. It is one of the finest buildings in London.

INQUIRIES ABOUT CANADIAN TRADE.

The following were among the recent inquiries relating to Canadian trade received at the Canadian Government office in London :

1. The proprietors of certain saddle and harness preparations, boot and shoe blackings and polishes, embrocations and horse powders, are seeking to extend their business with Canada, and contemplate appointing a representative in the Dominion.

2. A firm of spinners of carpet, hosiery and coating yarns is desirous of doing a Canadian trade, and wishes to get into touch with carpet and hosiery manufacturers in Canada.

3. A Londou firm of general import and export merchants desires to get the representation of a few good Canadian houses whose goods are likely to sell in large quantities if properly pushed.

4. Inquiry is made again for names of Canadian exporters of fruit pulp.

5. A firm of bedstead makers is open to buy wood frames, of Canadian manufacture, for wire mattresses.

6. A North of England firm is looking out for a good Canadian house which would take up the agency for a special line of cycle oils in tins, as well as Scotch glue, gelatine, etc.

[The names of the firms making the above inquiries can be obtained on application to the Editor of HARDWARE AND METAL.]

TO MAKE HAMMOCKS IN TORONTO.

The Hoffman-Corr Manufacturing Co. have established a warehouse and factory at 118 Bay street, Toronto, where they intend to manufacture a large line of hammocks, and to handle rope, twine and thread, cotton duck, yarn, warps, wick, waste, bags, excelsior, moss, tow, hair, tapes, fibres, braids, oakum, nets, wadding, batts, awning stripes, burlaps, flags, etc.

The business will be under the management of F. J. Purtill, an energetic young man who is well acquainted the Canadian trade, and is, by the way, a good friend of HARDWARE AND METAL, having, while connected with Iver Johnson's Arms & Cycle Works, Fitchburg, Mass., written the advertisements for that firm, thus realizing the close touch this paper has with its field in Canada from coast to coast. It is safe to say that under his direction the goods of this company, which have an enviable reputation already, will be in general demand from the Canadian trade.

MACHINERY AND ELECTRICAL SUPPLY DEPARTMENT

MACHINERY AND ELECTRICAL NOTES.

THE principal makers of sewing machines in the United States, with the exception of The Singer Machine Co., Wheeler & Wilson and Wilcox & Gibbs, have, says The American Exporter, been merged into a company with a capital of $30,000,000, and with B. Eldredge, president of The National Sewing Machine Co., as president of the new company.

Pischer & Son are erecting a mill at Causapscal for the manufacture of birch and spool wood.

The Hastings, Ont., foundry is working overtime filling orders for sawmill machinery in Manitoba and Quebec.

G. H. Cliffe has decided to go into the manufacture of acetylene gas machines more extensively than heretofore, so is overhauling a mill in Dundas to that end.

The Ontario Portland Cement Company's new buildings at Brantford, Ont., are being rapidly pushed forward and will soon be ready for the installation of machinery.

The Westinghouse Electrical Company, of Pittsburg, Pa., one of the largest electrical concerns in the world, have decided to open a factory in Ottawa to cut and prepare mica. The mica will be mined in the Gatineau district, and the staff employed will number about 200 men and girls.

The Hatton Patent Right Co., Limited, have been incorporated to purchase and deal in patent rights and inventions. The head office of the campany is Owen Sound, Ont.; its capital, $50,000, and the directorate is as follows: Timothy Charles Hatton, James McAllister, Charles Allen Gentles, Alexander Grant McKay and John Gentles, of Owen Sound.

WANT TO SELL BOILERS AND ENGINES.

Some British engineering firms are finding a profitable market for their specialities in the British-Columbian mining camps, and there is no doubt that if they will carefully look into the trade conditions along the Pacific coast they will find many excellent trade openings. For instance, the demand for boilers is said to be great and increasing. It is stated that last autumn 125 boilers were in stock in Dawson, all of which were sold before March of this year. Vertical boilers of from 6 to 20 H.-P., and horizontal boilers of from 20 to 75 H.-P. are in great demand. The demand for engines is also considerable, and at present is chiefly met by the United States. Those most in request run from 10 to 20 H.-P. The trade in iron pipes is also of importance, and it is reported that there is a very large market for steel hydraulic piping of from 8 to 30 inches, punched, rolled, and ready to be rivetted.—Coal and Iron Trades' Review, London.

FAIRBANKS COMPANY'S WESTERN MANAGER.

The Fairbanks Company have appointed J. E. Botterell manager of their Western branch at Vancouver. Mr. Botterell has been connected with the firm for the past four years, first as travelling representative in the Maritime Provinces and latterly as sales manager at the Montreal house.

The growing trade throughout British Columbia and the Northwest Territories requires increased energies and help to take care of the business, and in consequence Mr. Botterell should be just the man to fill the position.

This firm has been established but four years in Canada, and up to date have three times enlarged their premises as well as opening another establishment in Vancouver.

BICYCLE EXPORTS AND IMPORTS.

Evidently the United States has lost its grip on the export bicycle trade. A report of the U. S. consul at Chemnitz, Germany, gives some instructive figures relative to the trade, showing that while the United States in 1898 exported $7,150,000 worth of wheels, or more than the total exports of Germany and Britain, the trade returns for 1901 show Germany's export trade to have reached $2,927,000 in 1901, Britain's being $2,808,000, and the United States only $2,595,000. The consul adds that during 1902 German bicycles continue to have a greater sale throughout Europe than either American or British.

The sales of United States bicycles in Canada have, it is also instructive to note, declined materially in the past four years. In 1899, our total imports of bicycles, the bulk of which came from the United States was $497,161, while in 1901 they had fallen to $125,350. Meanwhile Canadian exports of wheels have materially increased. In 1899 our exports reached $241,753, of which $191,029 went to Australasia. In 1902 our sales to foreign countries were $312,835, Australasia again taking the bulk of the trade.

ELECTRICITY FOR REFUSE.

"Electricity for Refuse" was the subject of a paper read before the Manchester section of the Institution of Electrical Engineers on November 11, by W. F. Goodrich, the object of the writer, according to Ironmonger, being to show that cremation of refuse and really efficient power production were compatible, and could be coincident. Out of a total number of 160 towns in Great Britain, where destructors had been adopted, 45 towns had decided to combine the destructor with the electricity-works, and the actual destroying capacity of the destructors adapted in combination with generating stations might be put at upwards of 1,400 tons daily. Forty and even 50 units had been generated per ton of the fuse destroyed over short periods. At Darwen during a period of one year 33 units had been generated per ton of refuse destroyed, and at Shoreditch, over a similar period, 20 units. Sufficient data were available to show that with a well-designed and well-managed plant at least 30 units per ton of refuse burned might safely be relied upon the whole year through. There had been a number of instances where, for a certain period, the whole of the power required had been obtained from the refuse, but this happy state of things was exceptional, and experience showed that the refuse-destructor was only a most useful adjunct to a generating station. Mr. Goodrich, who showed a number of lantern-slides in connection with his lecture, was warmly thanked at the close.

The sawmill owned by Ross-McLaren, near New Westminster, B.C., will be opened again after ten years of inactivity. They have sold out to an American Co., who will start it in operation as soon as possible. Over 200 hands will be employed.

TORONTO AGENCY OF DARLING BROS.

DARLING BROS., engineers and machinists, Reliance Works, of Montreal, are opening a branch in Toronto under the management of Richard Dawson, who has been in the service of the company for about five years, being employed as a designer, and who has made an excellent name for himself with the trade.

Darling Bros. make a specialty of steam engineering, their principal line being the installation of the Webster system of low-pressure steam heating, which includes Webster's feed water heaters, oil extractors and steam separators. They also manufacture Moore and Burnham pumps, and handle boiler feed, vacuum, tank and light service and artesian well pumps; in fact, any and all kinds of pumps. They are, too, dealers in electric, hydraulic, power and hand elevators for freight and slow-speed passenger elevators. Mr. Dawson has opened his office at No. 2 Toronto street, where he will be pleased to see or hear from the trade.

The Webster system of heating has found much favor in Toronto during recent years. Among the large buildings which have been equipped with the system are the new King Edward Hotel, the new Dodge Manufacturing Co., The Toronto Carpet Co., and the new factories for The Gendron Manufacturing Co. The palatial head offices of the Grand Trunk Railway and the new Board of Trade, of Montreal, have also been equipped with this system.

The method of installing the system is unique. Darling Bros. prepare the plans for the work, take the contract and then allow the leading plumbing firms to figure on the work. Responsibility for the work, therefore rests with them, not with the plumber; yet it is claimed that the latter will have just as much work and reward as he would have under the ordinary system of heating.

When you call on or write to Mr. Dawson for further information kindly mention "Hardware and Metal."

PURCHASED A WAVERLEY ROUND-ABOUT.

H. A. Kemp has purchased a Waverley electric runabout manufactured by The International Motor Car Co., from their Canadian representatives, The Canada Cycle and Motor Co. This vehicle will be one of their latest, fitted with wood wheels and a special side battery. The electric vehicle will be used extensively in cities and towns during the coming season. A number of Toronto gentlemen intend using electric carriages in the city and gasoline touring cars for country roads and touring.

AN UP-TO-DATE FRAME FITTING

Vibration absorbing devices have obtained much favor among bicycle riders the past few years, and have demonstrated that they are a vast improvement over the rigid frame. Discerning makers are now including these machines among their high-grade business getting features. The success of such flexible or cushion frames is assured. The double flexible frame, made by The Sager Cycle Co., Rochester, N.Y., and sold by John Millen & Son, of Montreal and Toronto, is the result of progress in the natural development of a good idea, and it embodies decided improvements in operation.

Among the advantages are that it necessitates no change of spring for different weight riders, it improves rather than detracts from the appearance of the bicycle, has an ample spring with no tendency to bottom when subjected to an unusual shock, and is self-constrained, permitting the use of a loose joint at the hanger, thus avoiding particularly objectionable construction. The double flexible fitting can be attached to an old wheel as well as to a new one, so should be a good line for the repair man as well as for the makers.

Noel Philomene, general merchant, of St. Flavien, Que., has ceased doing business under his present style.

WEST-INDIAN PRODUCTS.

IN this week's issue HARDWARE AND METAL presents its readers with a cut of the British West-Indian exhibit, as it appeared at the Toronto Industrial Fair last September. The picture gives some idea of the extent and importance of this exhibit, but naturally it fails to do adequate justice to the whole thing. One would need to be present in person and examine carefully all the details in order to grasp the full significance of the important collection of West-Indian products there shown. The arrangement was excellent, and the various exhibits were placed as conveniently as possible to admit of a careful inspection. The throngs which crowded around the space allotted to this section evidenced the interest which was universally aroused by the luxuriant and curious products of the tropical Islands.

Next year, Pickford & Black, of Halifax, who originated and carried out the idea of the exhibit and who are to be congratulated on its success, intend to repeat their experiment on a large scale both at Toronto and at the Dominion capital. They are of the opinion that these exhibits will do a great deal to promote trade between the West Indies and Canada.

C. S. Pickford, who undertook the task of working up the interest of the people of the West Indies in the enterprise, and who also took charge of the exhibit at Toronto, informed HARDWARE AND METAL that, although the work and worry was great, he looked forward to the pleasure of making, if possible, a larger showing next year. For this purpose he will probably leave Halifax for the West Indies about the middle of January, remaining there for six months.

Mr. Pickford says that, although his firm did the work of transporting the goods from the West Indies to Toronto and exhibiting them, their efforts would have been of no avail if they had not been backed up in the able manner they were by the exhibitors in the West Indies, as also by the following gentlemen : Luke Hill, Guy Wyatt, of Demerara ; T. Geddes Grant, Edgar Tripp, of Trinidad ; John Barclay, secretary of the Agricultural Society, Kingston, Jamaica, and last, but by no means least, Dr. Morris, C.M.G., Imperial Commissioner of Agriculture in the West Indies, and his lieutenants in the different Islands.

Dr. Morris, Mr. Pickford informs HARDWARE AND METAL, passed through Toronto some three weeks ago on his way to Ottawa, and stated that he was more than delighted with Canada. He has control of the botanical stations in the different Islands, and is doing a great work for the West Indies in improving the sugar cane. Here alone he has succeeded in increasing the yield some 25 per cent. ; and also in fruit, cocoa and other products the improvement is marked. Take, for instance, onions ; both in Antigua and Dominica this article has been made a great success of, the former, in the last couple of years, having exported large quantities to the other Islands of the West Indies.

In this regard, Mr. Pickford says that he saw at Dominica last winter potatoes, beets, etc, which he does not think could be beaten in Canada ; he also states that trade between Canada and the West Indies is steadily increasing, and all that is wanted is for our manufacturers to push their wares by sending their representatives into the field, and good business will result. HARDWARE AND METAL wishes Pickford & Black good luck in their efforts.

PAINT, OIL AND BRUSH TRADES

LINSEED OIL IMPORTATIONS.

AN Ottawa despatch dated December 3 says: "J. Livingstone, ex-M.P., Baden; and E. Fielding, Toronto, had an interview with the Minister of Customs to-day on the subject of the duty upon flaxseed oil and linseed oil, the importations of which are increasing rapidly, to the serious detriment of the Canadian industry. Last year from Great Britain there were imported 650,943 gallons, and from the United States, 41,946 gallons."

When seen by "Hardware and Metal," re the above, Mr. Fielding, with his characteristic reserve, had nothing to say concerning his visit to Ottawa. No change in the duty on linseed or flaxseed oils had been requested by them.

The motive of the visit is in all probability presumed by the writer of the despatch, who does not seem to be thoroughly conversant with the facts. Instead of rapidly increasing the imports of linseed oil into Canada have steadily decreased of late. In 1899 Canada imported 1,032,308 gallons, in 1901 the imports had fallen to 778,982 gallons, and in 1902 to 692,889 gallons. At the same time the production in Canada has steadily increased. Mills are now in active operation in Baden, Elora, Guelph and Montreal, and it is claimed by the Canadian makers that they can now supply the demand of the home market. The trouble is, therefore, that the imports are not decreasing fast enough.

There has been no agitation against the amount of the duty, 25 per cent., which is considered an equitable basis. But inasmuch as the bulk of our importations of linseed oil came from Great Britain, the British preference of 1-3 off makes the duty on the greater portion of linseed oil brought in here 16 2-3 per cent.

The one source of complaint which has in recent years disturbed the trade has been this preference. The linseed oil exported from England is ground in Hull, and it is claimed by the Canadian manufacturers that it is produced to a great extent from flaxseed grown in the Argentine Republic, which, being a foreign country, has no right to the Canadian preference. There is a provision, however, that if a "substantial portion of labor" enters into the production in a preference country like Britain, of an article produced from raw material from a foreign country, it may enjoy the preference. The Minister of Customs is the final authority as to what is a "substantial portion of labor," and has in the past held that the value of raw material from a foreign country must be enhanced 25 per cent. in a preference country to enjoy the 33 1-3 preference under the Canadian tariff.

It has long been claimed that the preference should not be given to linseed oil ground in Great Britain from the Argentine Republic flaxseed. Up to the present this claim has not been upheld by the Minister of Customs, but it is difficult to state what movements may be on foot in regard to the matter before the season's importations start to arrive in the spring.

A NEW OIL COMPANY

The Canadian Trinidad Association, with headquarters at Walkerville, Ont., and with a capital of $300,000, has been incorporated with the following directorate: J. G. Lovell, Wm. Bain, Robert Gowans, E. W. McNeill, S. R. Wilkie and R. Richardson. The business of the new company is to produce, refine and deal in petroleum oil and by-products.

NEW LINE OF PAINTS.

The Grant-Hamilton Company, Limited, Toronto, are making 23 colors of "Sterling" elastic paint for inside and outside house, factory and mill painting. Hardware dealers looking for a new line, which, from the standpoint of either price or quality, is calculated to give satisfaction to customers and profit to themselves, should write to this company for further particulars regarding this line, not failing to mention "Hardware and Metal."

BRUSH CATALOGUE FOR 1903

The United Factories, Limited, Toronto, have just issued their catalogue for 1903, which will be sent to the trade during the next few weeks. In addition to the numerous lines of painters', artists', household, toilet and factory brushes, horse brushes and stable brooms, brooms and whisks, woodenware and fibreware, baskets, mats, twines, cordage and display tables which the company have sold in past years, several new lines, and particularly of brushes, are being introduced to the trade. These new lines are expected by the company to meet with general favor, and should be examined carefully. The catalogue is well illustrated and very comprehensive, comprising 206 pages. A good feature of the work is a number of practical hints concerning the handling and use of brushes, which every hardwareman should allow his clerks to read. If you do not get a copy of this catalogue in the next week or so, drop a card to The United Factories, Limited, of Toronto, mentioning "Hardware and Metal."

SUBSTITUTES FOR TURPENTINE.

A writer in The Naval Stores Review, from Wiesbaden, Germany, says: "I can state through my own experience that the consumption of substitutes, since some years ago, has considerably increased and that varnish manufactories use the same for cheap qualities of varnish for ordinary purposes. The tinware and the basket industries mostly employ varnishes made with turpentine substitutes, and all my endeavors to prove their being useless have been in vain. The lithographic printing offices which formerly employed only spirits turpentine to purify the stones are now using petrol. It is to be regretted that many varnish manufactories spoil their wares by adding substitutes also for the better varnishes without seeing the damage they suffer. As soon as spirits turpentine rises over 45c., the patent turpentine, the Russian and Polish products, find their way into consumption, and a remarkable diminishment in the use of pure spirits turpentine will be the result."

LINSEED OIL.

This is usually looked upon as the quiet season for linseed oil, and as a general rule, with the prices a little easy. England, especially, has her dull season about this time, and usually closes down all works for a short period about Christmas. The exceedingly cold weather and prevailing snow storms in England have caused all cattle to be stall fed, and still the prices hold firm. Canadian dealers are anxiously awaiting the drop in England, so that they will know how to regulate the market in this country. It is surmised that the market across the Atlantic is practically in the hands of a combination.

FOR SPRAYING PAINTS.

The use of the motor spray for painting is coming into general use, especially for rough painting over large surfaces. The Spray Motor Co., London, Ont., are making a spray which has won an excellent reputation for this class of work.

PAINT AND OIL MARKETS.

MONTREAL

THE most striking feature of the business done in Montreal during the past week is the heavy bookings of paris green. Each season a faint hope is indulged in that the demand for paris green will fall off, but this is apparently not in accordance with facts, as last year it had an extraordinary demand, and owing to the continued increase in the area of potatoes planted, it is understood that at least 25 per cent. more green will be required for the coming year. One firm in Montreal report that they have all ready sold about 140 tons, and orders are still arriving by each mail. In the general trade the exceedingly cold weather has somewhat checked the demand for immediate shipment, but a healthy tone prevails in all paint and oil circles and the leading manufacturers report that they have enough business in sight to keep them running full time during the winter and spring. We quote:

GROUND WHITE LEAD.—Best brands, Government standard, $5.00 to $5.25; No. 1, $4.77½ to $4.87½; No. 2, $4.40 to $4.50; No. 3, $4.02½ to $4.12½; No. 4, $3.65 to $3.75, all f.o.b. Montreal. Terms, 4 months, or 3 per cent. off for cash in 30 days.

DRY WHITE LEAD.—$5.25 in casks; kegs, $5.50.

DRY WHITE ZINC.—Pure dry, in casks, 6¼c.; in 100-lb. kegs, 6¾c. No. 1 zinc, in casks, 5¼c.; in 100-lb. kegs, 5¾c.

WHITE ZINC (ground in oil)—Pure, 25-lb. irons, 8c.; No. 1, 7c.; No.2, 6c.

PUTTY.—We quote: Bulk, in bbls., $1.90 per 100 lb.; bulk, in less quantity, $2.05; bladders, in bbls., $2.25; bladders, in 100 or 200-lb. kegs or boxes, $2.40; in tins, $2.55 to $2.65; in less than 100-lb. lots, $3 f.o.b. Montreal, Ottawa, Toronto, Hamilton, London and Guelph. Maritime Provinces, 10c. higher, f.o.b. St. John and Halifax.

ORANGE MINERAL.—Casks, 7c.; 100-lb. kegs, 7¼c.; smaller quantities, 8¼c.

RED LEAD.—Genuine red lead, in casks, $4.50; in 100-lb. kegs, $4.75; in less quantities, $5.75 per 100 lb. No. 1 red lead, casks, $4.25; kegs, $4.50, and smaller quantities, $5.50.

LITHARGE.—Ground, casks, 5c.; less quantities, 5½c.; flake litharge, casks, $5.25; smalls, $5.75 per 100 lb.

LINSEED OIL.—Raw, 63c.; boiled, 66c. In 5 to 9 bbls., 1c. less. Terms, net cash in 30 days. Delivered in Ontario, between Montreal and Oshawa, at 2c. per gal. advance.

TURPENTINE.—Single barrels, 75c.; 2 to 4 barrels, 74c. Terms, net cash in 30 days.

SHELLAC VARNISH.—Pure white, $2.35 to $2.45; orange, $2.25 to $2.35.

MIXED PAINTS.—$1.20 to $1.45 per gallon.

CASTOR OIL.—8¾ to 9¼c. in wholesale lots, and ½c. additional for small lots.

SEAL OIL.—48 to 50c.

COD OIL.—35 to 37½c.

PARIS GREEN.—Petroleum barrels, 13¼c. per lb.; arsenic kegs, 13½c.; 50 and 100-lb. drums, 14c.; 25-lb. drums, 14½c.; 1-lb. packages, 15c.; ½-lb. packages, 17c.; 1-lb. tins, 16c.; ½-lb. tins, 18c.

TORONTO.

There is still little doing except in paris green, which has been advanced 1c. by the manufacturers. Linseed oil and turpentine are both stiff at primary markets, but there is no change here. Other lines are dormant. We quote:

WHITE LEAD.—Ex-Toronto, pure white lead, $5 to $5.25; No. 1, $4.62½ to $4.87½; No. 2, $4.25 to $4.50; No. 3, $3.87½ to $4.12½.; No. 4, $3.50 to $3.75 in packages of 25-lb. and upwards; ½c. per lb. extra will be charged for 12½-lb. pkgs.; genuine dry white lead in casks, $5.02½.

RED LEAD.—Genuine, in casks of 560 lb., $4.50 to $4.75; ditto, in kegs of 100 lb., $5; No. 1, in casks of 560 lb., $3.75 to $4; ditto, kegs of 100 lb., $4.25.

LITHARGE.—Genuine, 6 to 6½c.

WHITE ZINC.—Genuine, French V.M., in casks, $6.25; Lehigh, in casks, $6 to $6.25.

SHINGLE STAIN.—In 5-gallon lots, 60 to 75c. per gallon.

PARIS WHITE.—90c. to $1 per 100 lb.

WHITING.—65c. per 100 lb.; Gilders' whiting, 80c.

GUM SHELLAC.—In cases, 35c.; in less than cases, 40c. per lb.

LIQUID SHELLAC.—Pure orange, in bbls., $2.25 to $2.35; white, $2.35 to $2.45 per gal.; in less quantities, 10c. extra.

GLUES.—Broken sheet, in 200-lb. bbls., 8½c. per lb.; cabinet glue, in bbls., 12c.; emery glue, in bbls., 17½c.; bookbinders', ground, 10½c.; finest American, white, 19c.; No. 1 American white, 15c. per lb.

PUTTY.—Bladders, in barrels, $2.25; bladders, in 100-lb. kegs, $2.40; bulk in bbls., $1.90; bulk, less than bbls. and up to 100 lb., $2.05; bladders, bulk or tins, less than 100 lb., $2.90.

PARIS GREEN.—Petroleum bbls., 14c. per lb.; arsenic kegs, 14½c.; 50 and 100-lb. drums, 15c.; 25-lb. drums, 15½c.; 1-lb. packages, 16c.; ½-lb. packages, 18c.; 1-lb. tins, 16c.; ½-lb. 18c.

PLASTER PARIS.—New Brunswick, $2 per barrel.

PUMICE STONE.—Powdered, $2.50 per cwt. in bbls. and 4 to 5c. per lb. in less quantity; lump, 10c. in small lots and 8c. in bbls.

LIQUID PAINTS.—Pure, $1.20 to $1.40 per gallon; No. 1, $1.10 per gallon.

BARN PAINTS.—65 to 70c. per gallon.

CASTOR OIL.—English, in cases, 9 to 9½c. per lb. and 10 to 10½c. for single tins.

LINSEED OIL.—Raw, 1 to 2 bbls., 63c.; boiled, 66c.; 3 to 5 barrels, raw, 62c.; boiled, 65c.; 6 to 9 barrels, raw, 60c.; boiled, 63c. delivered. To Toronto, Hamilton and London, 2c. less. All quantities of 10 bbls. and over of linseed oil sold only f.o.b. Toronto, Hamilton, London and Guelph.

TURPENTINE.—Single bbls., 77c.; 2 to 3 bbls., 76c. delivered. Toronto, Hamilton and London, 1c. less. For less quantities than barrels, 5c. per gallon extra will be added, and for 5-gallon packages, 50c. and 10-gallon packages, 80c. will be charged.

GASOLINE AND BENZINE.—We quote: Benzine, 19¼c. and gasoline, ordinary, 21¼c. and engine, 22¼c. f.o.b. Toronto.

WINDOW GLASS.

MONTREAL.

The severe weather of the past few days has been very good for the glass business. People are very busy trying to close up both old and new buildings. The dealers feel quite satisfied that there will be no material change in the price before spring, and our quotations are still as follows: First break, 50 feet, $2; second, $2.10 for 50 feet; first break, 100 feet, $3.80; second break, $4; third break, $4.50; fourth break, $4.75.

TORONTO

There is a good movement, and while prices are nominally unchanged, there seems to be considerable cutting. Our quotations are: Under 26 in., $4.25; 26 to 40 in., $4.65; 41 to 50 in., $5.10; 51 to 60 in., $5.35; 61 to 70 in., $5.75; 71 to 80 in., $6.25; 81 to 85 in., $7; 86 to 90 in., $7.75. Toronto, Hamilton and London. Terms, 4 months, or 3 per cent. 30 days. Discount, 15 per cent.

PLEASURES OF THE ROAD.

By "Roadster," in an English paper.

IF there were beneath the sun one single trade or profession whose members were unanimous in its praise, what a rush there would be for it! How paterfamilias would sigh with relief; how the "young gentleman just left school" would apply in his best copperplate for admission to its ranks. But there is not, and this side Utopia never will be, such a city of refuge for "our boys." Up and down the social scale, barrister and butcher, sailor and sweep, all sing the same sad song—"My dear sir, make the lad anything but that; a bare living is the most he can hope for. I assure you nowadays the competition," etc. Of all excuses and drawbacks, the universal scapegoat is that same "competition"—a word so welcome as almost to take rank with "that blessed word Mesopotamia!"

So the bagman, who, whatever be his faults, is at least up to date, comes forward with his little "wail." And the intelligent foreigner in the present, or Macaulay's New Zealander in future ages, will see in his mind's eye a feeble remnant of dispirited men trudging their way, repulsed from shop after shop; here by a notice that "Messrs. Penny & Post see no travellers"; there by a firm whose proprietary articles are all "our own make"; leaving town after town orderless and spiritless, and sneaking at night to their frugal meal and hard bed "in the worst inn's worst room."

A painful picture! If only it were attested by the railway carriage, the street, and the commercial-room. But they seem such "jolly companions every one" these poor "wailers." So jovial and hail-fellow-well-met among themselves; so affable and cheerful with any stranger who finds himself a bagman's vis-a-vis. Are they all forced, the cheerful smiles as they swing from customer to customer, or chaff "Boots" as he puts the bags inside the 'bus, and slams the door—three minutes to catch the train half a mile away! They grumble, it is true, as they sit in conclave at the commercial dinner, or over the evening "fish and tea"; but for men who "haven't taken a line to-day, sir," they speak with marvellous smoothness, and, moreover, display a lively interest in the vagaries of the Stock Exchange which one hardly looks for in men on the verge of despair and ruin.

There are undoubtedly many doing badly on the road; some because they deserve to do badly; others, for whose "best" adverse circumstances are too strong. A small number—as in all other trades—are doing superlatively well. And between these opposite extremes, the main body are doing "as well as can be expected."

It may be said of "the road," as the late George Robins once said of a desirable property brought under his hammer, "For any gentleman requiring this sort of thing, this is just the sort of thing he requires." Does a man like change of scene and society? The road will certainly give it him. Does he weary of the same daily walk to business, the same faces week after week behind the counter or the desk? Is it his taste to sleep one night in a city caravansera, and the next to be the only "gentleman in the parlor" of the one hotel in a country town where they study economy and dispense with gas on moonlight nights? And does he find that his appreciation of "home" is kept more lively by being a "week-end" visitor only? Then "the road" is, of all places, the place for him.

He may be so qualified, and yet not succeed as a traveller. For that he must have a genius for perseverance, and many things besides, a persuasive manner and a taking tongue among the number. But for a man with a talent for travelling, what I have hinted at as pleasures of the road will, if they do not actually smooth his path, yet lift him gently over many a rough place. And there are other alleviations of his lot. A "cranky" customer seen at oftenest weekly or monthly, is not so sharp a thorn in the flesh as a bullying manager or an uncongenial fellow-clerk. You pull yourself together, bow before the storm of grumbles or snubs, and 10 minutes later are outside in the sun, and rid of him till next journey. Even the fussiest of firms can only get at you through the medium of the correspondence clerk and the mailbag, and must confine the hourly interviews and complaints to those "inside." The man who stands behind his own counter soon loses, if success comes slowly, the pride of possession which he first felt. Waiting for trade is weary work. The bagman never waits—except for trains. He pushes forward, working shop after shop, street after street, now a small town, now a city, always hoping, and not infrequently finding that things are better "a little bit further on."

Travellers and tradesmen alike will tell you how the road swarms with unsuccessful brothers of the bag. Very likely; there are failures in every business and profession, but the unsuccessful traveller is always en evidence; the publicity of his work and the breadth of his field of action make this unavoidable. When wheat and chaff grow on separate stalks wholesale houses will send out none but successful men, and we shall probably miss the "cheery failures" whom a modern writer has described as the cream of social life. Meanwhile, threshing machines are not yet out of date, and a great army of weary countermen and clerks chorus the song of Capt. Macheath, and cry, "Let us take the road."

Mr. Oliver McClary, London, Ont., is dead at the age of 87. Deceased was one of the original founders of The McClary Manufacturing Co., from which firm he retired about 20 years ago.

They went and "Told" the Sexton,
And the Sexton "Tolled" the Bell.

STOVES AND TINWARE

AND ALLIED TRADES

HARDWARE AND METAL" has received such general support from the tinsmiths and stove dealers of Canada, and has been so widely recognized as the only trade paper in the Dominion dealing particularly with matters pertaining to these trades, that it has been decided to devote more space and attention to this branch of the metal trade, and to this end a department, "Stoves and Tinware," is started in this issue.

* * *

This department will deal with technical subjects of interest to stove dealers, tinsmiths, etc., as well as with business outlook and conditions affecting the trade. The regular quotations on materials which have heretofore been published in our market reports will be continued in their usual place, and, in addition, an effort will be made to secure any further information of interest or value.

* * *

To be of the greatest service to the trade generally, the department must receive the support and co-operation of its readers. We would, therefore, appreciate any correspondence pertaining to the stove and tinware trades ; would be pleased to answer any questions submitted, or secure any information requested.

GURNEY'S NEW FOUNDRY.

The new foundry and machine shop which The Gurney Foundry Co., Limited, are erecting at Toronto Junction, is being rapidly pushed forward and it is hoped will be ready for occupation early in February. As these premises are quite large they will enable The Gurney Foundry Co., Limited, to cope with their expanding business, filling all orders with the promptness they so much desire, but have found so difficult with their present premises.

FLUX OR ACID FOR TIN ROOFING.

Should acid be used for soldering a roof ? A correspondent of The Metal Worker submits the following answer :

" I would say that, in my opinion, acid should never be used for soldering a roof. If it is strong enough to do its work it is strong enough to do damage if it is not removed after the soldering is done as is the custom when soldering tinware in a shop where a wet cloth removes the acid. This, however, is impracticable on a roof. On an old roof, where the tin is somewhat worn and the iron is bare and rusty, it is quite a common practice to use acid, and the opinion of some is that it does no harm. In such cases, however, a wet cloth is used to wipe off the acid and remove traces of it, or to dilute whatever might remain. For a new roof there is no excuse for using acids. If a wet flux is desired, rosin cut with turpentine will afford a suitable flux that will not interfere with the solder flowing freely. Some use one of the cheaper oils, similar to sweet oil, with beneficial results."

CANADIAN ZINC MINERS SATISFIED.

A correspondent in Sandon, B.C., writes "The zinc mine owners are now realizing good returns on their properties. The abolition of the American duty on zinc ore leaves the United States zinc market open to Slocan producers, and Kansas, Missouri and Texas smeltermen are free to enter the British-Columbian field to purchase Canadian ore. Already The Kanyon Zinc Co.'s agent has contracted for several thousand tons. A freight rate for zinc ore of $11 per ton has been granted by the C.P.R. and Great Northern Railways from Sandon to Zola, Kan. The Slocan Star mine alone has 50,000 tons of zinc ore blocked out which is more than twice the entire shipments of Slocan to date this year."

SETTING THE FURNACE

The following suggestion re the setting of furnaces is giving by The Insurance Chronicle : " Place it on a foundation of brick or stone. Have stone, brick, or metal not less than 36 inches wide in front of the ash-pit. The dome of the furnace should not be less than 18 inches from the unprotected woodwork above. The smoke-stack should not be less than 12 and the hot-air flues not less than 8 or 10 inches from the side walls of combustible material. The hot-air flues should be constructed of IX bright tin, and they should be double where they pass through wood or lath-and-plaster materials. There should be an air-space of at least ½ inch between the inner and outer flues. Set the register in soapstone frames not less than 2 inches wide and well bedded in plaster of paris. Make register boxes of IX bright tin, if they pass through floors. Have the joist and floor timbers framed around them so as to leave an air-space from 2 to 3 inches wide, and cover the exposed woodwork with tin on all sides. Use a metal air-trunk or inlet, with a wire net or grating at its outer opening. Wooden air-trunks are exceedingly dangerous, for at some time a reversal of the draught is likely to occur and carry sparks into the wooden shaft."

SELLING MANTELS, GRATES AND TILES.

HARDWARE dealers are not slow to take a hint, if it is likely to help business in any way. For some time The Batty Stove and Hardware Co., Toronto, have been running an advertisement in "Hardware and Metal," suggesting to hardwaremen that when customers are building a new house they should try to sell them a mantel as well as builders' hardware. Evidently these advertisements have been widely read. "Already," said Mr. Batty to a representative of "Hardware and Metal" this week, " we have received inquiries from all parts of Canada which are leading to orders. During the last few days, for example, we shipped full outfits of mantels, grates, tiles, gas logs, etc., to Marshall & Hunter, Medicine Hat, N.W.T., and to Kyle & Hunter, Wiarton, Ont." This should be a good line for the trade to keep a watchful eye upon at all times, and is in line with the policy "Hardware and Metal" has been advocating, that the retail hardwareman at every point in Canada should be the source of supply for practically everything into which hardware, metal or machinery enters. There are many articles which he could not carry in stock, but by acting as agent for manufacturers he can sell from illustrated catalogue, or, when the order is important enough, can bring a special representative from the interested manufacturers to aid him in getting it. Quite recently a subscriber to "Hardware and Metal" who has been following up this idea of developing his business in this way was enterprising enough to take a local manufacturer at his own expense to see a special machine which he was advising him to get in operation in a neighboring town.

A LISTOWEL FIRM SELLS OUT.

O. Bowyer, Listowel, Ont., has sold his business of stoves and tinware to Adolph & Bonnett, hardware merchants of the same town. This firm will run both lines now.

"ROYAL GOOD CHEER"

SQUARE WITH HIGH SHELF.

STOVE DEALER ROBBED.

Early on Tuesday evening, December 2, a burglary was committed in Montreal which for cool cheek has not often been beaten. The store of Wm. Clendinneng & Son, founders and stove manufacturers, corner of Craig and St. Peter streets, was closed as ususal at 7.30, and apparently not long after a man managed to get in through the side door and opened the large door, allowing his accomplices to enter. They stole three heating stoves and several frying pans, and other kitchen utensils, so it is evident that they must have had an express wagon or a sleigh to carry away the plunder. In spite of this no one could be found who remembered seeing them. Doubtless many persons passed while the burglars were taking away the goods, but the job was apparently carried out so cooly and openly as to disarm suspicion and the matter was never thought of by those who saw them.

GERMAN RAILS IN CANADA.

F. H. Clergue, president of The Algoma Steel Co., gave out the following official statement of the reason for the closing down of the steel mills: "The rail mill has shut down, having filled all orders booked, which have amounted to something over 30,000 tons. The company hope to secure the Temiscaming Railway order, on which to start up again. There being no duty on rails coming into Canada, the present slaughter price of German rails has enabled the Canadian roads to supply their requirements at prices less than cost at the Soo mills, owing to great difference in labor conditions. The Soo mills in every step of their processes, from the mines to the finished product, pay American wages, amounting on the average to 108 per cent. more than German wages. Canada is now sending abroad over $5,000,000 annually for rails, of which amount more than $4,000,000 would be expended in Canadian wages and materials if these orders were given to the Soo mills. The Soo mills have cost over $3,000,000, and over 500 men are thrown out of employment by their closing down."

STARTING.

Ezra Kendall tells a story about riding on a country railroad where the stations were so near together that the train had to begin to stop before it had commenced to start. As a result, the passengers never got anywhere. It was a continual case of coal-up, pull-up, puff-up and back-up.

A great deal depends upon getting well started. Not necessarily after the fashion of a "grand opening" with cigars and drinks all around, and, hic 'round again. Rather not. It can be said of very few successful enterprises that they started with a working majority.

A good start is simply a step forward, with a knowledge of what you are going after and a determination to win at all hazards. Following an upright course with this end in view will win success.

MANTELS, GRATES and TILE.

Are any of your customers building a new house? If so, why not try and sell them a mantel as well as hardware? They will want one, and it will pay you. Write us for catalogue and price.

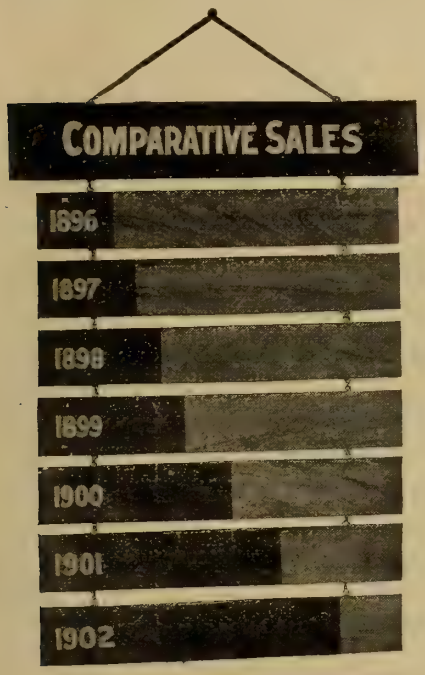
HAMILTON, CANADA.

A STORY OF GROWTH.

SINCE The Sherwin-Williams Co., the large paint and varnish makers, started in business in Cleveland in 1866, their history has been one of steady, progressive yearly growth—a growth to which Canada has contributed very largely. There is no time in the records of the company at which there was any halt in



A year by year comparison of the business of THE SHERWIN-WILLIAMS CO. from 1896 to 1902. It speaks for itself.

their progress. Year by year their sales have increased; year by year they have extended their operations to wider fields; year by year their staff of travelling representatives has been added to, until now the company covers thoroughly every profitable paint field in the civilized world.

A graphic comparison between the business of the company in 1896 and its business in 1902 is shown by the photographs we have reproduced. The pails tell a story of growth made possible by an organization perfect in every detail—by a policy of wise co-operation with customers—by push and energy and persistent advertising. The boards, showing the yearly increase in sales, speak for themselves.

Another illustration of the progress of the company is furnished by the additions made to their facilities during the last year and the many new buildings which are now in course of erection. In Canada, a four-storey warehouse has been added to the Montreal plant, plans have been drawn for an entirely new paint factory, which is to be the most modern and best equipped in the Dominion, and a new distributing depot is to be opened in Winnipeg on January 1. In the United States, a linseed oil mill has been erected in Cleveland, the Chicago and Newark plants are being doubled in size, extensive improvements have been made in the Cleveland plant, and a new division, known as the south-western division, has been established to look after the growing business of the company in the south-western portion of the States.

If we were to analyze the causes underlying the success of The Sherwin-Williams Co., we should find that principal among them are an unwavering stand for high quality and a wise regard for principles of good advertising. The company since its foundation have made nothing but high-class paints and varnishes. They believe that high quality in everything pays consumer, dealer and manufacturer best. And their success and the success of their customers proves that they are right. Their belief in the power of good advertising is fully borne out by their complete advertising organization and the advertising help they give their dealers. We doubt if any company in any line of business does as much to get trade for their customers as The Sherwin-Williams Co.

The company believes thoroughly in co-operation. They believe that it is incumbent upon them to find a market for their products for the dealer. They believe in helping him so far as it lies within their power to turn over his stock quickly and profitably. They believe, and they practice their belief, that if a man's business is worth going after it is worth developing. Those are the principles that have enabled the company to grow so rapidly,

A graphic illustration of the growth of THE SHERWIN-WILLIAMS CO. since 1896.

that have made possible their present position—the largest paint and varnish manufacturers in the world. And the same principles are bringing success to their customers everywhere.

EXPORTS FOR WEST INDIES.

PICKFORD & BLACK steamers are getting good freights for their Windward Island service at present. All the outward steamers from Halifax are being well filled and homeward cargoes are much larger than in any previous season. In the latter case the condition is due to increased sugar purchases at Demerara and other places by Canadian refineries and it is hoped that next season will witness a great expansion in the imports of this article.

"We are getting about all the freight we can handle of a certain class," said Mr. Hensley to The Maritime Merchant, "but would like to see a greater variety. We have made a special effort these several years to interest Canadian manufacturers in the West Indies as a field for their products, but so far have not induced them to do very much. They nearly all admit that there is a chance for a profitable business, but that the home demand is so great at the present time they find it impossible to take up with foreign trade. Of course we are in hopes that these conditions will not be permanent, as nearly all the manufacturers are increasing their output, and, then, again, new people are starting who will compete for trade in the home field, thus making it necessary for others to look for business in outside markets. We think, therefore, that, though slow in coming, when once begun, sales to the West Indies will develop rapidly. We have a standing offer to manufacturers with regard to passenger rates for travelling representatives. We offer them a reduction of 25 per cent. on regular prices, or, in other words, a man can make the round trip to Demerara, 42 days, and have first-class accommodation and meals for $97.50, and will have time enough to do business at Bermuda, Trinidad, all the Windward Islands and Demerara. This just about covers the cost of carrying him, but we consider it worth while, as we are very anxious to develop the export business in all classes of Canadian goods." Mr. Hensley reports numerous inquiries from people who purpose taking a cruise to the tropics this winter. Some are going to remain over a few weeks at Trinidad, and others will come back on the steamer on which they go out. The trip is certainly a delightful one and all who can afford the time should take it."

"Where's your watch?" asked the observant man.

"Why, here it is," replied the man whose prosperity had slipped a cog or two recently.

"But that's a silver one. The one you used to carry had a handsome gold case."

"Well—er—circumstances alter cases, you know."

MARKETS AND MARKET NOTES

QUEBEC MARKETS.

HARDWARE.

Montreal, December 12, 1902.

THE movement in general hardware this week is still lively. The cold weather and good roads have resulted in an active demand for all Christmas goods, and sorting-up orders in skates, hockey sticks, sleigh bells, etc., are quite satisfactory. Some orders for spring, 1903, have been received, but we understand that so far the volume of business done is not as large as that of last year at the same period. The wholesale houses, however, have been stock-taking and are getting ready to place in spring goods, and their orders to importers are heavy. A reduction of 10c. has been made in smooth steel wire, and sisal rope is ½c. lower. Other lines are unchanged in price.

BARB WIRE.—A few orders are coming in for spring. The price of barb wire is $2.90 per 100-lb. keg f.o.b. Montreal, and $2.55 f.o.b. Cleveland.

GALVANIZED WIRE.—Some business has been done in this wire for spring, but the orders are not as numerous as last year. Prices follow: Nos. 6, 7 and 8 gauge, $3.20; No. 9, $2.55; No. 10, $3.30; No. 11, $3.40; No. 12, $2.70; No. 13, $2.80; No. 14, $3.80; No. 15, $4.30; No. 16, $4.55; No. 17, $4.95; No. 18, $5.20. In carlots, f. o. b. Cleveland, the prices are: No. 9, $2.15; No. 12, $2.30; No. 13, $2.40, not dutiable. No. 10, $2.20; No. 11, $2.25; No. 14, $2.50; No. 15, $2.95; No. 16, $3.05, dutiable. In less than carlots, 12½c. per 100 lb. extra is charged.

SMOOTH STEEL WIRE.—Bright and annealed wire is now on a base of $2.50, a reduction of 10c. There is, however, but a small demand. Our quotations are as follows: Bright and annealed, $2.50 per 100 lb. f. o. b. Montreal, Toronto, Halifax, London, Hamilton and St. John. Net extras per 100 lb. are now as follows: Coppered wire, 60c.; tinned wire, $2; oiling, 10c.; spring wire, $1.25; best steel wire, 75c.; bright soft drawn, 15c.; special hay-baling wire, 30c.

FINE WIRE.—There is no change. The discount remains at 25 per cent, with net extras as follows: 1 and 2-lb. hanks, 25c. per 100 lb.; ½-lb. hanks, 37½c. and ¼-lb. hanks, 50c.

BRASS AND COPPER WIRE.—Trade is quiet. The discount on both wires is 62½ per cent.

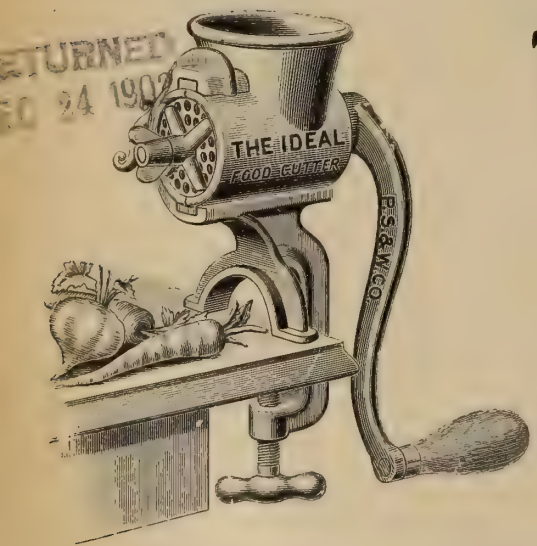
FENCE STAPLES.—The market is still quiet though some orders for spring have been received. Galvanized staples are quoted at $3 per 100-lb. keg and bright at $2.80 per 100-lb. keg; packages of 25 and 50 lb., 25c. extra.

WIRE NAILS.—Business is still quiet and there is no new feature on the market. In small lots, the price is $2.55 per keg, and in carlots, $2.50 per keg, f.o.b. Montreal, London, Hamilton, Toronto, Gananoque, Brantford, Windsor, Ont., St. John and Halifax.

CUT NAILS.—The price is $2.45 in small lots and $2.40 in carlots. There is very little business doing.

HORSE NAILS.—These have not changed in price. The market shows a good deal of activity and prices are unchanged. The discounts are quoted as follows: "C" brand, 40, 10 and 7½ per cent. off; on "M" brand, "Oval," 57½ per cent.; "New City," 57½ per cent.; "New Countersunk," 65 per cent.; "Monarch," 65 per cent.; "Peerless," 50 and 7½ per cent.

HORSESHOES.—There is a brisk trade doing and prices are steady and unchanged. Our quotations are still as follows: Iron shoes, light and medium, pattern, No. 2 and larger, $3.35; No. 1 and smaller, $3.60; snow pattern, No. 2 and larger, $3.60; No. 1 and smaller, $3.85; X L steel shoes, new light pattern, sizes 1 to 5, No. 2 and larger, $3.45; No. 1 and smaller, $3.70; featherweight, all sizes, 0 to 4, $5; toe weight, all sizes, 1 to 4, $6.25. Shoes, more than one size in a keg, 10c. per keg extra. F.o.b. Montreal only.



Cut shows chopper ready for action.

The Ideal Food Cutter.

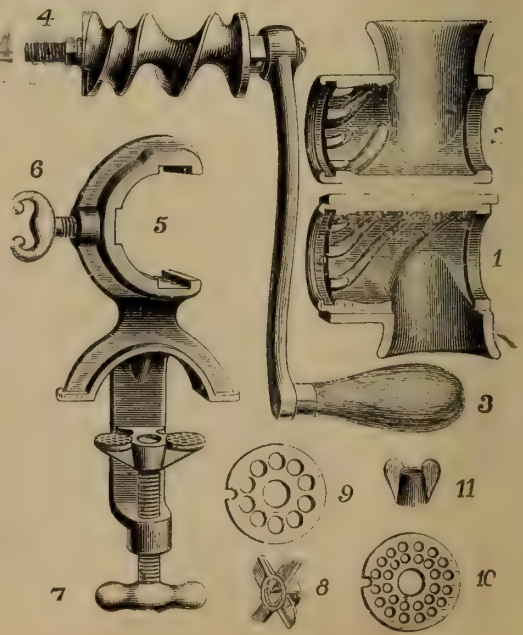
Cuts everything that can be cut in a chopping bowl.

Knives and cutters are made of tool steel—they never get dull.

Does not squeeze, tear or grind, and has no cast-iron legs to wear out.

Has a powerful feed screw which always works with ease and rapidity.

Cut shows parts of chopper.



The "Ideal" is so satisfactory that when once introduced it sells rapidly and almost excludes all others.

RIVETS AND BURRS.—There is but little doing. The discounts follows: Best iron rivets, section carriage, and wagon box, black rivets, tinned do., coopers' rivets and tinned swedes rivets, 60 and 10 per cent.; swedes iron burrs are quoted at 55 per cent. off; copper rivets, with the usual proportion of burrs, 45 per cent. off and coppered iron rivets and burrs, in 5-lb. carton boxes are quoted at 60 and 10 per cent. off list.

BOLTS.—The market rules quiet. There is no change in the discounts this week. Our quotations are as follows: Norway carriage bolts, 55 per cent.; common, 50 per cent; full square carriage bolts, 55 per cent.; machine bolts, 50 and 5 per cent.; coach screws, 66 2-3 per cent.; sleighshoe bolts, 65 and 5 per cent.; blank bolts, 50 and 5 per cent.; bolt ends, 50 and 5 per cent.; plough bolts, 50 and 5 per cent. To any retailer an extra discount of 10 per cent. is allowed. Tire bolts, 67½ per cent.; stove bolts, 67½ per cent. Nuts, square, 3¼c. per lb. off list; hexagon nuts, 3⅜c. per lb. off list. To all retailers an extra discount of ½c. per lb. is allowed.

SCREWS.—A few orders have come in this week, but trade is still quiet and the prices are unchanged. We quote the discounts as follows: Round head bright, 82½ and 10 per cent.; flat head bright, 87½ and 10 per cent.; brass, round heads, 75 and 10 per cent.; brass, flat heads, 80 and 10 per cent.

CORDAGE.—Sisal rope has been reduced in price ½c. The demand for cordage is still slow. We quote: Manila, 14c.; British manila, 12c.; sisal, 11½c. and lathyarn, 11c.

BUILDING PAPER.—Business has been very quiet this week. Quotations follow: Tarred felt, $1.70 per 100 lb.; 2-ply, ready roofing, 85c. per roll; 3-ply, $1.10 per roll; carpet felt, $2.25 per 100 lb.; dry sheathing, 35c. per roll; tar sheathing, 45c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll; O K and I X L, 65c. per roll; heavy straw sheathing, $30 per ton; slaters' felt, 60c. per roll.

SCREEN WIRE CLOTH.—There is no change. The price is $1.40 per 100 square feet.

FIREBRICKS.—The market is quiet and prices show no change. Quotations are as follows: Canadian cement, $1.90 to $2.25; German, $2.20 to $2.30; English, $2.15 to $2.25; Belgian, $1.70 to $1.95 per bbl., ex-wharf, and American, $2.10 to $2.20 ex-cars.

SKATES.—Sorting orders are very brisk. There is no change in quotations. We quote: Halifax pattern, 36c. per pair; nickel-plated, 65c.; ladies' nickel-plated, 60c.; ladies' concave nickel-plated, $1.35 plain hockey, 27c. to $1.35; nickel-plated hockey, 60c. to $2.50; double-end hockey, $1.50 to $3. Skate straps, 35c. to $1.35.

HOCKEY STICKS.—The movement this week continues active, and prices are as follows: Best second growth, goal keepers', $4.20 per doz.; ash, $2.90; elm, $2.25; boys' elm, $1.10; common, 90c. Regulation pucks, $1.50 per doz.

SNOW SHOVELS.—A good business is doing. We quote as follows: "Habitant," $2.25 to $2.40; "Victor," 30 per cent. off; steel railroad shovels, 48 and 5 per cent. off.

FIRE SHOVELS.—There is still a good demand and the market is active under steady prices. We quote as follows: No. 70, 38½ to 40c. per dozen; No. 55, 55 to 60c.; No. 57, 82½ to 90c.; No. 60 82½ to 90c.; No. 65, $1.37½ to $1.45; No.

APR 8 1904

80, 50 to 55c.; "Duplex," No. 7, $1.21; No. 9, $1.52; No. 11, $1.82.

COAL HODS.—Shipments have been quite active. List prices are as follows: Japanned, 16-in., $4.50 per doz.; 17-in., $4.80; 18-in., $5.10; with gold band, 17-in., $5.10; 18-in., $5.40. Galvanized, 16-in., $6.20; 17-in., $6.50; 18-in., $6.80 per doz. The discount is 45 per cent.

LANTERNS.—Jobbers report a brisk trade in lanterns. No quotable changes have been made. Quotations are as follows: Tilt, lift or hinge, No. 0, $4.00 per dozen; Cold Blast, $7 per dozen; dash-board, No. 0, $5.75 per dozen; cold-blast dashboard, $9 per dozen. Extras are as follows: Japanning, 50c. per dozen; copper-plating cold blast, $2 per dozen. The prices quoted are f.o.b. London, Hamilton, Toronto, Belleville, Kingston and Montreal.

METALS.

The metal market is still strong on most lines, and although some tendency toward cheaper iron is reported, it is not likely that any change in this direction will come for some time, and in railway and structural materials the market is still very firm. It is reported that a good deal of business has been held back on account of the high prices, and that any reduction would bring this forward immediately, so that there is little prospect of a dull market for some time. There have been no important changes on the market this week.

BAR IRON.—Prices are still firm, although no actual change has been made. Prices follow: Merchants' bar, $2; horseshoe iron, $2.25; extra refined, $2.25 and forged iron, $2.20.

BLACK SHEETS.—Nothing of importance has occurred on this market. There is a fair demand, and prices are as follows: 28 gauge, $2.65; 26 gauge, $2.60; 20 to 24 gauge, $2.50 and 8 to 20 gauge, $2.50.

GALVANIZED IRON.—There is some demand, but the market rules quiet. We quote: No. 28, Queen's Head, $4.40; Apollo, 10¾-oz., $4.40; Fleur de Lis, $4.15; Comet, $4.10; "Bell" brand, $4.05. For less than case lots 25c. extra is charged.

SOIL PIPE AND FITTINGS.—Trade continues quiet at unchanged prices. The discounts are quoted as follows: Light soil pipe, 3 to 6 inch, 50 per cent.; medium and extra heavy soil pipe, 2 to 6-inch, 60 per cent.; extra heavy soil pipe, 8-inch, 45 per cent.; light fittings, 2 to 6-inch, 50 and 10 per cent.; medium and extra heavy fittings, 2 to 6-inch, 60 per cent.; extra heavy fittings, 8-inch, 45 per cent.

PIG IRON.—The market is still firm at $24 to $24.50 f.o.b. Montreal.

INGOT COPPER.—This is very quiet at about $12.25 per 100 lb.

INGOT TIN.—Some dealers are still practically out of tin. It can be obtained, however, on the market at $26.85 to $27.50 per 100 lb.

PIG LEAD.—A moderate demand prevails. In carlots the price is $2.90 and in small lots, $3.25.

LEAD PIPE.—There is nothing new to report on this market. The price of composition and waste is 8c. and ordinary, 7c., with discount at 37½ per cent.

IRON PIPE.—The market is active and prices are unchanged. We quote as follows: Standard pipe, per 100 feet, in lengths under 19 feet: Black, ¼, $2.40; ⅜, $2.65; ½, $2.85; ¾, $3.65; 1 in.,

SAMPLE ROOM, 13 ST. JOHN STREET,
MONTREAL.

$5.20; 1¼, $7.35; 1½, $8.95; 2-in., $12.55. Galvanized, ¼, $3.20; ⅜, $3.45; ½, $3.85; ¾, $5; 1-in., $7.20; 1¼, $10.05; 1½, $12.20; 2-inch, $16.85. Extra heavy pipe, plain ends, are quoted per 100 feet as follows: Black, ½, $4.20; ¾, $5.25; 1-in., $7.55; 1¼, $10.55; 1½, $12.75; 2-in., $17.60. Galvanized, ½, $5.20; ¾, $6.65; 1-in., $9.55; 1¼, $13.25; 1½, $16; 2-in., $21.90. For threads and couplings 5 per cent. is added.

TINPLATES.—The market is not active. Cokes sell at $4.25 and charcoals at $4.75 to $5.25.

STEEL.—The price of steel is unchanged. A fair demand is experienced. We quote: Sleighshoe, $2.10; tire, $2.20; bar, $2.05; spring, $2.85; reeled machinery, $2.75; toecalk, $2.60; machinery (iron finish), $2.10; mild steel, $2.05; square harrow, $2.15.

SHEET STEEL.—The market is quiet and unchanged as to prices. We quote: Nos. 10 to 20, $2.50; 3-16, $2.50; ¼, 5-16 and ⅜, $2.40.

TOOL STEEL.—There has been no improvement in the demand this week. We quote as follows: Black Diamond, 8c.; Sanderson's, 8 to 12c., according to the grade; Jessop's, 13c.; Leonard's, 7½c.; Jonas & Colver's, 8 to 15c.; "Air Hardening," 45 to 60c.

CANADA PLATES.—There is a fair movement in this line. Quotations are as follows: 52s, $2.70 to $2.80; 60s, $2.85 to $2.90; 75s, $2.80 to $2.85; full polished, $3.75 and galvanized, $4.25 to $4.35; galvanized, 60s, $4.45 to $4.55.

TERNE PLATES.—The market is still quiet and without feature. We quote $7.50.

COIL CHAIN.—A fair trade is reported. and our quotations are now as follows: No. 6, 12½c.; No. 5, 10½c.; No. 4, 10c.; No. 3, 9½c.; ¼-in., 7¼c. per lb.; 5-16, $5; 5-16 exact, $5.25; ⅜, $4.25; 7-16, $4.05; ½, $3.95; 9-16, $3.85; ⅝, $3.55; ¾, $3.50; ⅞, $3.45; 1-inch, $3.45. In carload lots an allowance of 10c. is made.

SHEET ZINC.—This sells at $5.85 to $6.25. The market is quiet.

ANTIMONY.—There is no change. We quote 10c.

ZINC SPELTER.—There is little demand. The price is 5c.

SOLDER.—This goes as usual. Prices show no change, bar solder being quoted at 20c. and wire solder at 18c.

SCRAP METALS.

Mixed country rags have become scarce and the market is firmer. No actual changes in prices have taken place as yet, but an advance is looked for. Copper is dull but unchanged in price, and our quotations are as follows: Heavy copper and wire, 9c. per lb.; light copper, 8c.; heavy red brass, 10c.; heavy yellow, 8½c.; light brass, 5c.; lead, 2 to 2¼c.; zinc, 2½ to 2¾c.; iron, No. 1 wrought, $15 to $16; No. 2, $7 per ton; machinery scrap, $16 to $16.50; stove plate, $13; malleable and steel, $6; mixed country rags, 60 to 70c. per 100 lb.; old rubbers, 6½ to 6¾c. per pound.

HIDES.

Beef hides are quoted 1c. lower this week. Otherwise there is no change in price. A fair trade is doing. We quote: No. 1 hides, 8c.; No. 2, 7c.; No. 3, 6c. Calfskins, 8 to 10c.; lambskins, 60c.

RAW FURS.

Business in raw furs this week has not been particularly active, offerings having been somewhat lighter than a week ago. There is, however, a fair trade doing at the prices we here quote, except, of course, in beavers, which are not now offered:

	Large	Medi'm	Small	Kitts	Fall Beaver $2.00 to $2.50 per pound.		Spring Beav $3.00 to $3.25 per pound.

NO OTHER SHINGLES DO AS WELL AS EASTLAKES.

They prevent fire—are lightning proof—can't possibly leak, because of their patent side lock, and are the very easiest and quickest to apply of any shingle made.

These points explain their unequalled popularity.

If you haven't them in stock, you're not fair either to yourself or your customers.

Metallic Roofing Co., Limited

TORONTO. MONTREAL. WINNIPEG.

lots of money to spend, has, no doubt, been effective in keeping up an active trade so late in the season. Dealers, in anticipation of a good demand for Christmas goods have bought freely, and the prospects are they will not be disappointed. The base price of smooth steel wire has been put down 10c. per 100 lb. There has been an advance in soil pipe and fittings, the discounts now being 45 per cent, for light soil pipe, 50 per cent. for light soil pipe fittings, and 50 and 10 per cent. for medium and extra heavy pipe and fittings, and 45 per cent. for 7 and 8 inch pipe.

BARB WIRE.—A good many orders for barb wire are being booked for delivery later on. The prices are unchanged. We

ONTARIO MARKETS.

Toronto, December 12, 1902.

HARDWARE.

WHOLESALE hardware merchants are busy with numerous orders for all seasonable lines of hardware. Business for December keeps up remarkably well and the jobbers are surprised at the fact, for all fall the volume of trade doing in hardware has been large. But the fact that the country is generally prosperous, and the people having

quote: $2.67½ from Cleveland and 12½c. less in carlots. From stock, Toronto, $3.

GALVANIZED WIRE.—There is an active trade for future delivery in galvanized wire. We quote: Nos. 6, 7 and 8, $3.15 to $3.35 per 100 lb.; No. 9, $2.65 to $2.85; No. 10, $3.20 to $3.40; No. 11, $3.25 to $3.45; No. 12, $2.80 to $3; No. 13, $2.90 to $3.10; No. 14, $3.75 to $3.95; No. 15, $4.30; No. 16, $4.55. Nos. 6 to 9 base from Cleveland are quoted at $2.27½ in less than carlots.

SMOOTH STEEL WIRE.—There has been a decline of 10c. per 100 lb. in the base price of smooth steel wire. Our quotations are: $2.50 per 100 lb. Oiling, 10c.; coppering, 60c. and tinning, $2 per 100 lb. extra. Shipping points, Toronto, Hamilton, London and Montreal, with freights equalized on those points.

FINE STEEL WIRE.—There is a small amount of fine steel wire still going out. The discount is 25 per cent.

WIRE NAILS.—There is a small sorting trade doing in wire nails, but no orders are yet being taken for spring. The trade are waiting for the manufacturers to make prices for future delivery. Quotations are as follows: $2.50 in carlots and $2.55 in less quantities. The shipping points are Toronto, Hamilton, London, Gananoque and Montreal.

CUT NAILS.—There is a small trade doing in certain sizes of cut nails. The price is $2.50 per keg.

HORSE NAILS.—The cold weather is making trade active in horse nails. The prices are unchanged. The discounts are as follows: "C" brand, oval head, 40 and 10 and 7½ per cent.; on "M" brand, 50, 10 and 5 per cent.; "Monarch," 60 2-3 per cent.; "Countersunk" head, 60 per cent.

HORSESHOES.—These are in active demand owing to the coming on of the cold weather. Our quotations are as follows: Iron shoes, No. 2 and larger, light, medium and heavy, $3.45; snow shoes, $3.70; light steel shoes, $3.55; featherweight (all sizes), $4.95; iron shoes, No. 1 and smaller, light, medium and heavy (all sizes), $3.70; snow shoes, $4; light steel shoes, $3.80; featherweight (all sizes), $4.95.

SCREWS.—The drawing near of the end of the year is having the effect of lessening somewhat the demand for screws, enabling the jobbers to replenish their stocks for the next year's campaign. We quote: Flat head bright, 87½ and 10 per cent. discount; round head bright, 82½ and 10 per cent.; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.; round head bronze, 65 per cent. and flat head bronze, 70 per cent.

RIVETS AND BURRS.—There is still a good demand for rivets and burrs at unchanged prices. We quote the discounts as follows: Iron rivets, 60 and 10 per cent. diseount; iron burrs, 55 per cent.; copper rivets, with usual proportion of burrs, 45 per cent.; copper burrs alone, 30 and 10 per cent.

BOLTS AND NUTS.—There has been a slight slackening off in the demand for bolts and nuts, but jobbers are still scarce of supplies. We quote as follows: Carriage bolts, common ($1.00 list), 50 per cent.; carriage bolts, full square ($2.40 list), 55 and 10 per cent.; carriage bolts, Norway iron ($3.00 list), 55 and 10 per cent.; machine bolts, all sizes, 50 and 10 per cent.; coach screws, cone points, 66 2-3 and 10 per cent.; elevator shaft and whiffletree bolts, 50 per cent.

SPADES AND SHOVELS.—Stocks of spades and shovels in Toronto are light, but the demand for them is small. At the present time a great number of snow shovels are being sold. The discounts are 40 and 5 per cent.

ROPE.—There is not much of a demand for rope at the present time. We quote as follows: Pure manila, 14c.; British manila, 12c.; sisal, 12c.; lathyarn, single, 11c. and double, 11½c.; sisal bed cord, 3-cord, 48 feet, 65c.; 60 feet, 80c.; 72 feet, 95c. per doz.

HARVEST TOOLS.—These are quiet. The discount is 60 and 10 per cent.

LAWN MOWERS.—No trade at present is being done in lawn mowers. Prices are as follows: Woodyatt, 12-in. wheels, $7.50; Star, 12-inch wheels, $5.50; Daisy, 12-inch wheels, $4.90; Philadelphia, 10-inch wheels, $6; Ontario, 10-inch wheels, $12.75. The other sizes are in proportion. The discount is 50 per cent.

GREEN WIRE CLOTH.—There is hardly any business doing in green wire cloth. We quote $1.40 per 100 square feet.

EAVETROUGHING, ETC.—Trade in eavetroughing and conductor pipe has dropped off with the cold weather. Prices are: Eavetroughing, 10-inch, per 100 ft., $3.10; conductor pipe, 2-inch, per 100 ft., $3; 3-inch, $4; 4-inch, $5.25; 5-inch, $6.75 and 6-inch, $9.

CUTLERY.—Trade in the fancy lines of cutlery is active. A good many orders are coming forward for immediate shipment and the jobbers are busy. The most active lines at the present time are skates, fancy carving sets, hollow ware, pocket knives, etc.

BUILDING PAPER.—There is a good active demand for building paper. Prices follow: Dry sheathing, grey or straw, 35c. per roll; tar sheathing, grey or straw, 45c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll.

TINWARE AND ENAMELLED WARE.—There is a big movement in stove pipes and stove boards this week. Fancy enamelled ware for the holiday trade is also active.

STOVES, RANGES, ETC.—There has been an active demand for small coal heaters during the week. The certainty that there will be a scarcity of coal throughout the winter is inducing many householders to have wood stoves instead of furnaces, hence the large number of small heaters going out.

SCREEN DOORS, ETC.—These are quiet. Quotations are: Screen doors, common, 2 or 3 panel, walnut stained, 3-in. style, $6.60; stained, yellow or green, $6.80; in natural colors, oil finish, $8.15; 4-in. style, 20c. per dozen extra.

CEMENT.—Trade in this line has quieted down considerably owing to the cold weather. The prices are nominal and unchanged. We quote: Canadian Portland, $2.80 to $3.20; hydraulic, $1.35 per barrel. At the works the prices are $2.50 to $2.70 per barrel.

METALS.

There has been no cessation to the demand for metals for both prompt and future delivery. A general optimism prevails and it is not likely that prices will recede much during the early part of 1903, at least. There has been for some time a scarcity in the small sizes. The prices of the sizes over 2 inches are open and the 4 per cent. discount has been done away with. Tin abroad continues weak and unsatisfactory and the prices here have been gradually sagging until

THE THOS. DAVIDSON MFG. CO., Limited

MONTREAL, P.Q.

the price is now $2 per 100 ℔. lower than a week ago. There is an easy tone to the London, Eng., copper market, but in New York there has been fairly active buying. In iron and steel an advance was looked for in the United States at the beginning of next year, but the action of the railway companies in advancing the freight rates on January 1 will probably delay the advance in the metals.

PIG IRON.—There is still a shortage in the supplies of pig iron and the values are firmly maintained. The employes of The Nova Scotia Steel and Coal Co., at Sydney Mines, N.S., have made a demand on their employers for a 10 per cent. increase of wages, and should this request be granted there are chances of an appreciation being effected in pig iron, as the cost of production will be considerably increased. We quote: $23.00 for No. 1 and $22.50 for No. 2 at the Canadian furnaces. On track, Toronto, No. 2 Summerlee is quoted at $23.

STEEL BOILER PLATES.—There continues a good demand for these and the prices are firm. We quote $1.80 per 100 ℔. in carlots.

STEEL RAILS.—The Clergue interests at Sault Ste. Marie, Ont., have closed down their mills on account of Mackenzie & Mann placing a large order for their railway rails in Germany, where the price is much lower than in this country. The Dominion Government has been asked to impose a protective tariff on the German article to protect the Canadian industry. The Ontario Government Railway Commission have given the order to the Clergue syndicate for 10,000 tons of steel rails at $36 per ton. The foreign tenders averaged about $28 per ton.

TOOL STEEL.—There is a heavy demand for tool steel. Quotations follow: "B C" and "Black Diamond," 10 to 11c.; Jessop's, Morton's and Firth's, 14c.; Jonas & Colver's, 8 to 15c.; ditto, "Air Hardening," 30 to 50c.; Chas. Leonards', 8 to 9c.; Park's "Silver," 12 to 14c.; Park's Special, 15 to 20c.

MILD STEEL.—The inquiry for this steel is active and the article is scarce. We quote $2.50 to $3 per 100 ℔. f.o.b. Toronto.

BOILER TUBES.—An active demand is reported for boiler tubes.

SPRING STEEL.—A good inquiry is keeping up for spring steel. The prices are unchanged. We quote $3 to $3.50 per ton, on track, Toronto.

BAR IRON.—There is a good demand for bar iron with a scarcity of the same. We quote the base price as follows: $2.05. Extras cut to length while rolling: 2 ft. and over, 10c. per 100 ℔., 1 ft. and under 2 ft., 15c.; under 1 ft., 20c.; over 20 ft. by special agreement, according to length and size.

BLACK SHEETS.—Business has been quite active in this line at unchanged prices. We quote as follows: Common, $3.15 for 28 gauge and dead flat, $2.50 for 26 gauge.

CANADA PLATES.—The cold weather has improved the demand for Canada plates. We quote: All dull, $2.90 to $3; half-polished, $2.85 to $3.10, and all bright, $3.75 to $3.85.

GALVANIZED SHEETS.—There is a fair movement in galvanized sheets in small lots, and our quotations are as follows: Queen's Head, $4.50 for 28 gauge; American, $4.40 for 29 gauge; Bell brand, $4.30 for 28 gauge; Gordon Crown, $4.50 for 28 gauge.

TIN.—The demand locally for tin has been more active. The markets abroad are weak and prices here in sympathy have sagged $2 per 100 ℔. We quote $29 to $30.

TINPLATES.—There is a fair demand for these. We quote: Charcoals, $4.75 to $5, and cokes, $4.25 to $4.50 per box.

COPPER.—There has been a brisk demand for copper, although prices are not very close. We quote: Ingot copper, $13 per 100 ℔. and sheet copper, $22 to $23 per 100 ℔.

BRASS.—There is no change in the local market. The discount is 15 per cent.

LEAD.—There is a small movement in pig lead. The base price is $3.50 per 100 ℔. for pig lead and $3.75 for bar lead.

IRON PIPE.—The demand keeps heavy. Some of the jobbers have advanced the prices of some of the sizes, and the discount of 4 per cent. has been done away with. We quote as follows: Per 100 ft., black pipe, $\frac{1}{8}$-in., $3 to $3.25; $\frac{1}{4}$-in., $2.30 to $2.40; $\frac{3}{8}$-in., $2.65; $\frac{1}{2}$-in., $2.85; $\frac{3}{4}$-in., $3.65; 1-in., $5.20; $1\frac{1}{4}$-in., $7.35; $1\frac{1}{2}$-in., $8.95; 2-in., $12.55; $2\frac{1}{2}$-in., $20 to $21; 3-in., $24 to $25; $3\frac{1}{2}$-in., $30 to $32; 4-in., $37.50 to $38.

ZINC SPELTER.—There is a fair demand for zinc spelter. We quote 5 to 6c. per ℔.

ZINC SHEETS.—This market continues active. We quote the base price as follows: Cask lots, $6 to $6.25 and part casks, $6.25 to $6.50.

SOLDER.—There is a fair volume of business being transacted in this line.

ANTIMONY.—This article is quiet. We quote $9 per ton.

PETROLEUM.

Another advance of $\frac{1}{2}$c. has been made by The Queen City Oil Company this

week, which makes the prices of their brands as follows: Sarnia Prime White, 17½c.; Sarnia Water White, 19½c.; Family Safety, 20c., in bbls.; Pratt's Astral, 19½c. in bulk. The Union Petroleum Co quote prices unchanged, as follows: Lily White, Canadian, 17c. in bbls.; Silver Light, American, 19c. in bbls.; Crystal Spray, water white, American, 20c. in bbls.; Pennoline, best American imported, 22c. in bbls. In bulk, 2c. extra.

HIDES, SKINS AND WOOL.

HIDES.—The movement in hides continues brisk and prices are steady. We quote: No. 1 green, 8c.; No. 2 green, 7c.; No. 1 green, steers, 8½c.; No. 2 green, steers, 7½c.; cured, 8½ to 9c. per lb.

CALF SKINS.—There is a fair demand for these. We quote as follows: Veal skins, 6 to 14 lb. inclusive, No. 1, 10c.; No. 2, 8c.; do, 15 to 20 lb. inclusive, No. 1, 9c.; No. 2, 7c.; deacons (dairies), 60 to 70c. each.

SHEEPSKINS.—There is a good call for sheepskins. The price is steady at 75c. each.

WOOL.—This market is improving. We quote: Fleece wool, 14c. and unwashed wool, 7½c. per lb.

TALLOW.—The price of this commodity is weak with no quotable change. The ruling prices are 6¼ to 7c. per lb.

SEEDS.

The outside deliveries of red clover and alsike continue light. Timothy is coming in more freely. Prices at outside points follow: Red clover, $6.25 to $6.75; alsike, $6.50 to $7 and timothy, $1.60 to $1.85.

COAL.

The cold weather has caused such a stampede for coal that local retailers cannot nearly supply the demand. Prices, consequently, range from $8 to $10 in a retail way, and many householders have been unable to buy at the latter figure. Soft coal is unchanged at $5.50 at international bridges.

OLD MATERIAL.

There is no change. Business keeps decidedly active. Our quotations are as follows: Heavy copper and wire, 10c. per lb.; light copper, 8 to 8½c.; heavy red brass, 9½c.; heavy yellow brass, 8 to 8½c.; light brass, 5 to 5½c.; lead, 2 to 2¼c.; scrap zinc, 3c.; iron, No. 1 wrought, $13 per net ton; No. 2 wrought, $4.50; machinery cast scrap, $15.50 to $16; stove plate, $10; malleable and steel, $6 to $6.50; old rubbers, 6½c. per lb. and country mixed rags, 50c. per 100 lb.

NOTES.

Tin has declined $2 per 100 lb.

The prices of some sizes of iron pipe have advanced.

The base price of smooth steel wire is 10c. per 100 lb. lower.

There has been an advance in the prices of soil pipe and fittings.

Lewis Bros., York street, Toronto, are carrying a line of fancy carvers.

NOVA SCOTIA MARKETS.

Halifax, December 9, 1902.

THE condition of the hardware trade for the last week has been extremely good considering the season of the year, though it has fallen off considerably from what it was up to within a few weeks ago. Stock-taking has already commenced so that the rush of this work may be over before Christmas, and everything will be ready for the commencement of business when the new year opens.

* * *

Speaking with a prominent hardwareman last week, he expressed considerable satisfaction with the state of the trade generally during the year. The volume of business done was above the average, and trade conditions were satisfactory. A large amount of building was done during the year, and this brought a heavy demand for everything in the line of builders' materials, while in other lines the amount of business done was a good average with other years. There had been some failures, with consequent losses, but these were below the average. Money had been plentiful throughout the Provinces, and payments were exceptionally well attended to. There had been some disadvantages, especially in procuring "rush" orders in the iron and steel lines; in fact, a rush order meant months, in some cases, before the order was filled. Some business was lost on this account, but it was hoped that next year conditions would be considerably better.

* * *

Just now, as in many other lines of trade, the retailer is doing the heaviest business. Winter is here, and sleigh bells, rugs, blankets, etc., are being renewed. Those who handle cutlery and skates, are also busily engaged, as these are lines in which appropriate and useful Christmas presents can be made. The small boy, too, wants his new sled, and quantities of these are being sold. As the Halifax wholesalers are nearly all retailers as well, the retail trade in these seasonable articles helps to tide over the usual slack season.

* * *

There is no change in the cordage situation. Canadian manufacturers have announced their intention to meet all competition, but their competitors have not further reduced prices, which are given at 14c. base for manila and 12c. for British manila and sisal. A reaction is expected before any great length of time.

* * *

The Halifax exports for the week ending December 6, amounted to $133,910, as compared with $183,850 for the corresponding week last year. No doubt, the falling off was due to the shortage in apple shipments. The exports were apportioned as follows: West Indies, $48,345; Great Britain, $27,755; Newfoundland, $24,068; United States, $27,547; France, $6,145.

R. C. H.

SELLING SADDLERY HARDWARE.

H. S. Howland, Sons & Co. are in receipt of many large orders for sleighbells, horse blankets and girths. The season for these lines is now here and this firm claim their stock is still well assorted. They are also much pleased with the large numbers of orders that are coming in for skates from all over Canada. Boker's and those of The Starr Manufacturing Co. are the popular lines.

H. S. Howland, Sons & Co. wish to call the attention of the trade to the fact that the "Mic-Mac" hockey sticks are branded 1903. There are many imitations of this stick on the market, and the trade ought to see that the goods they get are the properly branded genuine articles.

CLOSING DOWN FOR REPAIRS.

The Waterbury Brass Co., Waterbury, Conn., will close their mills from the night of December 24 until the morning of January 2, 1903, for the usual inventory and repairs. The trade are requested to anticipate their requirements as far in advance as possible.

STEEL REGISTERS.

H. S. Howland, Sons & Co. are carrying a complete line of stamped steel registers, japan finish, with or without borders, in all sizes, from 6x8 in. to 12x16 in. These registers are mostly used for hot air purposes, hut can be used also for ventilation in the ceiling or in the walls.

QUEBEC TAXES TRAVELLERS.

At a recent meeting of the City Council of Quebec the following by-law was adopted:

1. No commercial traveller, being in the city of Quebec, shall take orders or sell goods in trade or other articles on sample catalogue or price list to persons other than merchants, in the ordinary course of their business, before having obtained for so doing a permit or license from the city of Quebec, which license shall be delivered by the City Clerk.

2. To obtain said license a sum of three hundred dollars shall be paid to the City Treasurer.

3. Any commercial traveller doing said business in the city of Quebec, without having obtained said license, shall be liable to a fine not exceeding forty dollars for each offence, and in default of payment of said fine, with costs and imprisonment for a space of time not exceeding two months.

The by-law will come into force on May 1, 1903.

PERSONAL MENTION.

Mr. H. Miller, of Miller, Morse & Co., wholesale hardware merchants, Winnipeg, Man., is in Toronto.

Mr. George W. Weir, late of Rice Lewis & Son., Toronto, but now with The Acme White Lead and Color Co., Detroit, is in Toronto.

The trade will be glad to know that Mr. J. R. Terrill, representing Caverhill, Learmont & Co., who was laid up for some three weeks, is now covering his territory again.

Mr. D. C. Draper, is out in the Eastern Townships representing The Canada Hardware Co., Limited, of Montreal. He is calling on his old friends with a full line of samples of up-to-date hardware, cutlery especially.

Mr. Frank J. Taylor, of The Western Foundry Co., Limited, Wingham, Ont., was in Toronto last week for a few days on business. "Orders are coming in steadily for 'Huron' ranges," he said, "and we are receiving nothing but praise. We have not yet heard of a single complaint."

INDUSTRIAL GOSSIP

THE Dominion Iron and Steel Company in conjunction with The Dominion Coal Company have been shipping considerable cargoes of coal from Sydney, C.B., to Sweden, for Scandinavian railways.

The G.T.R. shops at Point St. Charles, Que., have turned out five new coaches.

The net earnings of The Dominion Coal and Steel Co. for the first eight months of the year were $1,634,000.

The Dominion Wrought Iron Wheel Co., with J. B. and W. H. Tudhope and Wm. Thomson, of Orillia, Ont., directors, have decided to stact the manufacture of wheels at that place.

Dr. D. Jamieson and H. W. Kennedy, of Georgetown, are at Hull, Que., on business in connection with the establishment of a factory there of The International Portland Cement Co.

It is reported than an English and Scotch syndicate of shipowners have completed arrangements for a new trans-Atlantic line, employing vessels of 7,000 to 8,000 tons in the service.

The output of the three great lumber mills at Parry Sound, Ont., is 75,000,000 feet, worth approximately $1,350,000. The Peters and Conger mills have shut down for this season. The Parry Sound Lumber Company's mill is still running.

The D. F. Jones Manufacturing Company, Limited, manufacturers of spades and shovels, Gananoque, Ont., have recently enlarged their factory and increased their power and machinery. By this means they have been enabled to increase their output 50 per cent.

PROPOSED COPPER PLANT.

A copper producing plant is now being talked of for Canada, to be situated either in Montreal or at Shawinegan Falls, Que. The proposed enterprise has for its promoter C. K. Milburne, an English gentleman, who has already large interests in British-Columbian mines.

Although some Montreal firms interested in copper were approached on the subject and did not give any hearty response to Mr. Milburn's proposals to establish such a plant in Montreal, it has not discouraged the backers of the enterprise. The objection raised by the Montreal firms was that since manufactured copper could be brought in so cheaply into Canada there was no field for a plant here. Mining engineers, on the other hand, look with favor upon the project.

It would certainly be a practical method of developing this branch of Canadian mineral products.

The copper would be made by a new electrolyde process, patented by Mr. Milburn, who claims that by this method the copper would be produced at a fraction of the cost that is now required in the United States and could be sold with profit at half the price now ruling. Mr. Milburn has interested both British and American capitalists in the scheme, and he has also been promised the aid of President Melville, of the Great Northern Railway of Canada, who, it is stated, is ready to give a site at Shawenigan Falls, and Mr. Aldrich, manager of the Canadian Pacific smelting works at Trail, B.C.

TRAVELLERS AGAIN SEIZE THEIR GRIPS.

THE travellers and officials from the several branches of The Canada Paint Co., who have been in session for some time, have finished their deliberations and have left for their respective territories.

This was the tenth annual convention of The Canada Paint Company's staff held at the headquarters of the company in Montreal, and much good is accomplished by these meetings. The year about closing has been a banner one, showing an extraordinary increase of this company's business and the plant for 1903 will be very much enlarged to meet the heavy trade which is already in sight.

The Canada Paint Company have acquired another graphite property near Petitcodiac, New Brunswick. The area is about five square miles, and the graphite is of the finest description for painting purposes. This company announce that they will be happy to mail free their booklet describing the many uses for graphite paint if our subscribers will mention this paper.

The Canada Paint Company are manufacturing 250 tons of pure paris green. They are bound to exterminate the "Colorado" potato bug if possible.

Take Hold of the "J.M.T." Lines.

Take hold of the "J.M.T." lines and add pleased and satisfied patrons to your list of customers.

Our line of hardware specialties includes the greatest trade-getters offered in Canada, being of particularly superior quality and especially low price.

In bath-room accessories, plumbing equipment, brass and copper goods, valves, gas and electric fixtures, and tools for engineers, plumbers and steam and gas fitters, our line offers decided advantages for your trade.

Let us talk with you by letter regarding your needs. We can fill your orders promptly and at a price which will be profitable to you.

HEATING AND PLUMBING

PLUMBING AND HEATING NOTES.

GUEST & CO., Toronto, have been appointed sole Canadian agents for the "Brilliant" aluminum gas tips, which are warranted not to rust, corrode, clog or smoke. It is further claimed that they will last forever. These tips should have a big sale throughout the country. When you write for a sample mention HARDWARE AND METAL.

Brown Bros., bakers, Collingwood, are erecting a large bake shop.

A $5,000 Methodist church is to be built at Harriston next spring. It will be on the same site as the present edifice.

Victoria, B.C., is planning for a new hotel of 100 rooms. It will be built by a joint stock company capitalized at $50,000, divided into $1 shares.

The Standard Ideal Sanitary Co., Limited, Port Hope, has been incorporated with a capital of $100,000 and the following directorate: H. T. Bush, A. E. Pipher and Pauline L. Bush, all of Port Hope.

BUILDING PERMITS ISSUED.

TORONTO.

To Walter Marks, for dwellings on Euclid avenue near Lennox street, to cost $4,000; R. M. Ogilvie, architect.

S. Young, for two dwellings on Yorkville avenue, near Hazelton avenue, to cost $5,000.

The Wm. Davies Co., Limited, for addition to 179 McCaul street, to cost $2,000.

George Castle, for one dwelling at 20 Admiral Road, to cost $5,000; H. Simpson, architect.

T. Falconer, for two houses at 152 and 154 Sorauren avenue, to cost $4,000; Mr. Bradley, architect.

A. S. Rogers, for two houses near Elm Road on Nanton Crescent, to cost $6,500; A. R. Denison, architect.

F. Fenton, for two buildings on Bloor street, near Church street, to cost $6,500; Chadwick & Beckett, architects.

B. G. Austin, for store and three dwellings on Bloor and Margueretta streets, to coat $7,200; R. Ogilvie, architect.

Phillip & Davis, for two dwellings on Admiral Road, near Lowther avenue, to cost $7,000; H. Simpson, architect.

H. S. Marvin, for eight dwellings on Gore Vale avenue near Arthur street, to cost $12,000; G. R. Harper, architect.

Ambrose Kent, for four dwellings, near Lappin avenue, on St. Clarens avenue, to cost $16,500; F. H. Herbert, architect.

James Rodgers, for store and dwelling on Bloor street, near Brunswick avenue, to cost $2,000; Bond & Smith, architects.

PLUMBING AND HEATING CONTRACTS.

TORONTO.

Guest & Co., Toronto, have the contract for steam-heating a factory for Mayell & Co., Richmond street east.

The Bennett & Wright Co., Limited, have the contract for overhauling the heating, plumbing and electric wiring of the Bank of Commerce building, and for plumbing, heating and wiring in the large addition to the building on Jordan street; for the plumbing, heating and electric wiring in an addition to the Dominion Bank, corner Spadina avenue and College street; for plumbing in The Toronto Hardware Co'.s new factory on Dufferin street; for plumbing, heating and wiring in a new house for Geo. Gowanlock, architect, Walmer Road, and for plumbing, heating and draining new offices, mills and other premises for The Copper Cliff Mining Co.

A BIG CONTRACT.

The establishment of factories and mills in Canada means a lot of business to the plumbers of the country now. The advent of the sprinkler system has added to the calls on the plumbing firms to a degree that was not anticipated a few years ago. An instance of this has been furnished by the contract given by the Canadian Cereal Co., Peterboro', to Purdy, Mansell & Co., Toronto. This firm have had 25 men busy at the new mills in Peterboro' since last May, and their bill for fire protection (a Grinell Automatic Sprinkler System), alone amounted to over $22,000. The reason for the unusual activity in plumbing circles this year is, in all probability, due in a large measure to the increased demand for plumbers and steamfitters by the new factories springing up all over the land.

MONTREAL PLUMBING TRADE.

The severe weather of the past few days has caused a rush with the plumbers in the way of small jobs, especially repairs on steam and hot-water pipes. One dealer had 32 calls for his services in four hours, on Tuesday morning of this week. The trade generally seem to think that the contract work for this year is at an end, that is, as far as new contracts are concerned, but some of the leading plumbing and heating firms have contracts that will not be finished for three months. It would be hard to find a more satisfied lot of business men with the present year's trade than the plumbers. The greater part of the plumbing and heating trades are making an endeavor to get straightened out and be ready for stock-taking about the end of the year.

HEATING FROM A HOTEL RANGE.

A CORRESPONDENT in Tillsonburg, Ont., asks the following question of The Metal Worker: "Can I get satisfactory results from a hot-water radiator connected to the water front of a hotel range? There are two water fronts in the range, one being connected to a 40-gallon boiler. The radiator can stand in the hall on the floor above, directly over the range. The desire is to heat six small bedrooms and a hall. The size of these rooms in all occupies a floor space of 27 x 30 ft. The water front is tapped for 1-in. pipe. What sized radiator would be necessary, or will a pipe coil heat better?"

The answer given was as follows: "There is no difficulty in heating a radiator on the floor above a range by circulating hot water through the water back in it. In this instance it would be well to connect the return pipes of the two ranges by means of a small pipe to serve as an expansion pipe. Whether the fire chamber is large enough and the way the fire in the range is run is sufficient to heat the water that is needed for heating so much space are questions that can only be answered by our correspondent, who is on the ground and knows the conditions. Assuming that the ceilings on the upper floor are 8 ft. high, there should be about 6,500 cubic feet of space to heat. Ordinarily, to heat this amount of space to a comfortable temperature, 1 square foot of surface to 30 cubic feet of space should be provided which would require a radiator having 290 square feet of surface. We assume that it is only desired to take the chill off these rooms, and that they are to be heated from a large radiator in the hall by leaving the doors open or by means of transoms over the doors. Under such circumstances a radiator having 25 or 30 per cent. less surface might serve a satisfactory purpose. But it would be better if a larger flow and return pipe could be used. A radiator of this size should have at least 1¼-inch pipe, and it is possible that a special water front could be secured having openings for this size of pipe. A pipe coil would heat best, but on its construction depends whether or not it would hinder circulation more than a radiator."

Bicycle Supplies

There is lots of good business to be done and the hardware dealers should do a big share of it.

Write us and we will tell you how to do it for 1903.

CANADA CYCLE & MOTOR CO., Limited,

Toronto Junction, CANADA

MANITOBA MARKETS.

WINNIPEG, December 8, 1902.

BEYOND the fact that sorting trade in Christmas goods is very active and general trade good, there is practically nothing new to say of the hardware situation. In paints and oils there continues a fair and steady trade, and this line will be more in demand than is usual in the winter months, owing to so many buildings having been got in shape for finishing during the winter.

The fuel question continues to be an active one. The supply of hard coal, excepting such as can be brought in by the all-rail route, is now known, and while it is not at all equal to the ordinary winter requirements, there does not appear to be any danger of a fuel famine. Such a large number of people dreading the scarcity and additional cost of anthracite have made other provisions for winter heating. Snow having come early and the weather turning cold, there is every prospect of an early and abundant supply of wood; indeed, there would be plenty in the city now were it not for the shortage of cars to bring it in.

Very many stoves and furnace grates have been put in for the purpose of burning the native coals, such as Crow's Nest Pass, Galt and Souris.

The lumber camps are all very busy getting ready for the opening of the season. There is great promise of a large amount of bush work in getting out lumber, ties, telephone and telegraph poles.

There is no change of price in either hardware, paints, oils or glass to record for the week.

MR. M'CORMICK THE NEW PRESIDENT.

The Montreal Metal and Hardware Manufacturers' and Merchants' Association held its annual meeting last week at which the officers for the ensuing year were elected. The following members were present: President, Jas. W. Pyke; G. A. Kohl, Jas. Davidson, A. A. Brown, Wm. Starke, F. O. Lewis, Thos. L. Paton, Thos. H. Newman, F. Bacon, W. S. Leslie, F. Hopkins, H. J. Fuller, W. S. Gardner and Wm. McMaster.

The officers elected were:
President, J. C. McCormick.
Vice-President, Geo. Caverhill.
Treasurer, G. A. Kohl.
Directors, H. J. Fuller, T. H. Hopkins, T. L. Paton and Wm. Starke.

A committee was appointed to make arrangements for the second annual dinner of the Association, which is to take place in the near future. Mr. James Davidson, who, during the past year, has ably represented the association on the Council of the Board of Trade, was again chosen for the nomination to that position.

HOW WHOLESALERS SHOW GOODS.

IF there is one thing more than another in which a great many hardware merchants are behind dealers in other lines of business, it is, perhaps, in the displaying of their goods to advantage in the store, and very often also in the window. It is such an easy thing to get into a rut in this matter, that it is not to be wondered that many in the trade give but scant attention to the proper display of their goods. Wholesalers have found it to the greatest advantage to arrange their varied samples in a manner that not only attracts the most attention from visitors, but also affords them an opportunity of examining closely the workings of the different articles. The retailer can profitably take a leaf out of the wholesaler's book in this regard. A visit to a thoroughly up-to-date wholesale hardware establishment will give anyone many good points on how to show goods.

One can hardly find a more suitable place to pick up novel and useful ideas of this kind than in the warehouse of The Canada Hardware Company, DeBresoles street, Montreal. Not long ago "Hardware and Metal" called attention to their moving the offices of the managing staff from the first floor to the ground floor, where they not only have much more room but are provided with one of the finest and most modern and up-to-date sample rooms to be found in any Canadian wholesale hardware house. The general idea they have kept before them has been to mount the goods wherever possible in such a manner that they could easily be worked by a customer, and have all their good points examined closely.

The first cut here shown gives a view of the front section of their sample room as it looks to one just entering the warehouse. Prominent in the foreground will be seen two large stands, on which are mounted blocks holding samples of builders' hardware, each block being a working model of the lock it samples. This is a clever American device which has been brought here by The Canada Hardware Company, and which cannot be beaten by any other method now in use as a means of showing such goods to advantage. These locks, it should be mentioned, are all of the latest designs and are continually being changed as new patterns are introduced on the market.

On the left side of the sample room can be seen a row of glass gun cases, containing samples of nearly every description of gun. In these cases are also shown sporting goods and ammunition samples. Underneath the cases are closets containing dust-proof trays, on which are arranged gun implements of all sorts, wads, cartridges, etc. Two doors closing over each set of trays protect the goods perfectly from dust.

Opposite the gun cases, on the other side of the sample room, is a long row of sample boards revolving on pivots and holding the smaller articles of builders' hardware, and padlocks. Both sides of the boards are covered with these goods as well as the back of the case, behind them, and by turning them in any way desired, the goods can be seen and examined as satisfactorily as though held in the hand. These boards are a great improvement an the old-time green cards which were formerly employed for this purpose. They can be repaired more neatly and with greater ease and can also be renewed whenever desirable.

Aloog this same side of the sample room are the stocks, dies, and plumbers' tools. Following them come samples of shovels and harvest tools placed along the wall on implement brackets made especially for the purpose. At the end of this side the kitchen utensils and meat choppers are displayed, being attached to

Wood Turnings, Hand Bench and other Screws Mallets, Handles, Vises Clamps, Tool Chests Croquet, Lithographs Wood Toys, Novelties

and also the celebrated

Wood's Patent Car Gate

For Street and Steam Railroad Cars.

The R. BLISS MFG. CO.

Pawtucket, R.I., U.S.A

Canadian Representative: ALEXANDER GIBB, 13 St. John St., MONTREAL.

75 YEARS. ESTABLISHED 1825. 75 YEARS.

shelving so as to be easily operated by customers.

In the middle of the room, at the rear, such goods as wringers, washing machines, etc., are arranged, and here there is also arranged a table of vises, which may be seen in the second photograph.

Going down the centre of the room towards the entrance, we come to the cutlery showcases, arranged in the form of a square, in the centre of which there is a telephone exchange. These cases are arranged with two rows of drawers, fitted with concealed electric lights which throw a strong light directly on the goods and are of much advantage on dark days or in the evenings.

From the cutlery cases run towards the front of the sample room two parallel lines of glass showcases with an aisle between. These cases contain carvers, fancy goods, plated ware and revolvers.

This second illustration is a view of the sample room taken from the rear, the offices having been just behind where the camera was placed. We can here see another row of the revolving boards; these showing shelf hardware and tools.

Above them, on the shelf made by the cases, there is ample room to show coffee mills, bone mills, lard presses, wheelbarrows, etc.; while over all, on the walls, a neat display has been made of sample cards of nails, horseshoes, horse nails, files, rivets and paints on palettes.

There is no crowding of goods here. All are well placed and given ample room, notwithstanding that so many different articles have to be shown. Salesman and customer are alike at an advantage, the one in making the best display of his goods possible, the other in making a selection of what he needs and of having placed before him many articles which, without seeing, he might overlook.

BUSINESS CHANGES.

DIFFICULTIES, ASSIGNMENTS, COMPROMISES.

CARPENTER & CO., contractors, of Fort William, Ont., have assigned to Ernest A. Morton, and their creditors meet on December 16.

A. Desmarteau is curator of Aumond & Caty, contractors, Montreal.

Joseph Leduc, general merchant, of St. Isidore de Prescott, Ont., is offering to compromise.

Lamarche & Benoit are curators of J. N. Bisaillon, general merchant, Ste. Angele de Monnoir, Que.

The creditors of Greenleaf & Daring, contractors, Windsor Mills, Que., hold a meeting on December 13.

A. Dalphe, general merchant, Varennes, Que., has assigned, and his creditors held a meeting on December 9.

The assets of John McArthur & Co., paint dealers, Montreal, have been sold, and McArthur & Co. are offering to compromise.

Bilodeau & Chalifoux are the curators of Desire Houlle, contractor, of Montreal, and his creditors held a meeting on December 9.

J. J. Gawley, general merchant, Belmont, Ont., has assigned to Albert Snyder, and his creditors will meet on December 15.

PARTNERSHIPS FORMED AND DISSOLVED.

Hathaway & Pierce, blacksmiths, of Wallaceburg, Ont., have dissolved, and F. Hathaway continues.

SALES MADE AND PENDING.

The assets of W. A. Patterson, general merchant, Brysonville, Que., are to be sold.

W. L. Quinette, general merchant, of Londesboro', Ont., is advertising his business for sale.

The assets of A. A. Dugas, general merchant, Ste. Anne des Monts, Que., are to be sold on December 18.

CHANGES.

Gammage & Co., bicycle dealers, Ridgetown, Ont., are out of business.

Sevigny & Bergeron, general merchants, St. Flavien, Que., have registered.

A. Robitaille & Frere, carriagemakers, St. Laurent, Que., have registered.

Wilson & Co., blacksmiths, Macleod, N. W. T., have sold out to Fancy & Co.

McElroy & Sons, general merchants, of Richmond, Ont., have sold out to Lewis Bros.

Alberta Daly, general merchant, of Strathcona, N.W.T., has sold out to W. Brunelle.

Brownstone & Steinburg, general merchants, Rosenfield, Man., are retiring from business.

C. C. West, general merchant, of Hopewell Hill, N.B., has sold out to G. W. Newcombe.

Noble & Graham, agricultural implement agents, Carman, Man., are succeeded by Graham & Co.

FIRES.

E. N. Breckenridge, general merchant, Aylmer, Que., was burned out; partially insured.

Sliney & Mitchell, dealers in stoves, etc., St. John, N.B., have sustained slight damage by fire.

The planing mill of James A. Hewitt, builder and planing mill owner, Grimsby, Ont., has been burned.

R. F. Anderson & Co., wholesale and retail hardware merchants, New Westminster, B.C., have been burned out.

DEATHS.

Jeremiah Tracy, jr., general merchant, Tracy Station, N.B., is dead.

A NEW DEVICE.

Alexander Gibb, who is the Canadian representative of S. R. Slaymaker, Lancaster, Pa., is showing an attractive assortment of their padlocks, put up one dozen on a card, which are selling rapidly. Unlike the old-fashioned kind, these are attached to the cards by locking the shackle to rings sewn to the card, the keys being hung on small hooks beside them. The advantage in this is apparent, for the cards can always be kept full, whereas in the old-style cards, as soon as the string which held them was broken for one lock all the others became loose.

Common galvanized iron

has all the faults there are;

the worst one is its varying.

Apollo is uniform.

H. Boker & Co.'s registered brand of "**King Cutter**" Razors is their finest production in quality. Equal to same are :

"KOH-I-NOOR," SOLD BY CAVERHILL, LEARMONT & CO., MONTREAL.
"TRUE BLUE," SOLD BY RICE LEWIS & SON, TORONTO.

"**KING CUTTERS**" **Sold by all leading wholesale houses.**

CURRENT MARKET QUOTATIONS.

December 12, 1902.

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figures being for larger quantities and prompt pay. Large cash buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list, as the desire is to make it perfectly accurate.

BRADSTREET'S

Capital and Surplus, $1,500,000. Offices Throughout the Civilized World.

Executive Offices: Nos. 346 and 348 Broadway, New York City, U.S.A.

THE BRADSTREET COMPANY gathers information that reflects the financial condition and the controlling circumstances of every seeker of mercantile credit. Its business may be defined as of the merchants, by the merchants, for the merchants. In procuring, verifying and promulgating information, no effort is spared, and no reasonable expense considered too great, that the results may justify its claim as an authority on all matters affecting commercial affairs and mercantile credit. Its offices and connections have been steadily extended, and it furnishes information concerning mercantile persons throughout the civilized world.

Subscriptions are based on the service furnished, and are available only by reputable wholesale, jobbing and manufacturing concerns, and by responsible and worthy financial, fiduciary and business corporations. Specific terms may be obtained by addressing the Company at any of its offices. Correspondence Invited.

To the Dealer

If you contemplate changing or adding to your Range line during the coming year it will pay you to communicate with us, and let us explain to you what our **"CROWN HURON"** Range offers in the way of larger profits and more satisfied customers than can be obtained with any other Range on the market.

Every sale secures you a permanent customer. Read what one of our customers says:

"Berlin, December 8, 1902.

"So far, the 'Crown Hurons' I have put out are giving very best of satisfaction, and I think without a doubt you have a WINNER.

"G. E. POTTER."

THIS IS THE RANGE IT PAYS TO HANDLE. MADE BY US, AND US ONLY.

MONTREAL.

Some Good Reasons Why we claim your trade

FIRST—The brass we make is the standard by which all other brass is judged.

SECOND—It was good enough for good people 40 years ago, and now that we are making a better brass it ought to be good enough for the younger generation.

THIRD—WE ARE ON THE SPOT with a full and complete stock for shipment same day order is received. This alone is worth a good many dollars in these rush times.

FOURTH—We have issued a comprehensive catalogue classifying over a Million Pounds. It's here for the asking.

EXIT (?) OF THE MERCHANT.

ONE sometimes hears it remarked that the day of the wholesaler is departing and that the time is coming when the manufacturer will send his products direct to the retailer. Now we are told that the retailer is to join the wholesaler in the exodus from the commercial field, and that the manufacturer is to pass over the heads of both in getting his products to the consumer.

The author of this startling declaration is Mr. T. M. Humble, the Toronto representative of La Presse. Mr. Humble has taken upon himself the task of educating manufacturers up to his ideal in regard to advertising. And this argument is one of the links in the chain which he is endeavoring to weld by which he proposes to pull them away from the columns of the trade journals.

A chain, we are told, is no stronger than ts weakest link. If this be true, and no one has ever questioned it, La Presse's representative has welded a pretty weak chain indeed.

He is not a wise man who would deign to say what the future will not bring forth. We are living in an age when great things are happening, when science is working wonders, when what was considered impossible yesterday is being accomplished to-day. It is possible that in the future the housekeeper may, by pressing a button, be able to obtain not only light and heat, but her food, clothing and general household supplies as well. But even then it would by no means follow that she would no longer require the retail dealer or that the latter in turn would no longer have need of the wholesaler.

Neither the wholesale nor the retail business is a sinecure. Each has its place in commerce. Each is a centre for facilitating the distribution of the products of the farm and factory. It was this work of facilitating the movement of merchandise that brought each into existence. When one or the other fail to perform this office it will disappear from the commercial world. But the tendency of the times does not indicate that either are likely to disappear. Retail stores and wholesale warehouses may be relatively fewer in number. But in size and importance they are likely to be relatively larger. At any rate, that is the tendency of to-day in trading as well as in manufacturing concerns. And, of course, the larger they are the greater will be their utility.

We are tending more and more towards specialization. The merest schoolboy recognizes this. The conditions would have to be of the very opposite in order to force the retailer and the wholesaler out of business. As the size and importance of the retail stores and wholesale warehouses increase, the number of lines they carry in stock will naturally multiply. And thus both the consumer and the retailer will be able to have more of their wants supplied under one roof than under the old conditions. In other words, the wholesale houses and the retail stores will possess greater facilities for doing business, and, consequently, show even greater reason for their existence.

BUSINESS MEN IN CIVIC BODIES.

OUR municipal governing bodies are weak because their members are deficient in the strength which men of practical business experience bring.

Society influence and political pull are all too powerful factors on election day to expect anything else as long as the business men in the various municipalities do not use their influence and mark their ballots in favor of men of the desired type.

We would not for one moment advocate the election of business men because they are business men. We only do so because they are the best qualified for the duties appertaining to municipal administration. Those who would successfully govern a city and make and unmake its laws must of necessity be possessed of the quality of business commonsense. No sane man would for one moment question that. And yet, while in the abstract we acknowledge this to be good doctrine, in practice our actions take a contrary course. In other words, we preach one thing and practice another. We acknowledge the fitness of the business man, but we choose Barabbas the ward heeler, the political partizan, the man who is merely using his position or his party as a stepping-stone to civic or civil service.

A few weeks hence the electors of the different municipalities in Ontario will be electing their representatives to the local governing bodies. The duty devolving upon them if they desire good civic government is obvious.

THE QUESTION OF RECIPROCITY WITH THE UNITED STATES.

IT is to be hoped that no one in Canada anticipates the realization of closer and better trade relations in the near future between this country and the United States because at Detroit last week the National Reciprocity League of the United States adopted a resolution favoring reciprocity with Canada. It is quite true the resolution was strongly worded, urging that "the Government of the United States should take immediate steps to secure closer and more advantageous trade relations with Canada, and that reciprocal relations beneficial to both countries should preferably follow the general lines of the removal by both countries of the duties on the natural products of each, and such mutual extensions of the free list and reductions and changes of the duties on the manufactured products of both as will give to each a low rate of duty as is given to any other country."

The language used by some of the speakers at the convention was even stronger than the words of the resolution, part of which is quoted above. Mr. E. N. Foss, of Boston, a director of three large manufacturing concerns and the owner of extensive iron works, made the bold statement that "the New England manufacturers required reciprocity in raw materials with Canada to save their workshops and factories from being closed. * * * If Canada does raise her tariff to our tariff against her, then many of our New England mills and factories must close down."

"In Canada," declared ex-Governor Lind, of Minnesota, "they can raise all the products of the northern zone, and they have what the people of the States require, and it is not right to prevent the free exchange of these commodities. * * * The sensible course for the United States is to treat Canada as if she were in the Union."

What a difference from some of the utterances in Congress in 1864, when the Bill to abrocate the treaty of 1854 was being discussed! Nothing scarcely unkind enough or derogatory enough could be said. Canada was of no consequence. We had no market in Great Britain. And Representative Baxter declared: "They (the Canadians) have nowhere else to go but to our (the United States) markets."

Again, at the Reciprocity Convention, held in Detroit in July, 1865, Hon. J. W. Potter, United States Consul at Montreal, declared: "It is not the policy of Americans to continue the treaty. And within two years after its repeal Canadians themselves will apply for admission to the United States." This was 37 years ago, and still Canada has not sought admission to the United States.

But in spite of the change in sentiment toward Canada, the dissipation of much of the ignorance that abounded in regard to this country, and the resolution adopted at the recent convention, the politicians in the United States are far too strongly entrenched in their opposition for the most ardent advocates among the commercial class in both countries to expect a realization of their hopes for at least some years to come.

Notice To Advertisers.

Thursday next being Christmas Day the forms of HARDWARE AND METAL will go to press one day earlier than usual for the issue of December 27.

Will advertisers please note that all new copy and changes must be in our hands on **TUESDAY, 23rd** inst? We cannot guarantee to change advertisements after that date.

THE PUBLISHERS.

The reciprocity treaty of 1854, which provided for free interchange of the products of the sea, the soil, the forest and the mine, was the result of many years of agitation more or less continuous. Away back in 1816, President Madison brought the subject before Congress in a special message; and the Administrations of Munro, John Quincy Adams and General Jackson also interested themselves in the question. In 1847 the British Minister at Washington made a proposal for a reciprocity arrangement with Canada, and in the same year our own Parliament authorized the admission, free of duty, of natural products of the United States as soon as Congress had passed a similar measure.

The New York Chamber of Commerce took the question up in 1852, and the treaty of 1854, which was adopted by the United States in 1865, was the outcome. Webster, Everett, Douglass, Eward, Marcy, Dix, Clayton, Cushing and other such political stalwarts were supporters of reciprocity with Canada. But where is there to-day in the United States such advocates of the cause? Echo answers, where?

One thing we do know, and that is that the opposition of certain interests in the United States has so far been able to burk all attempts at reciprocal arrangements with Cuba, Jamaica and Trinidad. And if these can succeed what can we expect should a treaty between Canada and the United States come before Congress for ratification? It does not require the vision of a prophet in order to anticipate what the result would be.

While it may be in the distant future, we believe that ultimately the trade relations between the two countries will be more equable. The politicians will not be able to have their way always. The business men in the United States are awakening to the fact that the inequality in the two tariffs cannot be maintained except to the injury of their own country. And the more they realize this the more will they exert themselves to remove or modify the cause.

In the meantime it is the duty of Canada to sit still and await results. There must be no more importuning. They must come to us, not we go to them.

CANADA'S IMPORTS OF IRON AND STEEL.

NOTWITHSTANDING the fact that Canada has within the last four or five years experienced an unprecedented development of her iron and steel industries, this country is to-day one of the largest purchasers of iron and steel and the manufactures thereof in the world.

From the United States alone we buy practically as much in these lines as does the whole of Europe. The figures for 1901, as given by the U. S. Bureau of Statistics, in the Annual Review of Foreign Commerce of the United States (page 4349), show an increased steel export of $43,812,323 to Europe and $43,518,993 to British North America. The totals for 1902 have not yet been published in detail, but it is made clear that while the exports of these lines to Canada were well main-

tained, the exports to Europe have seriously diminished.

In referring to this the report says: "In 1899 and immediately preceding years the iron and steel industries of Europe were exceptionally prosperous; there was an active demand and prices were high. * * * But these conditions have materially changed; the European demand and European prices have declined."

The above is interesting in view of the fact that it is only a year or two since trade papers, newspapers, politicians, and trade theorists were expatiating continually regarding the remarkable inroads of United States manufacturers in the European markets. So much noise was made, so much enthusiasm manifested by United States persons and papers over the European market, that it seems odd to learn from the returns that the much-vaunted European market has taken less United States iron and steel manufactures than Canada has needed for her rapidly-extending industries.

Canada may not compare with European countries in population, but in industrial progressiveness and commercial expansion this country leads the procession.

Will Canada continue to be as big a buyer of iron and steel as in recent years? The answer cannot fail to be in the affirmative.

This country has just entered on an era of expansion. To-day all our manufacturers of iron and steel goods are finding difficulty in keeping pace with their orders. Talk of extension of old and establishment of new works is general. And every new factory or foundry brings in its train a new demand for machinery and supplies and opens new avenues of trade. However, the population of the country, especially in New Ontario and the Northwest Territories, is growing as never before, about 60,000 people having come in from the United States alone in the year.

The cumulative force of events plainly points to a continuance in ever-increasing volume of the era of prosperity which has contributed so largely to the development of Canadian industries and to the necessity of purchasing the raw materials, machinery, tools, etc., needed in these industries.

THE CANADIAN NICKEL INDUSTRY.

IN an interview published in The Toronto World, Mr. J. R. Gordon, of Sudbury, Ont., states that over $8,000,000 of United States capital has been invested in the nickel and copper mines about Sudbury, and that development work is being rapidly extended, over 5,000 men being employed. In referring to the matter, Mr. Gordon said:

> There is one thing, however, which threatens the prosperity of the business. That is the export duty talked of by the Government. If that is put on the produ t of the mines it will surely ruin the business. Of course, the object of the Government is to force the complete smelting of ore residue in Canada and, therefore, give employment to as much labor as possible. This is entirely impracticable. In the first place, the production of a thousand miners is easily reduced to the commercial article by 30 people. Thus the labor of 1,000 men is jeopardized in the hope of giving employment to 30 men. It is only the matte which is shipped to the United States. This is the amalgam left after the base minerals have been removed. To treat this matte sulphuric acid, salt cake and other reagents are required, which are not available here. Therefore, an export duty will retard the mining of copper and nickel very materially without contributing in anyway to the prosperity of the country.

The World commented on Mr. Gordon's remarks as follows:

> Mr. Gordon's remarks must be taken with a grain of salt, for in the first place the International Nickel Co. does not anything like control all the nickel deposits of the Sudbury district. The Clergues and others own deposits in that section which are probably more extensive and more valuable than those in the grip of the aforesaid ally of the United States Steel Corporation. And, in the second place, inasmuch as the Sudbury nickel field contains the only nickel deposits in America, and, excepting only those of far away New Caledonia, the only deposts in the world, the Canadian Government would seem to be in a rather strong position and will not likely be bulldozed into foregoing an export duty on nickel ore or matte. Canada has long enough fed United States industries with her raw materials, and the Ottawa Administration will do well to consider all the arguments in favor of an export duty before they decide against such a policy.

The talk of an export duty is the most arrant nonsense from a practical standpoint. The only substantial market for Canadian nickel in the world is the United States. The Rothschilds combination practically control the European market, as New Caledonia averages from 7 per cent. to 15 per cent. nickel, whereas Canada averages from 3 per cent. up to the richest, 5 per cent. The American tariff of 6c. a pound on pure nickel keeps the New Caledonia nickel out of the market. Our Government has obtained the refining of the Canadian nickel up to 85 per cent. to 90 per cent., and the matte, which contains 90 per cent. of nickel, goes in free as not being pure nickel, and thus is enabled to maintain its place in the United States market against the New Caledonia nickel. Were it not for the United States tariff of 6c. on pure nickel the industry in Canada would undoubtedly have to close down. This is the whole crux of the situation, and any talk of an export duty only serves to frighten investors.

The best evidence of the ability of our mines being able to compete against New Caledonia nickel in the European market is shown by the fact that the Rothschilds combination at the beginning of the year secured a contract for seven years with the British Government in competition with the International Nickel Co., representing Canadian nickel, and in spite of the fact that the Ontario Government made the strongest possible efforts to induce the British Government to specify Canadian nickel.

The profits in the business have been persistently grossly exaggerated. No higher dividend than 1 per cent. per month, which is a very small return for a mining industry, has ever been paid, and no dividend has as yet been paid by the International Nickel Co., owing to its having to expend its earnings in improvements. Every other concern, with the exception of Dr. Mond's, has failed to continue, and the only way that any money has been made up to date is by the most careful and economical management. And in spite, too, of the fact that one of the directors, and a very large stockholder of the International Nickel Co., A. W. Maconochie, M.P., for Aberdeen, Scotland, who is one of the most influential men in the Conservative party, is also a strong Imperialist and most anxious to aid in the development of Canada in preference to a foreign possession like New Caledonia.

Those who favor an export duty on nickel should also remember that the business men in Sudbury and vicinity, who are in a position to realize perhaps better than people in any other part of the country what the consequences of such action would be, are strongly opposed to the proposal; in fact, it is no secret that this particular opposition was not without its influence in deterring the Ontario Government from putting into operation regulations already authorized by the House designed to stop the export trade.

The value of the nickel produced in Canada last year was $1,859,970, an increase of 145 per cent. over 1900, while in 1898 and 1899 the figures were $514,220 and $526,104. In the annual report, under date of May, 1902, of Director Gibson, of the Ontario Bureau of Mines, appeared this paragraph: "The increase in quantity and value of nickel and copper is notable, part of the gain in value being due to the larger output and part to the fact that the mattes of the Sudbury district are now brought to a much greater richness in metallic contents than formerly."

In view of these facts is it not better to leave well enough alone?

COMMERCIAL TRAVELLERS' ANNUAL.

THE Dominion Commercial Travellers' Association held its 28th annual meeting in Montreal on Saturday evening, December 13, with the president, James Robertson, in the chair.

The president's report made pleasant reading. The financial condition of the association was shown to be in the best of shape. The report went on to say:

"Negotiations have been carried on with the transportation companies, with a view to having the week-end tickets apply to all points, or at least to certain cities which were not included in places to where week-end tickets could be obtained. We regret to say the companies did not see their way clear to adopt our suggestion, and our request was respectfully declined.

"The Prince Edward Island tax on commercial travellers has continued to occupy the attention of the board. Conferences have been held with sister associations, and all have agreed to make a combined effort to test the legality of this obnoxious law should the opinion now being obtained warrant us in so doing. With this object in view, the best legal advice in Canada is being sought, and we are now awaiting a report which we hope to receive in the course of a few days.

"Our present rooms not proving as attractive as they might be, the directors have decided to return to the Board of Trade building, where more commodious and convenient accommodation can be obtained. Rooms have already been secured, which we expect to occupy as soon as the new building is completed. The death claims were confined almost altogether among members of long standing. The amount paid under our mortuary benefit scheme to the beneficaries of deceased members was $32,300, representing 32 claims. Average age of deceased members was 51 years, their membership averaging 16 years.

"Three different sums, amounting to $26,000, have been invested in first mortgages on real estate, bearing 5 and 5½ per cent. Total amount now invested: First mortgages, $183,500; harbor bonds, $15,237; Board of Trade second mortgage bonds, $5,000.

"The total received on revenue account was $49,773. Of this amount $32,300 has been paid for claims arising from the death of 32 members. The working expenses amounted to $4,358. The net surplus for the year was $14,028. This amounth as been added to capilal account, which now aggregates $203,004.

"The increase in membership for the year, was greater than in any previous year since 1882, and reflects the great activity and growth of the wholesale trade, consequent upon the increased settlement and development of the resources of our country. Number on roll as per last annual statement, 3,749; new members, received this year, 651; less lapsed through nonpayment of annual subscription, 336; making our present membership, 4,046, a gain of 315 for the year."

The annual rental of the associations new rooms in the Board of Trade building will be $1,200.

It was decided that subscriptions, limited to one dollar per member, should be collected for the purpose of endowing a bed in the Montreal General Hospital.

The following resolution was offered by Mr. Max Murdoch, seconded by Hon. J. D. Rolland, and carried unanimously:

"That the absence of uniformity in the legal procedure for the distribution of the assets of an insolvent debtor is detrimental to the commercial interests of the Dominion of Canada, and an obstacle to the extension of trade, both external and internal;

"That this uniformity can only be obtained by means of a Federal Insolvent Act;

"That it is urgent that an equitable uniform insolvent law be passed at the forthcoming session of the Federal Parliament."

THE OFFICERS ELECTED.

For the first time in the history of the Association, there was no balloting for office-bearers, all having been elected by acclamation at the last quarterly meeting. They are:

President—Mr. James Robinson.
Vice-President—Mr. George A. Mann.
Treasurer—Mr. J. S. N. Dougall.
Directors—W. B. Mathews, R. C. Wilkins, W. H. Evans, A. Fournier, W. J. Egan, P. J. Paradis (Quebec), S. A. Agnew, John Paterson, A. D. Gall, R. Booth, jr.; past-president, T. L. Paton.

The annual dinner of the Association will take place December 22.

MUTUAL BENEFIT SOCIETY.

The Dominion Commercial Travellers' Mutual Benefit Society held its seventeenth annual meeting on Saturday afternoon. President J. T. Lesueur submitted his annual report. He said that the membership now totalled 1,038, with 120 new members added during the year, which, although not increasing the total number to that extent, on account of the customary annual lapses, would still materially improve the society's position on account of the new additions being almost entirely young men. The number of death claims provided for since the last annual report was 13, leaving in hand, after paying all charges against the society, a balance of $5,508. With a view to so increasing the membership that the six regular assessments might prove sufficient to meet the average number of death claims, and thus obviate the need of special assessments, it was pointed out that this could be done by adding about 500 recruits to the regular membership.

President—Mr. J. T. Lesueur.
Vice-President—Mr. A. McA. Murphy.
Treasurer—Mr. Chas. Gurd.
Trustees—Messrs. David Wat on, F. S. Cote, Max Murdoch, J. N. Christie, E. H. Copland, John Hardie, C. M. Mills, J. W. Rou-seau, Alex. Peden and D. M. Campbell.

PERSONAL MENTION.

Mr. Charles Edmonds, of the Marshall-Wells Co., Winnipeg, Man., is visiting his parents in Montreal, in which city he has many acquaintances, having been with Messrs. Frothingham & Workman for a number of years.

Mr. S. B. Kennedy, of Toronto, the western representative of Lewis Bros. & Co., has severed his connection with that firm owing to ill-health and is making a trip through the Southern States in the hope of recuperating. He will spend some time in St. Louis. It is to be hoped that the trip will prove beneficial to him.

The trade throughout Western Ontario will regret to hear of the illness of Mr. Dingman, assistant buyer for Messrs. Moore & Brown, wholesale and retail hardware dealers, Sault Ste. Marie, who is laid up in the hospital there with typhoid fever. Mr. Dingman has many friends throughout the west, where his territory is. He will be in the hospital for a number of weeks.

Mr. Charles Carmichael, traveller for the Marshall-Wells Co., Winnipeg, is in Montreal visiting his parents. Mr. Carmichael was formerly with Messrs. Frothingham & Workman for some time. His friends in Montreal will be very glad to hear of his success in the West. He has a branch establishment in Calgary, N.W.T., besides covering the western territories and the Yukon for the Marshall-Wells Co.

George Taylor & Son, hardware merchants, London, Ont., have found business good since they went into their present premises at 136 Dundas St. two years ago.

BUSINESS CHANGES.

DIFFICULTIES, ASSIGNMENTS, COMPROMISES.

JOHN A. HUME, agricultural implement agent, Listowel, Ont., has assigned to George A. Barber, and his creditors had a meeting on December 19.

John Bone, general merchant, Minden, Ont., has assigned to R. Lee.

Alex. Desmarteau is curator of Aumond & Caty, contractors, Montreal.

The creditors of Raoul Lapierre, contractor, Montreal, have held a meeting.

Edward Wright, box manufacturer, of Newboro', Ont., has assigned to L. S. Lewis.

Beaudoin & Croteau, general merchants, Black Lake, Que., have assigned to A. Faucher.

C. Audet, general merchant, Roberval, Que., is offering to compromise at 35c. on the dollar cash.

Zazaire Laliberte, general merchant, of St. Nicholas, Que., has assigned, and V. E. Paradis is provisional guardian.

Holdengraber & Rosenberg, general merchants, of Bathurst, N.B., are offering to compromise at 40c. on the dollar.

PARTNERSHIPS FORMED AND DISSOLVED.

George Puck & Co., mill supplies, of Montreal, have dissolved.

Jones Bros., general merchants, Sweetsburg, Que., have dissolved.

Ledgerwood & Rollins, agricultural implement agents, Arnprior, Ont., have dissolved partnership.

Fraser & Stewart, agricultural implement agents, Miniota, Man., have dissolved; D. J. Stewart continues.

SALES MADE AND PENDING.

The assets of J. E. Heon, general merchant, St. Eulalie, Que., are to be sold.

The assets of J. N. Bisaillon, general merchant, Ste. Angele de Manoir, Que., are to be sold.

CHANGES.

Alex. Brosseau, contractor, Montreal, has registered.

Paton, Laird & Son, builders, of Montreal, have registered.

H. A. Urquhart, hardware dealer, Vancouver, has sold out to R. McKay.

L. Leville & Co., sash and door manufacturers, Montreal, have registered.

A. McRae & Co., general merchants, of Elva, Man., have removed to Lyleton.

E. N. Sicotte, general merchant, of La Rochelle, Man., has removed to St. Malo.

E. J. Rose, baker and confectioner, of Macgregor, Man., is succeeded by J. J. Pierce.

Andrew Sipes, general merchant, Drinkwater, N.W.T., is succeeded by Sipes & Coventry.

Albert W. Wise, agricultural implement agent, Goderich, Ont., has sold out to W. Kearney.

J. R. Kelly, general merchant, Glenboro', Man., has sold out to Hazlewood & Benedeckson.

FIRES.

The flax mill of Clark & Co., St. Marys, Ont., has been burned.

Williams Bros., hardware merchants, of Gladstone, N.W.T., have sustained loss by fire.

D. Lacerte, general merchant, of Prince Albert, N.W.T., has sustained loss by fire.

C. J. Greene, general merchant, Bath, N.B., had his premises and stock damaged by fire.

Welford Bros., manufacturers of ropes and brooms, London, Ont., sustained loss by fire; insured.

CATALOGUES, BOOKLETS, ETC.

A HANDSOME CALENDAR.

With the New Year drawing very near almost every company doing business in North America is furnishing its customers with a calendar for 1903. Harrington & Richardson Arms Co., of Worcester, Mass., have favored us with one of their calendars for next year. It is one of the most handsomest we have seen for 1903. It shows two ladies shooting at targets and is printed in four colors. The card is about two feet in length and one foot wide, and would be an ornament to any office. This firm shows very good taste in the designing of this calendar.

A MANUAL OF BUSINESS.

THE MANUAL OF BUSINESS. By Sydney P. Johnston. Daniel Stern, Publisher. Chicago.

This work is intended to prove a work of ready reference to business men in regard to many forms of business usage and correspondence employed by them in the conducting of their vocation. Instruction is given on the various details in connection with the office, and the general business forms, laws and regulations are fully dealt with. Valuable technical information is also given on various subjects directly related to the management of the office, the store and the factory. Also what will be useful to many a business man. Parliamentary rules and forms of resolutions are included in the matter of this book, and at the back are lists of business terms, business abbreviations and business maxims.

RAIL MILL STARTS UP ON MONDAY.

Having received orders from both the Ontario and Dominion Governments, the steel rail mill at Sault Ste. Marie, Ont., will resume operations on Monday, December 22. The orders already booked will keep the mill running all winter.

AMERICAN ENTERPRISE IN CANADA.

JUST sixteen months have elapsed since The Nicholson File Co. purchased the plant of The Globe File Co., Port Hope, Ont. When the sale had been completed a rumor was circulated that this factory would be closed indefinitely and all the files required for the Canadian trade would be sent in from the United States. This, however, was not the policy of The Nicholson File Co., as they have, since that time, shown. Within thirty days from the date of purchase they commenced enlarging and modernizing these works, sparing no expense necessary to place this factory on a par in every respect with their several American industries.

The cost of these changes has been considerable; but, as the president of The Nicholson File Co. has every confidence in the future of our Dominion, he has made every preparation necessary to meet the growing demand for files and rasps throughout Canada.

The Dominion works now possess the most modern machinery in every department for the production of the highest class of goods. They employ only expert workmen and use carefully-selected material; and, with an experience of over 40 years in manufacturing files, they are prepared to supply their Canadian customers with the same class of goods, manufactured in Canada, as they are exporting to Europe from their American factories.

The daily production at Port Hope is from 600 to 700 dozen files, and, should the demand warrant it, they can increase the output to 1,000 dozen daily. This embraces everything from a 3-in. saw file to a 20-in. railroad bastard file.

This company has displayed a great deal of enterprise and forethought in anticipating the future wants of the country, and a successful future for it seems assured.

DEATH OF J. S. BENNETT.

J. S. Bennett, of Toronto, manufacturer of the patent shelf boxes that bear his name, died suddenly the other day. Blood poisoning was the cause of death. The circumstances surrounding his demise are particularly sad, his wife having predeceased him just one week, almost to the hour.

Deceased was in the hardware business in London, Eng., for some years. He was for a time in a hardware store in Winnipeg, and later travelled for H. S. Howland, Sons & Co., in the Northwest. It was while in Winnipeg that he invented the shelf boxes and drawers that bear his name, and after leaving H. S. Howland, Sons & Co. he started a factory for their manufacture and was rapidly building up a prosperous trade when death so suddenly overtook him. Deceased left two sons, aged 9 and 12 respectively, to mourn his loss.

The business will be continued by a brother of deceased, who will give prompt attention to orders.

Deceased was a genial and whole-souled man, and his death is generally regretted by those who knew him.

WINDSOR RETAIL ASSOCIATION.

AT Windsor, on Tuesday evening, December 9, the local branch of the Retail Merchants' Association of Canada held their regular monthly meeting. The president, A. E. Edgar, occupied the chair.

Four new members were admitted, as follows: Howell Bros., jewellers, Oulette avenue; Jno. M. Lord, grocer, Aylmer avenue; Morton & Christie, hardware, etc., Sandwich street east, and Herman Burwaska, plumber, Sandwich street west.

The auditors' report for the year just closed was read, and on motion was adopted.

The secretary reported that he had carried out the instructions given him at the last meeting in writing to the chief of police informing him that certain merchants of the city were giving amusement-stamps in contravention of the by-law. Nothing having been done in the matter a committee was appointed to obtain evidence and make complaint against the offenders in the police court.

The president appointed the following committee to make arrangements for the first annual "At-Home" to be held next month: Honorary President Geo. H. Nairn, Auditor A. J. McTavish, and Secretary B. J. Davis.

The rest of the evening was taken up with a discussion of the advisability of forming trade sections, it having been shown that there are grocers and plumbers and hardwaremen sufficient to form these two sections. And it is hoped by the next meeting there will be a sufficient number of druggists to form another section.

The secretary was ordered to draw a warrant for the amount due the Central Association, and forward the same to the central secretary at Toronto.

There being no other business the meeting adjourned.

A despatch from Ottawa says that Banker R. Paine, manager of the Ontario Power Co., has submitted to the Federal Government plans for a section of the route over which electricity will be brought from Niagara to Toronto. A double-pole line will be built the entire distance, so that if one line is disabled the other can be used. Mr. Paine states that by this time next year the company will be able to furnish 15,000 horse-power in Toronto, and that ultimately they will produce 150,000 horse-power.

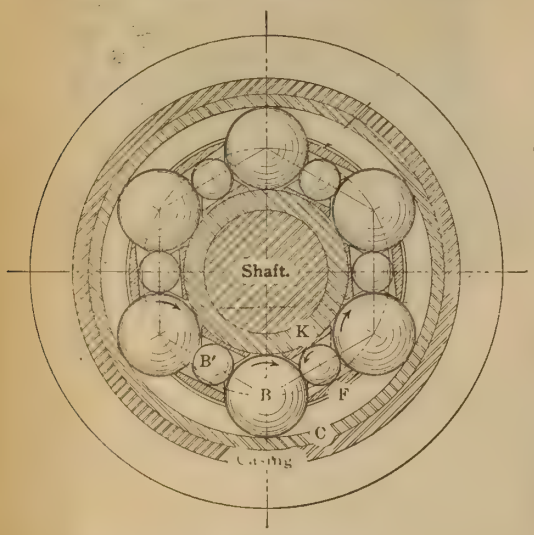
MACHINERY AND ELECTRICAL SUPPLY DEPARTMENT

CHAPMAN DOUBLE-BALL BEARINGS

EIGHT years ago C. H. Chapman, of Groton, Mass., while trying to improve a sulky for track work, hit on the idea of double-ball bearings. Since then he has spent much time in perfecting his idea, which is now accepted by mechanics as sound. Experiments have been made testing the bearings in many kinds of machinery, from ordinary shafting to a street railway car, and preparations are now being made to equip an entire train on the Intercolonial Railway with them.

It is claimed that the present cost of operating machinery with journal bearings can be reduced one-half by the use of these



bearings, which require no oil, being frictionless, and require much less power for operation.

The principle of the bearings can be seen from the accompanying diagram. It will be noted that B is the load-carrying ball, B' the idler ball, F the retaining float for B', C the cup and K the cone. The idler is so placed that its centre is coincident with a line connecting the centres of each of the adjacent carrier balls, B, and is positively held in position by a loose free ring F that floats with the carrier balls and is supported on the cone or shaft, but not in contact with any of the balls when the same are under load, during which time the idler balls are maintained in the same relative position by rolling contact with the carrier balls.

The manufacture of these bearings has not been completed, but The Chapman Double Ball Bearing Co. of Canada Limited, 39 Scott street, which control the Canadian patent rights, expect to start making them before long.

OPENED A BRANCH IN TORONTO.

The Garlock Packing Company, of Hamilton, Canada, have opened an office in the Carlaw Buildings, 30 Wellington street west, Toronto, and have appointed Mr. T. Christie as their representative. They are sole manufacturers of Garlock's Engine, and Pump Packings, patented; also asbestos sectional and hot water pipe coverings.

THE CRAMP STEEL COMPANY'S WORKS.

THE large plant of the Cramp Steel Company, at Collingwood, are receiving the last of their plant. A representative of The Mail and Empire, Toronto, who visited the works on Saturday, says they will soon be in operation. The machine shops of the company have been running since September last, getting the plant in order. All the buildings are of the highest class. Every foundation is of stone and cement. The excavations were made down to the living rock. The company will have one of the finest rolling-mills in Canada, in addition to the second steel plant. The rolling mills will turn out flats, rounds, squares and angles from 6 x 6 down to ¼. The steel furnaces will have an out-put of from 100 to 120 tons of open-hearth steel per day. This will be finished down into staple material such as is used every day in the year by the blacksmiths and machinists of the country. A great deal of their material will be sold to associated industries in the town. The shipyard is expected to be a large customer. and as soon as Canadians realize that it will take six or seven new steel freight boats per year to keep up with the growth of tonnage in Manitoba, a plate mill will be built. The company expect to supply the new wire mills at Collingwood with 50 tons of material daily, and to build a blast furnace during the coming summer, also docks and additional steel furnaces. They have been delayed this season considerably by lack of material. For instance, they let the contract for boiler stacks in June The contractor was to deliver in six weeks. He could not get any material in Canada or the United States and had to go to England for it. It was shipped promptly, and when it reached Montreal it was stacked up with other material on the docks there for about three months before it was moved. They are ready for the winter now, and expect to run night and day as soon as their electric light plant is installed, which will be in a couple of weeks.

TORONTO WAREHOUSE TO CLOSE.

The Toronto warehouse of the Canadian General Electric Co., Limited, will be closed from January 2 to January 6, inclusive, for the purpose of stock-taking. No shipments from this warehouse will be made during that period. The company request their customers to kindly anticipate their needs as much as possible, and place orders for immediate requirements in due time, so that shipments may be made prior to January 1 next.

MACHINERY AND ELECTRICAL NOTES.

ON Friday last a toolhouse owned by The Canada Bridge Co., of Walkerville, near St. Catharines, where they are erecting an iron bridge, was destroyed by fire, tools, ropes, splices, etc., to the value of over $10,000 being burned.

A vertical 8 h.-p. engine has been purchased by Church Bros., Orillia, from H. W. Petrie, Toronto.

The Canadian Niagara Power Co. will enlarge its wheel-pit to accommodate 11 turbines of 110,000 total h.p.

Nelson, B.C., has passed a by-law to expend $150,000 in putting in a power plant and extending the city's electric light system.

An entire sawmill outfit, including a fine portable engine and boiler, was shipped to Gustof Leidtke, Wilno, Ont., by H. W. Petrie, Toronto.

The Kilgour Piano & Organ Co., of Hamilton, have installed a 50 h.-p. steam engine. It was purchased from H. W. Petrie, Toronto.

Toronto, was found in the Niagara River below the Falls on Saturday.

The East Kootenay Lumber Co., Cranbrook, B.C., have prepared plans for a new mill and are about to order their machinery.

A 100 h.-p. tandem compound Wheelock engine has been installed at Brussels, Ont., by H. W. Petrie, Toronto, to furnish power for the Brussels Electric Light Co.

John Craven, of Manchester, Eng., has made final arrangements with the Dominion Iron & Steel Co., Sydney, for the establishment of a plant in Sydney for the manufacture of coal-tar products.

Toronto Council has decided to submit a by-law authorizing the expenditure of $175,000 on a new pumping engine for the waterworks system on the date of the municipal elections.

The Sydney Post says that the Knapp Tubular Steamship Co.'s proposition to start works to build their boats there is being favorably considered by the leading business people of Sydney, C.B.

A new style of typewriter, the Monarch, has been placed on the market, covered by 16 United States patents. The inventor is Jacob Felbel, of New York, and the selling agents are the Monarch Typewriter Co., of New York.

Geo. McLachlan, of The McLachlan Gasoline Engine Co., Limited, Toronto, has returned from installing gasoline engines at Tottenham, Elmvale, Carleton Place, Snake Creek and Ottawa.

The Toronto Council have ratified an agreement with the Toronto Steel Works, leasing that concern 10 acres of land on Ashbridge's Bay for 30 years at $500 per year, and fixing the assessment at $50,000 per year for 10 years.

Assistant City Solicitor Lobb, of Toronto, predicts that in 20 years there will be no street car rails on Toronto streets; that automobiles will take the place of the street cars, to be succeeded later by an overhead or underground service.

The Dodge Manufacturing Co. have secured the contract for the entire equipment of elevating, conveying and power transmission machinery, amounting to several hundred tons, for the 1,000,000-bushel elevator now under construction in Montreal harbor.

The Kay Electric & Dynamo Co., Limited., Toronto, have sold a 20 h.p. motor to The Wyld-Darling Co., Toronto; a 15 h.p. motor to Todhunter, Mitchell & Co., Toronto; a 400-light dynamo to Tottenham, Ont., municipality; five dynamos to A. R. Williams & Co., Toronto, and one 100-light dynamo to H. W. Petrie.

An interesting new invention is one which provides for the sealing of envelopes by electricity. It is said that this machine can seal 8,000 envelopes in an hour, and that when the envelope is sealed there is no danger of its coming loose. Each envelope leaves the machine free from moisture and tightly sealed.

A despatch from Glasgow says that Nelson, Reid & Co., of that city, have secured the contract for building a large number of locomotives for the Canadian Pacific Railway Company. Canadian and American builders were in keen competition for this contract, but Nelson, Reid & Co. secured it, because they promised quicker delivery of the engines.

IN THE MATTER OF THE GEE ELECTRICAL CO., LIMITED.

IN LIQUIDATION.

By order of the Master-in-Ordinary there will be sold in detail by Public Auction by Messrs. C. J. Townsend & Company, on Tuesday, December 30th, 1902, commencing at 11 o'clock a.m. on the premises, 11 Colborne Street, Toronto, the following assets of The Gee Electrical Engineering Co., Limited, consisting of:

Planes and attachments.
Lathes and attachments.
Drills.
Mills.
Machine Tools.
Belting and pulleys.

Window Fixtures in Hardware Stores.

BECAUSE of their extremely small size it is difficult to make an attractive window display with the majority of articles in a stock of fancy or shelf hardware.

The accompanying illustrations show some of the devices used by expert window-trimmers in some of the most successful show windows.

In Fig. 1, the stand may be made any size from, say, 1 ft. to 3 ft., and two or more used according to the size of the window. They can be constructed very cheaply of wood, and if painted or stained and varnished, and the discs nicely covered with colored felt or beige, they will make a very handsome piece of window furniture, besides being an attractive way of showing small stuff.

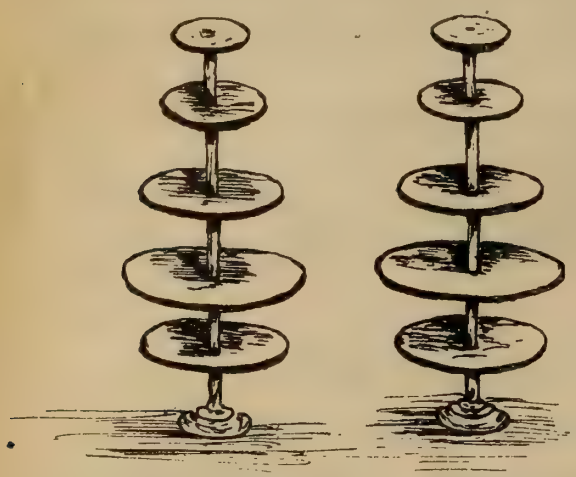

Fig. 1

Fig. 2—The circle can be made any size up to, say, 5 ft. in diameter. The star can be formed by inlaying with another color of cloth besides the one used in the outside portion of the large disc. If, when showing small wares in shelf goods, the star is filled in with bright brass or steel-colored articles, and the other portion filled with japanned and other dark pieces, this will be found to make a very handsome fixture.

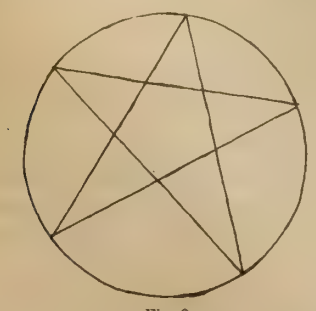

Fig. 2.

Fig. 3 shows plain discs on an upright stand. If several small ones are used in a window and the spaces filled in with large articles, some very nice displays could be worked out.

Fig. 4—In this figure the same idea of using two different colored cloths for covering, as in Fig. 2, can be used, and also the same idea of contrasting the color of the goods to be shown. This is an age of display, and this applies to merchandising as well as anything else. Some merchants proceed on the principle that goods can be sold in proportion to the extent they are shown, and there is no doubt there is a great deal of sense in the idea.

WINDOW-DRESSING IDEAS.

By W. H. S.

NO matter how much a merchant spends on newspaper advertising he should never omit the valuable and inexpensive method of attracting public attention to his store by means of his show window. Hundreds of people pass the store every day, and there will surely be a few who need articles like those displayed in the window.

The window as an advertising medium is beginning to be recognized everywhere, and in some large cities may be seen many handsome window displays. Large stores often keep a window-dressing expert, a man who devotes his whole attention to the arrangement of the window display.

In arranging the articles in the window a merchant can best judge the effect by going outside occasionally and looking at the display while it is being developed. Often articles are seen "left-handed" when they should be "right-handed," because the man who was dressing the window failed to go outside and view the effect. Some goods also should be put in the window a little in advance of the season, so that the eyes of the passers-by may be caught, and those who are in the habit of buying for their future needs, may be induced to make their purchases.

A good plan in making window displays is to take in one line of goods after another as long as they are seasonable. It is not wise to crowd a great number of samples together in one window. Better display one or two lines of goods at a time and often change the display. At least once a week should the windows be changed. The departmental stores change their displays every day, or every other day at the least. They make a practice of showing in the window the goods they are going to make a special sale of in advance of the sale, and find this plan to work out successfully.

Fig. 4.

Another thing the merchant should look after is to keep the glass clean. Wash off your fronts frequently, and do not be long in doing it, for it is unsightly to see a boy stretched out on a ladder all day with a sponge and a pail of water rubbing down the windows.

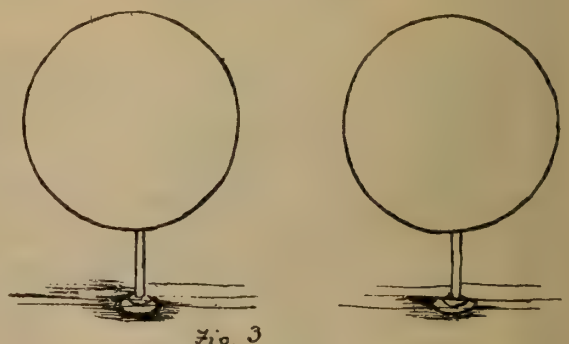

Fig. 3

F. E. Kerr, agricultural implement agent, Souris, Man., is reported to be selling out to W. Merrill and J. S. Kelly.

PAINT, OIL AND BRUSH TRADES

TESTING TURPENTINE.

TURPENTINE is, like many other useful substances, too often adulterated. So the following simple but satisfactory tests, suggested by The Carriage Builder, should be of value, and should enable dealers to keep their turpentine supply fairly above suspicion. Pure turpentine has a sweet odor, not unlike that of the pine tree aroma, scarcely pungent, and not in any wise sour, and when freshly drawn, the foam, if any, should rapidly subside.

Naval authorities in testing turpentine, still adhere to the practice of dropping the suspected sample of turpentine on a piece of white paper, in comparison with a standard sample. Turpentine containing a very slight percentage of kerosene oil will leave upon evaporation a greasy stain, whereas the pure article, not too quickly distilled, will leave no stain. A turpentine that has been too rapidly distilled will leave upon the paper a gummy, yellowish, white stain, and this should not be confounded with the stain of the kerosene oil turpentine.

Pure turpentine will usually evaporate from a piece of white paper in five minutes, and leave no stain. If more than seven minutes be required for the evaporation of the sample, it may be set aside as unfit to use in fine coach colors, or for mixing undercoatings of any kind. The sense of smell will sometimes expose the kerosene adulteration, but in these days of successfully deodorizing fluids, the olfactory organ cannot be depended upon as an infallible authority.

THE UNITED FACTORIES CALENDAR

One of the most artistic calendars that we have seen this year is being exhibited by The United Factories, Limited, of Toronto and Montreal and London. The date pad is of medium size and is stitched on heavy, dark green card, with above it a panel containing a well-drawn figure of a pretty young maiden. As the firm's name is printed in gold it adds rather than detracts from the artistic effect of the calendar, which is worthy of a place in home or office. They can be had by any of the trade on application.

A GOOD SEASON.

Wholesale paint dealers express satisfaction with the results of stock-taking, which, in nearly every case, show the season to have been record-breaking in amount of goods handled. As prices have been on the whole well maintained, the cash accounts show good balances on the right side in every case, too, which is the vital source of satisfaction.

PAINT AND OIL NOTES.

Owen Sound has almost unanimously passed a by-law to grant exemption and free water for domestic and sanitary uses to The Ontario Linseed Oil Company, Limited.

The Saugeen Oil Company, Limited, has been incorporated with $10,000 capital, head office in Walkerton, and the following directorate: D. Robertson, W. Richardson, R. E. Truax, L. C. Fenton and C. A. Fox.

LINSEED OIL TO ADVANCE.

Producers of linseed oil have notified the wholesale dealers that all deliveries of linseed oil after January 1 will bear an advance of 1c. per gallon. The advance is due, in a large measure, to the improved conditions, linseed oil having advanced in the English market and flaxseed in the Chicago market. For present delivery there is no change in quotations.

PAINT AND OIL MARKETS.

TORONTO.

THERE is practically nothing doing and prices are unchanged. Attention is, however, drawn to the fact that the price of linseed oil which was incorrectly given last week, is now changed to the proper figures. We quote:

WHITE LEAD.—Ex-Toronto, pure white lead, $5 to $5.25; No. 1, $4.62½ to $4.87½; No. 2, $4.25 to $4.50; No. 3, $3.87½ to $4.12½.; No. 4, $3.50 to $3.75 in packages of 25-lb. and upwards; ½c. per lb. extra will be charged for 12½-lb. pkgs.; genuine dry white lead in casks, $5.02½.

RED LEAD.—Genuine, in casks of 560 lb., $4.50 to $4.75; ditto, in kegs of 100 lb., $5; No. 1, in casks of 560 lb., $3.75 to $4; ditto, kegs of 100 lb., $4.25.

LITHARGE.—Genuine, 6 to 6½c.

WHITE ZINC.—Genuine, French V.M., in casks, $6.25; Lehigh, in casks, $6 to $6.25.

SHINGLE STAIN.—In 5-gallon lots, 60 to 75c. per gallon.

PARIS WHITE.—90c. to $1 per 100 lb.

WHITING.—65c. per 100 lb.; Gilders' whiting, 80c.

GUM SHELLAC.—In cases, 35c.; in less than cases, 40c. per lb.

LIQUID SHELLAC.—Pure orange, in bbls., $2.25 to $2.35; white, $2.35 to $2.45 per gal.; in less quantities, 10c. extra.

GLUES.—Broken sheet, in 200-lb. bbls., 8½c. per lb.; cabinet glue, in bbls., 12c.; emery glue, in bbls., 17½c.; bookbinders', ground, 10½c.; finest American, white,

Makers

THE MURALO COMPANY, New Brighton, Borough of Richmond, New York.

19c.; No. 1 American white, 15c. per lb.

PUTTY.—Bladders, in barrels, $2.25; bladders, in 100-lb. kegs, $2.40; bulk in bbls., $1.90; bulk, less than bbls. and up to 100 lb., $2.05; bladders, bulk or tins, less than 100 lb., $2.90.

PARIS GREEN.—Petroleum bbls., 14c. per lb.; arsenic kegs, 14½c.; 50 and 100-lb. drums, 15c.; 25-lb. drums, 15½c.; 1-lb. packages, 16c.; ½-lb. packages, 18c.; 1-lb. tins, 16c.; ½-lb. 18c.

PLASTER PARIS.—New Brunswick, $2 per barrel.

PUMICE STONE.—Powdered, $2.50 per cwt. in bbls. and 4 to 5c per lb. in less quantity; lump, 10c. in small lots and 8c. in bbls.

LIQUID PAINTS.—Pure, $1.20 to $1.40 per gallon; No. 1, $1 10 per gallon.

BARN PAINTS.—65 to 70c. per gallon.

CASTOR OIL.—English, in cases, 9 to 9½c. per lb. and 10 to 10½c. for single tins.

LINSEED OIL.—Raw, 1 to 2 bbls., 65c.; boiled, 68c.; 3 to 5 barrels, raw, 64c.; boiled, 67c.; 6 to 9 barrels, raw, 62c.; boiled, 65c. delivered. To Toronto, Hamilton and London, 2c. less. All quantities of 10 bbls. and over of linseed oil sold only f.o.b. Toronto, Hamilton, London and Guelph.

TURPENTINE.—Single bbls., 77c.; 2 to 3 bbls., 76c. delivered. Toronto, Hamilton and London, 1c. less. For less quantities than barrels, 5c. per gallon extra will be added, and for 5-gallon packages, 50c. and 10-gallon packages, 80c. will be charged.

GASOLINE AND BENZINE.—We quote: Benzine, 19¼c. and gasoline, ordinary, 21¼c. and engine, 22¼c. f.o.b. Toronto.

MONTREAL

Paris green continues to be the liveliest item in the trade, as the larger buyers are securing their wants while the present low prices last. The order books of the manufacturers are well filled and an advance in the price can be expected in the near future. Linseed oil is again weak in the English markets, but as the dealers here did not advance the price in sympathy with the recent English advance, there was no change. Turpentine is scarce in the South, and reports indicate a shortage before the new crop arrives. White lead is in good demand, and painters' materials generally are moving more freely than at this time last year, which indicates a good business for the early spring. We quote:

GROUND WHITE LEAD.—Best brands, Government standard, $5.00 to $5.25; No. 1, $4.77½ to $4.87½; No. 2, $4.40 to $4.50; No. 3, $4.02½ to $4.12½; No. 4, $3.65 to $3.75, all f.o.b. Montreal. Terms, 4 months, or 3 per cent. off for cash in 30 days.

DRY WHITE LEAD.—$5.25 in casks; kegs, $5.50.

DRY WHITE ZINC.—Pure dry, in casks, 6¼c.; in 100-lb. kegs, 6¾c. No. 1 zinc, in casks, 5¼c.; in 100-lb. kegs, 5¾c.

WHITE ZINC (ground in oil)—Pure, 25-lb. irons, 8c.; No. 1, 7c.; No.2, 6c.

PUTTY.—We quote: Bulk, in bbls., $1.90 per 100 lb.; bulk, in less quantity, $2.05; bladders, in bbls., $2.25; bladders, in 100 or 200-lb. kegs or boxes, $2.40; in tins, $2.55 to $2.65; in less than 100-lb. lots, $3 f.o.b. Montreal, Ottawa, Toronto, Hamilton, London and Guelph. Maritime Provinces, 10c. higher, f.o.b. St. John and Halifax.

ORANGE MINERAL.—Casks, 7c.; 100-lb. kegs, 7¼c.; smaller quantities, 8¼c.

RED LEAD.—Genuine red lead, in casks, $4.50; in 100-lb. kegs, $4.75; in less quantities, $5.75 per 100 lb. No. 1 red lead, casks, $4.25; kegs, $4.50, and smaller quantities, $5.50.

LITHARGE.—Ground, casks, 5c.; less quantities, 5½c.; flake litharge, casks, $5.25; smalls, $5.75 per 100 lb.

LINSEED OIL.—Raw, 63c.; boiled, 66c. In 5 to 9 bbls., 1c. less. Terms, net cash in 30 days. Delivered in Ontario, between Montreal and Oshawa, at 2c. per gal. advance.

TURPENTINE.—Single barrels, 75c.; 2 to 4 barrels, 74c. Terms, net cash in 30 days.

SHELLAC VARNISH.—Pure white, $2.35 to $2.45; orange, $2.25 to $2.35.

MIXED PAINTS.—$1.20 to $1.45 per gallon.

CASTOR OIL.—8¾ to 9¼c. in wholesale lots, and ½c. additional for small lots.

SEAL OIL.—48 to 50c.

COD OIL.—35 to 37½c.

PARIS GREEN.—Petroleum barrels, 13¼c. per lb.; arsenic kegs, 13½c.; 50 and 100-lb. drums, 14c.; 25-lb. drums, 14½c.; 1-lb. packages, 15c.; ½-lb. packages, 17c.; 1-lb. tins, 16c.; ½-lb. tins, 18c.

WINDOW GLASS.

TORONTO.

There is a better feeling among the jobbers and trade is not being pushed so eagerly, owing to the small margin. It is believed that another agreement may be reached by the wholesalers this week. Prices are nominally unchanged. Our quotations are: Under 26 in., $4.25; 26 to 40 in., $4.65; 41 to 50 in., $5.10; 51 to 60 in., $5.35; 61 to 70 in., $5.75; 71 to 80 in., $6.25; 81 to 85 in., $7; 86 to 90 in., $7.75. Toronto, Hamilton and London. Terms, 4 months, or 3 per cent. 30 days. Discount, 15 per cent.

MONTREAL.

The glass market is steady and firm. Considerable glass is moving in a jobbing way, but dealers do not look for any rush till the warm weather arrives. We quote: First break, 50 feet, $2; second, $2.10 for 50 feet; first break, 100 feet, $3.80; second break, $4; third break, $4.50; fourth break, $4.75.

CURLING SEASON.

The arrival of frosty weather reminds the business man who is fond of the "roarin' game" that it is time to polish up his curling stones and provide himself with a "besom" to sweep the way for his colleagues. There is nothing surpasses Boeckh's bamboo-handled broom for this purpose, as they are light, strong, and exceedingly durable. The bamboo rings afford a satisfactory and assuring grip, while the broom end is firm, elastic, and specially adapted to the curler's use.

NO OTHER WHITE LEAD

has taken and maintained such a high position for fineness, whiteness and coveriug power, as that of

STOVES AND TINWARE

AND ALLIED TRADES

SOFT COAL TROUBLES.

"A. E. R.," Hamilton, writes' "Several customers are using soft coal in furnaces supplied by me. They had good results at first, but complain that the furnaces now smoke badly and do not heat well."

Ans.—The use of soft coal necessitates the use of smoke pipes and chimney considerably larger than is required for hard coal, as the soot production is much larger. It would be well for all dealers in stoves, ranges and furnaces to impress their customers with the fact that the small size of their pipes will necessitate their being cleaned often so that the soot will not interfere with the working of the furnace or stove. Neglect of this, has, in several cases, led to a clogging of pipes which filled the house with smoke, the results of which are more easily understood than appreciated. Stove dealers, whose customers use soft coal, should equip one or more of their staff with steel brushes and ropes for cleaning flues and pipes. The flues must be kept clean as they will become stopped and so coated as to reduce the heating power of their furnaces. The demand for this help should be general where soft coal is much used.

CROW'S NEST COAL AND COKE.

"The output of coal and coke at the mines of The Crow's Nest Pass Coal Company is steadily increasing," states Elias Rogers, of Toronto, who returned a few days ago from a visit to the mines. "About $1,000,000 was spent in extensions this year, and the expenditure will be kept up until the capacity is 10,000 tons per day, about half of which will be coal, and the other half coke. The industrial conditions of British Columbia are excellent, and the demand for coal steadily increasing."

FORT WILLIAM STOVE WORKS.

Harold E. Copp, who, with his father, is starting a stove-foundry business in Fort William, Ont., under the style of W. J. Copp, Son & Co., was in Toronto a few days ago.

"We are going to manufacture," he said in reply to a question, "stoves and stove furnishings. The stoves will be particularly adapted for the Western trade, and we consider the outlook most promising. We certainly will be able to sell all the stoves we can manufacture."

The building which is being erected is in the form of an open square and will have a frontage of 175 feet. The moulding shop will be 127 x 70 feet, and the mounting shop, 110 x 55 feet.

Harold E. Copp, who is still working on the liquidation, says the estate will show a surplus of between $40,000 and $50,000, notwithstanding the forced sale of many of the assets.

STOVE GRATE FOR PEAT.

Some very interesting experiments are going on at The Burrow, Stewart & Milne Foundry with peat taken from a bog not over a thousand miles from Hamilton. The peat is made in a new way, only half an hour being required from the time it is taken from the bog until it is pressed into neat looking blocks. The newly patented stove grate, invented by one of the firm's workmen, burns the stuff splendidly.

STOVE TRADE KEEPS BRISK.

"The demand for stopes and stove supplies," said Mr. Kennelly, Toronto representative of The McClary Manufacturing Company, London, Ont., "keeps brisk in a remarkable way. Generally at this season of the year we are well on with stock-taking, but this year we are prevented from doing this by the continued rush of orders. This is a good thing for us, and for the retail trade all over the country, but it is unusual and will leave much less time for stock-taking and preparation for the coming season."

AMONG THE TRADE.

R. W. Philips, Guelph, Ont., was in Toronto on Wednesday.

The foundry of F. H. Wilson & Company, Yarmouth, N.S., has been damaged by fire ; insured.

Arthur Read, of C. O. Read, stove merchants, Hagersville, Ont., paid a business visit to Toronto on Wednesday.

E. C. Carrick, vice-president of The Gurney Foundry Company, Limited, Toronto, has been confined to his house by a severe attack of bronchitis.

Norman McKenzie, traveller for The Record Foundry and Machine Company, of Moncton, N.B., died on Sunday, after a short illness, of pneumonia. He took ill at Pugwash and reached home on Saturday. He leaves a wife and family. He was about 55 years old.

ACETYLENE RENDERED HARMLESS.

ACCORDING to John S. Seymour, former United States Commissioner of Patents, by the use of a recent invention acetylene can be used for public and private illumination without any danger of explosion, even if the gas is subjected to the test of an electric spark. To obtain this result the storage cylinder is packed with asbestos or brick disks—the latter of 80 per cent. porosity—and filled with acetone. The acetylene is then pumped into the cylinder or tank under a pressure of ten atmospheres. It is found that the acetone dissolves, or absorbs the acetylene to the extent of 100-fold the mathematical capacity of the cylinder. The gas is now being used on several railroads in this manner for illuminating purposes. William McDevitt, of Philadelphia, inspector for the fire underwriters, said that the invention constituted the greatest improvement in the safe use of acetylene yet extant. With the gas stored in this manner, he believed that the element of danger of explosion was almost eliminated.

AN IDEA FOR GAS BURNERS.

According to The Baltimore News, the latest idea for the use of gas is an attachment for parlor stoves which gives a steady flow of gas over a large surface. A bushel of curled iron shavings is piled upon the grate. The shavings become red hot and distribute the heat as evenly as a coal fire. The efficiency of the gas flame is trebled through the use of shavings. J. T. Fleeherty, of that city, is responsible for the use of shavings, and he declares that the result is most satisfactory. So far as the heat given off by the stove is concerned, he is right, for the fire is bright enough to warm any good-sized parlor. He is now experimenting with the use of shavings in connection with a gas attachment for a kitchen stove, and he believes that with the combination a fire hot enough to bake can be secured. He also believes that eventually the device can be applied to a furnace. While not thoroughly satisfied yet as to the cost of gas for running a parlor or kitchen stove, he said that he thought it would be less than coal.

W. Wyatt & Sons, stove and tinware dealers, London, Ont., are occupying a four-storey building on Talbot street, but do not find it too large for their very complete stock.

WANTED TO HEAT THE TROPICS.

A curious instance of the zeal of British merchants to cultivate colonial trade has been furnished to many firms in Trinidad lately, says The Trinidad Mirror. Numbers of beautifully illustrated catalogues have been received, setting forth the manifold excellencies and beauties of fire grates, stoves, fire irons, and other accessories for keeping rooms warm in cold climates. What on earth do these British mecchants imagine Trinidad to be? In the Arctic regions? Is it the outcome of ignorance or must we attribute their favors to the zeal which outstrips the discretion of the office boy in search of promotion? Much surprise is felt on turning over these catalogues to discover that there is no mention of skates! Are we doomed to endure yet another winter without these delightful aids to healthful amusement? We are afraid we are!

AN ATTRACTIVE CALENDAR.

The Paterson Manufacturing Company, Limited, manufacturers of building papers, roofing felt, etc., Toronto, have just issued one of the daintiest calendars of the year. It contains, in addition to a large letter-date pad, a fine lithograph of a bewitchingly sweet maiden of ten summers or so. When the trade see this calendar it is likely that The Paterson Company will have trouble in supplying all who want them with this beautiful production. If you want one, speak quick.

METALLIC GOODS GROWING IN FAVOR

The tinsmith of the present day must be progressive if he is to keep in touch with his trade. An illustration of this necessity is given in the growth of the demand for metal roofing, ceilings and decorative effects. It is only about 17 years since The Metallic Roofing Co., of Toronto, started the manufacture of one line of metal roofing, and now they are making over a thousand lines for various purposes, for inside as well as outside use, and including the most stately and beautiful effects as well as the plainer lines for everyday use.

This company have just finished the erection of a showroom, the exterior and interior of which are fitted with their own lines. The effect is artistic to an exceptional degree, some of the beam, shelf and cornice effects being a marvel of ingenuity. Any tinsmith visiting Toronto should make it a point to see this showroom, for it will give him in half-an-hour an idea of the possibilities for him in this line of work which he might not grasp at home in years.

The demand for this class of work is steadily increasing as may be judged from the fact that The Metallic Roofing Co. use 40,000 boxes of soft steel plates of one size alone, each box weighing 112 lb.

W. J. Manning, agricultural implement agent, Stonewall, Man., is succeeded by Manning & Vincent.

MANTELS, GRATES and TILE.

Are any of your customers building a new house? If so, why not try and sell them a mantel as well as hardware? They will want one, and it will pay you. Write us for catalogue and price.

A WORTHY INSTITUTION.

WHEN the farmer puts his seed under mother earth he expects it to bear bushels of grain in a few months.

So it is with the merchant. He invests money in merchandise, counting on a profitable turnover.

A father pays for his son's education anticipating that it will provide the young man with the powers of mind to put the body and head at work in gaining a livelihood.

Yet the seed may not bring forth grain, the merchandise may not be sold at a profit, and the young man may not reach the ideals of his father.

In all these instances the expenditure of money is a speculation. It may bring happiness and it may not.

Do you want to put your money into active work where you are sure—no speculation this time—it will reap happiness not only to yourself but to suffering children?

A Scene in the Sick Children's Hospital.

To-day the Hospital for Sick Children, Toronto, is performing a heavenborn mission on earth. It is renewing health, removing pain and straightening distorted limbs of hundreds of young Canadians, boys and girls, who will yet make their mark in this growing Dominion, but who, were it not for this noble institution, might have already filled an early grave.

That's where your dollar can find a way to bring you pleasure and profit without any doubts or fears as to the investment. Money is always at work. It is ceaseless in its labor, but in no spot in this fair Canada is it put to better service than at the Hospital for Sick Children. Step into the hospital any day in the week and you will see the fruits. Faces once pale and wrinkled are healthy and round; bodies once aching with pain are filled with life, and limbs once helpless are as active as bright Canadian boys and girls can make them.

The Hospital for Sick Children depends solely upon the generosity of the people of Canada. It requires $35,000 a year for its maintenance, and it stands to-day as a monument to the big hearts of our people.

It takes a dollar a patient per day to maintain the Hospital. The Ontario Government contributes $7,000 a year, or almost 17 cents per patient per day, for there are always at least 150 children under treatment. This amount from the Government is all expended on maintenance. Then the corporation of the city of Toronto gives $7,500, or 17 cents per patient per day, and remember, not for Toronto patients, but for every child no matter from what point he may come. And in addition to this Toronto citizens donate from $4,000 to $6,000 for the maintenance of all patients, to say nothing of the $4,000 contributed yearly by Toronto people towards maintaining cots they have founded in the Hospital.

Ten years ago the Hospital was encumbered with a mortgage. The building and its furnishings cost $150,000. The corporation of the city of Toronto contributed $20,000 and the citizens of Toronto gave $60,000. Year by year the mortgage has been reduced, and it is now paid.

The Hospital must proceed in performing its great mission. Money is needed to maintain it, and this appeal is made for that purpose. Hospital work cannot be conducted without money. To keep the machinery moving dollars and cents are needed. Nurses, domestics and officials have to live. Their wages must be paid.

Let every one who can spare a dollar forward it as quick as the good thought strikes them to Douglas Davidson, Secretary of the Hospital for Sick Children, or to J. Ross Robertson, Chairman of the Trust, College street, Toronto.

The Tucker Hardware Company, Weyburn, N.W.T., have sold their hardware business to J. C. McLennan.

"You Pay Your Money and Take Your Choice."

If you want low-priced horse nails, we can make them equal to, if not better than any other Horse Nail Maker in Canada. But we don't believe in them, and if you give the matter a little consideration, you won't believe in them either.

You can't make low-priced horse nails unless you use low-priced material: can you? Neither can you make the best Horse Nails unless you use the best material. You will surely admit that. The cost of manufacturing the low-priced material or the best, is practically the same, so that it resolves itself into a question of the quality of material used to effect any economy. The extreme difference between the low-priced material that is fit to make a horse nail, and the best obtainable quality—such as we use exclusively—of SWEDISH CHARCOAL MILD TOUGH STEEL NAIL RODS, does not exceed $20.00 a ton, or one cent a pound, or say twenty-five cents a box. Now is it not better to pay one cent a pound more for the material? We think so: and if the Farrier will only compare fairly the advantages to him and his customer of using only the best horse nails, we shall not hear so much about "cheap nails." Do not forget the fact that if you buy (as you can) horse nails at less than the "**C**" brand, that for every 25c. a box less (on the average size No. 8) it only reduces the cost one-third of one cent on the Nails used in shoeing a horse. It is poor economy to use poor material of any kind, and especially in the cost of Horse Nails.

We solicit your expressed preference for the "**C**" brand on your orders.

Canada Horse Nail Company, MONTREAL.

MARKETS AND MARKET NOTES

QUEBEC MARKETS.

Montreal, December 19, 1902.

HARDWARE.

THERE are but few quotable changes to report on the market this week. The movement in sleigh bells, skates, and other goods of the kind, while not as active as a couple of weeks ago, is yet quite satisfactory and has kept up unusually close to Christmas. The results of stock-taking have shown business to be in a healthy condition and that all jobbing houses have had a very good year's trade. The only change of importance in prices has been the reduction of 10c. per keg in wire nails. Most dealers are now looking for a like reduction in the price of cut nails. But according to one usually well-posted authority, cut nails will not be changed, or if they should be the reduction would only amount to one or two cents, as the changed conditions of selling cut nails will make a difference. Business with country points has assumed the usual quietness which always characterizes it ust prior to the holiday season, but with city merchants jobbers are still doing an active trade, especially in the Christmas goods.

BARB WIRE.—A meeting in regard to barb wire was held last week, but no change of importance was made. The price is now $2.90 per 100-lb. keg f.o.b. Montreal, and $2.55 f.o.b. Cleveland.

GALVANIZED WIRE.—The market is quiet and prices are unchanged. Our quotations are as follows: Nos. 6, 7 and 8 gauge, $3.20; No. 9, $2.55; No. 10, $3.30; No. 11, $3.40; No. 12, $2.70; No. 13, $2.80; No. 14, $3.80; No. 15, $4.30; No. 16, $4.55; No. 17, $4.95; No. 18, $5.20. In carlots, f. o. b. Cleveland, the prices are: No. 9, $2.15; No. 12, $2.30; No. 13, $2.40, not dutiable. No. 10, $2.20; No. 11, $2.25; No. 14, $2.50; No. 15, $2.95; No. 16, $3.05, dutiable. In less than carlots, 12½c. per 100 lb. extra is charged.

SMOOTH STEEL WIRE.—There is no further change in this wire, and no improvement is reported in the demand. We quote: Bright and annealed, $2.50 per 100 lb. f. o. b. Montreal, Toronto, Halifax, London, Hamilton and St. John. Net extras per 100 lb. are now as follows: Coppered wire, 60c.; tinned wire, $2; oiling, 10c.; spring wire, $1.25; best steel wire, 75c.; bright soft drawn, 15c.; special hay-baling wire, 30c.

FINE WIRE.—This moves slowly. The discount is 25 per cent., and the net extras are as follows: 1 and 2-lb. hanks, 25c. per 100 lb.; ½-lb. hanks, 37½c. and ¼-lb. hanks, 50c.

BRASS AND COPPER WIRE.—In neither of these wires is there much doing this week. The discount is 62½ per cent.

FENCE STAPLES.—A slight amount of business for spring delivery is reported, which is done on a basis of $3 per 100-lb. keg for galvanized staples and $2.80 per 100-lb. keg for bright. 25c. extra is charged for 25 and 50-lb. packages.

WIRE NAILS.—The feature on this market has been the reduction in price of 10c., making quotations now $2.40 per keg in carlots and $2.45 per keg in small lots, f.o.b. Montreal, London, Hamilton, Toronto, Brantford, Windsor, Ont., and St. John.

CUT NAILS.—No change in the price of cut nails is to be reported, but it is expected that they will be reduced. At present the market is quiet at $2.45 in small lots and $2.40 in carlots.

HORSE NAILS.—There is a fair demand. Discounts are quoted as follows: "C" brand, 40, 10 and 7½ per cent. off; on "M" brand, "Oval," 57½ per cent.; "New City," 57½ per cent.; "New Countersunk," 65 per cent.; "Monarch," 65 per cent.; "Peerless," 50 and 7½ per cent.

HORSESHOES.—Prices are unchanged. The demand is moderate. We quote as follows: Iron shoes, light and medium, pattern, No. 2 and larger, $3.35; No. 1 and smaller, $3.60; snow pattern, No. 2 and larger, $3.60; No. 1 and smaller,

RETURNED DEC 12 1903

"Famous" Air-Tight Heater--Series 21.

All sheet iron body, heavy sheet-steel linings, and cast-iron pipe collar.

Perfect screw-closing damper renders draft through stove impossible, unless desired.

No nickel except urn. New inner linings can be put in by removing top.

We can make prompt shipment in all sizes of this series.

$3.85; X L steel shoes, new light pattern, sizes 1 to 5, No. 2 and larger, $3.45; No. 1 and smaller, $3.70; featherweight, all sizes, 0 to 4, $5; toe weight, all sizes, 1 to 4, $6.25. Shoes, more than one size in a keg, 10c. per keg extra. F.o.b. Montreal only.

RIVETS AND BURRS.—Business in this line is slow and the market is without special feature. Discounts follow: Best iron rivets, section carriage, and wagon box, black rivets, tinned do., coopers' rivets and tinned swedes rivets, 60 and 10 per cent.; swedes iron burrs are quoted at 55 per cent. off; copper rivets, with the usual proportion of burrs, 45 per cent. off and coppered iron rivets and burrs, in 5-lb. carton boxes are quoted at 60 and 10 per cent. off list.

BOLTS.—The situation is entirely unchanged. Trade is quiet. We quote: Norway carriage bolts, 55 per cent.; common, 50 per cent; full square carriage bolts, 55 per cent.; machine bolts, 50 and 5 per cent.; coach screws, 66 2-3 per cent.; sleighshoe bolts, 65 and 5 per cent.; blank bolts, 50 and 5 per cent.; bolt ends, 50 and 5 per cent.; plough bolts, 50 and 5 per cent. To any retailer an extra discount of 10 per cent. is allowed. Tire bolts, 67½ per cent.; stove bolts, 67½ per cent. Nuts, square, 3¼c. per lb. off list; hexagon nuts, 3¾c. per lb. off list. To all retailers an extra discount of ¼c. per lb. is allowed.

SCREWS.—There has been no improvement in the market this week and but little business has transpired. We quote as follows: Round head bright, 82½ and 10 per cent.; flat head bright, 87½ and 10 per cent.; brass, round heads, 75 and 10 per cent.; brass, flat heads, 80 and 10 per cent.

CORDAGE.—No further change has been made in sisal, which is steady at the last reduction. Our prices follow: Manila, 14c.; British manila, 12c.; sisal, 11½c.; lathyarn, 11c.

BUILDING PAPER.—This moves slowly at unchanged prices. We quote as follows: Tarred felt, $1.70 per 100 lb.; 2-ply, ready roofing, 85c. per roll; 3-ply, $1.10 per roll; carpet felt, $2.25 per 100 lb.; dry sheathing, 35c. per roll; tar sheathing, 45c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll; O K and I X L, 65c. per roll; heavy straw sheathing, $30 per ton; slaters' felt, 60c. per roll.

SCREEN WIRE CLOTH.—There is nothing doing. The nominal price is $1.40 per 100 square feet.

FIREBRICKS.—In this line there is very little doing. We quote as follows: English firebricks, $16 to $22 and Scotch, $17 to $22 per 1,000.

CEMENT.—The market this week is not active. We quote: Canadian cement, $1.90 to $2.25; German, $2.20 to $2.30; English, $2.15 to $2.25; Belgian, $1.70 to $1.95 per bbl., ex-wharf, and American, $2.10 to $2.20 ex-cars.

SKATES.—There is still a fairly good movement in skates, although the heaviest part of the trade is over for the season. Our quotations are as follows: Halifax pattern, 36c. per pair; nickel-plated, 65c. per pair; ladies nickel-plated, 60c.; ladies' concave nickel-plated, $1.35; plain hockey, 27c. to $1.35; nickel-plated hockey, 60c. to $2.50; double-end hockey, $1.50 to $3. Skate straps, 35c. to $1.35.

HOCKEY STICKS.—A moderate demand is experienced this week. There is no change in prices. Quotations are as follows: Best second growth, goal keepers', $4.20 per doz.; ash, $2.90; elm, $2.25;

boys' elm, $1.10; common, 90c. Regulation pucks, $1.50 per doz.

SNOW SHOVELS.—These are still going well. An active trade has been in progress since the commencement of the cold weather. We still quote: "Habitant," $2.25 to $2.40; "Victor," 30 per cent. off; steel railroad shovels, 48 and 5 per cent. off.

FIRE SHOVELS.—A fair trade is doing this week. We quote as follows: No. 70, 38½ to 40c. per dozen; No. 55, 55 to 60c.; No. 57, 82½ to 90c.; No. 60, 82½ to 90c.; No. 65, $1.37½ to $1.45; No. 80, 50 to 55c.; "Duplex," No. 7, $1.21; No. 9, $1.52; No. 11, $1.82.

COAL HODS.—Jobbers report a moderate demand. Quotations are as follows: Japanned, 16-in., $4.50 per doz.; 17-in., $4.80; 18-in., $5.10; with gold band, 17-in., $5.10; 18-in., $5.40. Galvanized, 16-in., $6.20; 17-in., $6.50; 18-in., $6.80 per doz. The discount is 45 per cent.

LANTERNS.—There is still a fair movement in lanterns, but there is nothing special to report on the market. Prices are: Tilt, lift or hinge, No. 0, $4.00 per dozen; Cold Blast, $7 per dozen; dashboard, No. 0, $5.75 per dozen; cold-blast dashboard, $9 per dozen. Extras are as follows: Japanning, 50c. per dozen; copper-plating cold blast, $2 per dozen. The prices quoted are f.o.b. London, Hamilton, Toronto, Belleville, Kingston and Montreal.

METALS.

There has not been any marked change in the situation of the metal market. Structural material is still much wanted, and although the steel rail mills at Sault Ste. Marie have not enough orders to keep them going, orders have been given to foreign mills, and American importers also report the receipt of some good round inquiries from Canadian sources. There has been no improvement to speak of in the sheet metal trade, but reports from the bar mills indicate a good business. Black Canada plates have shown some weakness on the English market. One buyer expects to obtain a quantity at £8. Importers report a very good demand for galvanized Canadas, and some large orders have been cabled recently.

BAR IRON.—There is a good demand this week, and the market is firm, though no actual change in prices has been made. We quote: Merchants' bar, $2; horseshoe iron, $2.25; forged iron, $2.20.

BLACK SHEETS.—The market has displayed no new phase since our last report and prices remain unchanged. We quote: 28 gauge, $2.65; 26 gauge, $2.60; 20 to 24 gauge, $2.50 and 8 to 20 gauge, $2.50.

GALVANIZED IRON.—The trade in galvanized iron is not active. Prices are as follows: No. 28, Queen's Head, $4.40; Apollo, 10¾-oz., $4.40; Fleur de Lis, $4.15; Comet, $4.10; "Bell" brand $4.05. For less than case lots 25c. extra is charged.

SOIL PIPE AND FITTINGS.—There is nothing of importance to note on this market. Discounts are as follows: Light soil pipe, 3 to 6 inch, 50 per cent.; medium and extra heavy soil pipe, 2 to 6-inch, 60 per cent.; extra heavy soil pipe, 8-inch, 45 per cent.; light fittings, 2 to 6-inch, 50 and 10 per cent.; medium and extra heavy fittings, 2 to 6-inch, 60 per cent.; extra heavy fittings, 8-inch, 45 per cent.

PIG IRON.—There is no change. The price is very firm at $24 to $24.50 f.o.b. Montreal.

LONDON, ENG.

Manufacturers of

HIGH-CLASS VARNISHES ONLY

Which can be obtained direct from the works or from the principal Color Dealers in Canada.

INGOT COPPER.—The tone of the market is easy at $12.25 per 100 lb.

INGOT TIN.—The price of pig tin was advanced on Tuesday by some dealers. We quote $27.50 per 100 lb.

PIG LEAD.—There is a fair inquiry and a moderate trade is doing at $2.90 in carlots and $3.25 in small lots.

LEAD PIPE.—Composition and waste sell at 8c. and ordinary at 7c. The discount is 37½ per cent.

IRON PIPE.—There is a good movement in iron pipe and prices are steady and unchanged. Quotations are as follows: Standard pipe, per 100 feet, in lengths under 19 feet: Black, ¼, $2.40; ⅜, $2.65; ½, $2.85; ¾, $3.65; 1-in., $5.20; 1¼, $7.35; 1½, $8.95; 2-in., $12.55. Galvanized, ¼, $3.20; ⅜, $3.45; ½, $3.85; ¾, $5; 1-in., $7.20; 1¼, $10.05; 1½, $12.20; 2-inch, $16.85. Extra heavy pipe, plain ends, are quoted per 100 feet as follows: Black, ½, $4.20; ¾, $5.25; 1-in., $7.55; 1¼, $10.55; 1½, $12.75; 2-in., $17.60. Galvanized, ½, $5.20; ¾, $6.65; 1-in., $9.55; 1¼, $13.25; 1½, $16; 2-in., $21.90. For threads and couplings 5 per cent. is added.

TINPLATES.—There has been no change on this market. The price of cokes remains at $4.25 and charcoals, $4.75 to $5.25.

STEEL.—The movement in steel is fairly active. No quotable change is reported. We quote: Sleighshoe, $2.10; tire, $2.20; bar, $2.05; spring, $2.85; reeled machinery, $2.75; toecalk, $2.60; machinery (iron finish), $2.10; mild steel, $2.05; square harrow, $2.15.

SHEET STEEL.—Some business has been done this week at the prices we quote, but in general, trade is quiet. Our quotations follow: Black Diamond, 8c.; Sanderson's, 8 to 12c., according to the grade; Jessop's, 13c.; Leonard's, 7½c.; Jonas & Colver's, 8 to 15c.; "Air Hardening," 45 to 60c.

CANADA PLATES.—No change is reported locally. The English market for black Canadas has weakened somewhat. Galvanized plates are in good demand among the wholesale trade. We quote as follows: 52s, $2.70 to $2.80; 60s, $2.85 to $2.90; 75s, $2.80 to $2.85; full polished, $3.75 and galvanized, $4.25 to $4.35; galvanized, 60s, $4.45 to $4.55.

TERNE PLATES.—These are slow at unchanged prices. The price is $7.50.

COIL CHAIN.—A few orders have been placed with importers this week. Prices are: No. 6, 12½c.; No. 5, 10½c.; No. 4, 10c.; No. 3, 9½c.; ¼-in., 7¼c. per lb.; 5-16, $5; 5-16 exact, $5.25; ⅜, $4.25; 7-16, $4.05; ½, $3.95; 9-16, $3.85; ⅝, $3.55; ¾, $3.50; ⅞, $3.45; 1-inch, $3.45. In carload lots an allowance of 10c. is made.

SHEET ZINC.—There is not much doing in this metal. The price is $5.85 to $6.15.

ANTIMONY.—We quote 10c.

ZINC SPELTER.—The movement in spelter is light and the price remains at 5c.

SOLDER.—The demand for solder is steady and a good amount of business is doing at 20c. for bar solder and 18c. for wire solder.

SCRAP METALS.

The scarcity of mixed country rags has not been relieved and the market is still firm, though no quotable change has been made. There is no special feature to the market for metals this week, and our quotations are as follows: Heavy copper and wire, 9c. per lb.; light copper, 8c.; heavy red brass, 10c.; heavy yellow, 8½c.; light brass, 5c.; lead, 2 to 2¼c.; zinc, 2½ to 2¾c.; iron, No. 1 wrought, $15 to $16; No. 2, $7 per ton; machinery scrap, $16 to $16.50; stove plate, $13; malleable and steel, $6; mixed country rags, 60 to 70c. per 100 lb.; old rubbers, 6½ to 6¾c. per pound.

RAW FURS.

The market for foxes is somewhat better this week and one firm has advanced its price to $4 for large, 50c. above former prices. Other furs are now offering fairly well, but supplies are not up to last year's. We quote:

For New Buildings or Old

Where highest excellence is required, our Metallic Ceilings and Walls are used.

Because they give more lasting satisfaction—are strictly sanitary—and are made in a multitude of artistic designs to suit all tastes and requirements.

Progressive dealers everywhere realize the advantages of handling these reliable goods.

Metallic Roofing Co., Limited

TORONTO. MONTREAL. WINNIPEG.

only, and does not admit salted hides. It states that dried skins or hides, and the horns, hoofs, wool and bristles, of cattle, sheep, or swine may be admitted into Canada from the six States in question, provided that they are not produced from animals grown or slaughtered in any of those States, but originated outside them. It is reported that a large cargo of salted hides is now on its way from Engfand to

HIDES.

The only quotable change this week is an advance of 5c. in the price of lambskins. We quote: No. 1 hides, 8c.; No. 2, 7c.; No. 3, 6c.; calf skins, 8 to 10c.; lambskins, 65c. The recent Order-in-Council, providing for the admission of hides into Canada when shipped through the six New England States referred to dried hides

Canada, via either Boston or Portland, and the amended Order does not provide for their entry into Canada.

—

MONTREAL NOTES

Lambskins are 5c. higher.

Wire nails have been reduced in price 10c. per 100-lb. keg.

ONTARIO MARKETS.

Toronto, December 19, 1902.

HARDWARE.

FOR the season trade in wholesale hardware is good. December, this year, will possibly figure out the best December that hardware jobbers have had for a long time. Trade for all lines of hardware is keeping up remarkably well, and although the travellers are coming in for their holidays, there are numerous orders for skates, axes, axe handles, cross cut saws, bucksaws, saw sets, tarred felt paper, chains, rope and files. There is also quite a call for padlocks and the different lines of building hardware. Trade is about over for guns and ammunition, in which lines the manufacturers for some time have been unable to keep the trade supplied with sufficient stocks to fill their orders. Spades and shovels are also in good demand, but the stocks of these in the hands of the jobbers at the present time are light. In some quarters a change is anticipated in the prices of these, owing to the reported competition from England and the United States, but the Canadian trade seem to be satisfied with the domestic article, as it is more saleable in this country than those imported, the shapes, weights and sizes being such as the Canadian artisans have been in the habit of using. The imported goods are often clumsier. Wire nails have declined 10c. per keg. There have been no other changes in prices.

BARB WIRE.—There are quite a few orders coming forward for barb wire. We quote the base price as follows: $2.67½ from Cleveland and 12½c. less in carlots. From stock, Toronto, $3.

GALVANIZED WIRE.—Trade in this wire for the season is moderately active. The prices are unchanged. Our quotations are as follows: Nos. 6, 7 and 8, $3.15 to $3.35 per 100 lb.; No. 9, $2.65 to $2.85; No. 10, $3.20 to $3.40; No. 11, $3.25 to $3.45; No. 12, $2.80 to $3; No. 13, $2.90 to $3.10; No. 14, $3.75 to $3,95; No. 15, $4.30; No. 16, $4.55. Nos. 6 to 9 base from Cleveland are quoted at $2.27½ in less than carlots.

SMOOTH STEEL WIRE.—Trade is still quiet. We quote: $2.50 per 100 lb. Oiling, 10c.; coppering, 60c. and tinning, $2 per 100 lb. extra. Shipping points, Toronto, Hamilton, London and Montreal, with freights equalized on those points.

FINE STEEL WIRE.—There is a small amount going out. The discount is 25 per cent.

WIRE NAILS.—Prices for present and future delivery have been put down 10c. per keg. The manufacturers and wholesale merchants now claim that the price of these has been reduced to the lowest point possible and that the imporattions from Pittsburg will be stopped. If the orders come forward as freely the next few months as they have been doing since the new prices were made it is anticipated that the Canadian factories will have all they can do to turn out the nails required for shipment up till April 1. We quote the base price as follows: $2.45 per keg and 5c. less for carlots. The shipping points are Toronto, Hamilton, London, Gananoque and Montreal.

CUT NAILS.—There is not much of these going out. We quote $2.50 per keg base.

HORSE NAILS.—The colder weather is making horse nails active. We quote the discounts as follows: "C" brand, oval head, 40 and 10 and 7½ per cent.; on "M" brand, 50, 10 and 5 per cent.; on "Monarch," 66 2-3 per cent. and "Countersunk" head, 66 2-3 per cent.

HORSESHOES.—Numerous orders keep coming forward at unchanged prices. We quote: Iron shoes, No. 2 and larger, light, medium and heavy, $3.45; snow shoes, $3.70; light steel shoes, $3.55; featherweight (all sizes), $4.95; iron shoes, No. 1 and smaller, light, medium and heavy (all sizes), $3.70; snow shoes, $4; light steel shoes, $3.80; featherweight (all sizes), $4.95.

SCREWS.—The demand for screws has slackened off a little with the holidays. The prices are unchanged. The discounts follow: Flat head bright, 87½ and 10 per cent. discount; round head bright, 82½ and 10 per cent.; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.; round head bronze, 65 per cent. and flat head bronze, 70 per cent.

RIVETS AND BURRS.—Trade in these has quieted down a little. Discounts are as follows: Iron rivets, 60 and 10 per cent. discount; iron burrs, 55 per cent.; copper rivets, with usual proportion of burrs, 45 per cent.; copper burrs alone, 30 and 10 per cent.

BOLTS AND NUTS.—A fair number of orders keep coming forward for bolts and nuts. Quotations are as follows: Carriage bolts, common ($1.00 list), 50 per cent.; carriage bolts, full square ($2.40 list), 55 and 10 per cent.; carriage bolts, Norway iron ($3.00 list), 55 and 10 per cent.; machine bolts, all sizes, 50 and 10 per cent.; coach screws, cone points, 66 2-3 and 10 per cent.; elevator shaft and whiffletree bolts, 50 per cent.

SPADES AND SHOVELS.—The demand for spades and shovels keeps up well, but stocks in the hands of jobbers are light, as the trade are anticipating a change in prices before long. The discounts are 40 and 5 per cent.

ROPE.—Quite a number of orders are still coming forward for rope at unchanged prices. Our quotations are still as follows: Pure manila, 14c.; British manila, 12c.; sisal, 12c.; lathyarn, single, 11c. and double, 11½c.; sisal bed cord, 3-cord, 48 feet, 65c.; 60 feet, 80c.; 72 feet, 95c. per doz.

HARVEST TOOLS.—The tone of the market is quiet. The discount is 60 and 10 per cent.

LAWN MOWERS.—These at present are quiet. We quote: Woodyatt, 12-in. wheels, $7.50; Star, 12-inch wheels, $5.50; Daisy, 12-inch wheels, $4.90; Philadelphia, 10-inch wheels, $6; Ontario, 10-inch wheels, $12.75. The other sizes are in proportion. The discount is 50 per cent.

GREEN WIRE CLOTH.—This line continues quiet and the prices are unchanged. The base price is $1.40 per 100 square feet.

EAVETROUGHING, ETC.—Trade in eavetroughing has dropped off with the cold weather. Our quotations are as follows: Eavetroughing, 10-in., per 100 ft., $3.10; conductor pipe, 2-inch, per 100 ft., $3; 3-inch, $4; 4-inch, $5.25; 5-inch, $6.75 and 6-inch, $9.

CUTLERY.—There is still an active demand for various lines of Christmas goods, like carvers, pocket knives, skates, etc.

BUILDING PAPER.—In spite of the lateness of the year there is a good demand for tar sheathing and the other lines of building paper. We quote: Dry sheathing, grey or straw, 35c. per roll; tar sheathing, grey or straw, 45c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll.

TINWARE AND ENAMELLED WARE.—Stove furnishings are still moving out freely and the fancy lines of enamelled ware are active.

STOVES, RANGES, ETC.—Quite a number of small heaters are in demand. The mildness of the weather and the fact that coal is so scarce this season are having the effect of prolonging the demand for stoves later than usual. Many citizens cannot procure enough coal this winter to burn in their furnaces and so are putting in coal and wood heaters to accommodate themselves to the decreased supply of fuel that will be provided.

SCREEN DOORS, ETC.—These are still quiet and unchanged, and our quotations are as follows: Screen doors, common, two or three panel, walnut stained, 3-in. style, $6.60; stained, yellow or green, $6.80; in natural colors, oil finish, $8.15; 4-in. style, 20c. per dozen extra.

CEMENT.—There is little doing at present in the cement line. There is no demand and the factories have none to offer, their entire output of the season being exhausted. The prices are nominal and unchanged, and the trade seem to be watching each other to see who will make the first change. But the market now is at about as low a basis as it can be to permit the manufacturers making a reasonable profit in disposing of their product, consequently not much of a decline is expected. It is true the prices advanced last summer, but the prices of soft coal, which article plays a big part in the making of cement, are high, which will have a tendency to maintain firmly the cement market for some time to come. Prices follow: Canadian Portland $2.80 to $3.20; hydraulic, $1.35 per barrel. At the works the prices are $2.50 to $2.70 per barrel.

METALS.

The general metal trade continues satisfactory, although there is approaching a period that always interferes to some extent with business. It is customary for manufacturers to shut down their factories at this time of the year for stock-taking and repairs, and this slackens the demand in some lines. The outside tin markets have improved and therefore the prices of tin locally are strong without

Golden Hints
FOR
Christmas Silverware Trade.

The Christmas season is fast approaching and most of the retailers are prepared for it. It is not too late however to put in an order for a selection of Silver Plated Ware which will do much to increase your holiday trade.

There never was a better season for selling Silverware.

Send us your name and address and we will be pleased to forward you our catalogue filled with selling lines for Christmas.

Be sure it is **Standard Silverware**— it is the best.

Standard Silver Co.,
LIMITED

31-41 Hayter St., TORONTO

there having been made any quotable advance. In the United States there is an entire lack of speculative interest in copper, and buying is only being done in a moderate way. The United States iron trade is quiet, but there has developed a feeling in steel billets decidedly firmer than a week ago and much firmer than a month ago.

PIG IRON.—The situation is unchanged. We quote: $23 for No. 1 and $22.50 for No. 2 at the Canadian furnaces. No. 2 Summerlee is quoted at $23 on track, Toronto.

STEEL BOILER PLATES.—The demand is well maintained. We quote $1.80 per 100 lb. on track, Toronto, in carlots.

STEEL RAILS.—Little new has transpired in the steel rail situation. It is stated that The Clergue Works at Sault Ste. Marie have secured the contract for supplying rails for the Temiscaming Railway, and that with other Government contracts, his mills will be kept running for some time. The price of steel rails of Canadian manufacture is $36 per ton, and the German rails are quoted around $28 per ton.

TOOL STEEL.—This market keeps active at unchanged prices. We quote: "B C" and "Black Diamond," 10 to 11c.; Jessop's, Morton's and Firth's, 14c.; Jonas & Colver's, 8 to 15c.; ditto, "Air Hardening," 30 to 50c.; Chas. Leonards', 8 to 9c.; Park's "Silver," 12 to 14c.; Park's Special, 15 to 20c.

MILD STEEL.—There is a good demand, and the pcices are still quoted at $2.50 to $3 per 100 lb. f.o.b. Toronto.

BOILER TUBES.—These are unchanged.

SPRING STEEL.—The demand is well maintained. We quote $3 to $3.50 per 100 lb. on track, Toronto.

BAR IRON.—This article is scarce and in good demand. The base price follows: $2.05. Extras cut to length while rolling: 2 ft. and over, 10c. per 100 lb., 1 ft. and under 2 ft., 15c.; under 1 ft., 20c.; over 20 ft. by special agreement, according to length and size.

BLACK SHEETS.—These are active and unchanged in price. We quote: Common, $3.15 for 28 gauge and dead flat. $2.50 for 26 gauge.

CANADA PLATES.—Fair quantities continue to be sent out. We quote: All dull, $2.90 to $3; half-polished, $2.85 to $3.10 and all-bright, $3.75 to $3.85.

GALVANIZED SHEETS.—These are rather more active this week. We quote as follows: Queen's Head, $4.50 for 28 gauge; American, $4.40 for 29 gauge; Bell brand, $4.30 for 28 gauge; Gordon Crown, $4.50 for 28 gauge.

TIN.—The demand is easing off this week. The market is strong without any quotable change being made in the prices, owing to the strong upward turn taken by the outside markets. We quote $29 to $30 per 100 lb.

TINPLATES.—These are unchanged. We quote: Charcoals, $4.75 to $5 and cokes, $4.25 to $4.50 per box.

COPPER.—Ingot copper is quiet. Prices follow: Ingot copper, $13 and sheet copper, $22 to $23 per 100 lb.

BRASS.—A fair amount of business continues to be done. The discount is unchanged at 15 per cent.

LEAD.—This metal is quiet. We quote: Pig lead, $3.50 per 100 lb. and bar lead. $3.75.

IRON PIPE. There is still an active demand and some sizes, particularly ½-in., are scarce. We quote as follows: Per 100 feet, black pipe, ⅛-in., $3; ¼-in., $2.30 to $2.40; ⅜-in., $2.65; ½-in., $2.85; ¾-in., $3.65; 1-in., $5.20; 1¼-in., $7.35; 1½-in., $8.95; 2-in., $12.55; 2½-in., $20 to $21; 3-in., $24 to $25; 3½-in., $30 to $32; 4-in., $37.50 to $38.

ZINC SPELTER.—There is a fair demand and the prices are unchanged at 5 to 6c. per lb.

ZINC SHEETS.—There is a good and steady business being done. We quote: Cask lots, $6 to $6.25 and part casks, $6.25 to $6.50.

SOLDER.—The situation is unchanged.

ANTIMONY.—This line is quiet. The price is $9 per ton.

PETROLEUM.

The Union Petroleum Company have advanced prices ½c. per gallon for all grades except Pennoline, their figures now being: Lily White, Canadian, 17½c. in bbls.; Silver Light, American, 19½c. in bbls.; Crystal Spray, water white, American, 20½c. in bbls.; Pennoline, best American imported, 22c. in bbls. In bulk, 2c. less. The Queen City Oil Company quote their brands as follows: Sarnia Prime White, 17½c.; Sarnia Water White, 19½c.; Family Safety, 20c. in bbls.; Pratt's Astral, 19½c. in bulk.

HIDES, SKINS AND WOOL.

HIDES.—These are weak without any quotable change, owing to a decline on the Chicago market. The offerings are heavy, of poor quality, and are not in good demand. We quote: No. 1 green, 8c.; No. 2 green, 7c.; No. 1 green, steers, 8½c.; No. 2 green, steers, 7½c.; cured, 8½ to 9c. per lb.

CALF SKINS.—These are selling freely. Our quotations are as follows: Veal skins, 6 to 14 lb. inclusive, No. 1, 10c.; No. 2, 8c.; do, 15 to 20 lb. inclusive, No. 1, 9c.; No. 2, 7c.; deacons (dairies), 60 to 70c. each.

WOOL.—There is an active demand for wool, owing to strong Old Country markets, and prices here are up 1c. per lb. We quote: Unwashed, 8 to 8½c.; fleece, 15c.; pulled wools, super, 15 to 16c. and extra, 19 to 20c.

COAL.

There is a more liberal delivery of coal, but prices are still ruling from $8 to $10 for anthracite. The city has ordered a further supply of soft nut coal, to be delivered in Toronto at $5.50 per ton, at the rate of ten cars a week. This meets with the strong disapproval of coal dealers, but as the supply has been insufficient, their objections will carry little weight.

OLD MATERIAL.

There is no change. Business keeps decidedly active. Our quotations are as follows: Heavy copper and wire, 10c. per lb.; light copper, 8 to 8½c.; heavy red brass, 9½c.; heavy yellow brass, 8 to 8½c.; light brass, 5 to 5½c.; lead, 2 to 2¼c.; scrap zinc, 3c.; iron, No. 1 wrought, $13 per net ton; No. 2 wrought, $4.50; machinery cast scrap, $15.50 to $16; stove plate, $10; malleable and steel, $6 to $6.50; old rubbers, 6½c. per lb. and country mixed rags, 50c. per 100 lb.

NOTES.

Low-down closets are $1.50 cheaper.

The prices of wire nails have declined 10c. per keg.

NOVA SCOTIA MARKETS.

Halifax, December 16, 1902.

THE hardware trade, except in a few of the more seasonable lines, has not been very brisk during the last week, and for the next month or so there will be no great activity, or, till the time arrives when spring orders will commence to come in. The time now is fully taken up, however, in stock-taking, both as to the amount of stock on hand, the amount of business done during the year, and the general prospects for the coming year.

* * *

The first of these is a matter of so much work in going through the shop from cellar to attic with a careful recording of quantities and prices. The second is a more intricate piece of work, for many conditions have to be examined and many items considered of which there is no "invoice" to regulate value. This part of the business has been more or less under consideration for the last month or two, but now is the time to come down to solid facts. The results, as far as already figured out, indicate that 1902 has been a very successful business year, and all firms consulted place the volume, as well as the general conditions prevailing, as fully equal to last year, which was an exceptionally good one, and in many lines it is considered well beyond the average. Prices have been generally firm, and though there was considerable fluctuation in some oils, prices in the local market remained fairly steady.

* * *

The third matter to be considered is equally important—what of next year? There is a generally prosperous condition throughout the country. This is the word brought or sent in by the various travellers. The crops have been good, and though the apple crop was smaller than usual, higher prices were realized, and this equalized conditions. Money is fairly plentiful in the country and there are considerable building operations and other works in contemplation, all of which will strengthen trade. During the year, and, in fact, for two years, the dealers have been at considerable inconvenience to have orders filled by the manufacturers, filled promptly, especially in iron and steel goods. The fact that some lines had to be ordered six months ahead has been a hindrance to business, and there is some indication that this will be largely remedied during the coming year. A hopeful feeling prevails in all lines of hardware that 1903 will be equal and possibly exceed either 1901 or 1902.

* * *

The exports for the last week amounted to $145,688, as compared with $147,861 for the corresponding week last year. Shipments were made as follows: West Inhies, $78,081; United States, $28,040; Great Britain, $25,796; Newfoundland, $13,161; France, $650.

R. C. H.

TO THE HARDWARE TRADE OF CANADA.

We beg to draw your attention to a circular letter sent out by The Brown Fence & Wire Co., Cleveland, under date of October 30th, regarding Coiled Spring Wire. As we are the agents for the Brown Fence & Wire Co. in Canada, we feel that this circular letter is an injustice to the other Coiled Wire Manufacturers in Canada, who we believe are trying to confine as far as possible the sale of coiled wire to the hardware trade.

We are sorry this circular letter was sent out, as it is not our intention to antagonize the other manufacturers of coiled wire in Canada.

Yours truly,

THE WESTERN WIRE & NAIL CO., Limited.

TRADE MARK.

HEATING AND PLUMBING

PLUMBING AND HEATING NOTES.

THE Toronto plumbing inspectors are popular fellows among the craft, not only because of their genialty but because of their readiness to face and overcome obstacles. On Saturday one of them was up against an unusual job, fixing the plumbing in the bathroom of the city smallpox Isolation Hospital. He got over the danger of quarantine by having the room disinfected and climbing in to do the work by a window, and returning by the same route.

The C. P. R. has decided to spend about $100,000 in adding 200 rooms to its hotel an Banff.

J. T. Wilson & Son, architects, Chatham, Ont., are preparing plans for a residence for Mr. Glover.

The Canadian Firestop Manufacturing Company have registered in Montreal to manufacture fireproof articles.

H. W. Anthes, of The Toronto Foundry Company, is around again after several weeks' confinement to his house by illness.

Mr. Law, of Moose Jaw, N.W.T., has prepared plans for a new station, round house and other railway buildings at Elkhorn, Man.

Defective plumbing is blamed for about $5,000 loss to goods in Cole's National Manufacturing Company, Ottawa, on Thursday of last week.

The Buffalo Tool and Machine Company, Bay street, Toronto, have started the erection of an 18 x 30 ft. warehouse on Front street, opposite the Union Station.

The Rota Filters, Limited, Windsor, Ont., have been incorporated with a capital of $25,000, and J. A. Smith, F. S. Evans and J. L. Murphy as provisional directors.

A. A. McMichael, of The James Robertson Company, Toronto and Montreal, reached Halifax by the ss. Pretorian this week. He will spend a few days in St. John, N.B., and will probably reach Toronto on Monday or Tuesday.

Toronto jobbers report much difficulty in getting black iron pipe, particularly in sizes from 1-in. up. There seems to be such a general demand from all buying centres that all the mills are having trouble in filling their orders.

Wm. Hall, of Adam Hall & Company, plumbers, Peterboro', Ont., was in town this week buying fixtures for a new house which he is erecting. Rumor has it that this new house is to be a home for another beside Mr. Hall before long. Our best wishes.

Owen Sound ratepayers have voted 875 for and 24 against a by-law to take over the electric light plant in the town, and 876 for and 24 against one to take over the gas plant. The passing of these by-laws will result in an expenditure of about $75,000.

Edmund E. Cathels, former manager of The Hamilton Gas Light Company, goes to Providence, R.I., where he has been appointed engineer and assistant manager of The Providence Gas Works. He will retain his interest in the Woodstock and several other Ontario gas companies.

PLUMBERS' WEATHER.

"This has been a plumber's season all right," said a Toronto master plumber this week. "The weather continued warm until much later than usual, enabling us to get our contract work well cleaned up. Then we had a good stiff frost last week, and repairs have been the order of the day."

BUILDING PERMITS ISSUED.

TORONTO.

To The Canada Printing Ink Company for a factory on Dunn avenue, to cost $15,000. Gregg & Gregg, architects.

To The Wm. Davies Company for a store on Front street, near Vine street, to cost $1,200, and an ice house covered with galvanized iron, on Front street, to cost $2,000.

PLUMBING AND HEATING CONTRACTS.

Fullerton Bros., Toronto, have contracts for the plumbing and heating of two houses on Walmer Road for Mr. Stewart, and two houses on Victor ave., for W. B. Charlton.

Joseph Harris, Toronto, has contracts for heating houses for H. H. Williams, Walmer Road; F. R. Scott, Rosedale; E. E. Woodley, Avenue Road; George Mackenzie, Deer Park; Wm. Booth, Chicora avenue; J. T. Smith, Sherbourne street, and F. Sanderson, Crescent Road, and in a warehouse for George Beardmore, King street west.

Purdy, Mansell & Co., Toronto, have the contract for heating a greenhouse for H. H. Fudger, Rosedale; for plumbing and hot-water heating a house for G. Wills, Brunswick avenue; for the plumbing and heating of a house for G. A. Dinnick, St. George street; for plumbing and heating a house for Chadwick McTaggart, on Dufferin street, Toronto.

Fiddes & Hogarth, Toronto, have contracts for steam heating premises for The Woltz Manufacturing Company, 130 Richmond street west; for plumbing in the Dovercourt Road Baptist Church; for plumbing and heating Ald. Oliver's house on Sherbourne street; for plumbing in E. W. Malcolm's residence, South Drive, and for the plumbing in a house on Berkeley street, for T. G. Brough.

THAWS FROZEN PIPES BY ELECTRICITY.

WHEN water pipes are frozen at Sault Ste. Marie, Ont., they are thawed out by electricity, writes W. S. Horry, of that town, to The Electrical World and Engineer. Wm. Gorby, electrician, does the work, and has in the past six years thawed out all kinds and conditions of pipes, up to a 4-in. cast-iron pipe frozen 20 feet.

Mr. Gorby uses a 250-k.w. transformer, the smallest at his disposal, which he mounts on a sleigh. On the first appearance of the pipe-thawing apparatus in the winter, the rig is besieged with customers all wanting their house pipes thawed out. These people generally claim that it is the company's mains and not their own pipes that prevent the water from flowing, so a bargain is struck generally at about $3, payable immediately the water flows, provided it is proven that their pipes are frozen and not the mains.

The primary wires (2,200 volts) are bared and the current led through a water rheostat to the transformer. An ammeter indicates the load on the transformer primary. The secondary is connected to the frozen pipe at two places and the current switched on. In the ordinary house service pipes the water begins to flow very quickly, frequently within a minute. It may seem a bit dangerous handling the primary current in the way these men do, but in the very cold weather the snow is an insulator, like glass, and although the rig has been employed very largely, no accidents have occurred and the apparatus has never yet failed in getting a frozen pipe working.

LOW-DOWN CLOSETS CHEAPER

The price of low-down closet combinations have been reduced $1.50 all round. This action was taken by the Plumbers' Supply Association at Toronto this week to meet the competition of a Detroit house which has been cutting prices in Ontario recently. As there has been no reduction in the cost of materials, this reduction comes out of the profits the Toronto supplymen have been getting.

TRANSPORTATION ON THE LAKES

THE current issue of The Scientific American, which is devoted to the subject of "Transportation on Land and Sea," contains an article by Mr. Waldon Fawcett, from which the following extracts have been taken :

"The commercial chronicle of the United States records no more remarkable evolution than the development of transportation on the Great Lakes, extending as it does over little more than half a century, yet characterized by a series of radical innovations in the types of craft employed.

Unfortunately, it has never been found possible to accurately measure the entire water-borne commerce of the Great Lakes, but the statistics compiled by the United States Government officials at the Sault Ste. Marie canal—the water gateway connecting Lakes Huron and Superior, through which passes perhaps half of the commerce of the unsalted seas—indicate how rapid has been its growth. In the year 1881 the total amount of freight passing the Sault was 1,567,741 tons ; in 1891 it was 8,888,759 tons ; and in 1901, the last calendar year for which statistics are available, the aggregate was 28,403,065 tons. In other words, the traffic in 1901 was more than three times that a decade before and eighteen times that a score of years since.

"Passenger travel on the Great Lakes has also experienced remarkable growth. There are connecting lines of fast passenger steamers between the principal cities, such as Buffalo and Cleveland, Buffalo and Detroit, Cleveland and Detroit, and Chicago and Milwaukee, and also there are in service exclusively passenger steamers which make regular trips between Buffalo and Chicago. The Sault Ste. Marie statistics, which recorded the passage through the canals during the season of 1901 of upward of 60,000 passengers, chronicle, of course, but a fraction of the whole passenger travel, and it is estimated that the passenger steamers of the vast inland waterway carry annually between a quarter of a million and one-third of a million of people.

"A most interesting phase of the development of transportation and kindred activities on the Great Lakes is found in the increasing degree of attention given by the powerful steel-vessel building interests of the interior to the construction of steamers designed for salt-water traffic or for both lake and ocean service. Vessels of this type are proving particularly profitable to their operators by reason of the fact that they may be transferred to the Atlantic coasting trade during the winter months, when navigation on the lakes is impossible. In order to pass through the Welland and St. Lawrence canals, a vessel must not exceed 270 feet in length, and the carrying capacity of such a craft is approximately 3,000 tons. It may be noted in passing that the season of navigation on the lakes has been lengthened materially of late years. Many vessels are put in service earlier than formerly, and with the gradual disappearance of the old craft has come a disposition to have the carriers brave the elements until late in the autumn."

A SCALE IN USE FIFTY YEARS.

Fifty years is a long time for scales to be in everyday use, yet this is the length of time a merchant in Rushville, Ill., has used a pair he bought fifty years ago. His letter to the Fairbanks Company reciting the circumstances is as follows :

DEAR SIRS,—I will give you a little history that may interest you. On the 1st day of March, 1853, I went into business with my brother and bought a stock of hardware from a general store here. Among other things I bought a Fairbanks scale—your No. 536 grocers' scale. I have used this ever since—more than fifty years. I bought several scoops. The scale has always stood on our nail counter. It has weighed hundreds and thousands of kegs. It breaks to-day with one single nail, and I have shown its excellence as Fairbanks scale by using a little piece of paper which turns it. We have never repaired it or broken it, never used a file on it nor any oil, and it stands on the counter nice and fresh and bright, equal to a new one to-day. If you have a customer that can beat that record we would like to see him.

QUIETNESS IN BUSINESS.

By E. H. O.

BLUSTER and success are business antitheses. As the still streams runs deep, the calm equipoise of a mind well-balanced finds expression in no gurgling bustle. Quietness of demeanor is essential to that perfect grasp of situation which masters great endeavors.

The best machinery runs smoothly. The noiseless revolutions of mighty drive-wheels, not the wheezy old steam-whistles, propel the great manufacturing enterprise. It is the quiet, yet alert, not the gas-escaping, steam-exploding character, who will succeed. That perfect self-possession, not disturbed by chance interruptions, is capital more valuable than dollars and cents.

Quietness is not opposed to enthusiasm. Quietness, in its true business sense, is enthusiasm guided and controlled — a mighty mastery of energy that will not be subdued.

Quietness will succeed because it is universally sympathetic. Never unduly elated, never excessively depressed, cool and collected, every situation that may arise is not a master, but a slave. The quiet man is too strong, and too broad in outlook, to be biased. Prejudices arise through a disturbed perspective. Quietness adjusts the essential relationship of things.

In quietness, in the preservation of that calculative balance lies the greatest advantage of experience. Maturity means self-knowledge, the proper adjustment of self to environment means a quiet, orderly behavior that is invaluable.

The weakness of armies lies in being surprised, in being taken off guard. A business man cannot maintain a close watch on himself and on his business unless he preserves a constancy of guard against surprises. The mental equipoise means conservation of business interests as well as preservation of energy.

The even, orderly, well-filled tire will bear the rider's weight — a sudden expansion of one portion produces the blow-out prejudicial to the whole wheel. The loss of a man's whole business may be produced by an explosion at a critical moment, by the failure to maintain a business reticence, by an undue excitement at a juncture of supreme importance.

Uneasiness, restlessness, nervous excitement do not inspire confidence. I'll trust the quiet man ; he is more apt to be the honest man ; one thing is sure, he is the sane man. A man who is ever the same will not miss the chance to advance my interests, nor will he plunge me into adversity by a feverish recklessness, yes, he will get my patronage.

The quiet man is not the blind man, but the wide-awake, not the offensive, but the courteous. I had occasion the other day to go into two large manufactvring establishments in a large city. I wished to inquire after the state of trade in their branches of business. I repeated what was essentially the same question in each case. Were I to go into business now as a retailer, I know which should have my patronage.

"Yes," said one, "I'm busy, but I can spare five minutes. Do you know I often learn little things from you papermen—thoughts suggested, and then, again, it helps the trade."

The other was quite perturbed at first, even inclined to the irascible, at my presumption in interrupting him—him the general manager. Then, with a sarcasm which might have been effective had it not been so stale, he said :

"Life is so short, you know"—I don't like these short-lived men—"I haven't got time," they say. Well, I'd like to know if they haven't all the time there is. I know business men are pestered. I am not pleading for an open sesame to general managers, but what I do say is "keep cool." Even from unexpected sources you may learn a great deal. You can never tell when you may hear something to your advantage. With a sober judgment, and a cool head you can size up a man in half the time it takes you to recover from that flustering excitement which avails not, but rather weakens.

Quietness is not synonymous with laziness. One doesn't need to make a noise to be busy. An uproar impedes rather than helps progress. The business man should have people's attention directed to his business, not to himself. As much as possible the business should speak for itself, and he, as a factor, should be eliminated. Let him mould the business by his individuality, let him stamp the character of his goods with his own worth and personality, but do not let him put himself forward as a rival attraction to the general public. The more he is noticed, the less are his goods noted, the less is the volume of his business. No public can watch two things at once. Either the manager must show his ability by sinking himself into the business, by making the best that is within him a portion of the business also, or the manager, by noisy business methods, by clumsy and disturbing manners, must divert attention from the business to himself to the detriment of the business and to his own shame.

To the repining it may be sad, but to the active, quiet business man it is time that he who seeks his own advancement must lose his own identity, or better still, express his own identity through the impetus and encouragement given the business.

A GOOD FOLLOW-UP SYSTEM.

The follow-up system of the retail store is wholly dependent upon its attendants, but where these are men or women of intelligence, personality and tact it is possible to give the establishment individuality and link it with the customer in relations more closely than those usually existing between clerk and patron. Rogers, Peet & Co., New York, according to Printers' Ink, provide their salesmen with personal cards bearing their own names and those of the firm, and where possible to do so without giving offence the salesmen give the customers their cards and endeavor to obtain their names and addresses. At certain seasons of the year these customers are followed up with personal letters:

New York, September, 19, 1902.

Mr. Theodore Augustus, 10 Spruce street City.

Dear Sir,—Summer is gone, and you begin to look up your old friends again. Rogers, Peet & Co.'s fall clothing, fall furnishings, fall hats and shoes are worth looking at. Won't you have a look? Yours truly,

A. D. Sander.

These letters are all faultless imitations of typewriter, and are personally addressed and signed by the salesman. They can hardly fail of making an impression upon the man who receives one.

MANITOBA MARKETS.

WINNIPEG, December 15, 1902.

THE trade in holiday goods, staples and building materials has been good throughout the week. The only change of price in the hardware list is $2.85 base for sleigh shoe steel which is a shade different to the last price sent. In paints and oils, trade is quiet, the only change for the week being an advance of ½c. on all lines of refined petroleum.

NOTES.

The Geo. D. Wood Hardware Co. are now occupying the addition to their large warehouse. The building is 99 x 240 ft., four storeys and basement, and is one of the largest warehouses in Canada. The arrangements for loading are the most complete that it is possible to imagine, two arched driveways run through the first floor and have access by a lane to two streets.

The news of the death of Mr. W. H. McGuire, western manager of the James A. Smart Manufacturing Co., will come as a shock to many readers of HARDWARE AND METAL, who have known him for the past four years in the West, first as traveller, and, lastly as manager, of the recently-established Western branch. Mr. McGuire died, after a very brief illness, on Saturday last, and the interment took place to Elmwood cemetery, two brothers coming from the east to attend his funeral. He leaves a widow and two children to mourn his loss. Mr. McGuire was highly respected in the business community, and it was due to his zeal and integrity that the business of his company developed so rapidly in the West.

CURRENT MARKET QUOTATIONS.

December 19, 1902.

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figures being for larger quantities and prompt pay. Large cash buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list, as the desire is to make it perfectly accurate.

BRADSTREET'S

Capital and Surplus, $1,500,000. **Offices Throughout the Civilized World.**
Executive Offices: Nos. 346 and 348 Broadway, New York City, U.S.A.

THE BRADSTREET COMPANY gathers information that reflects the financial condition and the controlling circumstances of every seeker of mercantile credit. Its business may be defined as of the merchants, by the merchants, for the merchants. In procuring, verifying and promulgating information, no effort is spared, and no reasonable expense considered too great, that the results may justify its claim as an authority on all matters affecting commercial affairs and mercantile credit. Its offices and connections have been steadily extended, and it furnishes information concerning mercantile persons throughout the civilized world.

Subscriptions are based on the service furnished, and are available only by reputable wholesale, jobbing and manufacturing concerns, and by responsible and worthy financial, fiduciary and business corporations. Specific terms may be obtained by addressing the Company at any of its offices. **Correspondence Invited.**

CHRISTMAS HAS COME AGAIN

And with it Santa Claus and his big bag of gifts. Everyone is on the alert to know what the bag contains for him. Many are the guesses made by persons of all ages.

WHAT'S IN THE BAG?

A gift for nearly everyone—from a jumping jack for the baby to a prosperous year to the father.

There is in his bag something for you—our best wishes for a Merry Christmas and a Prosperous New Year, and also a suggestion to assist in this aforementioned prosperity.

This suggestion is—well, it's along the line of STOVES and RANGES. Before we mention the name, you know where to get the best——

NO. 22.

No. 33 (double blade) is similar in construction and finish.

Something New!

THIS is an entirely new style of mincing knife of our own design. The shank is a flat tinned steel band, drawn tightly into a groove encircling the handle, the blade being riveted between the ends. This construction does away with any hole in the handle, which consequently cannot split or come loose. The handle itself is stained and shellacked, the whole making the neatest and strongest mincing knife ever put on the market.

MADE ONLY BY **The P. R. Cumming Manufacturing Co., Limited, Clarksburg, Ont.**

LAPSED PATENTS.

IN the patent law, as at present expounded by the courts, there exist many strange inconsistencies. A recent case in which action was brought by the General Engineering Co. against the Dominion Cotton Mills Co. demonstrates this. The action was brought for infringement for a patent for an automatic stoker.

The facts of the case are as follows: Patents for the automatic stoker were applied for in Canada, Great Britain and Italy on March 1, 1892. The patent for Italy was granted first. Next the patent for Great Britain, and lastly the Canadian patent. The British patent lapsed in 1897 and the Italian patent in 1898, for failure to pay the fees at the patent office. Next year the action for infringement was brought.

The trial judge interpreted the Canadian Patent Act literally, where it provides that "if a foreign patent exists, the Canadian patent shall expire at the earliest date on which any foreign patent for the same invention expires." The British patent had expired in 1897 and consequently the Canadian patent expired contemporaneously. The judge accordingly dismissed the action.

On appeal the Supreme Court of Canada reversed this judgment in favor of the plaintiffs, on the ground that the section of the Act referred to only applied to cases where the patentee had actually secured the foreign patent before making his application in Canada.

The case was thereupon taken before the Judicial Committee of the Privy Council, and the decision of the trial judge sustained. Their Lordships could find no reason for putting on the case the restricted meaning assigned to the words of the Act by the Supreme Court of Canada.

Holders of patents, who also have their inventions patented in other countries, will have to watch their foreign patents very closely. The moment a foreign patent lapses, that same instant the Canadian patent lapses as well. The difficulty may, however, be obviated by retroactive legislation on the part of the Canadian Parliament.

A BUSINESS MAN FOR MAYOR.

Ald. Daniel Lamb has announced himself as a mayoralty candidate in Toronto. It is to be hoped he will be the choice of the citizens.

His success as a business man enabled him to retire some years ago with a substantial fortune, and for many years he has devoted his time and his energies to the public good. He is essentially a public-spirited citizen. Mr. Lamb has had a long municipal, as well as a long business experience, two qualifications rarely found in one man.

The business men of the "Queen City" should certainly think twice before they vote for either of his opponents, both of whom are lawyers. It is to be hopod, therefore, that they will do all in their power to secure his election by a handsome majority.

MARCONI'S SUCCESS.

MARCONI has succeeded in transmitting messages across the Atlantic without wires. The impossible of five years ago has now become an accomplished fact. By the utilization of the most improbable agencies the desired end has been secured. Marconi has veritably discovered a new world just as his countryman, Christopher Columbus, 400 years ago overcame the prejudices of his contemporaries and showed them that land existed far across the western seas.

The perplexing problem which contronts the world, and especially the commercial world, just now is whether or not this new system is going to supersede the old cable system. On the one hand, it is pointed out that the telephone has never superseded the electric telegraph for certain uses. On the other hand, the telephone and the telegraph never came into such direct competition as this new system will undoubtedly enter into with the established system.

It resolves itself mainly into an economic problem. Can the new system effect the work of the old system as well and as cheaply? If so, there can be little doubt but that it will injure the business of the old system and detract from its commercial value.

But there are as yet several inconveniences connected with the wireless system. Principal among these is the danger of interception. So far as we know, there is no means of confining the message solely to its desired destination.

One thing is certain and that is that, if the cable system is to be superseded, the process will be a gradual one. The Marconi system cannot be perfected and will not be adopted in a moment. There will be no commercial crisis when the one is exchanged for the other. In all probability it will be the cable companies themselves who will gradualty supplement their systems with the more approved features of the wireless system.

A POSSIBILITY OF RECIPROCITY IN COAL.

WITHIN the last couple of weeks two resolutions providing for reciprocity with Canada in coal have been introduced in the United States Congress. The first resolution was introduced in the House of Representatives by Hon. Samuel W. McCall, of Massachusetts. The second was introduced in the Senate by Senator Lodge, also of Massachusetts. These resolutions are naturally creating a good deal of interest on both sides of the line, and particularly that of Senator Lodge, one of the most prominent men in the Republican party in the United States. But the fact that reciprocity in coal is within the field of possibility is the chief cause.

Neither of the resolutions appears to be of the "catch-penny" type or framed with the desire to catch votes. Representative McCall's Bill grants authority to the President to enter into negotiations with the British Government for the admission of coal free from the Dominion of Canada whenever "that country shall make a similar concession to us." Senator Lodge's Bill provides for the admission of "coal free of duty from Canada when the President is satisfied that no duty is imposed by that country on coal from the United States."

In a recent interview in The Outlook of New York, Senator McCall said: "The amount of coal bought from Nova Scotia by New England is nearly but not quite so great as the amount bought by Canada (the Province of Ontario principally) from Ohio, Pennsylvania and West Virginia. The removal by Canada of the duty upon our coal in return for the removal by us of the duty on Canadian coal would greatly benefit the people, and, I believe, the people of both countries. Coal thus forms an ideal reciprocal item, or as nearly so as any can be."

During a speech delivered over two months ago at Northampton, Mass., Senator Lodge expressed himself emphatically in favor of reciprocity in coal with Canada, and, among other things, said: "I am ready to vote for a Bill—I would be glad to introduce one—authorizing the President to proclaim the abolition of all duties on Canadian coal when Canada removed her duty on American coal."

The duty on bituminous coal in Canada is 53c. per ton of 2,000 lb. Anthracite coal, it will be remembered, was placed on the free list in 1886. In the United States the duty on coal is 67c. per ton of 2,240 lb.

Coal has been a negotiable quantity in all reciprocal trade movements between Canada and the United States. In the Reciprocity Treaty of 1854, abrogated by the United States in 1865, coal was one of the products of both countries that was put on the free list.

It is altogether likely that it would have again been put on the free list by both countries under the provisions of the Washington Treaty of 1871 were it not for the indiscriminate action of the Dominion Parliament in removing the duty on both coal and salt at the very time the Canadian and British Commissioners were at Washington negotiating the treaty.

Notice To Advertisers.

Thursday next being New Year's Day the forms of HARDWARE AND METAL will go to press one day earlier than usual for the issue of January 3.

Will advertisers please note that all new copy and changes must be in our hands on **TUESDAY, 30th** inst? We cannot guarantee to change advertisements after that date.

THE PUBLISHERS.

The Americans, it will be remembered, wanted access to our fisheries. And during the progress of the negotiations at Washington one of the propositions made by the Commissioners representing the United States was, in return for those privileges, that Canadian coal, salt and fish —and three years later lumber—should be admitted free. Canada was, of course, to reciprocate in kind. This proposition seemed to find general favor in the United States. In fact, one branch of the American Congress had already passed a measure making coal and salt free, and it was believed that the Senate would acquiese. But on April 17, only a few weeks after the final proposition had been made by the American Commissioners, the offer was suddenly withdrawn, opposition having developed against it in the country.

Later, when introducing in the House of Commons his Bill to ratify the Washington Treaty as finally drafted by the Commissioners, Sir John Macdonald, who was one of the Commissioners representing Great Britain and Canada, said that one of the American Commissioners expressed his surprise at the opposition which had developed to the proposal to place coal and salt on the free list. "I know right well what the reason was," continued Sir John. "The monopolists having control of American coal in Pennsylvania and salt in New York, so long as the treaty would open to them the markets of Canada for their products, were willing that it should carry, because they would have the advantage of both markets, but when the duty was taken off in Canada, when you had opened our market to them, when they had the whole control of their own market and free access to ours, whether for coal or salt, the monopolists brought down all their energies upon their friends in Congress, and through them a pressure on the American Government for the prevention of admission of Canadian coal and salt into the American market, and from that, I have no doubt, came the withdrawal by the American Commissioners of their offer. * * * Under the circumstances, Mr. Speaker, I found myself powerless."

In a letter which Sir John Macdonald wrote to Dr. (now Sir Charles) Tupper from Washington, after the American Commissioners had withdrawn their offer, he said: "I am convinced that his (Commissioner Fish) reason is the unfortunate repeal of the coal and salt duties in the Canadian Legislature."

It was unfortunate. And it is still unfortunate that the two countries impose a high duty against the coal products of each. Nature certainly never intended that such a condition of affairs should exist. The coal of Nova Scotia is wanted by the manufacturers of the New England States. Ontario has to depend upon the mines of Pennsylvania, Ohio and Virginia for its supply of coal for heating and manufacturing purposes. With Manitoba it is practically the same. Out on the Pacific Coast and the nearby States the natural source of supply is the coal mines of British Columbia.

But what Nature designed the politicians have thwarted It is to be hoped that the politicians of both countries will set themselves to the task of remedying the present unnatural state of affairs as far as coal is concerned.

THE WORLD'S COPPER MARKETS.

THE copper markets of the world have during the past year, by reason of their weakness, been attracting attention. The Ironmonger recently had the following article on the supplies of copper:

"The remarkable developments in copper mining during the last few years have resulted in a heavy addition to the output of the metal, while a still greater increase is in prospect, notwithstanding the fact that the position of some of the hitherto largest producers is yearly becoming more difficult, owing to the lessening percentage-value of the ore mined on their properties and the increasing depth of the workings. Development work has been especially active in North America, where unusually important discoveries have been made, especially in the Senora district of Mexico and in Arizona.

THE CAUCASUS AND CANADA

also promise well, and rumor has it that extensive copper deposits exist in the territory owned by the British South Africa Co. The last-named supplies, if they exist, are hardly likely to have any serious influence upon the market for years to come, but the contributions coming from some of the other quarters named are already making themselves felt. Mexico, indeed, seems to possess possibilities which it is difficult to over-estimate; and that if that country continues to be moderately well governed it will probably soon take a much higher place upon the list of producers than it has hitherto done. The best-known copper property of Mexico is that of Boleo, which is owned by a French company. The Rothschilds are said to be interested in this company, and also in the Inguaran deposits, which are expected to prove of first importance, and which have already been brought into railway communication with the Pacific. Another

IMPORTANT MEXICAN PROPERTY

is that owned by the Greene Consolidated Co. at La Cananea. This mine is already marketing about 4,000,000 lb. of refined copper a month—an output which is likely to be increased to 6,000,000 lb. monthly before the year closes. The Phelps-Dodge interests own the Nacosari mine—another promising Mexican property—as well as the Moctezuma mine in Sonora, just near the border line separating Mexico from the United States. The last-named mining property is said to produce already at the rate of between 7,000 and 8,000 tons of copper annually. The Candela mine, which yields a sulphide ore of low grade, is another important property. The fiasco of the Panuco mine in Mexico and its £500,000. capital, however, is yet fresh in the memory of those interested in the metal.

THE TERRITORY OF ARIZONA

is rapidly developing into a copper-producing district of the first importance, such mines as the United Verde (temporarily shut down owing to a fire in the workings), the Copper Queen, the Old Dominion and the Arizona Copper Co. being well-known producers, whilst amongst the new-comers, of which great things are expected, are the Shannon and Treadwell. The deposits in the State of Montana are practically in the hands of the Amalgamated Copper Co., but a few of the less important are controlled by the Heinze group. Montana contains the Anaconda mine, a property once of almost fabulous richness, and even now, after years of working, the largest individual producer in the world. Like many other copper mines the Anaconda was started as a silver property—this was in the early eighties—but silver soon ceased to be a payable deposit, and gave place to high-grade copper ore. The mine has been on fire since 1890, and will probably continue for years yet in spite of vigorous effects to extinguish the flames, 100 men being permanently employed in fighting them. In addition to the Anaconda mine, Montana contains the Butte and Boston, the Boston and Montana and the Parrott properties, all controlled by the Amalgamated Copper Co., and all are highly productive. The State of Utah seems to be becoming a more and more important producer, and the mine of that name which works rich self-fluxing copper-gold-silver deposits of ore is credited with being able to lay down refined copper at 5c. per lb. in New York. A good deal of development work has also been done in the Ducktown district of Tennessee, where the ores are mostly low-grade sulphides.

THE LAKE SUPERIOR MINES

number scores of properties, but the Calumet and Hecla, the world's largest mine, towers above them all with an output, in 1901, of 39,000 tons of refined copper. The production of the lake mines during 1901 was about 156,000,000 lb., but during the present year, owing to certain extensions of plant and the fact that a number of new concerns have commenced operations, it will probably reach 176,000,000 lb., while the total United States production for the months of April to August of this year shows an increase over that of the same period of 1901 of more than 18 per cent. The newly-opened mines, being all based as business undertakings on a copper quotation of about 11c. per lb., can well afford to work at the present price of the metal. Canada is rapidly coming to the fore, her output in 1901 having been 18,800 tons, an increase on the year of 10,000 tons, whilst in Chile and Bolivia American operators are very busy.

THE EXPECTED INCREASE.

"The expectations of a material increase in the copper supplies from countries outside North America have not been realized to any great extent. Great hopes were raised that the Etruscan Copper Co., of Italy, would take its place amongst the "big mines" of the world, but at present the very existence of payable copper in its deposits is doubtful. The copper-mining prospects in the Caucasus district are said to be good, and already one company has an extensive plant on order. Copper is known to exist in China, and there are valuable, but as yet not commercially accessible, deposits in German South-Western and Central Africa. Australasia, too, is a promising and increasingly productive field, although developments are hindered in many localities by a variety of causes, amongst which drought is at present the most serious. Lack of water is checking copper mining in Scandinavia, where the metal is widely distributed, though with a few exceptions the properties have proved but third-rate producers. Japan contains rich deposits, but there are no signs of her output being materially increased.

TAKING A SURVEY

of the position there appears no reason to anticipate that the world's demands for the metal in the near future will outstrip the supply, although it is possible that deliberate attempts may be made to make the contrary appear to be the fact. Production is growing steadily all over the world, whilst it is doubtful whether the actual consumption of the metal is anything like as large as it is represented as being in certain optimistic quarters. Consumers need not anticipate any real scarcity of copper, although there are signs that powerful interests are trying to create a fictitious scarcity of supplies in Europe. The same policy was tried with disastrous results to its authors only a few months ago, and another attempt of a similar nature will almost certainly come to grief."

A large New York department store had an advertisement offering three percentages of discount. First they said they would save you from fifteen to fifty per cent. Further on—"We'll save you from twenty to forty per cent." At the end they said: "A third less than elsewhere is a fair average on which to base your calculations."—Chat.

ADVERTISING CHATS.

By A. B. Caswell,

IN my last chat with the retail advertiser I endeavored to impress upon him the importance of securing the confidence of his customers. This, as I said, is to be done by advertising only goods which possess merit. Or, if wishing to sell out something which is of inferior quality, to state the fact in plain language. In general—backing up plain statements with honest goods.

Having once secured the confidence of the public as an advertiser who means business, the hardest part of the work is over, so far as the merchant is concerned. So much newspaper space is used in advertising fakes and frauds, imaginary bargains, and so on, that the public are skeptical, especially of statements which are painted too brightly. Be careful, then, to clothe your remarks in language which contains simple statements of facts. Do not let them be too staid, however. Give them color enough to attract attention and to keep it.

GREAT REFORMS COME SLOWLY.

I have said that having once gained the confidence of the public the hardest part of the work is over. So it is, but do not imagine that this can be done without a great deal of patient and persistent effort. Do not expect to do it by one advertisement, or two, or five, or perhaps even ten. Great reforms come slowly—It is a great reform to win a customer from some store, where he has been dealing for years, perhaps, and where he is fairly well if not entirely satisfied with the treatment he has received. It is a great reform to get people to buy goods which they do not want at all, or, some other article in preference to goods which they do want. But such reforms as these have been made, and many more equally great, if not greater, directly through the medium of good advertising. Do not get discouraged if results do not come at once. The names of the victims of one or two-insertion advertising is legion, while the names of those who have built up splendid businesses from judicious and persistent advertising is spelled with the same letters.

PERSISTENCY THOU ART A JEWEL.

Take it in your own business. The salesman for some manufacturer or wholesaler calls eleven times, and the twelfth time he gets an order. Isn't it so? A good salesman expects to do it. It's tiresome, and it looks like time and money wasted, but he knows it isn't. He is pleasant about it and persistent and patient.

By and by the merchant says: "That fellow must have a good thing, or he wouldn't stick at it so well. I'll try a little anyway."

The eleven calls were advertising. An advertisement may go eleven times to the public before it convinces them, but if it is a good advertisement of a good article or commodity in a good newspaper, it will accomplish the result in time. It 's a certainty — it has been proven. The old saw, "Consistency, thou art a jewel," would read equally as well if the prefix in the first word was spelled PER-

DO NOT CROWD YOUR SPACE

Do not try to put too much matter into your advertising space. If you do you are going to lose your chance of inviting custom. The public, unless they are tremendously interested, are not going to wade through a mass of small type. If you cannot condense your matter so as to look well in your regular space, take a little extra space (the publisher is always glad to supply it pro rata) and give the ad. a chance. Look at this also the same as you would in your own business You would never think of trying to put a peck and a half of apples into a peck measure, or five quarts of coal oil into a gallon can. Yet, many a merchant expects a printer to crowd 400 lines of matter into a 200 or 300-line space, and feels disappointed if the result is not a success.

DECIDED RESULTS.

The Canada Hardware Co., Limited, Montreal, under date of December 17, 1902, write: "We have carefully watched our advertising, and our experience has been that we have decided results from advertising in HARDWARE AND METAL. From a recent ad. we had in your paper we received replies from every part of the Dominion and a few from England. This, we think, proves that your circulation takes up all the hardware dealers in this country of any account."

Make your sentences short and crisp. Imagine you have your prospective customer already on the other side of the counter. Rub it in hard; but be quick about it. They will like you better for it.

THE PREPARATION OF COPY.

If at all possible prepare the copy yourself, or, if not, leave the preparation in the hands of some competent person, always, however, personally supervising the work. Do not leave the preparation of copy to your office boy, who is probably in a hurry to get home and has a variety of other matters to attend to, of which the ad. is to his mind the least important. If your office boy is your ad. expert, and he is no better than the general run of office boys, you may expect to get "office-boy" results, probably $2 or $3 per week. The most successful advertisers to-day are those who devote a part of their own time to their advertising, giving it the same attention they would any other detail of their business. I know one large and successful merchant, who, if he does not get time during the day, sits up half the night, if necessary, to prepare his advertisement. Often our best ideas come to us in the "wee sma' hours," and this reminds me of a gentleman friend of mine of a literary calling, who keeps a pencil and writing-pad by the head of his bed all night, and who, whenever an idea strikes him in a waking moment, immediately feels for the pad and jots it down roughly in the dark. In this way he has received and kept for use many of his brightest inspirations.

TOM PEPPER'S ADVERTISING EXPERIENCE.

By G. H. Tudhope, Woodstock, Ont.

Tom Pepper launched out on the rough sea of trade,
With a nice little stock in a nice little store,
With the saving of years the whole stock was paid,
And Tom had a chance as few men had before.

The days passed by and he did fairly well,
But the trade didn't grow as he thought;
Each one that came he would generally sell,
But the crowd didn't come as they ought.

Bye-and-Bye Tom grew troubled and downhearted got,
His shelves were a playground for flies;
He didn't feel better when a friend said he ought
To "spruce up" and then "advertise."

"Advertising costs money—won't do any good,"
He said, "All the folks know I'm here—
They know I sell groceries—all kinds of food,
And an ad. will not help me, I fear."

At last by much coaxing and talk,
(Even Tom's wife was surprised)
That week he arranged and cleaned up his stock,
And the next, for a change, advertised.

Each week his ad. in The Echo was seen,
And then people came to the store,
Now Tom is brighter than he's ever been,
And his worst business troubles are o'er.

The ONTARIO TACK CO.
Limited
HAMILTON, ONT.

BUSINESS CHANGES.

DIFFICULTIES, ASSIGNMENTS, COMPROMISES.

RAOUL LAPIERRE, a well-known contractor, etc., of the city of Montreal, has consented to assign. A meeting of his creditors will probably be held at an early date.

M. Rousseau, general merchant, of Warwick, Que., has compromised.

J. Talbot & Fils, general merchants, of St. Eulalie, Que., have compromised.

C. W. Anderson & Son, bankers, of Oakville, Ont., have assigned to E. R. C. Clarkson, Toronto.

V. E. Paradis has been appointed curator of W. O. Langevin, general merchant, Grand Mere, Que.

A meeting has been called for December 27 to appoint a curator of N. Laliberte, general merchant, of St. Nicholas, Que.

PARTNERSHIPS FORMED AND DISSOLVED.

Dufresne & Cie, lime burners, Montreal, have dissolved.

Haddad & Checralla, general merchants, Gracefield, Que., have dissolved partnership.

H. & J. R. Green, agricultural implement agents, Moose Jaw, N.W.T., have dissolved.

There has been registered a dissolution of The National Syndicate Match Company, St. Raymond, Que.

George Will, agricultural implement agent, Prince Albert, N.W.T., has admitted —— Mansell as partner.

SALES MADE AND PENDING.

The assets of D. Houle, contractor, of Montreal, have been sold.

The assets of Amable Dalphe, general merchant, Varennes, Que., have been sold.

The assets of J. E. Heon, general merchant, of St. Eulalie, Que., have been sold.

The estate of Thomas Earle, harnessmaker, of Port Hope, Ont., is advertising his business for sale.

A. Brohmann, carriagemaker and blacksmith, Mildmay, Ont., is advertising his blacksmith business for sale.

CHANGES.

T. Rochon & Fils, builders, Montreal, have registered.

Alex. Ross, blacksmith, Melita, Man., is succeeded by W. Turner.

The Century Agency, manufacturers' agents, Montreal, have registered.

Wm. Walkey, blacksmith, of Newdale, Man., has sold out to Crossley Bros.

H. D. Ferris, agricultural implement agent, Wetaskiwin, N.W.T., is succeeded by S. C. Switzer.

Dell. Tremblay, agricultural implement agent, Sarnia, Ont., has sold out to Tanner & McConnell.

W. J. Gilliland, agricultural implement agent, Carievale, N.W.T., will be succeeded by Gilliland & McGregor.

BUILD ON A SOLID FOUNDATION.

THE SHERWIN-WILLIAMS CO. has reached the top in paint manufacturing through strict adherence to high principles.

From the beginning of our business, over thirty years ago, the principle underlying the making of each one of our products has been HIGHEST QUALITY.

Our facilities are the most complete and approved yet employed. We control the main accessories of our business.

We make, treat, and refine our linseed oil; manufacture our dry colors; make all our varnishes, japans, dryers; make all our tin cans; operate our own box factory; have our own printing plant; make our mills and machinery after our exclusive designs; and own a screw steamer for carrying flaxseed and lumber down the Great Lakes.

Our products are right from the foundation up.

The "B-13" Booklet tells what our products are and how they are sold. Write for it.

THE SHERWIN-WILLIAMS CO.

PAINT AND VARNISH MAKERS.

CHICAGO, NEW YORK, NEWARK, MONTREAL, CLEVELAND, BOSTON, TORONTO, SAN FRANCISCO, KANSAS CITY.

Joseph Shaw, general merchant and implement agent, Beausejour, Man., is succeeded by Joseph Shaw & Co.

The stock of A. A. Dugas, general merchant, Ste. Anne des Monts, Que., has been sold at 66¼c. on the dollar to D. Bouchard.

An item appeared in this department in a recent issue of "Hardware and Metal," to the effect that McIlroy & Sons, general merchants, of Richmond, Ont., had sold out to Lewis Bros. We have since heard that this was not correct.

FIRES.

H. T. Kirk, hardware merchant, New Westminster, B.C., has sustained loss by fire.

R. T. Anderson & Co., wholesale hardware merchants, New Westminster, B.C., have been burned out.

Loisselle Bros., harnessmakers and boot and shoe dealers, St. Jean Baptiste, Man., have sustained loss by fire to the extent of $2,700; insurance, $1,000.

DEATHS.

W. E. Dawson, hardware merchant, of Charlottetown, P.E.I. is dead.

HAS GONE TO CHICAGO.

R. A. Edington, who for the past 17 years has been with Sanderson Pearcy & Co., Toronto, latterly as manager of the retail departmnet, has left for Chicago to take a similar position. Mr. Edington will be much missed by the trade as well as by his firm and fellow-employes. His departure was made an occasion by his fellow-employes to express their good-will towards him, which they did in the warmest terms, at the same time presenting him with a "well-lined" purse.

40 PER CENT. DISCOUNT ON BRASS GOODS.

The Waterbury Brass Co., of 122 to 130 Centre street, New York, report an increased demand for their goods. This Company have issued a little folder announcing to the trade a 40 per cent. discount on lots of 100 lb. and over of their brass sheets, rolls, wire and rods.

CATALOGUES, BOOKLETS, ETC.

A NEAT DESK CALENDAR.

A style of calendar that is always in request is a small one of sufficient beauty to be worthy of a place at one's private desk. Such a calendar has been issued by The Marlin Fire Arms Co., New Haven, Conn. This calendar is 6 x 3½ in., but has a good, plain date-pad, and a picturesque hunting scene, the beauty of which is not destroyed by too pronounced advertising. These calendars will find a place at many hardware dealers' desks. They can be had by HARDWARE AND METAL readers on application.

ACQUIRED NEW PREMISES.

THE Belleville Hardware Company, of Belleville, Ont., have recently acquired new premises aad are branching out into an important industry. The company has an excellent directorate and is under experienced management. The Hon. Mackenzie Bowell is president, and among the directors are Harry Corby, ex-M.P. and Mr. Sill, M.P.P. The manager is W. C. Springer, formerly with the Peterboro' Lock Co., and H. C. Hurst is secretary-treasurer.

The Belleville Hardware Co. are engaged in the manufacture of door and sash locks and high-grade trimmings. At present they are employing 38 hands, and this number will be increased as soon as the business warrants it, the present works being able to accommodate 150 hands.

Electros for a catalogue are nearly completed, and a large supply of these will shortly be ready for the trade. At present they are supplying lines to several wholesale houses. The excellent quality of their goods may be gathered from the fact that the door and sash locks and the trimmings for the King Edward Hotel in Toronto were supplied by them in competition with the best United States goods.

BRANCHING OUT.

The Centrifugal Windmill Manufacturing Co. are going to locate their head offices and factory in Guelph, Ont. This company has recently been organized with a capital stock of $20,000, which it is intended shortly to increase to $50,000. A charter has been applied for and a site is being secured for the factory. Besides windmills, the company will make combination anvils, hammock chairs and small novelties in steel, iron and wood.

PERSONAL MENTION

Mr. C. R. Peckover, of Baines & Peckover, wholesale hardware merchants, Toronto, is spending his Christmas holidays at Salisbury, Ont.

Mr. John Irving, of the Nova Scotia Steel and Coal Co., New Glasgow, is spending the Christmas holiday in Toronto. He reports business good and the prospects for next year exceedingly bright.

IN THE CORK BUSINESS.

E. J. Murphy, Toronto manager for S. H. Ewing & Sons, Montreal, is severing his connection with that firm and is about to start up in Toronto in business for himself in the cork importing and manufacturing line.

NINETEEN HUNDRED AND THREE

finds us better prepared than ever before to give our patrons prompt service, and products of superior merit and quality. Enlarged facilities, additional automatic machinery, perfected systems and methods have become a necessity during the past year, through the ever-increasing demand for

Prosperous New Year.

IVER JOHNSON'S ARMS & CYCLE WORKS,

New York Salesroom: 99 Chambers St. FITCHBURG, MASS.

THE JAPANESE EXHIBITION.

THE Canadian Commissioner to the Japanese Exhibition, to be held shortly at Osaka, Japan, is William Hutchinson. The Canadian building will be finished at Osaka about January 15. In regard to the Dominion being represented at this Exhibition, Mr. Nosse, Japanese Consul-General at Montreal, expressed himself to a reporter as believing that this country will derive great benefit therefrom. The Dominion will be enabled to make herself known not only in Japan, but throughout the Orient, thus creating a future market there for the surplus products of the soil, the forest, the sea and the mines of British Columbia and the Northwest Territories. There was made from Canadian flour a bread superior to all others, but at the present time a big business in flour, amounting to $3,000,000 a year, was transacted by United States firms with the Japanese army and navy. This business might be made come to this country.

TO PREVENT THE FREEZING OF GAS PIPES.

A simple but effective device for preventing the freezing of gas pipes is described in The Illustrirte Zeitung fur Blechindustrie. It consists merely in the insertion of a wider piece of pipe just where the conduit issues from the ground or wall. For a conduit of a diameter from $\frac{3}{8}$ to $\frac{1}{2}$ of an inch a length of from 20 centimeters to 30 centimeters of a pipe 1 inch in diameter suffices. The deposition of the water particles contained in the gas, which on leaving the works have a temperature of about 50 degrees Fahrenheit, naturally takes place just where the gas is subjected to the most abrupt change of temperature, i.e., on its issue from the ground. If the external temperature is sufficiently low, the deposited water immediately congeals and clogs the conduit. As soon as the gas has acquired the temperature of the conduit the deposition of water and congealing cease, and this is said to be the case a short distance beyond the cooling point. Therefore, there should be no congealing beyond the inserted wider piece, and this piece is wide enough to accommodate a thick ice crust and to still leave a free passage for the gas. As a matter of fact, the principle of this new method is already employed in street lamps, and with success.

A NEW COMPANY.

On January 6 Owen Sound property owners will vote on a by-law to grant tax exemption and free water to The Canadian Heating and Ventilating Company who propose to manufacture all kinds of heating apparatus, hot-air furnaces, steam-heating boilers, radiators, registers, blowers, etc. Local men are interested in the company and they agree to spend over $100,000 on works and to employ over 80 men if they get what they ask for.

WESTERN AGENTS.

The Canadian Rubber Co., of Winnipeg, have been appointed sole agents for the "Beaver" brand mackintoshes in Manitoba, the Northwest Territories and British Columbia. This will be found a great convenience to Western buyers with whom the "Beaver" brand of goods have long been favorites.

MACHINERY AND ELECTRICAL SUPPLY DEPARTMENT

MACHINERY AND ELECTRICAL NOTES.

EDWARD PASSMORE, an employe at Lemon's sawmill near Schomberg, Ont., fell on a circular saw a few days ago and was instantly killed, his body being cut in two.

Smith & Baker, glass manufacturers, Hamilton, Ont., are moving into larger premises.

The Globe Wemicke Company, Stratford, Ont., are installing the Webster system of heating.

Machinery men in Montreal are very busy and a shortage of competent mechanics is feared.

Crown Lands Agent Henderson, of Sudbury, Ont., has reported the discovery of a new iron ore bed in Creelman township, near that place.

Mayor McIntosh, of St. Catharines, Ont., says that a large Buffalo manufacturing plant proposes to locate a branch in St. Catharines.

Darling Bros., Montreal, have installed the Webster system of heating in a factory for Thomas Bros., brush manufacturers, of St. Thomas, Ont.

Thomas Keilty, of Brockville, Ont., has been appointed factory inspector for the Eastern Midland District of Ontario, with headquarters in Toronto.

Mackenzie & Mann, of the Canadian Northern, have just placed an order for 19 new locomotives with The Canadian Locomotive Works, Kingston.

R. Dawson, Toronto, representative of Darling Bros., Montreal, has returned from a visit to London, St. Thomas, and other western Ontario points.

The Lamb Wire Fence Company, of London, Ont., has decided not to remove its works to St. Catharines, Ont., the inducements not being attractive enough.

The work on the new C.P.R shops in the east end of Montreal is progressing rapidly, but Mr. Goldmark, the C.P.R. engineer, says he would like to put 100 men more to work on the building.

The Electric Construction Company, of London, Ont., have the contract for the engine, boiler and dynamos for the additions to the departmental store of J. Mickleborough, Limited, of St. Thomas, Ont.

The two largest electrical companies in Germany, with a united capital of $45,125,000, have reached an agreement which is virtually a consolidation, the object of which is to face more successfully the crisis in the German electrical industry.

The Montreal Light, Heat and Power Company have had considerable trouble of late with their waterpower, their dam having been washed away. They are erecting a temporary structure for the winter, and next summer will build a permanent dam.

The agreement between the Toronto City Council and The Toronto Steel Co., who propose to establish rolling mills there, is practically void, as Toronto's solicitor, Mr. Fullerton, states that the inducements held out by Toronto are illegal and will need the consent of the Ontario Legislature before they can be put into effect.

The Duplessis Company, of St. Hyacinthe, Que., have decided to remove their plant for the manufacture of pegging machinery, for shoes, to Lynn or Haverhill, Mass. The reason ascribed is that a large demand for their machines comes from the United States, and they have to pay duty and bring the raw material into Canada, and on the re-entry of the finished product into the United States.

The Dominion Iron and Steel Company, Limited, Sydney, C.B., have decided not to continue the construction of its steel rail mill at that place for the present, but will devote the structure to the manufacture of structural steel, for which there is a much larger demand throughout Canada and which class of material yields better profits. The machinery for the new mill is being brought from Germany and will be ready for operation about May 1.

At a representative meeting of silver-lead miners of British Columbia, a resolution was passed recommending that the Canadian Government impose a duty equal to that levied in the United States, viz.: "On lead ores 1½c. per lb., on lead in bullion, pigs, bars, and old lead, 2½c. per lb. On all other products of lead as provided in the Dingley Tariff Act of July 24, 1897." They suggest a provision, however, to prevent smelters from effecting a combine as making exhorbitant charges.

CLEAN RUN OF "RAMBLER."

In the commemoration run of 100 miles held by the Automobile Club of Great Britain on November 8 last, from London to Maidenhead, the "Rambler" was the only American gasoline car which competed and earned a first-class certificate for a faultless, non-stop record. Of the 193 British, French and German cars which took part, only 34 finished, many leaving the run on account of the rainy weather. The "Rambler" was driven by Walter C. Allen, of the firm of Davis, Allen & Company, British representatives of Thomas B. Jeffery & Company, of Kenosha, Wis., the makers, and it was the first appearance of this machine in English competition.—Automobile and Motor Review, December 13.

ENGLISH VS. AMERICAN MACHINERY IN CHINA.

IN the early part of the year an announcement under the above heading went the rounds of the English and colonial newspaper press bearing upon the unjustifiable practice of a section of the English press of constantly belauding, at every opportunity, the American manufacturer, and his methods, to the detriment of the British manufacturer, and an instance was then given to illustrate the ability of the Britisher, in one branch of industry at least, to hold his own and to beat his American rivals. The instance was that of a large flour mill contract secured in China by an old firm of English milling engineers in competition with American makers, in which case the English firm was better both in price and time for delivery. We now learn that the whole plant was delivered within the time specified, ten weeks; and the proprietors were so pleased with the results obtained in working the mill, that they have placed the contract for another similar mill, also for North China, with the same English firm, viz.: E. R. & F. Turner, Limited, of Ipswich.

In the meantime the same firm has scored again in the same market over their American rivals, having recently secured a complete flour mill contract for another firm of Chinese millers—in the competition for which the American was beaten on all counts.

In the face of examples such as the above perhaps some of our friends of the English press, who have shown such readiness to advertise the excellence of their competitors, and to decry their own manufacturers, will begin to realize that there may be a reverse to their picture.

FIRE HAZARDS IN THE FACTORY.

IN the matter of hazards nitric acid causes much trouble. Lately such acid has been packed in cork, but when packed in the carboy with hay, leaks or breakages result in fire. The storage of acids and ammonia in large quantities in factories is discouraged, not because the latter is dangerous as a fire hazard, but because of the stifling nature of the liquids, thus preventing the entrance to buildings by firemen in case of fire, says a fire inspector of a large American city.

Benzine, the most dangerous of the liquids in common use and largely used in various processes, has been the cause of many fires. A given volume in liquid form is capable of conversion into sufficient vapor 8,500 times the volume of atmospheric air, and this inflammable atmosphere coming in contact with an open light will convey flame a long distance from its source. In all places where this liquid is used care should be taken that no flame for lighting is used, and if electric lighted, no lamp to be fused or cut out should be allowed in the room.

Naphtha and other products of petroleum, evaporating at a low temperature, are exceedingly dangerous to have inside of a factory. The gas mixed with air forms a heavy vapor, which in a cold room will lie undetected near the floor, and coming in contact with a flame cause an explosion. Lacquers used in metal-working establishments having a low flash point have been the cause of many fires. The lower the flash point the more likely is the atmosphere to be impregnated with the inflammable vapor liberated by the heat of the room. These are found under the names of enameloid, zapor, branoline, krystaline, obelisk, lastina, pyramid, adamantine, albaline, colophite, having a flash point varying from 18 to 116 degrees F.

Damp lampblack will ignite from the sun's rays. The same can be said of cotton waste moist with lard or other animal oil. Lampblack and a little oil or water will under certain conditions ignite spontaneously. Nitric acid and charcoal create spontaneous combustion. New printers' ink on paper when in contact with a hot steampipe will ignite quickly. Boiled linseed oil and turpentine in equal parts on cotton or linen rags or cotton waste will ignite in a few hours under a mild heat, and will in time create enough heat to ignite spontaneously. Bituminous coal should not be stored where it will come in contact with wooden partitions or columns or against warm boiler settings or steam pipes. This coal should not be very deep if it is to be kept in storage for a long period. If piled in the basement of a building it should be shallow and free from moisture, and under good ventilation. That liable to absorb moisture should be burned first. If on fire a small quantity of water showered on this kind of coal cokes it upon the top and retards any great quantity of water reaching the fire, thus necessitating the overhauling of the pile.

Iron chips, filings or turnings should not be stored in a shop in wooden boxes. The oily waste which is not infrequently thrown among them adds to the danger of fire from this source. The sweepings from the machine shop, if kept on hand, should never be placed over iron shavings. This mass of disintegrated iron is enough to incite heat and combustion. Iron and steel filings and turnings when mixed with oil will ignite spontaneously after becoming damp. A steam pipe against wood will cause the latter to ignite spontaneously after being carbonized, particularly if superheated steam enters the pipe, thus increasing the heat temperature. Steam heat apart from its contact with water forms a gas.

UNDERGROUND WIRES.

There is a movement on foot among the aldermen of Montreal to ask power at the next session of the Provincial Legislature to borrow $1,000,000 for the purpose of constructing a system of underground conduits to carry every electric wire in the city. They are a source of great hindrance to the fire brigade in fighting a fire, and are anything but an ornament to the city. They intend to tax the electric companies and in this way be paid the amount disbursed.

STEEL CORPORATION BUYS UP RIVAL.

The United States Steel Corporation has purchased the premises and plants near Pittsburg, and at Sharon, Pa., of The Union Steel Company, recently formed by the consolidation of The Union and Sharon steel plants, two of the most formidable competitors of the Trust. The absorption of the two concerns by The Steel Corporation means the elimination of this competition. The annual capacity of The Union Steel Company is 200,000 tons gross of wire rods, 200,000 tons of wire and 1,000,000 kegs of wire nails. The total annual capacity of The Sharon Steel Company is 300,000 tons of steel ingots, 125,000 gross tons of rods and 1,000,000 kegs of wire nails. The Sharon Tin Plate Company, controlled by The Sharon Steel Company, have a weekly capacity of 18,000 boxes of tinplate and 2,400 boxes of terne plate.

FACTORY EXTENSION.

The Canada Cycle and Motor Company are erecting a large addition to their factory at Toronto Junction. The addition consists of a two-storey brick building, built like the rest of the factory, on mill construction principles. The new building is principally to accommodate the growing trade of the parts and accessories, and will enable the firm to carry a fuller line in this branch than ever it has been able to do before.

The company cordially invite any of its patrons to visit them at their works at Toronto Junction any time they are in Toronto.

A NEW TYPE OF AUTOMOBILE.

One of the largest German automobile concerns has taken up the manufacture of both light and heavy vehicles in which the transmission of power is obtained by means of so-called friction wheels. The drive wheel, which also acts as a fly-wheel, is connected directly to the friction wheel, the latter (to secure forward and reverse motions) working upon a shaft controlled by a forked clutch. The speeds obtained depend, of course, upon the position of the friction wheel on the face of the driving wheel. It is claimed that by this arrangement the motor is used to its fullest extent, whether running on level or ascending ground, no matter how frequent the change in elevation. As a result, a 4 horse-power machine of the new type is said to have a travelling capacity equivalent to that of other motors of 6 and 8 horse-power. We have a few other particulars which may be inspected at our offices by any reader interested in the matter.—Commercial Intelligence.

W. J. Lindsay, of St. Thomas, who is promoting the Nail Company at Collingwood, states that his company proposes to start a thoroughly modern nail and wire-fence factory, to turn out twenty-five tons of nails and twenty-five tons of wire fencing daily. It is proposed to spend about $500,000 on the plant and to employ 300 hands.

IN THE MATTER OF THE GEE ELECTRICAL CO., LIMITED.

IN LIQUIDATION.

By order of the Master-in-Ordinary there will be sold in detail by Public Auction by Messrs. C. J. Townsend & Company, on Tuesday, December 30th, 1902, commencing at 11 o'clock a.m. on the premises, 11 Colborne Street, Toronto, the following assets of The Gee Electrical Engineering Co., Limited, consisting of:

Planes and attachments.
Lathes and attachments.
Drills.
Mills.
Machine Tools.
Belting and pulleys.
Motors.
Switches.
Dynamos.
Electric fixtures.
Arc and other lights and lamps.
Sundry supplies
Vises, benches and fixtures.
Furniture.
Amounting in all to the sum of $17,681.32.

Terms: Purchases under $500.00 cash. Over $500.00 25 per cent. to be paid as deposit at time of sale, 25 per cent. when goods checked off and balance in one month with interest at 6 per cent. secured to satisfaction of Liquidator.

The other conditions of sale as far as applicable are the standing conditions of Court.

Detailed inventory may be seen on our premises or on application to E. R. C. Clarkson, Toronto, Liquidator.

Dated at Toronto this 16th day of December, 1902.

NEIL McLEAN, Chief Clerk, M.O.
E. R. C. CLARKSON, Liquidator.

W. M. Douglas, Solicitor for Liquidator, 70 Home Life Building.

PAINT, OIL AND BRUSH TRADES

JOHN LUCAS & CO.'S SALESMEN.

IN paint circles an interesting event of the past month was the annual convention of salesmen and officials of John Lucas & Company, the well-known paint, varnish and color manufacturers, whose headquarters are at Philadelphia. The convention occupied a whole week, from December 15 to 20, and was one of the largest and most successful ever held by the company.

John Lucas & Company, established some 50 years ago by the late John Lucas, is now one of the leading paint manufacturing establishments in the United States. There has been nothing phenomenal in its growth, but under conservative, but nevertheless wise and capable management, each year has witnessed an increase in the company's business, so that to-day the position occupied by the house is an enviable one. To-day its products are known and sold in almost every State in the Union, while its export trade is large and yearly growing in importance.

The convention held for the purpose of reviewing the past season's work and the preparation of plans for the future, accomplished much good, and incidentally brought out a number of interesting facts. Some of these facts were that the year about to close was one of the most successful in the history of the company, and that to meet the rapidly growing demand for Lucas products manufacturing facilities were to be increased by substantial additions to the company's factories, which are located at Gibbsboro', N.J.

With these improved and increased facilities the company are confident that they will be in a better position than ever before to intelligently and successfully meet the requirements of its trade in all lines of the best in paints, varnishes and colors.

The present operations of the company consist as follows: Factories at Gibbsboro', N.J.; head office and depot at Philadelphia; branch offices and depots at New York and Chicago. From all these points corps of representatives are sent out and all of the United States, as well as Canada, Cuba and the West Indies is covered throughout the year.

THE FLAXSEED CROP PROFITABLE.

Evidently the growing of flaxseed has taken a firm hold on the farmers of Manitoba, as it is proving a success in many districts. It will not be long till Canada produces as much flaxseed as the country needs. The Elkhorn, Man., Advocate says: "F. W. Benson shipped a carload of flax to Winnipeg last week. This is the first carload of flax shipped from Elkhorn. Mr. Benson finds the raising of flax profitable and will continue raising this cereal, stating that he believes it more profitable than wheat. The price realized was $1 per bushel on track at Elkhorn."

THE ADVANCE IN PETROLEUM.

For some time petroleum has steadily advanced in price, owing to the rise in value of crude oil. The latter has been advancing, it now appears, owing to the fact that the current demand far exceeds the production. The Standard Oil Company, which is said to have a surplus of 20,000,000 barrels, is reported by The Paint, Oil and Drug Review, to be drawing on this surplus at the rate of 800,000 barrels per month, which rate would absorb the total in about two years. The reasons for this increased consumption are the new uses to which oil is being put. New by-products have been discovered, the shortage in the coal supply has brought about a large consumption of oil for fuel, it is just now coming into demand largely for illuminating purposes, and the export trade has largely increased. To add to this the production has fallen off materially and there is consequently every reason for further advances in the price.

NEW LINSEED OIL MILLS.

Clark & Carman, whose flax mill at St. Marys, Ont., was burned down a few weeks ago, will rebuild in the spring, says The St. Marys Argus. The new mill will be even larger than the one it replaces.

At the same time, if Owen Sound, Ont., ratepayers vote favorably to a proposal to bonus them, The Ontario Linseed Oil Company, Limited, of which St. Marys citizens are the principal members, and the interests of which are being looked after by Mr. Sanderson, of St. Marys, will erect in Owen Sound, says The Owen Sound Times, a mill 150 x 40 feet, and three storeys high.

It is evident from the rapid development of the linseed oil industry that there is profit for the crushers in this in Canada, notwithstanding the admission of from 600,000 to 1,000,000 gallons of British linseed oil under the preference tariff. Canadians will be glad to see such satisfactory conditions continue.

PAINT AND OIL NOTES.

The employes of the London branch of The Queen City Oil Company, Limited, were last Friday evening entertained by the manager, J. A. Carrick.

A fourth gusher of oil has been struck in Raleigh township, near Chatham, Ont. This well is about half a mile from any of the other three, and oil was reached at 370 feet.

A charter has been granted to The Dominion Oil Company, Limited, of Chatham, Ont. The share capital is placed at $850,000, the provisional directors being G. M. Fennel, Martin J. Woodward and Christopher Smith.

A Petrolea, Ont., despatch says that while treating a batch of benzine at The Canadian Oil Refining Company's plant recently, the liquid exploded and seriously burned four men, Wm. Nichols, Edward Rawly, Jas. Glass and John Reardon. They discovered a fire an the top of the building, and went up to investigate. When they opened the door the explosion occurred. All got down safely except Nichols, who slid down a hose line and fell, striking on a steam pipe, which broke under the contact, badly scalding him as well as inflicting internal injuries.

SCRUB BRUSHES IN CARTONS.

Boeckh's scrub brushes in cartons, put up separately for the trade in the better grades, retailing at from 25 to 50c. each, is the latest idea of The United Factories, Limited, Toronto. This arrangement will enable the retailer to have one of the principal lines of brushes always ready for the customer, who can select the kind wanted from the sample board, which is numbered to correspond with numbers on each of the cartons. The cartons are, moreover, quite attractive, and will add to window or interior display, without incurring the liability of goods becoming shop-worn. The firm's travellers are off the road at present, but will introduce this new line in a few weeks.

PAINT AND OIL MARKETS.

MONTREAL

There is practically no change in the situation in regard to paints and oils. Paris green is being booked freely, but the general business this week is assuming a holiday character, and there is no particular rush on in any branch of the trade. There is rather a brisk inquiry for varnishes, the furniture establishments appearing to be well employed. Coach

TURPENTINE.—Single bbls., 77c.; 2 to 3 bbls., 76c. delivered. Toronto, Hamilton and London, 1c. less. For less quantities than barrels, 5c. per gallon extra will be added, and for 5-gallon packages, 50c. and 10-gallon packages, 80c. will be charged.

GASOLINE AND BENZINE.—We quote: Benzine, 19¼c. and gasoline, ordinary, 21¼c. and engine, 22¼c. f.o.b. Toronto.

WINDOW GLASS.

MONTREAL.

Window glass has been very quiet for the past few days, the mild weather and holiday season being largely responsible. The prices are firm and there are no present indications of a change. We now quote : First break, 50 feet, $2 ; second, $2.10 for 50 feet; first break, 100 feet, $3.80; second break, $4 ; third break, $4.50; fourth break, $4.75.

TORONTO.

Prices keep steady, but there is nothing doing, and our quotations are still as follows : Under 26 inch, $4.25 ; 26 to 40 in., $4.65 ; 41 to 50 in., $5.10 ; 51 to 60 in., $5.35 ; 61 to 70 in., $5.75 ; 71 to 80 in., $6.25 ; 81 to 85 in., $7 ; 86 to 90 in., $7.75. Toronto, Hamilton and London. Terms, 4 months, or 3 per cent. 30 days. Discount, 15 per cent.

We heartily wish our patrons
one and all

THE CANADA PAINT COMPANY,

LIMITED

MONTREAL AND TORONTO.

MONTREAL, NEW YEAR'S DAY, 1903.

572 WILLIAM STREET.

DEAR SIR,—Permit us to inscribe on the opening page of your new year our sincere good wishes for 1903.

In common with all Canadians, we look forward to 1903, from a commercial standpoint, as a year that promises to eclipse all its precursors in the history of the Dominion.

This outlook is based not only on the remarkable development that is taking place in our country, but also on the strong Canadian sentiment that prevails in favor of purely Canadian goods.

It has been most interesting to us to notice how many of our clients, both manufacturers and distributors, have added to their business facilities during the past year.

The year has been to ourselves by far our largest and best, yet we open 1903 with provision for a still greater increase, and a confidence that it is coming to us.

Our 1903 Catalogue issues from the printing department to-day, and will be found as interesting as ever, leading you up to date in the various departments of our trade. It contains several new features, the most important being that of the New Fast Reds, not heretofore made in Canada, but now included in the list of goods made from the first stages within our works.

Manufacturing is our business; we do not act either as importers, agents, or distributors. The secret of value with us is that you have our goods at first hands. That this is understood and appreciated we have had abundant evidence in the past.

We have great pleasure in expressing our thanks for your bounteous treatment of us in 1902.

May we ask all our friends to begin 1903 well, by beginning early, letting us have Spring specifications at the earliest convenient dates, so that goods may be packed and thereafter stored, if need be, to wait shipping instructions.

Always at your service, and wishing you a Happy New Year,

We are,

Yours truly,

THE CANADA PAINT CO., LIMITED

ROB. MUNRO, MANAGING DIRECTOR.

STOVES AND TINWARE

AND ALLIED TRADES

HOW COKE IS MADE.

IN a paper recently read to the Pittsburg Foundrymen's Association, the author, N. P. Hyndman, remarked that "It is surprising the number of people interested in the consumption of coke, living remote from the coking coal fields, who are ignorant of its mode of manufacture. The style of oven principally used in this country is the beehive type. The by-product type is being introduced, but the preference in America to date seems to be for the beehive oven. These remarks, therefore, refer only to the latter. They are built in solid rows of any number consistent with the character of the surface of the ground. They may be 'bank ovens' (single row built against a hill) or block ovens' (double row on open ground). The coal is carried to them in 'lorries' holding enough coal to charge the oven, and running on a track built on top of the row of ovens. The coal is charged from the lorry into the ovens through a hole in the top. The process of applying the heat is where we find many people mystified, or laboring under a wrong impression. When the oven is new the heat is applied by burning wood until the bricks get thoroughly hot. The oven is then charged with coal and ignites. The burning is from the top of the oven to the base. When the coke is ready to draw, the door in front of the oven is opened and the cooling process started. This is done by quenching with water through a hose pipe, manipulated by the drawer. When cool enough to handle the drawer pulls the coke out on the yard with a large iron fork, finishing the quenching outside, as too much water permitted in the oven would tend to reduce the heat. As soon as possible after the oven is emptied it is recharged from the lorry with the same quantity of coal as before, and the burning process commences instantly from the heat of the oven. This continues during the entire period the oven is in operation.

"Coke is burned 48 to 72 hours — 48 hours because a certain quantity of coal will burn in a certain sized oven that length of time with best results to produce the highest quality of coke for blast-furnace use. The 72-hour coke, being burned longer, is harder and consequently of better quality, and is specially adapted to foundry practice."

COMFORT AND ECONOMY.

One of the best catalogues of the year, entitled "A Combination of Comfort and Economy," is the production of The J. F. Pease Company, Limited, Toronto. In addition to full descriptions of the "Economy" hot-water or steam and warm-air combination heaters, it includes many attractive cuts of public buildings and of private dwellings, large and small, into which the "Economy" heaters have been installed; also letters from the owners referring to the economy effected, the comfort secured and the general satisfaction given by the "Economy." As these booklets are being liberally distributed by The J. F. Pease Company, Limited, they are bound to materially assist in the sales of their furnaces and heaters.

THE SUCCESSFUL STOVE SALESMAN.

The following from an address made by F. Sabin at a stove salesmen's banquet recently, is not only brief and pithy, but contains a truth which all salesmen should recognize:

"In my humble judgment, if they desire to become successful in their calling as stove salesmen the best way is to be sincere and truthful to their customers. I mean by that not to misrepresent anything in order to make a sale. As the good-will of those they visit is their stock in trade and is an asset of no small amount, the salesman that has the confidence of his customers is, in my judgment, the best salesman and worth more to his employer in dollars and cents than a salesman that is indifferent to the success and interests of his customers."

TO MEASURE COAL.

An exchange gives the following comparatively simple method:

A solid cubic foot of anthracite coal weighs about 93 lb. When broken for use it weighs about 54 lb. Bituminous coal, when broken up for use, weighs about 50 lb. The consequent rule for the approximate measurement of coal in a bin or box is to multiply the length in feet by the height in feet, and again by the breadth in feet, and this result by 54 for anthracite coal, or by 60 for bituminous coal. The result will equal the number of lb., and to find the number of tons divide by 2,000.

AMONG THE TRADE.

David Boyer, stove and tinware dealer, Listowel, Ont., has sold out to Adolph & Bonnett.

Delahey's foundry at Pembroke, Ont, is being enlarged. When a large addition now under construction is completed the firm will employ nearly 200 men.

The C.P.R. and G.T.R. officials predict that there will not be as great a scarcity of fuel in Toronto and district from now out as there has been in the past few weeks, as the deliveries of coal can now be much more easily made than heretofore.

ANOTHER WAY TO DISPOSE OF SOOT.

Owing to the trouble caused by soft coal clogging pipes and chimney flues, the following suggestion, from a Detroit daily, is worthy of noting: "Zinc is a peculiar metal in many respects. It volatizes easily, and the oxide thus produced has a strong affinity for carbon. If one's furnace chimney is clogged up with soot and the owner desires to get rid of it, all that is necessary is to throw a little zinc scrap into the fire. Any old zinc will do, and very little will suffice to keep the chimney clean if used about once a week. The vapor of zinc oxide seizes upon the carbon of the soot and forms a new chemical compound, part of which goes up the flue and part falls to the bottom to be shovelled out as ash."

Hector Quesnel, 5, 10 and 15c. Store, Ottawa, is succeeded by C. Lamontremonville.

MANTELS, GRATES and TILE.

Are any of your customers building a new house? If so, why not try and sell them a mantel as well as hardware? They will want one, and it will pay you. Write us for catalogue and price.

MARKETS AND MARKET NOTES

QUEBEC MARKETS.

HARDWARE.

Montreal, December 26, 1902.

THE market for general hardware has been particularly active this week, but close up to Christmas Day there was a good demand for such lines as skates, sleigh bells, etc. Among the quotable changes of the week must be mentioned shovels. To meet the competition of English goods the home manufacturers reduced the discount to 15 per cent. off instead of 40 and 5 per cent. off. English shovels have been arriving on this market in large quantities, and it is hoped that this change will have some good effect. Tarred felt has advanced 5c. per 100 lb. for Quebec Province. The city trade in Christmas goods has kept up well, but with outside points trade was slow. Most of the travellers have come in from the road and will not go out again until the first of the year.

BARB WIRE.—There is no change to report. The price is $2.90 per 100-lb. keg f.o.b. Montreal, and $2.55 f.o.b. Cleveland.

GALVANIZED WIRE.—There is not much doing in this line, and our quotations are still as follows: Nos. 6, 7 and 8 gauge, $3.20; No. 9, $2.55; No. 10, $3.30; No. 11, $3.40; No. 12, $2.70; No. 13, $2.80; No. 14, $3.80; No. 15, $4.30; No. 16, $4.55; No. 17, $4.95; No. 18, $5.20. In carlots, f. o. b. Cleveland, the prices are: No. 9, $2.15; No. 12, $2.30; No. 13, $2.40, not dutiable. No. 10, $2.20; No. 11, $2.25; No. 14, $2.50; No. 15, $2.95; No. 16, $3.05, dutiable. In less than carlots, 12½c. per 100 lb. extra is charged.

SMOOTH STEEL WIRE.—The market is quiet and shows no new feature. We now quote: Bright and annealed, $2.50 per 100 lb. f. o. b. Montreal, Toronto, Halifax, London, Hamilton and St. John. Net extras per 100 lb. are now as follows: Coppered wire, 60c.; tinned wire, $2; oiling, 10c.; spring wire, $1.25; best steel wire, 75c.; bright soft drawn, 15c.; special hay-baling wire, 30c.

FINE WIRE.—Trade in this wire continues very quiet. The discount is 25 per cent. with the following net extras. 1 and 2-lb. hanks, 25c. per 100 lb.; ½-lb. hanks, 37½c. and ¼ lb. hanks, 50c.

BRASS AND COPPER WIRE.—The movement in both these wires is still light and the market has developed no new phase. The discount is 62½ per cent.

FENCE STAPLES.—Trade is quiet. We quote: Galvanized, $3 per 100-lb. keg; bright, $2.80. 25 and 50-lb. packages, 25c. extra.

WIRE NAILS.—There has been no further change in these nails, and prices remain at $2.40 in carlots and $2.45 per keg in small lots f.o.b. Montreal, London, Hamilton, Toronto, Brantford, Windsor, Ont., and St. John.

CUT NAILS.—The price of cut nails remains unchanged. The market is quiet. We quote: In carlots, $2.40 per keg and in smaller quantities, $2.45 per keg.

HORSE NAILS.—The market is steady nails is fair and prices remain firm. The discounts are still quoted as follows: "C" brand, 40, 10 and 7½ per cent. off; on "M" brand, "Oval," 57½ per cent.; "New City," 57½ per cent.; "New Countersunk," 65 per cent.; "Monarch," 65 per cent.; "Peerless," 50 and 7½ per cent.

HORSESHOES.—The market is steady and the demand moderate. Prices are as follows: Iron shoes, light and medium, pattern, No. 2 and larger, $3.35; No. 1 and smaller, $3.60; snow pattern, No. 2 and larger, $3.60; No. 1 and smaller, $3.85; X L steel shoes, new light pattern, sizes 1 to 5, No. 2 and larger, $3.45; No. 1 and smaller, $3.70; featherweight, all sizes, 0 to 4, $5; toe weight, all sizes, 1 to 4, $6.25. Shoes, more than one size in a keg, 10c. per keg extra. F.o.b. Montreal only.

RIVETS AND BURRS.—There is no business of any account doing at present. The discounts are quoted as follows: Best iron rivets, section carriage, and wagon box, black rivets, tinned do., coopers'

"Famous" Air-Tight Heater--Series 21.

All sheet iron body, heavy sheet-steel linings, and cast-iron pipe collar.

Perfect screw-closing damper renders draft through stove impossible, unless desired.

No nickel except urn. New inner linings can be put in by removing top.

We can make prompt shipment in all sizes of this series.

rivets and tinned swedes rivets, 60 and 10 per cent.; swedes iron burrs are quoted at 55 per cent. off; copper rivets, with the usual proportion of burrs, 45 per cent. off and coppered iron rivets and burrs, in 5-lb. carton boxes are quoted at 60 and 10 per cent. off list.

BOLTS.—Trade remains quiet with no changes to note. Quotations follow: Norway carriage bolts, 55 per cent.; common, 50 per cent; full square carriage bolts, 55 per cent.; machine bolts, 50 and 5 per cent.; coach screws, 66 2-3 per cent.; sleighshoe bolts, 65 and 5 per cent.; blank bolts, 50 and 5 per cent.; bolt ends, 50 and 5 per cent.; plough bolts, 50 and 5 per cent. To any retailer an extra discount of 10 per cent. is allowed. Tire bolts, 67½ per cent.; stove bolts, 67½ per cent. Nuts, square, 3½c. per lb. off list; hexagon nuts, 3¾c. per lb. off list. To all retailers an extra discount of ½c. per lb. is allowed.

SCREWS.—Very little business is being transacted, and prices remain unchanged. Quotations are: Round head bright, 82½ and 10 per cent.; flat head bright, 87½ and 10 per cent.; brass, round heads, 75 and 10 per cent.; brass, flat heads, 80 and 10 per cent.

CORDAGE.—Business is fair and several orders have been placed during the past week for manila rope. We quote as follows: Manila, 14c.; British manila, 12c.; sisal, 11½c. and lathyarn, 11c.

BUILDING PAPER.—There has been an advance of 5c. in the price of tarred felt. We quote as follows: Tarred felt, $1.75 per 100 lb.; 2-ply, ready-roofing, 85c. per roll; 3-ply, $1.10 per roll; carpet felt, $2.25 per 100 lb.; dry sheathing, 35c. per roll; tar sheathing, 45c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll; O K and I X L, 65c. per roll; heavy straw and sheathing, $30 per ton; slaters' felt, 60c. per roll.

SCREEN WIRE CLOTH.—No business has been transacted in this market. The nominal price is $1.40 per 100 square feet.

FIREBRICKS.—Trade is very slow in this line. We quote as follows: English firebricks, $16 to $22 and Scotch, $17 to $22 per 1,000.

CEMENT.—Dealers are looking for more trade after the new year, but at present it is quiet, and our quotations are as follows: Canadian cement, $1.90 to $2.25; German, $2.20 to $2.30; English, $2.15 to $2.25; Belgian, $1.70 to $1.95 per bbl., ex-wharf, and American, $2.10 to $2.20 ex-cars.

SKATES.—The trade is still good in skates and some good orders are still going out. Quotations are as follows: Halifax pattern, 36c. per pair; nickel-plated, 65c. per pair; ladies nickel-plated, 60c.; ladies' concave nickel-plated, $1.35 plain hockey, 27c. to $1.35; nickel-plated hockey, 60c. to $2.50; double-end hockey, $1.50 to $3. Skate straps, 35c. to $1.35.

HOCKEY STICKS.—A good trade is doing in hockey sticks. Prices are as follows: Best second growth, goal keepers', $4.20 per doz.; ash, $2.90; elm, $2.25; boys' elm, $1.10; common, 90c. Regulation pucks, $1.50 per doz.

SNOW SHOVELS.—There has been a falling off in orders during the past week. We quote: "Habitant," $2.25 to $2.40; "Victor," 30 per cent. off; steel railroad shovels, 48 and 5 per cent. off.

FIRE SHOVELS.—Trade continues good and prices steady. We quote: No. 70, 38½ to 40c. per dozen; No. 55, 55 to 60c.; No. 57, 82½ to 90c.; No. 60, 82½ to 90c.; No. 65, $1.37½ to $1.45; No. 80, 50 to

COAL HODS.—There has been a fair business in coal hods up to the present, but not up to former years. We quote as follows: Japanned, 16-in., $4.50 per doz.; 17-in., $4.80; 18-in., $5.10; with gold band, 17-in., $5.10; 18-in., $5.40. Galvanized, 16-in., $6.20; 17-in., $6.50; 18-in., $6.80 per doz. The discount is 45 per cent.

LANTERNS.—There is nothing of special interest to report in this market this week, and our quotations are as follows: Tilt, lift, or hinge, No. 0, $4 per dozen; Cold Blast, $7 per dozen; dashboard, No. 0, $5.75 per dozen; cold-blast dashboard, $9 per dozen. Extras are as follows: Japanning, 50c. per dozen; copper-plating cold blast, $2 per dozen. The prices quoted are f.o.b. London, Hamilton, Toronto, Belleville, Kingston and Montreal.

METALS.

The movement in metals has continued fairly satisfactory and no shading of prices is reported from any quarter. Pig iron is quoted at a lower figure this week, but the market is still firm under a strong demand. Copper is easy at unchanged prices. In ingot tin, quotations to arrive are $27.25 to $28.50. There is not much doing, however, in that line.

BAR IRON.—Considerable business has been doing during the past week and the prices remain unchanged. We quote as follows: Merchants' bar, $2; horseshoe iron, $2.25, and forged iron, $2.20

BLACK SHEETS.—There is no change in prices since our last report. We now quote: 28 gauge, $2.65; 26 gauge, $2.60; 20 to 24 gauge, $2.50 and 8 to 20 gauge, $2.50.

GALVANIZED IRON.—The market is very quiet, and our quotations are as follows: No. 28, Queen's Head, $4.40; Apollo, 10$\frac{3}{4}$-oz., $4.40; Fleur de Lis, $4.15; Comet, $4.10; "Bell" brand, $4.05. For less than case lots 25c. extra is charged.

SOIL PIPE AND FITTINGS.—There is no change to note in prices and business is slow. Discounts are as follows: Light soil pipe, 3 to 6 inch, 50 per cent.; medium and extra heavy soil pipe, 2 to 6-inch, 60 per cent.; extra heavy soil pipe, 8-inch, 45 per cent.; light fittings, 2 to 6-inch, 50 and 10 per cent.; medium and extra heavy fittings, 2 to 6-inch, 60 per cent.; extra heavy fittings, 8-inch, 45 per cent.

PIG IRON.—Business is quiet, and the price is very firm at $23.50 to $24.50, ex-store, Montreal.

INGOT COPPER.—The market is steady at $12.50 to $13.50 per 100 lb.

INGOT TIN.—There seems to be an uncertainty as regards this market. We quote $27.50 to $28.50 per 100 lb.

PIG LEAD.—Business is about done for the remainder of the year. We quote: $2.90 in carlots and $3.25 in small lots.

LEAD PIPE.—Composition and waste sell at 8c. and ordinary at 7c. The discount is 37$\frac{1}{2}$ per cent.

IRON PIPE.—Trade is good and prices remain unchanged. Quotations are as follows: Standard pipe, per 100 feet, in lengths under 19 feet: Black, $\frac{1}{4}$, $2.40; $\frac{3}{8}$, $2.65; $\frac{1}{2}$, $2.85; $\frac{3}{4}$, $3.65; 1-in., $5.20; 1$\frac{1}{4}$, $7.35; 1$\frac{1}{2}$, $8.95; 2-in., $12.55. Galvanized, $\frac{1}{4}$, $3.20; $\frac{3}{8}$, $3.45; $\frac{1}{2}$, $3.85; $\frac{3}{4}$, $5.; 1-in., $7.20; 1$\frac{1}{4}$, $10.05; 1$\frac{1}{2}$, $12.20; 2-inch, $16.85. Extra heavy pipe, plain ends, are quoted per 100 feet as follows: Black, $\frac{1}{2}$, $4.20; $\frac{3}{4}$, $5.25; 1-in., $7.55; 1$\frac{1}{4}$, $10.55; 1$\frac{1}{2}$, $12.75; 2-in., $17.60. Galvanized, $\frac{1}{2}$, $5.20; $\frac{3}{4}$, $6.65; 1-in., $9.55; 1$\frac{1}{4}$, $13.25; 1$\frac{1}{2}$, $16; 2-in., $21.90. For threads and couplings 5 per cent. is added.

TINPLATES.—The market remains unchanged. We quote: Cokes, $4.25 and charcoals, $4.75 to $5.25.

STEEL.—There is a fair movement in steel. Prices remain the same as last quoted: Sleighshoe, $2.10; tire, $2.20; bar, $2.05; spring, $2.85; reeled machinery,

HARDWARE AND METAL
MONTREAL. TORONTO.

$2.75; toecalk, $2.60; machinery (iron finish), $2.10; mild steel, $2.05; square harrow, $2.15.

TOOL STEEL. A little business is being done, but trade generally is very dull. Prices follow: Black Diamond, 8c.; Sanderson's, 8 to 12c., according to the grade; Jessop's, 13c.; Leonard's, 7½c.; Jonas & Colver's, 10 to 20c.; "Air Hardening," 65c. per lb.

CANADA PLATES.—Galvanized plates are in good demand and the market is very firm this week. Our quotations are as follows: 52s, $2.70 to $2.80; 60s, $2.85 to $2.90; 75s, $2.80 to $2.85; full polished, $3.75 and galvanized, $4.25 to $4.35; galvanized, 60s, $4.45 to $4.55.

TERNE PLATES.—These are slow at unchanged prices. The price is $7.50.

COIL CHAIN.—Importers report a few orders and expect a fair trade in a week or so. Our quotations are as follows: No. 6, 12½c.; No. 5, 10½c.; No. 4, 10c.; No. 3, 9½c.; ¼-in., 7¼c. per lb.; 5-16, $5; 5-16 exact, $5.25; ⅜, $4.25; 7-16, $4.05; ½, $3.95; 9-16, $3.85; ⅝, $3.55; ¾, $3.50; ⅞, $3.45; 1-inch, $3.45. In carload lots an allowance of 10c. is made.

SHEET ZINC.—The market is very quiet. We quote $5.85 to $6.15.

ANTIMONY.—The price is 10c.

ZINC SPELTER.—There is a very light movement and the price is still 5c.

SOLDER.—A good demand is reported for solder. We quote: Bar solder, 20c. and wire solder, 18c.

SCRAP METALS.

The only quotable change this week occurrs in machinery scrap, which has advanced 5c. Prices follow: Heavy copper and wire, 9c. per lb.; light copper, 8c.; heavy red brass, 10c.; heavy yellow, 8½c.; light brass, 5c.; lead, 2 to 2¼c.; zinc, 2½ to 2¾c.; iron, No. 1 wrought, $15 to $16; No. 2, $7 per ton; machinery scrap, $16.50 to $17; stove plate, $13; malleable and steel, $6; mixed country rags, 60 to 70c. per 100 lb.; old rubbers, 6½ to 6¾c. per pound.

RAW FURS.

No further change in prices is reported this week. There is still a good market for foxes, and prices here quoted are readily obtained. We quote:

For Yourself

you choose reliability and endurance when it comes to building·

Choose the same for your Customers.

Then you are certain of harmonious conditions and ever-increasing sales and prestige.

We make every conceivable need in Sheet Metal Building Materials—honest, capable goods that give the acme of artistic effect, as well as enduring reliability.

With our lines in stock, you'll never have an apology to make to your patrons.

Consider—these things count for much.

Metallic Roofing Co., Limited

TORONTO. MONTREAL. WINNIPEG.

HIDES.

There is no change in the hide market since last week, but the dealers are looking for a decline in sympathy with the rapid decline of late in the United States. We quote: No. 1 hides, 8c.; No. 2, 7c.; No. 3, 6c.; calf skins, 8 to 10c.; lambskins, 65c.

MONTREAL NOTES.

Tarred felt has advanced 5c. per 100 lb. for the Province of Quebec.

The discount on shovels has been reduced from [illegible] per cent. to 45 per cent.

Most of the travellers are in off the road for the holidays and will not go out till after the first of the year.

ONTARIO MARKETS.

Toronto, December 26, 1902.

HARDWARE.

FOR the holiday week business in wholesale hardware circles has been active. There has been quite a sorting up business in cutlery, skates, and plated goods, and a few transactions have been made also in the other lines. The travellers are in for their holidays and the orders coming forward have been mostly by mail. A number of visitors are in town calling on the trade and are placing some orders for immediate and future delivery. There has been no change in prices during the week and the figures at the present ruling will likely prevail till the end of the year.

BARB WIRE.—Trade is quiet and the base price is quoted as follows: $2.67½ from Cleveland and 12½c. less in carlots. From stock, Toronto, $3.

GALVANIZED WIRE.—There has been little business doing in galvanized wire. The prices are unchanged and our quotations are as follows: Nos. 6, 7 and 8, $3.15 to $3.35 per 100 lb.; No. 9, $2.65 to $2.85; No. 10, $3.20 to $3.40; No. 11, $3.25 to $3.45; No. 12, $2.80 to $3; No. 13, $2.90 to $3.10; No. 14, $3.75 to $3.95; No. 15, $4.30; No. 16, $4.55. Nos. 6 to 9 base from Cleveland are quoted at $2.27½ in less than carlots.

SMOOTH STEEL WIRE.—There has been no business of any account transacted in this line during the week. Base price follows: $2.50 per 100 lb. Oiling, 10c.; coppering, 60c. and tinning, $2 per 100 lb. extra. Shipping points, Toronto, Hamilton, London and Montreal, with freights equalized on those points.

FINE STEEL WIRE.—The demand for this wire is light. The discount is 25 per cent.

WIRE NAILS.—Prices are steady at the decline of last week. A fair number of orders for the season have come forward. Prices are as follows: $2.45 per keg and 5c. less for carlots. The shipping points are Toronto, Hamilton, London, Gananoque and Montreal.

CUT NAILS.—These are quiet and unchanged. The base price is $2.50 per keg.

HORSE NAILS.—There is a satisfactory demand for the season. The discounts are as follows: "C" brand, oval head, 40 and 10 and 7½ per cent.; on "M" brand, 50, 10 and 5 per cent.; on "Monarch," 65 per cent., and "Countersunk" head, 65 per cent.; "Peerless," 50 and 7½ per cent.

HORSESHOES.—Quite a number of orders keep coming forward at unchanged prices, and our quotations are still as follows: Iron shoes, No. 2 and larger, light medium and heavy, $3.45; snow shoes, $3.70; light steel shoes, $3.55; featherweight (all sizes), $4.95; iron shoes, No. 1 and smaller, light, medium and heavy (all sizes), $3.70; snow shoes, $4; light steel shoes, $3.80; featherweight (all sizes), $4.95.

SCREWS.—The demand for these has dropped off with the holiday season. The discounts are unchanged. We quote as follows: Flat head bright, 87½ and 10 per cent. discount; round head bright, 82½ and 10 per cent.; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.; round head bronze, 65 per cent. and flat head bronze, 70 per cent.

RIVETS AND BURRS.—There is little doing in these. The discounts are quoted as follows: Iron rivets, 60 and 10 per cent. discount; iron burrs, 55 per cent.; copper rivets, with usual proportion of burrs, 45 per cent.; copper burrs alone, 30 and 10 per cent.

BOLTS AND NUTS.—There is a light demand reported this week. We quote: Carriage bolts, common ($1 list), 50 per cent.; carriage bolts, full square ($2.40 list), 55 and 10 per cent.; carriage bolts, Norway iron ($3.00 list), 55 and 10 per cent.; machine bolts, all sizes, 50 and 10 per cent.; coach screws, cone points, 66 2-3 and 10 per cent.; elevator shaft and whiffletree bolts, 50 per cent.

SPADES AND SHOVELS.—A fair number of orders are still coming in for both spades and shovels. The discounts are unchanged at 40 and 5 per cent.

ROPE.—Trade has quieted down somewhat in this line, and quotations are as follows: Pure manila, 14c.; British manila, 12c.; sisal, 12c.; lathyarn, single, 11c. and double, 11½c.; sisal bed cord, 3-cord, 48 feet, 65c.; 60 feet, 80c.; 72 feet, 95c. per doz.

HARVEST TOOLS.—There is a dull feeling in the market for these. The discounts are quoted at 60 and 10 per cent.

LAWN MOWERS.—The tone of the market is quiet. The prices are unchanged. Prices follow: Woodyatt, 12-inch wheels, $7.50; Star, 12-inch wheels, $5.50; Daisy, 12-inch wheels, $4.90; Philadelphia, 10-inch wheels, $6; Ontario, 10-inch wheels, $12.75. The other sizes are in proportion. The discount is 50 per cent.

GREEN WIRE CLOTH.—There has been little buying in this line. We quote $1.40 per 100 square feet.

EAVETROUGHING, ETC.—Business in eavetroughing and conductor pipe is now at a standstill. The prices rule as follows: Eavetroughing, 10-in., per 100 ft., $3.10; conductor pipe, 2-inch, per 100 ft., $3; 3-inch, $4; 4-inch, $5.25; 5-inch, $6.75 and 6-inch, $9.

CUTLERY.—Quite a little sorting-up demand was experienced for the fancy lines of cutlery this week for the holiday trade.

BUILDING PAPER.—The orders coming forward are not so numerous this week as before. We quote as follows: Dry sheathing, grey or straw, 35c. per roll; tar sheathing, grey or straw, 45c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll.

TINWARE AND ENAMELLED WARE.—There is nothing doing. The holidays have caused business to drop off rapidly and jobbers are now busy stock taking.

STOVES, RANGES, ETC.—A falling off in the demand for these is reported and the manufacturers are commencing to take stock. So great has been the volume of business in these that there are now no surplus supplies on hand and so the trade is satisfied.

SCREEN DOORS, ETC.—Business in these is flat at present and will not likely pick up till the end of the year. Quotations follow: Screen doors, common, two or three panel, walnut stained, 3-in. style, $6.60; stained, yellow or green, $6.80; in natural colors, oil finish, $8.15; 4-in. style, 20c. per dozen extra.

CEMENT.—There is now nothing doing in cement. The cold weather has finished all outside work and stock-taking is the order of the day. The manufacturers are now enlarging their works and making preparations to increase their outputs for the coming vear. During the summer and early fall about 800,000 tons of foreign cement were imported into Canada. Quotations are: Canadian Portland, $2.80 to $3.20; hydraulic, $1.35 per barrel. At the works the prices are $2.50 to $2.70 per barrel.

METALS.

Consequent upon the holiday season being on the buying movement in metals has ceased temporarily. What business there is being done is for shipment from stock, but at the turn of the year it is expected that there will be a good deal of inquiry for metals. A turn in the speculative tide caused the London tin market to advance £2 per long ton last Monday and active buying was reported at that figure. The New York market responded to the appreciation, but there was no accompanying activity. The other metals outside are featureless.

PIG IRON.—The market is about the same as last week. We quote as follows: $23 for No. 1 and $22.50 for No. 2 at the Canadian furnaces. No. 2 Summerlee is quoted at $23 on track, Toronto.

STEEL BOILER PLATES.—There is a fair number of inquiries coming forward for these, but the mills are sold out for some time ahead. The quotations are steady at $1.80 per 100 lb. on track, Toronto, in carlots.

STEEL RAILS.—There is nothing new to report. We quote at the works $36 per ton for steel railway rails.

TOOL STEEL.—There is still a good demand for tool steel. Our quotations are: "B C" and "Black Diamond," 10 to 11c.; Jessop's, Morton's and Firth's, 14c.; Jonas & Colver's, 10 to 20c.; ditto, "Air Hardening," 70c. per lb.; Chas. Leonards', 8 to 9c.; Park's "Silver," 12 to 14c.; Park's Special, 15 to 20c.

MILD STEEL.—The market is steady and unchanged. We quote $2.50 to $3 per 100 lb. f.o.b., Toronto.

BOILER TUBES.—The market is in about the same condition as last week.

SPRING STEEL.—The demand is still good. The prices are $3 to $3.50 per 100 lb., on track, Toronto.

BAR IRON.—There is a strong market for this article without any change in

prices this week. We quote: The base price is $2.05. Extras cut to length while rolling: 2 ft. and over, 10c. per 100 lb., 1 ft. and under 2 ft., 15c.; under 1 ft., 20c.; over 20 ft. by special agreement, according to length and size.

BLACK SHEETS.—This line has shown some activity during the past week. We quote: Common, $3.15 for 28 gauge and dead flat, $2.50 for 26 gauge.

CANADA PLATES.—There is still a fair demand for this line, and a number of orders have been received for fairly large quantities. We quote as follows: All dull, $2.90 to $3; half-polished, $2.85 to $3.10 and all-bright, $3.75 to $3.85.

GALVANIZED SHEETS.—These are unchanged. Our quotations are as follows: Queen's Head, $4.50 for 28 gauge; American, $4.40 for 24 gauge; Bell brand, $4.30 for 28 gauge; Gordon Crown, $4.50 for 28 gauge.

TIN.—This metal has been more active. The prices are advancing on the outside markets, but the market, locally, is still strong at $29 to $30 per 100 lb.

TINPLATES.—These are unchanged. The base price is as follows: Charcoals, $4.75 to $5 and cokes, $4.25 to $4.50 per box.

COPPER.—More inquiries are reported for ingot copper this week. We quote as follows: Ingot copper, $13 and sheet copper, $22 to $23 per 100 lb.

BRASS.—There is no change in the market to report. The discount is 15 per cent.

LEAD.—The market is quiet. We quote $3.50 per 100 lb. for pig lead and $3.75 for bar lead.

IRON PIPE.—The demand is still good and prices are firm. We quote as follows: 100 feet, black pipe, ⅛-in., $3; ¼-in., $2.30 to $2.40; ⅜-in., $2.65; ½-in., $2.85; ¾-in., $3.65; 1-in., $5.20; 1¼-in., $7.35; 1½-in., $8.95; 2-in., $12.55; 2½-in., $20 to $21; 3-in., $24 to $25; 3½-in., $30 to $32; 4-in., $37.50 to $38.

ZINC SPELTER.—There has been a fair demand for small quantities of spelter. We quote 5 to 6c. per lb.

ZINC SHEETS.—These continue active and unchanged. The base price is quoted as follows: Cask lots, $6 to $6.25 and part casks, $6.25 to $6.50.

SOLDER.—This metal is quiet.

ANTIMONY.—There is nothing doing in antimony. We quote $9 per ton.

PETROLEUM.

The Union Petroleum Company's prices are unchanged this week. Prices follow: Lily White, Canadian, 17½c. in bbls.; Silver Light, American, 19½c. in bbls.; Crystal Spray, water white, American, 20½c. in bbls.; Pennoline, best American imported, 22c. in bbls. In bulk, 2c. less. The Queen City Oil Company quote an advance of ½c., their quotations now being as follows: Sarnia Prime White, 18c.; Sarnia Water White, 17½c.; Family Safety, 20½c. in bbls.; Pratt's Astral, 19½c. in bulk.

HIDES, SKINS AND WOOL.

HIDES.—The offering of hides continue large and are of poor quality. The market is weak both here and abroad, but prices rule nominally at previous quotations. Prices are as follows: No. 1 green, 8c.; No. 2 green, 7c.; No. 1 green, steers, 8½c.; No. 2 green, steers, 7½c.; cured, 8½ to 9c. per lb.

CALF SKINS.—These are in good demand and the prices are firm this week. Our quotations are as follows: Veal skins, 6 to 14 lb. inclusive, No. 1, 10c.; No. 2, 8c.; do, 15 to 20 lb. inclusive, No. 1, 9c.; No. 2, 7c.; deacons (dairies), 60 to 70c. each.

SHEEPSKINS.—These are unchanged at 75c. each.

WOOL.—The market for wool is strong with no quotable changes in prices. We quote: Unwashed, 8 to 8½c.; fleece, 15c.; pulled wools, super, 15 to 16c. and extra, 19 to 20c.

TALLOW.—A good deal of tallow is still coming on the market. Prices are weak at 6 to 6¼c. per lb. f.o.b. Toronto, and from store, 6½ to 6¾c. per lb.

SEEDS.

There is no business of any extent being transacted in seeds at the present time. The prices of red clover are nominal at $6.25 to $6.75 at outside points, and alsike is worth $5.75 to $6.75 per bushel, with the usual premium for samples of extra fine quality. Timothy is nominal at $1.50 to $1.85 per bushel.

OLD MATERIAL.

Prices are steady and trade is good for this time of the year We quote as follows: Heavy copper and wire, 10c. per lb.; light copper, 8 to 8½c.; heavy red brass, 9½c.; heavy yellow brass, 8 to 8½c.; light brass, 5 to 5½c.; lead, 2 to 2¼c.; scrap zinc, 3c.; iron, No. 1 wrought, $13 per net ton; No. 2 wrought, $4.50; machinery cast scrap, $15.50 to $16; stove plate, $10; malleable and steel, $6 to $6.50; old rubbers, 6½c. per lb. and country mixed rags, 50c. per 100 lb.

Gem Cutlery Co. have a large demand for their display cases containing the "Gem Safety Razor." The trade never had a better chance to secure a display case with absolutely no risk attached to the sale of the goods.

THE UTILITY OF WEALTH.

By BARNET MOTT, in Baltimore Herald.

THIS old idea of the richest man in the world, an individual who has always had an abiding charm for every other man, woman and child, came to mind the other day when I was reading Mr. Charles M. Schwab's statement of the values of the properties of The United States Steel Corporation. Our boyish idea of the wealth of the Chinese idol was always expressed in the words "millions." In Mr. Schwab's testimony before some board, the total value of the corporation's property was given as a little over $1,400,000,000. One fourteenth-hundred of this sum, or much less than 1 per cent. of the income—$1,000,000—is Mr. Schwab's annual salary. There may be such an accumulation of wealth in China. I have never been there and know nothing about the finances of either corporations or individuals. But I do not believe there is any such mass of concentrated wealth in any country of the Orient.

The sum of $1,100,000,000 represents an enormous amount of riches. When the "billion-dollar steel trust" was organized the public of all countries held up their hands in amazement at the stupendous capital. And now the company's president announces that in the short time since incorporation, the value of the property has increased 40 per cent. As was suggested at the time of the publication of Mr. Schwab's testimony, Croesus' fabled wealth was a small, street-corner tradesman's capital in comparison.

The majority of men will be honest with themselves and frankly admit that they would like to possess a tiny fraction of this sum, and would offer not the slightest hindrance if there were a possibility of the whole amount becoming theirs. He is an extraordinary and not altogether commendable man who is absolutely content with his present condition in life and who would not take advantage of an opportunity honestly to add to his comforts and his pleasures if the needed money were available. All except him who would be stationary have sighed throughout their lives—long and short—for just a few more things that they could not afford, wished that they had the money, and would gladly accept that in any honest form compatible with pride. The few who would refuse are few indeed, and somewhat unnatural.

These show a spirit when such great wealth in the hands of a few is mentioned not dissimilar to that of our boyhood dreams of China. They know nothing of the circumstances of the growth of the property, find it beyond the comprehension of inexperience and straightway conclude that there must be something evil in the acquirement of that enormous sum. The extremely rich man whom everybody is ready to believe earned his wealth honestly is so rare that I never heard of him. Jones says: "I could not gather such riches with years of toil with strict adherence to honesty, and I do not believe that any man could do so." One may doubt that a fairly intelligent man could hold so narrow, bigoted a view. As a matter of fact, it is the basis of at least a half of the common criticism of men of wealth. The number of men of good education and unquestionable intelligence who cling to that error would be surprising if it could be had. It is only ignorance's distrust of knowledge.

Everybody has been benefited by this increase in the world's wealth. The poor are not so wretched by any means as they were a couple of centuries ago, and the man of average wealth, the small tradesman and the skilled laboring man is far, far better off than he ever has been. We are just living on a scale that is comparatively huge, and we must sooner or later become used to the use of terms and figures that are the products of our mode of life.

The danger to our social constitution is not in the possession of vast wealth by any corporation or private person, or in the expenditure by the Government. We know that a corporation formed for honest business—the other kind collapses too quickly to be noticed—will be judicious in expending its wealth, and we may trust the Government to be so. Congress may be foolishly extravagant just a little once in a while, but in the long run will be generally wise in this action. What we really have grounds to fear is the expenditure of large wealth by the individual.

Mr. Schwab, for instance, who enjoys an income of a million dollars and probably more, cannot possibly use that sum for the ordinary wants of a man; that is to say, the necessities of one in the highest social station—the gentleman may not have been admitted to that standing yet, but, of course, may have all the external fittings of it—and undoubtedly spends a good deal in luxuries of one kind or another, on articles that anybody would class as luxuries for a single person. In the choice of those luxuries is the danger.

Some who think that life should be conducted by sentiment and not by reason and scientific law, hold that Mr. Schwab should give of his wealth to his employes in the form of higher wages. To do so would be to take a step back from the industrial economies that have made life so much easier, more comfortable and more beautiful than it was in Europe a century ago. The beginning made, who could tell where the retrogression would stop? The cost of production is ultimately the cost of labor. Then, if Mr. Schwab would be wise in such generosity to his employes, every employer in the land would logically have to follow his example and there would be a long leap toward the abolition of the economies that have been so beneficial. Again, who is to fix the limit of Mr. Schwab's gifts to the workmen? These will demand more and more as each effort is successful, for a man wishes to live as well as he can and to receive as large a remuneration as he can for his labor.

Much better is it for the great millionaires to do what they can to beautify their surroundings and their fellows', and add to the higher intellectual enjoyments of life. Mr. Carnegie has made this choice. Mr. Schwab would do so to a certain extent by erecting a mansion that would be truly a thing of beauty. While the others of us could not live in that house, we would improve ourselves to make the contrast less glaring. The surest way to better a poor man's lot is to surround him with such improved circumstances that he will be aroused to fit himself to enjoy them and be in some measure of harmony with them. The sentimentalists' policy of making the man dependent upon external help, paternalism, has invariably brought destruction with it.

The riches must, however, be spent in intellectual pursuits that will improve one's self, one's home and one's neighbors. Indulgence in physical enjoyment and elementary mental pleasures will be the source of national decay and extinction. Rome made this second choice and perished as a great power.

COOKING BY ELECTRICITY.

M. Moissau, of Paris, has invented an electric oven, in which electricity both turns the spit and roasts the joint, says Chambers' Journal. The fireplace has been turned into a small electric furnace, from which the heat radiates just the same as if it were a coal fire. Vessels have also been made for cooking purposes, with an outer and an inner skin, the interval between the two skins being filled with a white metal, which is heated by a current of electricity. In this way water can be boiled and food cooked. There are three degrees of heat, according to the will of the attendant. The vessels are provided with binding screws that connect them with the current in a moment.

The plant, stock, etc., of The Zanzibar Paint Co., Toronto, which recently assigned, has been sold to The Canada Paint Co., of Montreal and Toronto.

LIGHT WEIGHTS AND FALSE MEASURES.

By H. J. Holmes.

AN enormous number of London shopkeepers apparently yearn to accumulate wealth quickly by swindling their customers.

This statement receives ample substantiation from last year's report of the Public Control Department of the London County Council. From it we learn that the total number of unjust weight and measure appliances seized during the 12 months reached the imposing figures of 63,950 !

The amount of hard cash of which the public was robbed by such means can only be conjectured, but must have been a small fortune.

The L. C. C. employs a staff of officials whose duty it is to run to earth the perpetrators of this cruel system of fraud—cruel because its victims are mostly of the poorer class, who must feel acutely the loss of even the smallest sum.

As is well known, all weights, measures, and weighing instruments should, before being used in trade, bear the official stamp which records their honesty. Nearly 3,000,000 appliances of the sort were duly marked in the London district last year. But it is one thing that they are correct when they leave the L.C.C. official residence; quite another matter whether they will be allowed to remain so !

It requires the persistent efforts of 91 inspectors to limit the possibilities of the various appliances being tampered with, as the large number of seizures testify. And it must not be concluded that all the shop-keeping rogues are brought to book; some succeed in evading Nemesis for years. If eventually caught, their only punishment for the first two offences is being mulcted in a comparatively small fine—which, considering all things, they can well afford.

The dodges of the dishonest shopkeepers to evade detection are seemingly without limit. Swindling is a paying game, and those who practise such a lucrative profession can afford to devote much time to the study of the art of not being found out.

There is an instructive collection of swindling relics in the possession of Mr. Webb, the chief of the Newington Weights and Measures district office.

The collection of seized appliances includes a specimen of one of the most barefaced devices ever discovered, even in daring London. It is a machine once used for weighing tea. To the customers' side of the scales a string was attached, running down a hollow socket and through a hole in the counter, a weight being fastened to the end of the string. The weight could be supplemented by a pull of the shopman's fingers when considered necessary! A big point about this contrivance was that the string could be detached at a moment's notice on the advent of the L.C.C. inspector.

Mr. Webb's collection also includes several pairs of scales possessing very valuable idiosyncrasies—for the trader. Some have the happy knack of insuring that a purchaser only receives thirteen or fourteen ounces for every pound-weight paid for! The weights used may be genuine enough, but the scales are so constructed that when, say, a one-pound weight is placed in a certain position near the side of the pan, the scale containing the goods descends several ounces short.

A customer could thus be swindled of from one ounce to four ounces in every pound, according to the distance from the centre of the pan that the shopman's conscience allowed him to place his weight.

How regretful must have been the parting between a certain marine-storekeeper and the useful dial-scale which favored him either in buying or in selling. The registering hand was so fitted as to move backward or forward by a touch of the finger. In buying goods, the ingenious proprietor naturally kept the dial register low; in selling he merely, with a casual and unobserved touch of his forefingers upon the back of the dial, pushed the hand on a few points.

As for fraudulent weights, Mr. Webb's collection forms an admirable object lesson of the lengths to which a thoroughly enterprising shopkeeper will go.

There are scores of weights, for the most part bearing the official stamp of honesty, but each one in itself yielding ample proof that it has done its part in the art of swindling the public. From the quarter of a pound right up to the half hundredweight we are able to see how fraudulent even an officially stamped weight may become in the hands of unscrupulous traders.

Holes are drilled or cut in the metal, and filled with cork, wood, paper, or other light material. Sometimes a thin coating of lead hides the "faker's" work, but in other cases the cork or wood filling was undisguised when the weights were seized.

As for measures, there are many examples of how these are tampered with in order to defraud the public. False bottoms, dinged sides, drooping spouts, and worn-down tops are constantly used as the means of giving short measure. Costers are habitual offenders in this connection. The economical housewife who makes her purchases from itinerant hawkers does not always save money by the transaction.

The L.C.C. detective is often to be found hot on the trail of the dishonest coal-hawker, at whose hands the poor people who buy fuel in small quantities suffer much. It is a good thing to find this class of offence growing less. Not that the average coal-hawker is becoming more honest, but he has learnt to dread the sudden appearance of the little black van which bears a relentless inspector with his undeniable standard scales, empowered to test the weight of every bag of coal on the hawker's cart.

It is generally conceded that, so far as its powers go, the L.C.C. leaves no stone unturned in this branch of its multitudinous duties to save the public from the shopkeeping and hawking swindler; and that the Council's efforts in this direction are ably backed up by one of the most carefully organized bodies of men in the United Kingdom.—Royal Magazine.

TEST OF PAINT ON IRON BRIDGE.

IN September, 1897, the viaduct carrying 155th St. over the station tracks of the Manhattan Elevated Railroad in New York City, was painted with a number of paints of different composition and manufacture, with a view of determining their comparative protective qualities and durability when applied to metal subjected to the action of locomotive gases. The portion of the viaduct which was painted crosses three tracks and two station platforms, and consists of 17 lattice girders spaced nine to ten feet apart and having a clear height of about 13 feet above the rails. The lattice girders carry floor beams, to which were rivetted trough floor sections carrying the roadway. Previous to applying the paint the metal work was thoroughly cleaned by a sand-blast, and the priming coating was put on immediately after cleaning. After an extended examination of the paints and the results, H. B. Seaman, C.E., summarized his report as follows :

" The carbon and graphite paints have lasted altogether better than any of the other kinds that were applied on the viaduct, the carbon paints being rather better than the graphite. In my opinion, carbon paint is the best material to withstand the sulphurous fumes of locomotive gases. Red lead did not really have a fair test. It was used on several of the girders, but it was not applied by a manufacturer of red lead, but by the makers of other paints, who wished to use red lead in connection with their own. It might have given better results if it had been tried on its own merits. It forms a sort of cement which makes it effective for resisting moisture, as on ship bottoms, but it does not withstand the gases from coal so well. Asphalt and the compounds of rubber have lasted very poorly."

HEATING AND PLUMBING

PLUMBING AND HEATING NOTES.

NELSON, B. C., property-owners have approved by a vote of 271 to 89 of a loan by-law for $150,000, the money to be used in putting in a power plant and extending the city's electric light system.

M. F. O'Connell has been appointed plumbing inspectator of Ottawa.

The L. W. Webb Manufacturing Co., Montreal, expect to have their 1903 catalogue ready for the trade before the close of January.

Members of The Toronto Master Plumbers' Association say that W. G. D. Adams "has his hands full with the committee on prices entrusted to his care."

Two workmen, engaged in digging a sewer at Toronto Junction, Ont., were killed by a cave-in which was due to the sides of the sewer not being properly timbered.

E. J. Knowdell and R. C. Hodgson, plumbers, of Vancouver, have dissolved partnership. The business in future will be carried on by R. C. Hodgson and Wm. Stearman.

The Haggas Gas Engine Co., Toronto, have been incorporated, with H. W. Petrie, W. S. Haggas, T. A. Kilgour, M. M. and B. D. Petrie as provisional directors, and with a share capital of $40,000.

W. J. Wilson, of The John Ritchie Co., and H. Hogarth, of Fiddes & Hogarth, Toronto, are laid up by illness. W. H. Meredith, of R. H. Lear & Co., Toronto, has just got back to work after a confinement by a similar cause.

The Canadian Heating and Ventilating Co., Owen Sound, have been incorporated with a capital of $200,000, and the following as provisional directors: V. A. Harshaw, J. A. Ellis, W. S. Middlebro, J. H. McLauchlan and W. J. Christie.

A Building Trades Council will probably be formed at Winnipeg. A conference to consider the matter was held a few days ago, attended by plumbers, steamfitters, electrical workers, painters and other building trade representatives, who heartily endorsed the proposal.

CANADA METAL CO. GROWING.

Canada Metal Co., Toronto, have enlarged their working facilities so as to meet the increasing demand for their goods, the success being due to the satisfaction met in using their babbitt, solder, lead pipe, block tin pipe, battery zinc, etc. These people are also importers of pig lead, antimony, tin, zinc, etc.

TORONTO PLUMBERS MEET.

The regular monthly meeting of the Toronto Master Plumbers' Association was held on Monday evening in their new rooms, Employers' Hall, 18 Victoria street. The new headquarters are just what the Association officers have been wanting, being bright, attractive and cheery, and should help to draw out the members to the meeting.

The chair was occupied by the president, Robert Ross, and the following members were present: Messrs. McVicar, McKittrick, Mansell, Wallace, Cooper, Mason, Robertson, Harrison, Allison, Clapperton, Adams, Dean, Warwick and Secretary Le Grow.

The report of the committee dealing with charges was received and adopted, as follows: Steam-fitting plumbers and gasfitters, 65c. per hour, the day being from 8 a.m. till 5 p.m.; overtime and Saturday afternoons, time and a half; Sundays and holdays, double time.

The expenditures in connection with the Association having increased materially lately, it was decided to advance the dues to $1 per month.

PLUMBING AND HEATING CONTRACTS.

The London Engine Supply Co. have the contract for heating a large addition to the premises of the McCormick Manufacturing Co., London, Ont., and of the new premises of The London Advertiser.

BATHS FOR WORKMEN.

An innovation which other firms may find it to their interest to adopt has been made at the Newport Ironworks of Samuelson & Co., on Teesside. This is the provision of a suite of baths for the workmen, which are available to all and sundry at the nominal charge of ½d. per bath. The installation comprises slipper, shower and needle baths, supplied with hot and cold water, and there is also a plunge-bath with sloping bottom, giving a variation of 4ft. to 7ft. There can be no question that such aids to cleanliness and health are of the first importance, and if only the Newport men can be induced to take full advantage of the boon now offered them, the proprietors of the works will be amply repaid for their expenditure and enterprise in the increased energy and healthfulness of their employes. — Ironmonger.

BUILDING PERMITS ISSUED.

TORONTO.

To R. Barber & Son, for a $2,800 dwelling on Delaware avenue, near Bloor street.

To Dr. D. W. McPherson, for a $4,500 dwelling on Bathurst street, near College street.

To W. H. Wilson, for a dwelling at 114 Walmer Road, to cost $4,200; W. Hall & Son, builders.

To York County Council, for $3,000 alterations to 57 Adelaide street east; E. R. Babington, architect.

To Dr. Porter, for a $7,000 dwelling on Huron street, near Barnard avenue; Langley & Langley, architects.

BUILDING NOTES.

New cement works, 300 x 80 ft., are to be erected at Toronto Junction, Ont.

Delaney, Pettit & Co., Toronto, intend erecting a large addition to their premises.

It is believed that the C.P.R. is having plans prepared for a new station at Winnipeg.

D. F. Burke, of Port Arthur, Ont., has announced that he will spend $100,000 in the erection of new dwellings in Port Arthur.

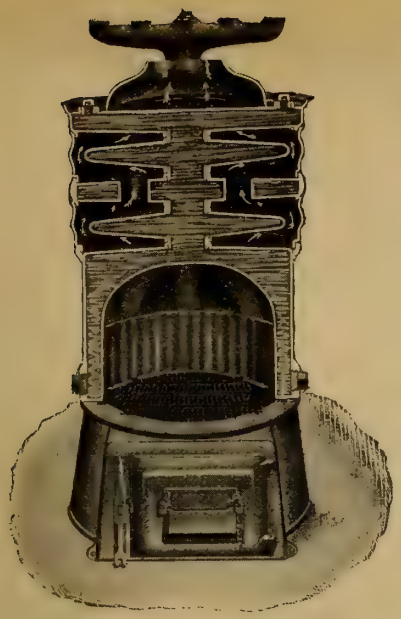
Mr. Resther, of Quebec, will rebuild a modern hotel on the site of the burned Victoria Hotel, work to be commenced in the spring.

The Goldie & McCulloch Co., Galt, Ont., have secured new premises, 23 acres in extent, and will erect new works on a large scale.

Building operations at Port Arthur, Ont., continue unusually brisk. The C.P.R. and the C.N.R. have not yet completed the important extensions they are making there and at Fort William.

MASTER PLUMBERS' GOOD WISHES

The master plumbers of Montreal wish to thank the manufacturers, through HARDWARE AND METAL, for the way they have filled every order during the past year, and also take this opportunity of wishing one and all a Happy and Prosperous New Year.



Successful Heating

Our efforts to warm Canadian buildings economically have been crowned with success. The introduction of our

"ECONOMY"

Hot Water Boiler and its ultimate perfecting have contributed largely to our fame as Heating Experts.

The **"ECONOMY"** Hot Water Boiler is made along sensible lines—constructed absolutely without bolts or packing—easy to put together—means satisfaction to the tenant, because it works steadily and burns little fuel.

Write for a new and attractive booklet on this system.

The Distribution of Selling and Commercial Expenses.

By . . .
Kenneth Falconer,
Montreal.

THE pro-rating of manufacturing expenses on the cost of product is a question which in these days of high shop organization is attracting universal attention amongst manufacturers. With the possible exception of the various methods of compensating labor, whether based on day or piece work, and including all forms of bonus or premium plans, no management problem is being more generally considered nor widely discussed. From the simple plan of providing for all expenses, including both selling and commercial, by a percentage on the cost of labor and material entering into the product, to the separation of the manufacturing expenses and providing for them by the scientific distribution on the cost of each article of only such items of expense as are directly related thereto, the manufacturer of to-day has unlimited opportunity to select that plan which is best suited to existing conditions and surrounding circumstances.

Where a line of distinction is drawn, separating manufacturing expenses, all others are usually classed together and little, or no attempt, is made to distinguish between the selling and the commercial, or administrative, expenses of the business. The manufactured cost of an article being composed of labor, material and manufacturing expenses, one of the following plans is usually adopted as regards what may be termed the selling cost: that is the cost of the article up to the time it is sold and becomes the property of the customer. In one case it is charged to Sales Account at its manufactured cost, and the difference between that value and the price at which it is billed to customer represents the gross profit; for this difference Profit and Loss Account receives credit, and being debited with such expenses of the business as are not included in the manufactured cost sufficient to cover all selling expenses, leaving the commercial or administrative expenses to be wiped out by Profit and Loss; or else to advance the cost at which goods are charged to Sales Account a sufficient percentage to cover all expenses not provided for in the manufactured cost; that is, the cost at which the article is charged and credited to stock. The objection to the two first plans is that they do not allow each individual sale to show the net profit or loss, as the case may be, and thus to stand on its own merits, while the weakness of the last plan is that, no distinction being drawn between the selling and other commercial expenses, it is impossible to hold the selling department responsible for the ultimate result, or to judge whether the efforts of the salesmen are producing from time to time more or less satisfactory results in the shape of profits on sales. Just as where all the expenses of a concern are included in the cost of manufacture it is impossible for an extravagant commercial, or incompetent selling, organization to neutralize the effects of the best of management, so where no distinction is made between selling and administrative expenses it is possible for an

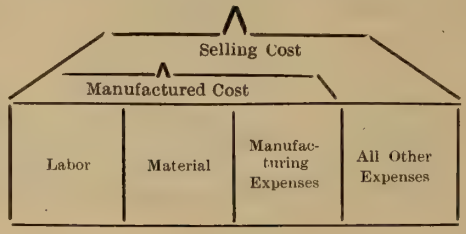

FIG I.

extravagant accounting, or commercial, organization to more than offset the efforts of the most efficient selling staff or the most economical administration of the stock room and shipping department.

The point I want to make may be seen more clearly by an examination of Figures I and II. If the selling cost, that is the cost up to the time the sale is made, is taken to include all expenses, as shown on Form I, then an extravagant administrative department or executive may more than offset the results attained by the selling staff, and the cause of a gradual lessening of the percentage of profit on sales remaining undiscovered; whereas, if the selling cost is taken to be as shown in Figure II, the cause of the trouble would be at once indicated. More especially will this be the case if the division between selling and other commercial expenses is so arranged that while the latter are equally borne by all sales the former are distributed in their correct proportion on the cost of goods sold in the various territories or districts of the Company's trade. To obtain this result and, at the same time, have each sale show on its face the net profit or loss is the object for which this plan was designed.

For purposes of illustration we will assume the case of a manufacturing company doing business in three defined districts, known as east, west and city. All manufacturing expenses being provided for by an advance on the price at which goods are charged to stock, a careful analysis of the remaining expenses shows an annual outlay of say $72,000, amounting to 12 per cent. on the cost of the probable sales as based on past records, this sum having to be provided for before any profit is made. Of this amount $42,000 is for such expenditures as may fairly be called selling expenses, such as travellers' salaries and expenses, commissions, advertising, etc., etc., the remaining $30,000 being made up of the general administrative expenses of the concern. The sales are estimated at $800,000, divided equally among the three districts named. The gross profits averaging 33⅓ per cent. on cost, this would mean a cost of goods sold of $600,000. The general administrative expenses bearing no direct relation to the amount of sales in each district, but only to the total of such sales, are to be provided for by a charge of 5 per cent. on the value of the goods sold, without regard to the location of customer.

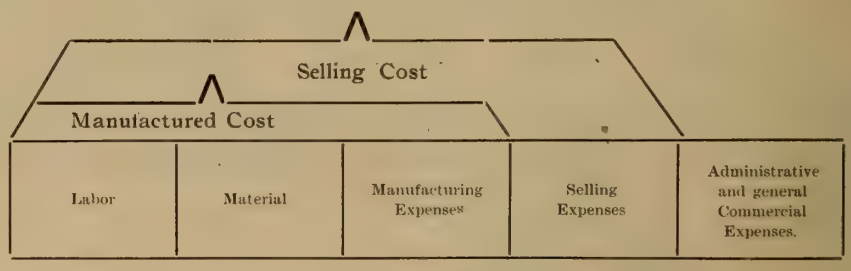

FIG II.

It is very desirable, however, that the charge against Sales Account, made to provide for the selling expenses, should be distributed on the sales in the various districts in exactly the same proportion the selling expenses of each district are expected to bear one to another. The various sums required will be seen by reference to Note A, and are based on past records of sales and expenses and present knowledge of salaries,

NOTE A. Data upon which provision for expenses for coming year is based :

	East.	West.	City.	Total.
Sales—				
Cost...	$200,000.00	$200,000.00	$200,000.00	$600,000.00
Sold	266,666.67	266,666.66	266,666.66	800,000.00
Expenses—				
Selling	$14,000.00	$22,000.00	$ 6,000.00	$42,000.00
Administrative	20,000.00	10,000.00	10,000.00	30,000.00
Total	$24,000.00	$32,000.00	$16,000.00	$72,000.00
Percentage of selling expenses on cost of sales	7 p.c.	11 p.c.	3 p.c.	
Percentage of commercial & administrative expenses	5 p.c.	5 p.c.	5 p.c.	
Total advance on cost of sales to cover all expenses except manufacturing	12 p.c.	16 p.c.	8 p.c.	

FORM 1—SHIPPING SLIP—EAST.

This space contains name of customer, date, terms and all particulars.

	Article.	Price.		Shop A.		Shop B.		Total.	
		Cost.	Sold.	Cost.	Sold.	Cost.	Sold.	Cost.	Sold.
	4	$1 50	$2 00	$6 00	$8 00				
		1 50	2 00			$6 00	$8 00	$12 00	$16 00
				Add	12 per	cent.		1 44	
								13 44	

The ultimate disposition of the above amounts is as follows :

Sales Account, Dr.	$13 44	
To Stock		$12 00
Sales Revenue	7 p.c.	84
Com. "	5 p.c.	60
	12 p.c.	
Customer, Dr.	16 00	
To Sales Account		16 00

commissions paid, and of current advertising contracts. For each district shipping slips (Form 1) of a different color are provided ; these are either made out by the shipper, or are the original shipping orders, as may be found best, and are the official advice to the office of shipment having been made, and notification to charge customer. When the charge has been made in the day book, the invoice number is noted in the space provided and the shipping slip returned to the cost department ; there the costs are filled in, value extended and the total percentage required to cover selling and commercial expenses (in this instance 12 per cent. for goods sold in the east, 16 per cent. in the west and 8 per cent. in the city), added to the cost. At the close of the month the various amounts thus added are listed under their correct headings and the totals ascertained. These totals are then divided in the proportions, as shown on Note A, and the amounts credited to Sales Revenue and Commercial Revenue, respectively, stock being credited at net cost. Sales Revenue Account thus gets credit for 7 per cent. on the cost of sales in the east, 11 per cent. in the west and 3 per cent. in the city, while 5 per cent. on all sales goes to the credit of Commercial Revenue to provide for the general expenses other than the selling. Sales Account having been debited with the net cost of goods sold, plus the percentage as shown in Note A, the difference in each instance between the amount so charged and the selling price will represent the net profit and show on each individual sale ; a most important point in the eyes of most managements.

All accounts properly coming under the head of selling expenses are each month closed out to Sales Revenue, and the other commercial expenses to Commercial Revenue. The manufacturing expenses having been charged out to the account provided for that purpose, it will thus be seen from month to month if the amounts provided for all the expenses of the business are too small, or are in excess of the requirements, and in either case whether it is the provision for the manufacturing, the selling or the administrative expenses that require readjusting. Should any of these expenses reach an abnormal figure, instant attention will thus be called to it.

In connection with the general ledger a sub-ledger is kept, showing the distribution

NOTE B. Sub-Ledger Account.

COMMERCIAL REVENUE ACCOUNT.

It is assumed that the percentage added to manufactured cost and credited to this account exactly provides for all administrative expenses.

of the selling expenses as well as the provision for same amongst the various districts, east, west and city.

Assuming annual sales, for two different years, at $600,000, with a gross profit of 33⅓ per cent., Note B. shows the total of the Sales Account and the Sales Revenue as taken from this sub-ledger, B1 being a summary of the result. Note C. contains exactly the same information as far as totals are concerned, and is based upon the plan of crediting profit and loss with the gross profit on sales, and charging the selling and commercial expenses to that account, the ultimate result in the shape of net profit shows an increase over 1902 and a decrease in the expenses of the business for that year—a most satisfactory showing, on the face of it, until the details are examined. These details, as shown on Note B., however, indicate a very serious condition of affairs in the west, where the selling expenses, though legitimately high, have reached an altogether unreasonable figure as compared with the previous year. In 1901 the sales in that district amounted to $200,000, the cost and expenses of selling to $21,850; in the following year the sales fell to $100,000, a decrease of 50 per cent., while the selling expenses only show a decrease of $2,850, or, roughly speaking, 13 per cent. The fact that this disproportion between the falling off of sales and the lessening of expenses did not cause a serious shrinkage in the profits is owing to the city trade having

NOTE B1.

Being a summary of the results for two years, as shown in Note B.

1901.	
Sales	$800,000.00
Selling cost as charged sales acct.	672,000.00
Profit on sales	$128,000.00
Add excess provided for selling expenses, being profit made by selling department	150.00
Net profit	$128,150.00

1902.	
Sales	$800,000.00
Selling cost as charged sales acct.	664,000.00
Profit on sales	$136,000.00
Less deficiency in amount provided for selling expenses, being a loss caused by the selling department	5,600.00
Net profit	$130,400.00

increased 50 per cent., with a very slight increase of the selling expenses for that district. The total sales expenses and profits for each year being practically the same the management might easily fail to see that their hold in one of the districts covered by their salesmen was fast being lost; but the expenses in that district being kept up to a high figure, possibly on account of injudicious advertising contracts. If the sales in the west had been equal in 1902 to what they were in 1901 the net result would have been a very substantial increase in the business done and profits realized. It must be understood that the figures used are purposely such as to show extremes. The results, however, are improbable in degree only, and not in their nature, and under these circumstances the trend of affairs would, of course, have been seen long before the results were so serious or the amounts

NOTE C.

Memo. of sales and profit without any distribution of selling expenses.

	1901	1902
Sales	$800,000.00	$800,000.00
Manufactured cost	600,000.00	600,000.00
Gross profit	$200,000.00	$200,000.00
Less all expenses not included in cost of manufacture	71,850.00	69,600.00
	$128,150.00	$130,400.00

involved so large. It is a truism to state that accurate knowledge of details is essential to the best success of the productive departments of industrial concerns. Equally full knowledge of details, if not so essential, may yet well be a strong factor towards the success of the selling department, and the admitted necessity of careful distribution of all manufacturing expenses is a strong plea for equal care in the distribution of the selling and commercial.

POOR FINANCING.

I READ an article not long ago, writes J. H. Bolton, the purport of which was that the reason a great number of merchants fail to make any money was not so much the lack of a volume of business as it was small profits.

There is a great deal of truth in this. So many merchants do not seem to realize what goods cost; they figure if they buy a yard of cloth for five cents and sell it at six cents they are making one cent. That they are not making anything, more likely losing, would be nearer the truth. There are so many articles that must be sold close that it is very necessary to put a profit on anything that will stand it. There is no sense in making leaders of everything.

So many merchants mark their goods according to the price they pay and not what they are really worth or will bring. I have frequently run across articles marked 20 per cent. above their real value, simply because the buyer gave too much for them at the time of purchase, or the market has dropped materially since that time; but the selling price is not changed.

On the other hand, I find next to the high-priced article, one which is marked at an equally ridiculous low figure, simply because it cost a certain price and a certain amount of profit was figured on that cost.

A man can't always hit everything right, but he'll pound his thumb a good deal if he doesn't try to find out, all the time, just how and where he is travelling. Men have made money when they went blindly into buying and selling goods, but we don't hear much about the fellows who flunk doing the same thing.

Making money by selling goods has to be done after just as intelligent methods as running a locomotive or an automobile successfully—chance may do it, but actual knowledge is the only sure way.

H. Boker & Co.'s registered brand of "**King Cutter**" Razors is their finest production in quality. Equal to same are :

"KOH-I-NOOR," SOLD BY CAVERHILL, LEARMONT & CO., MONTREAL.
"TRUE BLUE," SOLD BY RICE LEWIS & SON, TORONTO.

"KING CUTTERS" Sold by all leading wholesale houses.

CURRENT MARKET QUOTATIONS.

December 26, 1902.

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figures being for larger quantities and prompt pay. Large cash buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list, as the desire is to make it perfectly accurate.

BRADSTREET'S

Capital and Surplus, $1,500,000. **Offices Throughout the Civilized World.**

Executive Offices: Nos. 346 and 348 Broadway, New York City, U.S.A.

THE BRADSTREET COMPANY gathers information that reflects the financial condition and the controlling circumstances of every seeker of mercantile credit. Its business may be defined as of the merchants, by the merchants, for the merchants. In procuring, verifying and promulgating information, no effort is spared, and no reasonable expense considered too great, that the results may justify its claim as an authority on all matters affecting commercial affairs and mercantile credit. Its offices and connections have been steadily extended, and it furnishes information concerning mercantile persons throughout the civilized world.

Subscriptions are based on the service furnished, and are available only by reputable wholesale, jobbing and manufacturing concerns, and by responsible and worthy financial, fiduciary and business corporations. Specific terms may be obtained by addressing the Company at any of its offices. **Correspondence Invited.**
